"primary circuit" means an assembly of pipes and fittings in which water circulates between a boiler or other water heater and the primary heater inside a hot water storage vessel;

"primary heater" means a heater mounted inside a hot water storage vessel for the transfer of heat to the stored water from circulating hot water;

"pumping main" means any supply pipe conveying water under pumping pressure;

"secondary circuit" means an assembly of pipes and fittings in which water circulates in distributing pipes to and from a water storage vessel;

"secondary system" means that part of a hot water system comprising the cold feed pipe, any storage cistern, water heater and flow and return pipework from which hot water for use is conveyed to all draw-off points;

"service pipe" means so much of any pipe for supplying water from a main to any premises as is subject to water pressure from that main, or would be so subject but for the closing of some valves;

"servicing valve" means a valve for shutting off the flow of water in a pipe connected to a water fitting to facilitate the maintenance or servicing of that fitting;

"single feed indirect cylinder" means an indirect cylinder which has only one cold feed pipe connexion to supply both the primary and secondary waters, so designed that the formation of an air seal during filling prevents mixing and accommodates expansion of the primary water;

"spill-over level" means the level at which the water in a cistern or vessel will first spill-over through any outlet and any overflow pipe, if the inflow exceeds the outflow;

"stop valve" means a valve, other than a servicing valve, fitted in a pipeline for controlling or stopping at will, the flow of water;

"storage cistern" means any cistern, other than a flushing cistern, storing water for subsequent use;

"supply pipe" means so much of any service pipe, as is not a communication pipe;

"tank" means a non-cylindrical closed vessel capable of containing water under pressure greater than atmospheric pressure;

"temporary purpose" in relation to the use of any pipe means building, demolition or construction work during such period as the work is in progress or any other temporary purpose during a period not exceeding one month or such longer not exceeding three months as the Board may approve in any particular case;

"unvented primary circuit" means a primary circuit which is not provided with a vent pipe;

"vent pipe" means a pipe open to the atmosphere and used in connexion with a water system for the escape of air or steam;

"vented primary circuit" means a primary circuit which is provided with a vent pipe;

"warning pipe" means an overflow pipe so fixed that its outlet, whether inside or outside the building, is in an exposed and conspicuous position where the discharge of water therefrom maybe readily seen;

"washing trough" means a wash basin, sink measuring internally more than 1.2 meters over its longest or widest part, at which two or more persons can wash at the same time;

"water fittings" includes pipes (other than mains), taps, stop corks, valves, ferrules, meters, cisterns, baths, water closets, soil pans and other similar apparatus used in connexion with the supply and use of water;

"water meter" is a mechanical device fitted on a water supply service pipe to record how much water has been used in the premises for billing purposes;

"water-areas" means all areas currently being supplied with water by the Board or any other areas so declared by the Minister in accordance with section 4 of the Act; and

"water-line" in relation to a cistern means the top water level at which the cistern is designed to work; to a hot water system without a separate expansion cistern.

PART II

Installation of Water Fittings

Installation of water fittings

3. A person shall not—

(*a*) install a water fitting for purposes of conveying or receiving water supplied by the Board, or alter, disconnect, or use such a water fitting; or

(*b*) cause, or permit such a water fitting to be installed, altered, disconnected or used, in contravention of these By-laws.

Installation of water fittings causing waste, etc., of water supplied by Board prohibited

4.—(1) A person shall not—

(*a*) install or cause or permit to be connected or arrange a water fitting; or

(*b*) cause or permit to be connected or used, a water fitting which is damaged, worn out or otherwise faulty, such that it, causes, or is likely to cause, waste, undue consumption, misuse or contamination of water supplied by the Board.

(2) The Board may test any water fittings used or to be used in connexion with water supplied by the Board.

Water fittings to which these By-laws not applicable

5. Subject to any express provisions to the contrary, these By-laws shall not—

(*a*) require any person to remove, replace, alter, disconnect or cease to use any water fitting lawfully installed, or lawfully used, capable of being so used before the date on which these By-laws come into operation; or

(*b*) apply in respect of any water fitting installed or used in connexion with water supplied by the Board for non-domestic purposes where the water supplied—

(i) is metered and taken for a period not exceeding one month or, with the written consent of the Board, three months; and

(ii) cannot return through the meter to any pipe belonging to the Board.

PART III

Prevention of Contamination of Water from Contact with Unsuitable Materials or Substances

Laying and installation of water fittings in foul soil, etc., prohibited

6. A person shall not lay or install a supply pipe, distributing pipe or other water fittings in or on, or pass any such pipe or water fittings into or through any foul soil, refuse chute, ash pit, sewer, drain, cesspool, pit latrine or any manhole connected with any such sewer, drain or cesspool.

Laying and installation of water fitting in place or position where permeation or deterioration occurs prohibited

7. A person shall not lay or install a supply pipe, distributing pipe or water fitting, made of any material susceptible to—

(*a*) permeation by any gas which causes or can cause; or

(*b*) deterioration by contact with any substance which causes or likely to cause, contamination of the water in the supply pipe, distribution pipe or water fittings, in any place or position where such permeation or determination occurs or is reasonably likely to occur.

Use of material, which causes water contamination prohibited

8.—(1) A person shall not use any material or substance, which causes, or is likely to cause, contamination of water in the construction or installation of any pipe or water fitting which conveys or receives water supplied for domestic purposes.

(2) Paragraph (1) shall not apply in respect of—

(*a*) any hosepipe used in connexion with a washing machine or dishwasher, or for watering a garden, or washing a vehicle kept for private use, where the pipe or other fitting to which that hosepipe is, or may be, connected incorporates a valve or some other suitable device capable of preventing the backflow or back-siphonage of water through the hosepipe;

(*b*) a flushing cistern;

(*c*) a feed cistern connected to a primary circuit;

(*d*) a closed circuit; and

(*e*) a warning pipe.

Use of pipe fitting internally with coal tar, etc., prohibited

9. A person shall not, for purposes of conveying or receiving water supplied by the Board, use a pipe, pipe fitting or storage cistern which is internally lined or coated with coal tar or any substance which includes coal tar.

Use of lead pipe prohibited

10. A person shall not, for purposes of conveying or receiving water supplied by the Board, install a lead pipe or other water fitting, or a storage cistern made from, or internally lined with, lead.

Copper pipe not to be connected to lead pipe

11. A person shall not, for purposes of conveying or receiving water supplied by the Board—

(*a*) connect a copper pipe, or cause or permit the connexion of a copper pipe, to a lead pipe;

(*b*) incorporate a copper pipe, or cause or permit the incorporation of a copper pipe, with a lead pipe,

unless suitable means, from time to time approved by the Board, are employed to prevent, so far as is reasonable, corrosion through galvanic action.

PART IV

Prevention of Contamination of Water by Back-siphonage, Backflow or Cross Connexion

Interpretation for this Part

12. For the purposes of this Part—

"backflow prevention device" means either a type A or type B air gap, a check valve, a double check valve assembly, a combination of check valve and vacuum breaker, a pipe interrupter, or some other water fitting or arrangement of water fittings designed to prevent the backflow or back-siphonage of water;

"check valve" means a mechanical device which—

(*a*) by means of resilient elastic seal or seals permits water to flow in one direction only and is closed when there is no flow;

(*b*) is resistant to corrosion, immune from, or resistant to, dezincification and is capable of operating in a continuous water temperature not exceeding 65 degrees centigrade; and

(*c*) when shut, prevents the passage of water from the inlet to the outlet where the water pressure at the valve inlet does not exceed 10 millibar;

"critical water level" in relation to type B air gap means the steady water level in a cistern, vessel or other water fitting when there is a maximum inflow of water and all outlets, except any overflow, are closed;

"double check valve assembly" means a mechanical device comprising two check valves with a test cork between them;

"pipe interrupter" means a non-mechanical device without any moving, flexible or elastic parts—

(*a*) in the event of any vacuum in a pipe in which it is installed admits air into it to prevent the backflow of water;

(*b*) is resistant to water corrosion and is immune from, or resistant to dezincification; and

(*c*) has an unobstructed air inlet-aperture, or apertures which when a vacuum occurs on the inlet side, produces a corresponding vacuum on the side not exceeding 5 millibar below atmospheric pressure;

"type A air gap" means the air gap which occurs if there is an arrangement of water fitting whereby—

(*a*) water is discharged into a cistern, vessel or other water fitting which has at all times an unrestricted overflow to the atmosphere;

(*b*) the pipe discharging into the cistern, vessel or other water fitting is not obstructed;

(*c*) water is discharged downwards into the cistern, vessel or other water fitting at not more than 15 degrees from vertical; and

(*d*) the vertical distance from the spill-over of the cistern, vessel or other water fitting to the point above that spill-over level being the lowest point of any pipe or water fitting which discharges into the cistern, vessel or other water distance referred to in Column 2 in relation to the corresponding pipe referred to in Column 1 of the following table—

TABLE

1	2
Bore of pipe or outlet	*Vertical distance of point of outlet above spill-over level*
(*a*) not exceeding 14 mm	20 mm
(*b*) exceeding 14 mm but not exceeding 21 mm	25 mm
(*c*) exceeding 21 mm but not exceeding 41 mm	70 mm
(*d*) exceeding 41 mm	Twice the bore of the outlet

"type B air gap" means the air gap which occurs when water is discharged into a cistern, vessel or other water fitting which is open at all times to the atmosphere, and the vertical distance between the lowest point of discharge into the cistern, vessel or water fitting and its critical water level is either—

(*a*) sufficient to ensure that, if there is a vacuum in the discharge pipe or water fitting, no water in the cistern, vessel or water fitting would be siphoned back into the discharge pipe or fitting; or

(*b*) not less than the distance referred to in Column 2 of the preceding table in relation to the corresponding pipe referred to in, Column 1 of the Table;

"vacuum breaker" means a mechanical device with an air inlet which is closed when water flows past it at or above atmospheric pressure but which opens to admit air if there is a vacuum in the pipe and closes so as to be water-tight when the flow of water is resumed at normal pressure.

Water supply for domestic purposes to water supply pipes for non-domestic purposes prohibited

13.—(1) Subject to paragraph (2), a person shall not connect a supply pipe or distributing pipe, which conveys, or a cistern which receives water supplied for domestic purposes such that it can convey or receive water supplied for non-domestic purposes.

(2) Paragraph (1) shall not apply in respect of a cistern, or conveying water from the cistern to a point of use if water is discharged into the cistern through a type A air gap.

Pumps to be connected with prior written authority of the Board

14.—(1) A person shall not, for the purposes of conveying or receiving water supplied by the Board, connect a pump or other apparatus in or to a supply pipe for the purpose of increasing the pressure, in, or rate of flow from—

(*a*) a service pipe; or

(*b*) any water fitting connected or to a service pipe, except with the prior written consent of the Board.

(2) A person shall not connect a supply pipe or pump delivery pipe drawing water from a supply pipe such that it can convey water from—

(*a*) a distributing pipe;

(*b*) a storage or flushing cistern;

(*c*) a pump delivery pipe drawing water from a distributing pipe or cistern; or

(*d*) a pipe or vessel pressurized by compressed air or gas.

Closed circuit not to be connected to supply pipe

15.—(1) Subject to paragraph (2), a person shall not connect a closed circuit to a supply pipe.

(2) Paragraph (1) shall not apply in respect of a temporary connexion if the connexion is made through a double check valve assembly or some other no less effective device which is permanently connected to the closed circuit.

Cistern pipe not to be connected to a secondary system

16. A person shall not connect a pipe forming part of a cistern fed from a vented primary circuit to any pipe forming part of a secondary system.

How to fit draw-off taps

17.—(1) Subject to paragraph (3), every draw-off tap or other similar fixed fitting other than a shower hosepipe installed to discharge water into a bath, sink, wash basin or similar fixed appliance other than a bidet shall—

(*a*) be fitted so as to incorporate a double check valve assembly;

(*b*) be fitted as close as is practicable to the point of draw-off or use, some other no less effective device to prevent the backflow or back-siphonage of water; and

(*c*) comply with paragraph (2).

(2) For the purpose of paragraph (1) (*c*), the vertical distance from the spill-over level of the bath, sink or other appliance to the point above the spillover level which is the lowest point of any draw-off tap or other fixed fitting which discharges into the bath, sink or other appliance shall, in relation to a draw-off tap of the appropriate size, be as follows—

Size of tap or combination fitting	*Vertical distance of point of outlet above spill-over level*
(*a*) Not exceeding 15 mm	20 mm
(*b*) Exceeding 15 mm but not exceeding 20 mm	25 mm
(*c*) Exceeding 20 mm	70 mm

(3) Paragraph (1) shall not apply to any draw-off tap or other water fitting where—

(*a*) the draw-off tap, or similar fixed fitting draws water by gravity only from a cistern, cylinder or tank having a vent pipe open at all times to the atmosphere;

(*b*) the vertical distance between the point at which the pipe supplying water to the draw-off tap or similar fixed fitting connects to the cistern, cylinder or tank and the spill-over level of the bath, sink or other appliance to which it is fitted is not less than 25 millimeters; and

(*c*) the pipe supplying water to the draw-off tap or similar fixed fitting does not supply water to any other tap or fitting other than a draining tap at a lower level.

Certain draw-off taps, what to incorporate

18.—(1) Subject to paragraph (2), every draw-off tap or other water fitting which incorporates a shower hosepipe, whether or not operated by a manual or automatic diverter installed to discharge water into a bath, shower tray, sink, wash basin or similar fixed appliance other than a bidet shall—

(*a*) incorporate a double check valve assembly;

(*b*) incorporate a check valve and a vacuum breaker; or

(*c*) have fitted, as close as is practicable to the point of draw-off, some other no less effective device to prevent the back-siphonage or backflow of water.

(2) Paragraph (1) shall not apply in respect of any draw-off tap or other fitting where—

(*a*) the draw-off tap or other fitting is installed in accordance with by-law 17 (3);

(*b*) the showerhead of any shower hosepipe is constrained by a fixed or sliding attachment so that the showerhead can only discharge water at a point above the spill-over level of the bath, shower tray or other fixed appliance as the case may be; or

(*c*) the vertical distance between the showerhead of any unconstrained shower hosepipe and the spill-over level of the bath shower tray or other fixed appliance, as the case may be, is not less than the figure mentioned in the table in by-law 17 (2) in relation to a draw-off tap or other similar fixed fitting of the appropriate size.

Use of certain hosepipes prohibited

19.—(1) A person shall not connect a hosepipe, other than a hosepipe used in accordance with by-law 8 (2) or a shower hosepipe installed in accordance with by-law 18, to a draw-off tap or other similar fitting for use either inside or outside any premises.

(2) Paragraph (1) shall not apply where a hosepipe connected to a draw-off tap or other similar fitting—

(*a*) draws water by gravity only from a cistern by means of a pipe which does not supply water to a draw-off tap or similar fitting other than a draining tap at a lower level; or

(*b*) is on any domestic premises with the written consent of the Board and incorporates as close as is practicable to the point of draw-off or use either a double check valve assembly or some other no less effective backflow prevention device.

Bidet not to be connected to supply pipe

20. A person shall not connect a bidet, which is equipped with any type of submersible spray, or any draw-off fitting to which a hand held flexible spray is, or can be, attached, to a supply pipe.

Where bidet may be connected to supply pipe

21. Subject to by-law 20, a person shall not connect a bidet to a supply pipe, unless the bidet—

(*a*) is of the over-rim water fed type; and

(*b*) is installed so that the vertical distance between the outlet point of any draw-off or similar fitting and the spill-over level of the bidet is not less than the figure mentioned in the table in by-law 17 (2) in relation to a draw-off tap or other similar fitting of the appropriate size.

Hot water pipe and bidet, how connected

22.—(1) A person shall not connect a hot water pipe or water heater which supplies hot water or a distribution pipe which supplies cold water to a bidet in such a way that the hot water pipe, the water heater or the distribution pipe, as the case may be, also supplies water to a draw-off tap or other similar fitting except a draining tap.

(2) Paragraph (1) shall not apply where—

(*a*) a supply pipe is connected to supply water to a bidet installed in accordance with by-law 21;

(*b*) a distributing pipe is connected to supply cold water to a flushing cistern or to a urinal; or

(*c*) a hot water pipe is connected to supply water only to a bidet and the hot water pipe either—

(i) has a check valve and vent pipe arranged to prevent the backflow or back-siphonage of water from the bidet; or

(ii) is fitted with some other similar effective backflow prevention device.

Washing machine, dishwasher, etc., to incorporate type B air gap

23.—(1) A person shall not use or install a washing machine, dishwasher or tumble drier connected permanently or temporarily to the water service operated by the Board, unless the washing machine, dishwasher or tumble drier is incorporated with either a type B air gap or a pipe interrupter which, if removed, stops the washing machine, dishwasher or tumble drier, as the case may be, from functioning.

(2) Subject to paragraph (3), every machine of the kind mentioned in paragraph (1) which is connected permanently or temporarily to water service elsewhere than in a domestic dwelling shall in addition to complying with paragraph (1), draw water by gravity only from a storage cistern.

(3) Paragraph (2) shall not apply where any machine mentioned in that paragraph incorporates a type A air gap.

Inlet pipe to incorporate a check valve and vacuum breaker

24. An inlet pipe of every ion-exchange common salt regenerated type water softener used in connexion with a clothes washing machine or dishwasher shall be fitted with a check valve and vacuum breaker or some other no less effective backflow prevention device, except where the supply of water to such a softener passes first through the backflow prevention device incorporated with the washing machine or dishwasher in accordance with by-law 23 (1).

Certain supply pipes to incorporate a type A air gap, etc.

25.—(1) Every supply pipe conveying water to a cistern, whether or not fitted with a float-operated valve, shall—

(*a*) if the cistern receives or contains, or is likely to receive or contain any substance which is, or is likely to be, harmful to health, incorporate a type A air gap; or

(*b*) if the cistern supply water to a primary circuit in a domestic dwelling house or is a flushing cistern, incorporate either a type A air gap, a pipe interrupter or a double check valve assembly.

(2) Paragraph (1) (*b*) shall not apply where a supply pipe conveying water to a cistern—

(*a*) is installed in accordance with by-law 31; or

(*b*) is fitted with a float-operated valve of a reducing flow type which prevents back-siphonage through it in the event of a vacuum occurring in the feed pipe.

Water supply pipes to domestic purposes to incorporate a type A air gap or type B air gap, etc.

26.—(1) Every pipe for the supply of water for domestic purposes to a point of use or draw-off where backflow or back-siphonage is, or is likely to be, harmful to health by reason of a substance which—

(*a*) is continuously or frequently present in contaminated water, shall incorporate a type A air gap; or

(*b*) may be present in contaminated water, shall incorporate a type A air gap or type B air gap, a pipe interrupter, a combination of check valve and vacuum breaker, double check valve assembly, or some other similar effective backflow prevention device.

(2) Every pipe for the supply of water for domestic purposes to a point of use or draw-off where backflow or back-siphonage is not, or is not likely to be harmful to health, shall incorporate a check valve or some other similar effective backflow prevention device.

(3) Paragraphs (1) and (2) shall not apply where a pipe supplying water to a point of use or draw-off is supplied from a cistern which—

(*a*) supplies water by gravity only to the point of use or draw-off; and

(*b*) is installed so that the vertical distance between the spill-over level of any vessel containing used or contaminated liquid at any point of use or draw-off, and—

(i) the invert level of the warning pipe in the cistern is not less than 300 millimeters; and

(ii) the lowest point inside the cistern is not less than 15 millimeters; and

(*c*) is fed with water from a pipe fitted with one of the backflow prevention device referred to in paragraph (1) (*b*).

(4) Where contamination by any disturbance or splashing of contaminated liquid in any vessel at a point of use or draw-off is likely to occur in a cistern referred to in paragraph (3), the cistern shall be tightly covered.

Certain supply pipes to be fitted with check valves, vacuum breakers, etc.

27. Every—

(*a*) supply pipe or distribution pipe which conveys water to two or more separately occupied premises, whether or not they are separately chargeable by the Board for the supply of water; or

(*b*) supply pipe which conveys to premises which under any written law are required to provide a storage cistern capable of holding sufficient water for not less than 24 hours, ordinary use,

shall be fitted with such a combination or combination of check valves, vacuum breakers, double check valve assemblies or some other no less effective backflow prevention device as shall effectively prevent the backflow or back-siphonage of water from one premises to another or from any floor or level or a building to a lower floor or level.

Water supply pipes for non-domestic purposes to be clearly and indelibly marked

28. In any premises, other than a dwelling house, every—

(*a*) supply pipe; or

(*b*) pipe for supplying water solely for fire-fighting purposes,

shall be clearly and indelibly marked so that such pipes are readily distinguished from each other and every other pipe in those premises.

Water fittings other than fire-fighting purposes prohibited

29. A person shall not connect to any pipe used for the supply of water for fire-fighting, a water fitting different from a water fitting installed solely for fire-fighting purposes.

Installation of backflow prevention device

30. A backflow prevention device shall, so far as is reasonably practicable, be installed in such a manner that it is accessible for examination, repair or replacement.

PART V

Prevention of Waste or Contamination of Stored Water

Installation of storage cistern

31.—(1) Subject to paragraph (2), a storage cistern for water supplied for domestic purposes, shall be installed in a place or position which shall prevent the entry into the storage cistern of surface or ground water, foul water, or water which is otherwise unfit for human consumption.

(2) A person shall not install a storage cistern, unless the storage cistern—

(*a*) is insulated against extremes of temperature; and

(*b*) if made of a material which may or is likely to contaminate stored water, is lined to coat with an impermeable material designed to prevent such contamination;

(*c*) has a rigid, close fitting and securely fixed cover which—

(i) is not air-tight;

(ii) excludes light, insects, rodents, birds etc., from the storage cistern;

(iii) is made of a material which does not shatter or fragment when broken and which shall not contaminate any water which condenses on its underside; or

(iv) in the case of a storage cistern with a water capacity of more than 1,000 liters, is so constructed that the storage cistern may be inspected and cleaned without having to be wholly uncovered, and is made to fit closely around any vent or expansion pipe installed to convey water into the storage cistern; and

(*d*) is provided with warning and overflow pipes, as appropriate, which are so constructed and arranged as to exclude insects, rodents, birds, etc.

Storage cistern to be so installed as to allow inspection and cleaning and to avoid damage

32. Every storage cistern shall be installed in such a way that—

(*a*) the storage cistern may be inspected and cleaned inside; and

(*b*) any float-operated valve or other device used for controlling the inflow of water into the storage cistern may be readily installed, repaired, renewed or adjusted; and

(*c*) damage or distortion to the storage cistern or to any water fitting connected directly to the storage cistern is avoided.

Float-operated valve to be fitted to pipe supplying water to storage cistern

33.—(1) Every pipe supplying water to a storage cistern shall be fitted with a float-operated valve or some other no less effective device for controlling the inflow of water by preventing any overflow.

(2) Paragraph (1) shall not apply in respect of a pipe connecting two or more storage cisterns each of which has the same overflowing level.

Installation of float-operated valve and feed pipe

34.—(1) Every float-operated valve or other device which controls the inflow of water to a storage cistern shall be—

(*a*) securely and rigidly fixed to the storage cistern; and

(*b*) installed so that the inflow of water is shut off when the level of the water in the storage cistern—

(i) is not less than 25 millimeters below the overflowing level of the storage cistern; or

(ii) where the storage cistern is fitted with a device referred to in by-law 38 (2), is not less than 50 millimeters below the overflowing level of the storage cistern.

(2) Every feed pipe supplying water to a float-operated valve or other device referred to in paragraph (1) shall be connected, braced and supported in such a way that the feed pipe is prevented from moving or buckling in relation to the thrust of the float-operated valve or other device as the case may be.

Vent pipe, warning pipe or overflow pipe not to be connected as means for conveying water

35.—(1) No person shall install a vent pipe connected to a cistern-fed primary circuit as a means for conveying water into a cistern which supplies water to a secondary system.

(2) No person shall install a warning pipe or overflow pipe from any cistern connected to a vented primary circuit as a means for conveying water to any cistern from which water may be drawn for domestic purposes.

Pressure in primary heater not to exceed pressure of stored water

36.—(1) In every double feed indirect cylinder from which stored hot water is, or may be drawn for domestic purposes, the pressure in the primary heater within the double feed indirect cylinder shall not exceed the pressure of the stored hot water under normal operating conditions.

(2) Paragraph (1) shall not apply where the primary heater inside the double feed indirect cylinder is made without joints or, if made with joints, such joints are capable of withstanding any water pressure to which the joints are, or may be, subjected under normal operating conditions.

Single feed indirect cylinder not to be connected to supply pipe and to have vent

37.—(1) A person shall not connect a single feed indirect cylinder directly to any supply pipe.

(2) A single feed indirect cylinder shall have a permanent vent into the atmosphere and shall be constructed and installed such that a mixture of water in the primary circuit when operating at a sustained temperature not exceeding 80 degrees centigrade is prevented.

Overflow pipe, warning pipe to be fitted to storage cistern

38.—(1) A storage cistern having a capacity exceeding 1,000 liters shall, subject to paragraph (2), be fitted with an overflow pipe and a warning pipe.

(2) A storage cistern which has a capacity not exceeding 1,000 liters shall be fitted with a warning pipe only.

(3) Paragraph (1) shall not apply—

(*a*) in the case of a storage cistern with a capacity exceeding 500 liters but not exceeding 10,000 liters, when the water level is not less than 25 millimeters below the overflowing level of the lowest overflow pipe; or

(*b*) in the case of a storage cistern with a capacity exceeding 10,000 liters, the storage cistern is fitted with an audible or visual alarm operating independently of the valve or device which controls the inflow of water and indicates when the water in the storage cistern is about to overflow.

(4) In this by-law, "capacity" means the volume of water which the storage cistern is capable of holding measured to its overflow level.

Installation of warning pipe

39. A warning pipe shall be installed in such a way that water is discharged through the warning pipe immediately the water in the storage cistern has reached overflowing level.

Connexion of flexible hose prohibited

40. A person shall not connect a flexible hose to a warning pipe or an overflow pipe.

Connexion of warning pipe to another warning pipe or overflow pipe prohibited

41.—(1) A person shall not connect a warning pipe to another warning pipe or overflow pipe, except in the case of two or more flushing cisterns each of which has the same overflow level.

(2) Where two or more flushing cisterns have a common warning pipe, the warning pipe shall be installed so that the source of any overflow may be readily identified.

Condition of float-operated valve

42. A float-operated valve installed in any cistern or other apparatus shall—

(*a*) be capable of controlling the flow of water into the cistern or apparatus;

(*b*) be water-tight, when it is closed;

(*c*) incorporate either a renewable seat and washer each of which is resistant to corrosion and erosion by water or some other no less effective valve assembly; and

(*d*) on installation, be capable of withstanding, an internal hydraulic pressure 1.5 times the pressure to which it shall ordinarily be subject; and

(*e*) have a float which—

(i) is made of a material capable of withstanding any water temperature in which it is operating or is likely to operate; and

(ii) has a lifting effort such that when not more than one half of the float is immersed in water, the float-operated valve is capable of drop-tight closure against the highest pressure to which the float-operated valve is likely to be subjected; and

(*f*) have a lever which—

(i) when the float-operated valve is closed, shall withstand without bending or distorting a force twice that to which it is ordinarily subjected; and

(ii) in the case of a 15 millimeters float-operated valve, is constructed so that water shut off level may be altered or adjusted without bending the float lever.

Installation of float-operated valve

43. A person shall not install a float-operated valve for the purpose of conveying hot water to any cistern unless—

(*a*) the float-operated valve is made of materials capable of withstanding without leaking any ordinary operating water temperature to which it is or may be subjected;

(*b*) so far as is reasonably practicable, operation of the float-operated valve is not, and is not likely to be prevented or impaired by scale deposited thereon; and

(*c*) having regard to any scale which is, or is likely to be deposited on the valve or float valve, the float-operated valve is adjusted to prevent any overflow.

Valve or device to be capable of controlling flow of water into storage cistern

44. A valve or device installed for controlling the inflow of water into any storage cistern other than a float-operated valve shall be capable of controlling the flow of water into that cistern.

Installation of storage cistern in a place, which may contaminate water prohibited

45. A person shall not install a storage cistern for water supplied for non-domestic purposes, or a cylinder or water fitting used in connexion with the storage cistern, in a place or position which may result in the water stored in the cistern becoming unfit for the purpose for which the water is intended.

Float-operated valve to be fitted to pipe supplying water for animal use

46.—(1) Every pipe which conveys water supplied by the Board to a drinking trough or bowl for animals shall be fitted with a float-operated valve or some other no less effective device to control the inflow of water into the drinking trough or bowl and prevent the water from flowing over the drinking trough and bowl.

(2) Subject to paragraph (1), the provisions of this Part shall apply to the drinking trough or bowl as if it was a storage cistern to which by-laws 32 to 34 apply.

Ponds, fountains or pools to be constructed with impervious lining or membrane

47. Every pond, fountain or pool supplied with water by the Board and has capacity exceeding 10,000 liters of water shall be constructed with such an impervious lining or membrane as would prevent water from leaking or seeping from the pond, fountain or pool.

PART VI

Prevention of Waste of Water from Damage to Water Fittings from Causes other than Corrosion

Installation of pipes and other water fittings below ground level

48.—(1) Subject to paragraphs (2) and (3), the vertical distance between the top of every pipe or other water fitting laid or installed below the ground and the finished ground level shall not be less than 375 millimeters and not more than 850 millimeters.

(2) Where it is impracticable to comply with the provisions of the minimum depth, the pipe or other water fitting shall be laid or installed as deep as is reasonably practicable below the finished ground level and shall be effectively protected against damage from any cause whatsoever.

(3) This by-law shall not apply where the pipe or other water fitting is laid or installed in the ground under any building or structure of a permanent nature or is used only for a temporary purpose and period not exceeding three months.

Pipes or water fittings to be protected from damage

49.—(1) A person shall not install any pipe or water fitting inside or outside a building or structure, unless the pipe or other water fitting is, so far as is reasonably practicable, effectively protected, by the manner of its installation or insulation or by some other no less effective means, against damage from any cause.

(2) Paragraph (1) shall not apply where a pipe or other water fitting is installed below ground level in accordance with by-law 48 (1) or in respect of a warning or overflow pipe.

Erection of buildings, toilets and sewage reticulation pipes

50.—(1) A person shall not erect a structure on top of a pipe main or above any Board's reticulation pipes or within 5 meters for all pumping mains and 2 meters for all distribution pipes and 1 meter for all service pipes.

(2) A person shall not construct a pit latrine or any sewage disposal facility or structure on top, or within 10 meters, of a water supply pipe.

(3) Notwithstanding any other penalty that the Board may impose on a person for breach of these By-laws or any other written law, where a

person has breached this by-law, the Board may demolish the structure in question in order to access the pipes without paying compensation to the owner.

Plastic pipes to be protected from damage

51. A person shall not install a plastic pipe, which is likely to be damaged when exposed to petroleum products, unless the pipe is covered or otherwise protected from such damage.

PART VII

Prevention of Waste from, or Contamination by, Unsuitable or Improperly Installed Water Fittings

Installation of water fitting likely to contaminate water prohibited

52. A person shall not install a water fitting intended to convey or receive water supplied by the Board, if such water fitting is made wholly or partially of, or incorporates, or lined or coated with, any material or substance which contaminates, or is likely to contaminate, the water by altering the color, odor, taste or composition of the water.

Only water fitting capable of withstanding pressure, etc., to be installed

53.—(1) A person shall only install a water fitting, if the water fitting is made of such materials as are, insofar as is reasonably practicable, capable of withstanding external load or physical pressure, vibration, stress or settle, internal water pressure, internal and external temperatures and corrosion.

(2) A person shall not install a water fitting—

(*a*) under the ground;

(*b*) through or under any wall, footing or foundation;

(*c*) into any wall or solid floor;

(*d*) into any chase or duct; or

(*e*) in an inaccessible position or a position to which access is difficult, unless the water fitting is—

(i) constructed to withstand without bursting, buckling, fracture or leaking and internal hydraulic pressure twice that to which it would normally be subject;

(ii) installed to accommodate any reasonably foreseeable movement, including any thermal movement in the pipe; and

(iii) except in a closed circuit, resistant to dezincification.

Pipe to be free from airlock or reverberation

54. Every pipe shall be adequately supported and secured so as to avoid damage from airlock or reverberation.

Pipe for supply of water for domestic purposes to be cleaned before installation

55. Every pipe installed for purposes of supplying water for domestic purposes shall be flushed to remove debris and sterilized to kill off harmful micro organisms before it is first used after installation, renewal or repair.

Supply for cold water to be exposed to minimum heat

56. A supply pipe installed in a dwelling house for purposes of supplying cold water for domestic purposes to any tap shall be installed in such a place or position that, insofar as is reasonably practicable, the water will not be warm when it is drawn off from that tap.

Connexion of metal pipe to water fitting by means of adhesive prohibited in certain circumstances

57. A person shall not connect a metal pipe to any water fitting by means of an adhesive if the metal pipe is to be—

(*a*) installed below ground level or through or under any wall, or foundation;

(*b*) embedded into any wall or solid floor or enclosed in any chase or duct; or

(*c*) installed in any other place or position to which access is difficult.

Installation of pipe into wall or floor prohibited

58.—(1) A person shall not embed a pipe or other water fitting into any wall or solid floor or in or below a solid floor or under a suspended floor at ground level.

(2) Paragraph (1) shall not apply where—

(*a*) the pipe or other water fitting is installed in a chase or duct (not being the cavity in a cavity wall) in a wall or solid floor which may, if necessary, be readily exposed;

(*b*) the pipe, excluding a pipe joint, is installed in a pipe sleeve or duct in or under a solid floor which may, if necessary, be readily removed and replaced;

(*c*) a pipe is installed in an internal wall other than a solid wall; or

(*d*) a pipe is installed under a suspended floor at ground level, which may, if necessary be readily removed and replaced.

Isolation of pipes and water fittings

59.—(1) Where any water fitting is removed from a system, every pipe or an appropriate part of the pipe, which conveys water to the water fitting, shall be fully isolated.

(2) A person shall not connect a metal pipe, pipe joint or other water fitting, whether by way of repair or replacement, to another pipe, pipe joint or other water fitting made of a different metal, unless, either—

(*a*) deterioration through galvanic action is unlikely to occur; or

(*b*) effective measures are taken to prevent such deterioration.

PART VIII

Stop Valves

Interpretation for this Part

60. In this Part, unless the context otherwise requires, "premises" means—

(*a*) any property to which a separately chargeable water supply is provided by the Board; and

(*b*) any properties, which are occupied as dwelling premises whether or not separately charged for water supply by the Board.

Stop valve to be fitted to supply and distributing pipes, etc.

61.—(1) A stop valve shall be fitted to every supply pipe and distributing pipe conveying water to any premises supplied with water by the Board such that the supply of water to the premises may be shut off without shutting off water supply to any other premises.

(2) A stop valve shall, insofar as is reasonably practicable—

(*a*) be inside the premises;

(*b*) be above floor level;

(*c*) be as near as possible to the point where the water supply first enters the premises; and

(*d*) be so installed that its closure prevents the supply of water to any point of use on the premises.

Stop valve fitted to pipe supplying water to premises be readily accessible

62.—(1) A supply pipe or distributing pipe conveying water in common to two or more premises shall be fitted with a stop valve at a place, whether inside or outside any one of the premises, readily accessible to each occupier of the premises.

(2) A stop valve shall be so installed that its closure prevents the supply of water to all of the premises supplied by the supply pipe or distributing pipe.

Stop valve to be water-tight, etc.

63. A stop valve fitted in accordance with these By-laws shall—

(*a*) be water-tight when closed;

(*b*) be water-tight when open and subjected to an internal hydraulic pressure 1.5 times the pressure to which it is normally subject;

(*c*) except in the case of a plug valve, be so designed or adapted that its seal can be readily renewed;

(*d*) not incorporate a loose washer plate; and

(*e*) be resistant to corrosion.

Supply pipe to be drained when stop valve is closed and draining tap opened

64. A supply pipe in any premises shall be installed so that when a stop valve fitted in accordance with by-law 61 is closed and any draining tap is open the supply pipe may be drained.

Supply pipe to be fitted with a draining tap

65. A person shall not install a supply pipe in any premises, unless the supply pipe is fitted with a draining tap which—

(*a*) is water-tight when closed and is subjected to an internal hydraulic pressure 1.5 times the pressure to which it is normally subjected;

(*b*) is so designed or adapted that its seal can be readily renewed; and

(*c*) is resistant to corrosion.

Draining tap not to be buried or submerged in water

66. A draining tap fitted to a supply pipe shall not be buried in or covered with soil or be submerged in water, or installed in a position in which it is likely to be submerged in water.

Servicing valve to be fitted to pipe conveying water from storage cistern

67. A pipe for conveying water from—

(*a*) a cold water storage cistern the capacity of which exceeds 18 liters; or

(*b*) a hot water storage cistern, cylinder or tank,

shall be fitted with a servicing valve as close to that cistern, cylinder or tank as is reasonably practicable.

Servicing valve to be installed with float-operated valve

68.—(1) A pipe supplying water to a float-operated valve shall be installed with a servicing valve to shut off the supply of water to the float-operated valve.

(2) A servicing valve installed in accordance with paragraph (1) shall be installed as near as is reasonably practicable to the float-operated valve.

69. A person shall not install a servicing valve as the sole means of controlling or preventing the flow of water through any pipe, unless the valve is installed as if it was a stop valve under by-law 63.

Servicing valve to have characteristics of stop valve

70.—(1) A person shall not install a servicing valve, unless the valve—

Installation of servicing valve

(*a*) is designed or adapted to operate only by the insertion of a screwdriver or other instrument in a slot on the servicing valve;

(*b*) is water-tight when closed and is capable of withstanding, without leaking, an internal hydraulic pressure 1.5 times the pressure to which it is ordinarily subjected.

(2) By-law (1) shall not apply where the servicing valve—

(*a*) is installed as if it was a stop valve under by-law 64; or

(*b*) is installed on a distributing pipe with a static water pressure not exceeding 1 bar.

71. A vacuum breaker, check valve, double check valve assembly or combination of check valves and vacuum breakers installed in any pipe shall be water-tight when closed and capable of withstanding, without leaking, an internal hydraulic pressure 1.5 times the pressure to which it is normally subjected.

Vacuum breaker, check valve to be water-tight, etc.

72. A stop valve or servicing valve installed in accordance with this Part shall be so placed that, so far as is reasonably practicable, the stop valve or servicing valve can be readily examined, maintained and operated.

Stop valve and serving valve to be readily accessible

PART IX

Water Closets and Urinals

73. A water closet pan shall—

Water closet to be supplied with water from valveless cistern or trough

(*a*) be supplied with water from flushing cistern or of the valve-less type which incorporates a siphonic apparatus; and

(*b*) be so made and installed that after normal use the water closet is emptied by a single flush.

74. A person shall not install a flushing cistern which, when flushed at any one time, discharges into water closet pan water supplied by the Board exceeding 7.5 liters.

Installation of flushing cistern exceeding certain amount of water prohibited

Cistern not to give flushes of different volumes

75. A person shall not install or adapt a cistern which, when flushed, discharges water into a water closet pan of different volumes.

Installation of flushing cistern or trough exceeding certain amount of water prohibited

76. A person shall not install a flushing cistern or trough which, when flushed at any one time, discharges into two or more water closet pans water supplied by the Board exceeding 7.5 liters.

Flushing cistern or trough to be fitted with warning pipe and indelibly marked with water level line

77. A flushing cistern or flushing trough installed in any premises supplying water to a water closet pan shall be fitted with a warning pipe and shall be indelibly marked on the inside with a line indicating the water level at which a float-operated valve installed to control the flow of water into the flushing cistern or flushing trough is to shut off such that, when flushed, the flushing cistern or trough does not discharge into a water closet pan water exceeding the amount referred to in by-law 74 and 76.

Urinal to be supplied with water from flushing cistern or trough

78.—(1) A urinal which is cleared by water after use, shall be supplied with water from a flushing cistern or trough which incorporates a siphonic apparatus designed or adapted to supply no more water than is necessary.

(2) A person shall not install a flushing cistern or flushing trough referred to in paragraph (1) for use in connexion with two or more urinal bowls or stalls or two or more urinal slabs each exceeding 700 millimeters in width, unless the flushing cistern or flushing trough is designed or adapted to fill at a rate exceeding 7.5 liters per hour for any one of the urinal bowls or stalls or urinal slabs.

Pipe supplying water to flushing cistern or flushing trough to be fitted with valve

79.—(1) A pipe, which supplies water to a flushing cistern or a flushing trough used for flushing a urinal bowl or stall, shall be fitted with—

(*a*) a flow shut off valve controlled by a time switch and lockable shut off valve; or

(*b*) some other equally effective automatic device or method for regulating the periods during which the cistern or trough may fill.

(2) By-law (1) shall not apply where a flushing cistern or flushing trough is manually operated or fills and flushes by the operation of some other fitting or a signal transmitted from a photo-electric cell or pressure

pad or some other device designed to ensure that the cistern flushes only after the urinal is used.

Flush and warning pipes only to supply water to water closet, etc.

80. A person shall not install a pipe to supply water to a water closet pan or to a urinal bowl or stall or slab, except a flush pipe or a warning pipe installed to discharge water into air not less than 150 millimeters above the edge of a water closet pan.

PART X

Prevention of Waste, Misuse and Contamination of Water from Draw-Off Taps, Baths, Basins, Sinks and other Fittings

Water inlet and outlet of bath, basin, sink, etc.

81.—(1) A bath, wash basin, sink or similar fitting installed for use in any premises shall—

(*a*) be so constructed or arranged that every inlet for water into the bath, wash basin, sink or similar fitting is hydraulically separated from, and unconnected with, any water outlet thereof; and

(*b*) be provided with a water-tight and readily accessible plug or some other device capable of closing any outlet for water from the bath, wash basin, sink or similar fitting.

(2) Paragraph (1) (*b*) shall not apply in respect of any—

(*a*) shower bath or shower tray;

(*b*) apparatus to which water is delivered at a rate not exceeding 3.6 liters a minute, or in the case of a washing trough, 3.6 liters a minute to any unit of it, solely from a fitting designed or adapted for that purpose; or

(*c*) apparatus installed in any hospital or used in any medical, dental or veterinary practice, which is designed or adapted for use with an unplugged outlet.

Washing trough to be fitted with draw-off taps

82. Every washing trough consisting of two or more units shall be fitted with separate draw-off taps or similar fittings for each such unit.

Draw-off tap to withstand severe temperatures, pressure, etc.

83. Without prejudice to by-law 53, every draw-off tap to which water is supplied by the Board shall—

(*a*) be capable of operating effectively at—

(i) any water temperature not exceeding 65 degrees centigrade; and

(ii) any internal water pressure to which it is likely to be subjected;

(*b*) be made and designed so that it may be easily closed to shut off the flow of water;

(*c*) if it incorporates a renewable seal or washer, be made or adapted so that the seal or washer can be readily renewed or replaced;

(*d*) be resistant to corrosion; and

(*e*) be designed when new to withstand, without leaking, an internal water pressure, which is 1.5 times more than that to which it shall ordinarily be subjected.

Types of washing machines, to be connected to supply or distributing pipe

84. A person shall not connect a washing machine, tumble drier or dishwasher to any supply pipe or distributing pipe conveying water supplied by the Board, except—

(*a*) a washing machine, and which in any complete washing cycle uses not more than 3.6 liters of water for every liter of machine drum or tub volume;

(*b*) a washing machine incorporating a tumble drier, and which in any complete washing and drying cycle uses not more than 6.4 liters of water for every liter of machine kilogram of dry load;

(*c*) a tumble drier incorporating a water spray which uses not more than 20 liters of water for every drum volume; or

(*d*) a dishwasher, which in any complete washing cycle uses not more than 7 liters of water for every place setting.

PART XI

Prevention of Waste or Contamination of Water from any Hot Water System

Vent pipe not to discharge water from secondary system to primary circuit

85. A vent pipe from any secondary system shall not be connected to or arranged to discharge water into any combined feed and expansion cistern connected to a primary circuit.

Circumstances in which apparatus or cylinder may be installed

86. A person shall not install any apparatus or cylinder, unless the apparatus or cylinder which—

(*a*) is capable of accommodating any expansion water;

(*b*) is connected to a separate expansion cistern or vessel; or

(*c*) is so arranged that expansion water can pass back through a feed pipe to any storage cistern to which the apparatus or cylinder is connected.

Unvented water heater

87. A person shall not install an unvented water heater which is not an instantaneous water heater unless the unvented water heater—

(*a*) is capable of accommodating any expansion water;

(*b*) is connected to a separate expansion cistern or vessel; or

(*c*) is installed so that any expansion water can be accommodated in the pipe work of any secondary system, and so that no hot water can enter any communication pipe or supply pipe to which a cold water draw-off tap is connected.

Installation of expansion cistern

88. Every expansion cistern or vessel and every cold water combined feed and expansion cistern connected to a primary circuit shall be—

(*a*) capable of accommodating any expansion water from the primary circuit to which the expansion cistern or vessel or the cold water combined feed and expansion cistern is connected; and

(*b*) installed so that in ordinary operation, the water level is not less than 25 millimeters below the overflow level of the warning pipe connected to the expansion cistern or vessel and the cold water combined feed and expansion cistern.

Boiler to withstand pressure and temperature

89. A boiler shall be constructed with materials the nature, strength and thickness of which is capable of withstanding internal water pressure and operating temperature to which the boiler is, or is likely to be subjected.

Pressure relief valve, etc., to function in a certain way

90. Every pressure relief valve, expansion valve, temperature relief valve or combined temperature and pressure relief valve connected to any boiler or hot water cylinder or storage tank shall—

(*a*) be capable of closing automatically after discharging water;

(*b*) be water-tight when closed;

(*c*) be resistant to corrosion;

(*d*) be constructed and installed so that the discharge of water from the pressure relief valve, expansion valve, temperature relief valve or combined temperature and pressure relief valve or from any pipe connected to it is readily visible; and

(*e*) except in the case of a temperature relief valve or the temperature function of a combined temperature and pressure relief valve, discharge water only when it is subject to water pressure of at least 0.5 bar above the water pressure to which the boiler or hot water cylinder or storage tank is, or is likely to be, subjected.

Unvented hot water cylinder or storage tank to be fitted with a temperature relief valve

91. An unvented hot water cylinder or storage tank which is supplied with water by the Board, whether or not by means of a storage cistern and which is fitted with a non-mechanical safety device, shall be fitted with temperature relief valve which—

(*a*) operates at a temperature not less than 5 degrees centigrade below that at which the non-mechanical safety device operates or is designed to operate;

(*b*) closes automatically after discharging water; and

(*c*) is water-tight when closed.

PART XII

Taps for Drawing Drinking Water

Draw-off tap to be connected to service pipe, delivery pipe and distributing pipe

92. In every premises to which water is supplied by the Board, a draw-off tap convenient for drawing drinking water shall be connected to—

(*a*) a service pipe;

(*b*) a pump delivery pipe drawing water from a service pipe; or

(*c*) a distribution pipe drawing water wholly from a storage cistern which is—

(i) installed in accordance with by-law 31; and

(ii) supplied with water from a service pipe or a pump delivery pipe drawing water from a service pipe.

Standpipe for communal water supply to be metered, etc.

93. A standpipe which is used to provide a communal water supply shall be metered and be equipped with a non-concussive self-closing tap or other suitable waste preventing tap.

PART XIII

Notices to the Board

Notices to be given before installation or alteration is carried out in respect of water fittings

94.—(1) Any person who, in respect of any premises to which water is supplied by the Board, proposes to carry out any of the installations or alterations referred to in paragraph (2) shall give at least five working days written notice to the Board before commencing such installations or alterations.

(2) The installations or alterations for which written notice is required under paragraph (1) are such installations or alterations, other than repairs or renewals, of—

(*a*) a bidet;

(*b*) a flushing cistern;

(*c*) a hose union tap or tap to which a hose may be connected; or

(*d*) a water fitting which, if there is a backflow or back-siphonage of water through such water fitting, contaminates or is likely to contaminate water supplied by the Board.

Notice to be given in respect of work affecting pipe

95. A person who, in respect of any pipe which conveys, or is intended to convey, water supplied by the Board, proposes to—

(*a*) backfill any excavation in which the pipe is laid;

(*b*) thread the pipe through any tubular duct which enters a building below ground level;

(*c*) embed the pipe in any solid floor or wall; or

(*d*) lay the pipe below ground level by means of a mole plough or similar apparatus,

shall give at least five working days written notice to the Board before commencing any of the activities referred to in this by-law.

PART XIV

Water Connexions, Water Disconnexions and Meters

Application for water connexion *First Schedule*

96.—(1) A person wishing to be supplied with water by the Board shall apply to the Board in the Form prescribed in the First Schedule, for the supply of water to their premises; the application shall be accompanied by a sketch plan of the premises drawn to a scale of not

less than 1:500 showing the size of the premises in hectares and details of the proposed service.

Second Schedule

(2) On collecting the application form referred to in paragraph (1), a person shall pay the fee prescribed in the Second Schedule.

Second Schedule

(3) The Board, upon receipt of the application pursuant to paragraph (1), shall carry out measurements to determine the distance from the closest Board's water main to the premises requiring the new water connexion, and the Board shall thereafter provide a quotation to the applicant based on the rates prescribed in Part IV of the Second Schedule.

Second Schedule

(4) The Board shall only commence every new water connexion works for the premises upon payment of the new water connexion fee prescribed in Part IV of the Second Schedule.

(5) The Board shall not be bound to provide or continue to provide a water connexion of the size for which such application is made, but the Board may provide such larger or smaller water connexion as it deems appropriate to the average monthly consumption or estimated consumption required.

Second Schedule

(6) In the event that the owner or occupier of the premises requires that an existing water connexion be replaced by one of increased size, the occupier of the premises supplied shall pay the appropriate water connexion fee as prescribed in Part IV of the Second Schedule.

Board not responsible for failure in water supply

97. The Board shall not be responsible for any failure in its water supply or defect in the quality of water except where such failure is caused by the negligence of the Board or its employees, servants or agents; and the Board shall only be responsible for a defect in its water quality upon the assessment and proof of such a defect in water quality being certified by the Water Resources Board or any other authority so mandated by or under any written law.

Provision of water to premises comprising one or more buildings

98. Any property comprising a building or buildings on a separate subdivision of premises for town planning purpose and supplied with water by the Board shall have its own and not more than one water connexion:

Provided that the Board may—

(*a*) elect to install more than one water connexion to any property where the levels of any service reservoirs from which the property

can be supplied are such that one water connexion would not provide an adequate supply either in volume or at sufficient pressure or both;

(*b*) agree to install more than one connexion to a separate subdivision of premises for town planning purposes but in such case the service from each such connexion shall obtain or be capable of obtaining water from more than one connexion;

(*c*) agree to provide one water connexion to supply more than one separate subdivision of land where—

(i) such subdivision are continuous;

(ii) such subdivision are and continue to be under one ownership; and

(iii) any building erected thereon are held or occupied as a distinct or separate holding tenancy;

(iv) such land is utilized for a purpose associated with such buildings.

Safe custody of meters

99. Each water connexion shall have a separate water meter provided by the Board and either the person making the application for a water supply or the occupier of the property served as the case may be, shall be responsible for the safe custody and condition of the meter.

Board to remain owner of meters and stop cork

100. The Board shall remain the owner of any meter or stop cork provided under these By-laws and shall, be responsible for its maintenance, repair or replacement:

Provided that the person making the application shall contribute to the initial cost of the meter or stop cork or gate valve. Where any such meter or stop cork or gate valve is found to have been damaged or stolen in circumstances that would be attributable to the occupier, the occupier of the property served by the meter shall be liable to pay the cost of repairing or replacing such meter or stop cork or gate valve.

Disconnexion and maintenance of meters

101. Only the Board's employees, servants or authorized agents, shall disconnect or interfere with any meter or fittings connected therewith for any purpose whatsoever and, in the event of any repairs to any meter being necessary, the owner or occupier shall immediately notify the Board whose employees, servants or authorized agents shall effect repairs without undue delay.

Private meters

102. Nothing in these By-laws shall prevent any person from installing a meter other than a meter provided by the Board:

Provided that such a privately owned meter shall in all cases be fitted in such a way that it registers water which has already passed through a meter provided by the Board and the privately owned meter is not intended to replace the meter provided by the Board nor to interfere with the operations of a meter installed by the Board.

Meter readings

103.—(1) Any reading from a meter provided by the Board as entered in the books of the Board shall determine the quantity of water consumed, unless there is evidence to show that—

(*a*) either such reading was erroneously entered in the books of the Board or the meter was defective at the time of such reading; or

(*b*) the Board provided prepaid meters, which do not require the reading from the meter.

(2) In an event where the Board discovers that a meter is stuck, the Board shall reasonably estimate the monthly water consumption during the month in which the meter was stuck by using an average of a minimum three months water consumption quantities prior to the meter getting stuck.

Board to disconnect water due to non-payment of water bills, illegal water connexion, etc.

104.—(1) The Board shall disconnect supply to any premises, through removal of the meter or any such mechanism that shall stop the supply of water to premises, if—

(*a*) the owner or occupier of the premises has not paid his previous water bills, other charges or fees beyond the due date;

(*b*) the premises are vacated and owner or occupier has given the Board a minimum of three working days' notice; or

(*c*) a cheque being payment for an overdue account paid to the Board is referred to the drawer; such a cheque shall attract a penalty as prescribed by the Board according to Part III of the Second Schedule:

Second Schedule

Provided that—

(i) advice of such rate, charge or fee shall have been given to the attention of the occupier or owner concerned; and

(ii) reconnexion of supply shall only be made after the owner, or occupier of the premises has paid the outstanding water bill and a reconnexion fee as prescribed in Part VI of the Second Schedule to these By-laws.

Second Schedule

(2) In event that the owner or occupier of the premises illegally reconnects the supply of water after disconnexion has been made, the Board shall remove the entire distribution pipe up to the Board's main supply pipe.

(3) The Board shall only reconnect supply to premises upon payment of the cost of new water connexion by the owner or occupier plus the cost of volume of water used during the period when the premises were illegally connected estimated as being the sum of monthly charges covering the period when the premises were disconnected to when the illegal connexion was discovered.

(4) For purposes of this by-law, monthly charges shall be determined to be one-third of the aggregated consumption for the last three months prior to the disconnexion of the premises.

(5) A person shall not connect a supply pipe before the meter or have a new water connexion without the Board's consent.

(6) In the event that a person contravenes paragraph (5), the Board shall—

(*a*) completely remove the pipe and fittings used for such connexions; and

(*b*) only provide any such person water supply upon—

(i) payment of new water connexion and penalty fee prescribed in Part IV and Part VII of the Second Schedule, and any related costs; and *Second Schedule*

(ii) payment for the estimated water consumed during the period in which the person was illegally consuming water supplied by the Board, determined by an average water consumption of the group of consumers the person falls under for a period of one year using the appropriate consumer group water charge rates.

(7) Any person involved in any form of illegal water connexion, illegal drawing of water, or any form of activities whose aim is to interfere with the Board's system of water charging commits an offence.

Right to have meter tested

105.—(1) Any person receiving water supply from the Board through a service meter may apply in writing to have the meter provided by the Board for the service to be tested.

(2) When submitting an application under paragraph (1), a person shall pay a fee prescribed in Part V of the Second Schedule. *Second Schedule*

(3) If upon test the meter is found to be inaccurate beyond the limits of plus or minus five per centum of the true quantity, the Board shall replace such meter at its own expense, except where the meter was wilfully damaged.

Board may remove private meters

106. The Board may at any time, at its own expense, remove any meter whether or not the meter is owned by the Board and replace it with another meter:

Provided that if such meter is privately owned, the cost of replacement shall be borne by the consumer or owner thereof.

Inspection of premises by the Board

107.—(1) Any authorized employee, servant or agent of the Board may, at any reasonable time and on the production, if necessary, of an identification approved by the Board, enter upon any premises for the purpose of inspecting the water supply meter or any water fitting on such premises.

(2) A person authorized to enter the premises, under this by-law may, for purpose of such inspection remove any obstruction and the Board shall make good any damage thereby caused, unless the cause for the inspection is due to the default or negligence of the occupier or owner of the premises.

Obstruction of Board's employee an offence

108.—(1) Any person obstructing an authorized employee, servant or agent of the Board in the performance of his duties under these By-laws, commits an offence.

(2) Any other costs arising as a result of the obstruction shall be assessed separately and the offender shall reimburse the costs prior to restoration of supply.

Special agreement for water supply

109. Notwithstanding any provision contained in these By-laws, the Board may enter into any special agreement with any person or body corporate for the supply of water:

Provided that where the person is a private individual, the Board shall require the individual to produce, as a form of identification, a driver's licence, a passport, a national identity card, or an affidavit of identity sworn before a commissioner for oaths.

Ascertainment of water consumption when meter reading is found to be erroneous

110. Where it is found that a meter reading is entered erroneously in the books of the Board for any reason and no accurate assessment of the quantity of water consumed can be established, one-third of the aggregate consumption for the last three preceding months shall be deemed to be the consumption for the month or where this is impracticable, the

quantity consumed in the next ensuing month shall be deemed to be the quantity of water in respect of which the meter reading was erroneously entered.

Remedies to the Board for non-payment

111. Where an account has an amount which is overdue for a period of at least thirty days—

(*a*) the Board shall be entitled to charge monthly interest calculated at prevailing commercial bank rates;

(*b*) the Board shall be entitled to disconnect the water supply without notice to the debtor;

(*c*) the Board shall be entitled to transfer the bill to any known account of the debtor;

(*d*) the Board shall be entitled to enforce payment through any legally accepted means, including but not limited to taking a court action; or

(*e*) the Board shall be entitled to uproot the connexion at the cost of debtor and where payment has subsequently been made after uprooting the connexion, the debtor shall be deemed as an applicant for a new connexion for the purposes of these By-laws.

Change of occupancy

112.—(1) Any person occupying or vacating premises supplied with water by the Board shall give written notice to the Board of not less than three clear days excluding Saturdays, Sundays and public holidays of his intention to occupy or vacate the premises.

(2) Upon receiving the notice pursuant to paragraph (1), the Board shall cause the meter to be read on the date of such change of occupancy provided such change of occupancy does not occur on a Saturday, Sunday or public holiday.

(3) In the event of either no notice or insufficient notice being given by the person occupying or vacating premises supplied with water by the Board, such person shall be bound to pay for any metered water charges determined by the meter reading next following the date upon which such vacating occurs.

Repair of leaks and waste

113.—(1) Where there is any leak or waste on premises supplied with water by the Board, the Board may, by written notice, require the occupier of the premises to repair or prevent the leakage or waste, and, if within forty-eight hours from the time of such notice such leak or waste is not repaired or prevented, the Board may in its discretion disconnect

the supply of water to, or enter upon, the premises to repair or prevent the leak or waste at the expense of the occupier of the premises.

(2) Where an occupier of the premises is failing to reimburse to the Board the costs incurred by the Board in repairing or preventing a leak or waste referred to in paragraph (1), the Board may transfer the cost to the occupier's water bill account and subject the account to disconnexion.

Temporary water connexion

114.—(1) The Board may, on application and payment of an appropriate fee to be determined by the Board, supply water to any person for a temporary period for a temporary activity.

(2) Temporary supply of water shall not be connected to a permanent service except when it becomes necessary for purposes of testing.

(3) For the purposes of this section, "temporary water connexion" means a connexion required by a customer for a period less than thirty days.

Meter service fee

Second Schedule

115. Where premises have been provided with a water meter owned by the Board, a monthly meter service fee may be charged according to Part II of the Second Schedule.

PART XV

Fire Services

Fire services

116.—(1) Any owner or occupier of premises within the water-area wishing to have a connexion made to the Board's mains for the purpose of a fire service shall submit an application form as prescribed in the First Schedule.

First Schedule

(2) When submitting the application forms referred to in paragraph (1), the owner or occupier of premises shall attach two copies of a plan to a scale of not less than 1:500 to the application forms, showing the size of the premises in hectares and details of the proposed fire service and fire-fighting apparatus.

(3) The Board may agree to provide a connexion from a main for any fire service subject to the adequacy of such main and the Board may, in addition, require that—

(*a*) the person making the application for a fire service connexion shall bear the costs of providing such connexion;

(*b*) where the fire service is intended to be used exclusively for fire-fighting purposes, and a separate water connexion has been or is

about to be provided for other purposes, the fire service connexion shall be metered for determination of non-revenue water;

(*c*) where any fire service is intended to be used for purposes other than fire-fighting, it shall be metered and any additional expenses to provide a combination or compound or other meter shall be borne by the person making the application for such fire service to be supplied with water; and such meter shall be the property of the Board, which shall be responsible for its maintenance and repair or replacement.

(4) Where the owner or occupier under this by-law has used water through a fire connexion for purposes of fire fighting, he shall notify the Board in writing within twenty-four hours of use of the water.

(5) Where the owner or occupier under this by-law fails to notify the Board as required under paragraph (4), the Board shall charge for the water so used as prescribed in Part I of the Second Schedule.

Second Schedule

(6) This by-law shall not apply to any fire service existing at the date of commencement of these By-laws so as to require such fire service to be altered in any way:

Provided that if any such fire service is altered or extended at some future date, the whole of such fire service shall be operated in accordance with these By-laws.

Misuse of unmetered fire service water an offence

117. Where water is taken through an unmetered fire service without the consent of the Board for a purpose other than to extinguish a fire, any person so taking water or wilfully permitting water to be taken commits an offence.

Assemblies to be provided with fire hydrants

118.—(1) All town, municipal and city assemblies shall be provided with metered fire hydrants from where they can draw water for purposes other than fire-fighting and all other fire hydrants shall be available to the assemblies only for the sole purpose of fire-fighting.

(2) Any person drawing off water from fire hydrants which are not metered for purposes other than fire-fighting commits an offence.

PART XVI

Restrictions to Supply of Water

Power of Board to fix hours and quantities of supply

119. The Board may, from time to time, fix the hours at and in the quantities which water may be supplied.

Power of Board to restrict use of water in time of shortage

120.—(1) The Board may, whenever the available supply of water from its waterworks is insufficient to satisfy the normal demand for water, declare by notice in local newspapers and on the radio that a water shortage exists and shall specify in the notice appropriate restrictions which shall remain in force until the notice is revoked.

(2) Any person who, after the publication of the notice referred to in paragraph (1), uses water contrary to the restrictions specified in the notice commits an offence, and the Board shall have powers to disconnect his water supply and shall only have his water supply reconnected upon the revocation of the notice by the Board and upon payment of the reconnexion fee by the occupier or owner of the premises.

Continuous feed

121.—(1) Any apparatus which is dependent upon a continuous feed of water from the Board shall be connected to a storage cistern containing sufficient water for such apparatus to operate under normal working conditions for at least twelve hours.

(3) Where from any service the maximum draw-off is capable of exceeding 100 liters in one minute, the Board may require a storage cistern of a suitable capacity to be installed and the service so arranged as to moderate the draw-off direct from the main.

PART XVII

Charges for the Supply of Water and other Facilities

Water rate and service charge

Second Schedule

122.—(1) The Board shall charge, in respect of supply of water in one month or on prepaid arrangement, the quantity of which is ascertained by a meter, the rates prescribed in Part I of the Second Schedule.

(2) The Board shall charge in respect of a supply of water in one month, a meter service charge at the rate specified in Part II of the Second Schedule.

Second Schedule

Fees for application for supply of water

Second Schedule

123.—(1) A fee specified in Part V of the Second Schedule, shall be paid for each application for the supply of water made under Part XIV.

(2) Where a supply of water from the Board is requested in the circumstance specified in section 21 (3) of the Act, the Board may demand the payment of such additional fees as the Board may deem appropriate having regard to the costs which the Board would incur in making such supply of water available.

Fee for reconnexion of supply of water *Second Schedule*

124. Where a supply of water is disconnected pursuant to by-law 104, a reconnexion fee prescribed in Part VI of the Second Schedule shall be paid to the Board before supply is restored.

Authentication of notices, etc.

125. Every notice, order or other document under these By-laws requiring authentication by the Board shall be deemed sufficiently authenticated if signed by the Chief Executive or his authorized representative.

PART XVIII

Other Water Supply Within the Board's Water-Areas

Supply of water within the Board's water-areas prohibited

126.—(1) A person shall not supply water for any use within the Board's water-areas through other sources, unless a licence is obtained from the Water Resources Board upon recommendation by the Board.

(2) Provided that the Board has installed water supply in the area where licences were granted to drill boreholes, such licences shall be revoked by the Water Resource Board through recommendation from the Board and the boreholes capped by Board.

Powers of the Board to authorize other supply

127.—(1) A person shall not supply water in the Board's water-area without prior written authority from the Board and the Board shall stop any person from supplying water within its water-area whenever such water supply is in conflict with the Board's water supply or that the water thereof supplied shall have poor health effect to consumers, unless the Board's water supply to people within its water-area is not adequate or that there is a general shortage of water supply from the Board's waterworks.

(2) In exercise of the powers under subregulation (1), the Board shall liaise with the National Water Resources Authority.

Status of other existing water supplies

128.—(1) The Board shall have powers to discontinue any water supplied by any person, through the Water Resource Board or any other mandated Board, and to seal or stop supply of water, within its water-areas which were carried out before the commencement of these By-laws.

(2) Where a borehole has been drilled and being operated within the Board's water-area prior to the commencement of these By-laws, the Board may assess the quality status of the borehole.

(3) Where the Board, having assessed a borehole pursuant to paragraph (2), finds that the borehole is of poor water quality standards, the Board may seal the borehole.

(4) Where the Board, having assessed a borehole pursuant to paragraph (2), finds that the borehole is of good water quality standards, the Board shall put in place appropriate locking devices which will enable the Board to open the borehole whenever there is acute shortage of water from the Board's waterworks.

PART XIX

Access, Fishing, Boating and Sailing in Board's Controlled Water Sources

Interpretation of this Part

129.—In this Part, unless the context otherwise requires—

"reservoir" means any water body owned or used by the Board and includes the surrounding area of the reservoir;

"licence holder" means any person holding a current licence in the prescribed form; and

"the closed season for fishing" means any period or periods as the Board may from time to time determine and make known.

Activities prohibited without a licence

130. A person shall not enter a reservoir for the purpose of fishing, boating, sailing or any other purpose not connected with the Board's business, unless the person is a licence holder.

Licences

131. The Board may, in its absolute discretion, issue licences for any periods, and to any person or persons, and upon such terms and conditions and in such form as the Board may, from time to time, determine.

Conditions for issuing licences

132. The conditions of the licences issued by the Board may specify—

(*a*) activities of the licensee whilst within the reservoir;

(*b*) that the licence shall not be transferable;

(*c*) that the licence may be cancelled at any time by the Board;

(*d*) that the licence shall be produced to any official of the Board on demand;

(*e*) that the licence holder shall sign the visitor's book provided for that purpose at the appropriate entrance or entrances when entering and leaving the reservoir;

(*f*) that the licence holder is fully conversant with these By-laws and is deemed to have had the same fully explained to him;

(*g*) that the Board shall not be responsible for any loss or damage or injury sustained by the licence holder or his or her clients in consequence of his entering or remaining upon the Board's property or while engaged in fishing, boating or sailing on the waters of the reservoirs or otherwise, and whether such loss, damage or injury is occasioned by the negligence or default of the Board, its servants or agents or by a third party; or

(*h*) any other condition as the Board may deem fit within its lawful authority.

Fees for access and licences

133. The Board may charge such fees as the Board may determine—

(*a*) for the access by the public to the Board's reservoir area; or

(*b*) for issuance and renewal of licences for activities under this Part.

Hours of opening the reservoir

134. The reservoirs shall be open to licence holders every day of the year between 07:30 hours and 16:30 hours.

Extent to which reservoir is to open

135. The whole of the reservoir will not necessarily be available to licence holders but only such portions thereof as the Board may from time to time determine and show on the official charts.

Interference with machinery of the reservoir

136. A person shall not interfere with any machinery, valves, drains, plantations, fences or other works or apparatus of the Board within the area of a reservoir.

Pollution

137.—(1) A person shall not cause any pollution by introducing any deleterious or pollutant substance or by whatever unlawful means to water in the reservoir or transmission or distribution network or consumer point or its source or within a 100 meters radius from the intake point, streams or banks thereof.

(2) Any person who is found in possession of any deleterious or pollutant substance shall be refused entry into the reservoir, unless he disposes himself of the deleterious or pollutant substance at a site designated and acceptable by the Board, and away from the reservoir.

Motorized boats prohibited

138. A person shall not use a motorized boat within the reservoir.

Sanitation

139.—(1) A person shall use public conveniences provided by the Board for sanitary purposes, when accessing a reservoir area.

(2) Any person who, for sanitary purposes, uses any other portion of the reservoir area other than the public conveniences referred to in paragraph (1), commits an offence.

Entrances to reservoir

140. A person shall not enter a reservoir without first obtaining a special consent of the Board, save for the entrance or entrances from time to time provided for that purpose by the Board.

Activities of licence holders

141. The activities of all licence holders shall be so regulated as not to interfere with, or obstruct in any way, other activities being carried out on, upon or near the reservoir by the Board or by other persons authorized by the Board.

Delegation of powers

142. The Board may, from time to time, delegate any of its powers under these By-laws to any duly authorized officer or agent of the Board.

Conditions of entry into reservoirs

143. The following general conditions of entry shall apply to all licence holders, and licence holders are deemed to have accepted these conditions—

(*a*) a person shall not enter any prohibited area within the reservoir area, which prohibited areas shall be indicated by notices to that effect;

(*b*) a person, having entered the reservoir, shall not leave or cause to be left any litter within the reservoir area other than in the receptacles provided for that purpose;

(*c*) a person shall not be allowed to access the reservoir area with pets;

(*d*) the Board may absolutely prohibit the public from entering the reservoir at its discretion;

(*e*) the Board may prohibit any person from visiting the reservoir if such person has contravened the Act or these By-laws, whether or not he has been prosecuted for such contravention; and

(*f*) any person who does not comply with these conditions commits an offence.

Safety standards

144. A person shall not use a boat in a reservoir, unless the Board is satisfied that the boat meets such safety standards or environmental requirements as the Board may from time to time determine.

Removal of boat from the reservoir

145. The Board may, at any time, remove or order the removal of any boat from the reservoir.

146. The Board may prohibit the use of any boat or apparatus, including any fishing equipment or any boat whose exterior is coated with such paint, varnish or other material which may, or is likely to, pollute the reservoir.

Prohibition on the use of boat or equipment, which may pollute the reservoir

147.—(1) A person shall not leave a boat or any apparatus, including fishing equipment in a reservoir, except in such places and at such times as the Board shall, from time to time, designate as storage places for boats or apparatus.

Storage of boats and equipment

(2) The Board shall not be responsible for any boat or apparatus including fishing equipment left in the reservoir.

(3) The Board may authorize the stowing or storage of any boat or apparatus, including fishing equipment in the water on such conditions and for such periods as the Board may, from time to time, determine.

148. A person of the age below eighteen shall not be permitted to be in charge of, or manage or control, any boat at any time in the reservoir.

Person under eighteen not to manage boat, etc.

149. A person shall not, in a reservoir—

Fishing

(*a*) fish, except in such places in the reservoir as the Board may authorize;

(*b*) use live or dead bait that may be harmful for the purpose of fishing; or

(*c*) fish during the period when fishing has been prohibited or suspended by the Board.

PART XX

Miscellaneous Provisions

150. Any person who obstructs, threatens or otherwise injures a Board's employee, servant or agent in the course of the employee's, servant's or agent's, execution of his duties, commits an offence. These include but not limited to—

Injury to Board's employee, servant or agent

(*a*) bodily harm;

(*b*) verbal abuse;

(*c*) harassment; or

(*d*) unleashing a dog,

Cap. 7:01

and shall be charged under the applicable provisions of the Penal Code, unless otherwise not stated therein.

Damage to Board's infrastructure during road or, construction works, etc.

151.—(1) Any person intending to carry out road or construction works etc., within the Board's supply area shall notify the Board at least three working days prior to the commencement of works.

(2) Any person who causes damage to the Board's infrastructure during road works construction, etc., whether or not the person gave prior notice of commencement of the works to the Board, shall be liable to make good any loss resultant from the damage, notwithstanding his liability under any written law.

Pipe diversions

152. Any person or body corporate intending to construct near or above the Board's already laid pipes or infrastructure shall be responsible for all the costs to be incurred for relocation of the pipes or infrastructure.

Installation and replacement of prepaid or post-paid meter diversions

153. The Board shall be at liberty to install or replace a prepaid meter or post-paid meter at any premises as it deems appropriate at any one time:

Provided that the Board shall give a seven day written notice to an owner or occupier of the premises.

Protection of Board's water catchment areas

154. Any person that, or a body corporate whose officers, knowingly engages in activities that negatively impacts, or are likely to negatively impact on the Board's water catchment areas commits an offence.

PART XXI

Offences and Penalties

Offences, penalties and defences

155.—(1) Any person who contravenes these By-laws commits an offence and shall be liable, on conviction, if no any other punishment is provided by these By-laws or any applicable law, to a fine not exceeding—

(*a*) K1000 or imprisonment for one month;

(*b*) K2000 on subsequent conviction or imprisonment for three months; and

(*c*) K200 in respect of each continuing offence, for each day during which the offence continues.

(2) It shall be a defence for a person charged with an offence under these By-laws to show that—

(*a*) he took all reasonable steps and exercised due diligence to avoid commission of the offence; or

(*b*) he has a reasonable excuse for his act or omission which caused him to commit the offence.

SECOND SCHEDULE

(*This Schedule should contain fees payable to the Board for new connexions, water rates, reconnexions, temporary connexions, fire services, etc.*)

WATER RATES

PART I

	K	*t*
1. For water supplied through individual household meters—		
(*a*) high density customers—		
(i) for the first 3 cubic meters, per month	1,035	90
(ii) in excess of 3 cubic meters up to and including 6 cubic meters, per cubic meter	268	72
(iii) in excess of 6 cubic meters, per cubic meter . .	287	52
(*b*) medium density customers—		
(i) for the first 3 cubic meters, per month	1,199	58
(ii) in excess of 3 cubic meters up to and including 6 cubic meters	311	19
(iii) in excess of 6 cubic meters	332	97
(*c*) low density customers—		
(i) for the first 3 cubic meters, per month	1,370	98
(ii) in excess of 3 cubic meters up to and including 6 cubic meters	355	66
(iii) in excess of 6 cubic meters	380	55

	K	*t*
2. For water supplied from Kiosk or command water points—		
(*a*) consumption up to 3 cubic meters, per month . .	784	69
(*b*) in excess of 3 cubic meters up to and including 6 cubic meters, per cubic meter	118	40
(*c*) in excess of 6 cubic meters	177	66
3. For water supplied to commercial customers—		
(*a*) consumption up to 3 cubic meters, per month . .	2,564	19
(*b*) in excess of 3 cubic meters, per cubic meter . .	1,152	14
4. For water supplied to major commercial customers—		
(*a*) consumption up to 3 cubic meters, per month . .	3,103	92
(*b*) in excess of 3 cubic meters	1,394	62
5. For water supplied to institution customers—		
(*a*) consumption up to 3 cubic meters, per month . .	2,085	20
(*b*) in excess of 3 cubic meters, per cubic meter . .	717	17
6. For water supplied to major institution customers—		
(*a*) consumption up to 3 cubic meters	2,190	43
(*b*) in excess of 3 cubic meters, per cubic meter . .	753	36
7. For water supplied through prepaid meters per cubic meter—		
(*a*) Low density	473	78
(*b*) Medium density	440	08
(*c*) High density	358	53
(*d*) Communal Water Point	169	71
(*e*) Institutions	947	72
(*f*) Major Institutions	762	35
(*g*) Commercial	1,018	79
(*h*) Major Commercial	1,405	93
(*i*) Government Institutions	762	35

PART II

Services and other Charges

1. A service charge as shown below is payable for all connexions on a monthly basis.

(*a*) for water supplied through individual meters—		
(i) traditional housing areas, per month	239	71
(ii) medium density areas, per month	416	12
(iii) low density areas, per month	638	17
(*b*) for water supplied through institution meters . .	1,423	17
(*c*) for water supplied through major institution meters	1,495	00
(*d*) for water supplied through commercial meters . .	2,403	66
(*e*) for water supplied through major commercial and industrial meters	2,909	58

2. A meter rental charge as shown below is payable for all connexions, on a monthly basis—

(*a*) for water supplied through individual meters—		
(i) traditional housing area, per month	489	89
(ii) medium density area, per month	874	24
(iii) low density areas, per month	1,327	81
(*b*) for water supplied through institution meters . .	3,412	92
(*c*) for water supplied through major institution meters	8,676	93
(*d*) for water supplied through commercial meters . .	3,747	43
(*e*) for water supplied through major commercial meters	10,495	25

PART III

Penalty for Refer to Drawer Cheque

A penalty charge as shown below is payable for refer to drawer cheques issued by customers—

(*a*) for—		
(i) Individual household customers	10,000	00
(ii) Institutions	25,000	00
(iii) Commercial	25,000	00

PART IV

New Water Connexion Fee

A new water connexion fee is payable by a new applicant based on the following formula: Cost of the connecting pipes (dependent on size and distance) from source to the tap + Cost of the meter + Cost of the fittings + Cost of labor on installation.

PART V

Application Fee

An application fee of K100 is payable by a new applicant for a connexion.

PART VI

Reconnexion Fee

A reconnexion fee is payable for all disconnected accounts due to non-payment of water bill as follows—

for—

(i) Individual household customers	1,200	00
(ii) Institutions	2,000	00
(iii) Commercial	2,000	00

PART VII

Illegal Connexion Fees

An illegal connexion fees of K2,000 for each day the connexion remains connected to the Board water supply system is payable for all connexion made to the Board water supply system without knowledge of the Board and paying for the connexions fees.

WATER RESOURCES

ARRANGEMENT OF SECTIONS

SECTION

PART I
Preliminary Provisions

1. Short title
2. Interpretation
3. Application of the Act
4. Objectives
5. Water vested in the State
6. Public ownership of beds and banks of watercourses and lakes and of adjacent land strips
7. Powers and duties of the Minister

PART II
National Water Resources Authority

8. Establishment of the Authority
9. Disclosure of interest
10. Powers and functions of the Authority
11. Committees of the Authority
12. Invited persons
13. Regional offices
14. Staff of the Authority
15. Delegation of powers and functions
16. Water resources investigation
17. Authority's powers to require records, etc.
18. National monitoring of, and information on, water resources management
19. Sources of funds
20. Application of revenue from permit charges and licence fees
21. Investment powers of the Authority
22. Financial year of the Authority
23. Annual reports
24. Progress reports

SECTION

PART III

CATCHMENT MANAGEMENT COMMITTEES

25. Catchment areas
26. Establishment of catchment management committees
27. Procedure for establishment of catchment management committees
28. Composition of a catchment management committee
29. Functions of catchment management committees
30. Authority to assist catchment management committees
31. Funding and auditing of activities of operational catchment management committees
32. Catchment management strategy
33. Sensitization of users of watercourses on protection and management of watercourses and other bodies

PART IV

NATIONAL WATER POLICY AND NATIONAL WATER RESOURCES MASTER PLAN

34. National Water Policy
35. National Water Resources Master Plan
36. Action Plan to be adhered to

PART V

WATER ABSTRACTION AND USE

37. Reservation of water resource
38. Abstraction of water for domestic use, use of groundwater, and rainwater harvesting
39. Abstraction and use of water subject to licence
40. Application for licence
41. Criteria for issuing a licence
42. Contents of the licence
43. Terms and conditions of licence
44. Reference of licences to other authorities
45. Exemption of works
46. Issue of temporary licence
47. Licence conditional on inspection of works
48. Licensee to inform Authority of change of location of water use
49. Variation of a licence owing to change in circumstances, etc.
50. Cancellation of a licence

SECTION

51. Cancellation or variation of a licence for a public purpose
52. Variation of licence following change in flows
53. Variation of a licence at request of licensee
54. Effects of expiry or cancellation of a licence to abstract and use water
55. Lease of licence to abstract and use water
56. Succession to a licence to abstract and use water
57. Abandonment of permitted or licensed activities
58. Surrender of licence
59. Register of licences
60. Combined licence to abstract and use water and to discharge effluent
61. Duration of a licence to abstract and use water
62. Renewal of a licence to abstract and use water
63. Right to transfer saved water
64. Easements for works
65. Emergency powers in case of shortage of water

PART VI

CONTROL AND PROTECTION OF GROUNDWATER

66. Groundwater conservation areas
67. Issuing of licence not guarantee to supply of water
68. Permit to drill a borehole or to engage in borehole drilling programme for groundwater exploration
69. Submission of records
70. Tests on neighbouring boreholes
71. Contractor deemed to be constructor
72. Records may be required to be treated as confidential
73. Waste of groundwater
74. Contamination and pollution of groundwater
75. Authority may order special measures to safeguard groundwater resources
76. Artesian boreholes to be cased
77. Defective boreholes
78. Interference with defective borehole, etc.
79. Application to carry out work on a defective borehole
80. Instructions to deal with defective borehole
81. Authority may inspect borehole
82. Sworn statements to be submitted
83. Additional work on defective borehole
84. Licensing of borehole drillers and constructors

SECTION

PART VII
PROTECTED AREAS AND CONTROLLED ACTIVITIES

85. Protected areas
86. Controlled areas in relation to drought
87. Controlled activities

PART VIII
PREVENTION AND CONTROL OF WATER POLLUTION

88. Prohibition of pollution
89. Pollution of water resources from an activity or process
90. Declaration of prohibited substances by the Authority
91. Standards of effluent quality
92. Application for effluent discharge permit
93. Contents of the permit
94. Terms and conditions of a discharge permit
95. Reference of permits to other authorities
96. Duration of permit to discharge effluent
97. Renewal of permit to discharge effluent
98. Review of permit to discharge effluent
99. Transfer of permit to discharge effluent
100. Succession to permit to discharge effluent
101. Suspension and cancellation of permit to discharge effluent
102. Effects of expiry or cancellation of permit to discharge effluent
103. Pollution of water resources from spillage

PART IX
GOVERNMENT WATERWORKS

104. Powers of Authority to undertake works
105. State schemes and community projects
106. Precedence of schemes and projects
107. Construction of works for state schemes
108. Community projects
109. Contribution towards schemes and projects

PART X
SAFETY OF DAMS AND FLOOD MANAGEMENT

110. Definitions
111. Blockage of watercourses
112. Control measures for dams with safety risk
113. Responsibilities of approved professional persons
114. Registration of dams with safety risk

SECTION

115. Factors to be considered in declaring dams with safety risk
116. Exemptions
117. Regulations regarding dam safety and prevention of flood risk
118. Measures for flood mitigation and control

PART XI
WATER CHARGES AND FINANCIAL PROVISIONS

119. Charges
120. Collection and use of water fees and charges
121. Water Resources Trust Fund

PART XII
WATER TRIBUNAL

122. Establishment of Water Tribunal
123. Composition of the Water Tribunal
124. Vacancy in the office of a member of the Water Tribunal
125. Support staff and funds of the Water Tribunal
126. Indemnity of the Tribunal and its members
127. Jurisdiction of the Water Tribunal
128. Time for lodging appeal
129. Determination of appeals and disputes
130. Rules and procedures of the Water Tribunal

PART XIII
ASSOCIATIONS OF WATER USERS

131. Establishment and purposes of associations of water users
132. Approval and registration of associations of water users
133. Registration of associations of water users, compulsory membership implied
134. Register of associations of water users
135. Power of Authority to give directions
136. Disestablishment of associations of water users
137. Winding-up of affairs of associations of water users

PART XIV
MISCELLANEOUS PROVISIONS

138. Entry by Authority for monitoring of water resources
139. Obligations on entry on land
140. Inspection of land in relation to water use
141. Establishment of bodies to implement international agreements
142. General appeals
143. General offence and penalty

SECTION

144. Specific offences
145. Miscellaneous offences
146. Proceedings for offences
147. Penalties for offences
148. Administrative penalties
149. Offences by bodies corporate relating to state of mind
150. Offences by bodies corporate relating to liability of directors
151. Penalties for offences by bodies corporate
152. Damage caused by the Minister, etc., to be compensated
153. Prescribed guidelines
154. Decision to be in regard to objectives
155. Protection of the Minister and others from liability
156. Public consultation
157. Regulations

PART XV

REPEALS, SAVINGS AND TRANSITIONAL PROVISIONS

158. Transitional provisions
159. Notification of existing rights
160. Authority to record existing rights and to issue licence
161. Application of other relevant laws
162. Repeal and savings

CHAPTER 72:03

WATER RESOURCES

2 of 2013
G.N. 56/2013

An Act to provide for the management, conservation, use and control of water resources; for the acquisition and regulation of rights to use water; and for matters connected therewith or incidental thereto

[1st December, 2013]

PART I

PRELIMINARY PROVISIONS

Short title

1. This Act may be cited as the Water Resources Act.

Interpretation

2.—(1) In this Act, unless the context otherwise requires—

"aquifer" includes a geological structure or formation and an artificial landfill permeated or capable of being permeated permanently or intermittently with water;

"Authority" means the National Water Resources Authority established under section 8;

"authorized" means authorized by or under this Act;

"authorized person" means a person acting on behalf of the Minister or the Authority to whom powers have been delegated under section 15 and includes an officer, servant or agent of an authority or any person acting on behalf of the authority;

"borehole" includes a borehole, well, excavation or other opening in the ground or any natural or artificially constructed or improved underground cavity which is used—

(*a*) for intercepting, collecting, obtaining or using ground water; or

(*b*) for disposing of any water or waste below the surface of the ground;

"catchment", in relation to a watercourse or any part thereof, means the area from which any rainfall will drain into, the watercourse or part of the watercourse through surface flow to a common point;

"catchment management committee" means a committee established under section 26;

"catchment area" means an area designated as such under section 25;

"charges", in relation to the use of water from a water resource, includes fees, levies and premiums of any kind;

"construct" includes alter, improve, maintain and repair;

"domestic purposes" includes the provision of water for household and sanitary purposes and for the watering and dipping of stock;

"domestic sewage" includes faecal matter, urine, household slops and other liquid house refuse;

"domestic use" includes use for the purpose of—

(*a*) human consumption, washing and cooking by persons ordinarily resident on the land where the use occurs;

(*b*) watering not more than thirty livestock units;

(*c*) irrigating a subsistence garden; and

(*d*) watering a subsistence fish pond;

"easement" means a right to enter a land owned or occupied by another person for all or any of the following purposes—

(*a*) to construct works on or in that land;

(*b*) to store water on or in that land; or

(*c*) to carry water, drainage or waste under, through or over that land;

"enclosed spring water" means water in a spring which—

(*a*) is situated wholly within the boundaries of the land owned by any one landholder; and

(*b*) does not naturally discharge water into a watercourse abutting on, or extending beyond, the boundaries of that land;

"effluent" means any liquid discharged as a result of domestic, commercial, industrial or agricultural activities;

"environment" means all aspects of the surroundings of humans, including the physical, biological, economic, cultural and social aspects;

"existing right" means any right to abstract and use water or to discharge effluent—

(*a*) which at the commencement of this Act was lawfully acquired, is possessed by, and is being exercised by, any person; or

(*b*) lawfully acquired by any person before the commencement of the Act for the purpose of supplying water to the public;

"hydrological station" includes a gauging, recording or monitoring station or an investigation or monitoring borehole or ancillary works constructed or installed on land;

"inspector" means a person appointed by the Minister or the Authority to exercise the powers of an inspector under this Act;

"in-stream habitat" includes the physical structure of a water resource and the associated vegetation in relation to the bed of the water course;

"ground water" means the water of underground streams, channels, artesian basins, reservoirs, lakes and other bodies of water in the ground, and includes water in interstices below the water table;

"land" includes premises;

"landholder", in relation to land, means the registered owner of the land or the person in whom the land is otherwise vested by, and includes—

(*a*) any person who by any established right, custom or estate whatsoever is, or is entitled to be, the holder or possessor of land;

(*b*) any person lawfully holding or occupying land in accordance with the provisions of any law empowering the allotment of land upon the promise of title, subject to the fulfilment by the allottee of prescribed conditions; and

(*c*) any person to whom a mining lease or mining location has been granted under the Mines and Minerals Act;

Cap. 61:01

"licence" means a licence issued under this Act;

"livestock unit" means a mature animal with a live weight of 250 kilograms and for purposes of this definition—

(*a*) one head of cattle shall be deemed to be 0.7;

(*b*) one horse shall be deemed to be 0.6;

(*c*) one donkey shall be deemed to be 0.4;

(*d*) one goat shall be deemed to be 0.15;

(*e*) one sheep shall be deemed to be 0.15,

of a livestock unit;

"natural resources" means land, soil and water in their physical aspects together with the natural vegetation associated therewith, and the normal balance between them;

"occupier" means any person in occupation of the land or any part of the land or premises;

"owner" includes—

(*a*) the person for the time being receiving the rent of the land in connexion with which the word is used, whether on his own account or as agent or trustee for any other person; or

(*b*) the person who would receive the rent if the land were let to a tenant;

"permit" means a permit issued under this Act;

"pollute", in relation to water, means directly or indirectly to alter the physical, thermal, chemical, biological or radioactive properties of any water so as to render the water less fit for any beneficial purpose for which it is, or may reasonably be, used or to cause a condition which is hazardous or potentially hazardous to public health, safety or welfare, or to animals, birds, fish or aquatic life or other organisms or to plants; and "pollution" has a corresponding meaning;

"premises" includes any building or structure whether of a temporary or permanent nature and any vehicle or vessel;

"public consultation", in relation to any application made, or action proposed to be taken, under this Act, has the meaning assigned to it in section 156;

"regional office" means an office of the Authority established under section 13;

"reserve", in relation to a water resource, means that quantity and quality of water required—

(*a*) to satisfy basic human needs for all people who are or may be supplied from the water resource; and

(*b*) to protect aquatic ecosystems in order to secure ecologically sustainable development and use of the water resource;

"resource quality", in relation to a water resource, means the quality of all the aspects of a water resource including—

(*a*) the water quality stipulated for the reserve;

(*b*) the quantity, pattern, timing, water level and assurance of in-stream flow;

(*c*) the physical, chemical and biological characteristics of the water;

(*d*) the charter and condition of the in-stream and riparian habitat; and

(*e*) the characteristics, condition and distribution of the aquatic biota;

"riparian habitat" means the dynamic complex of plant, animal and micro-organism communities and their non-living environment adjacent to and associated with a watercourse;

"shared waters" means such water resources as form, or are traversed by, the boundaries of Malaŵi with any of its neighbouring states;

"spring" means water emerging from beneath the surface of the ground otherwise than as a result of drilling or excavation operations;

"stream" means the water contained in a watercourse, and includes a river;

"subsistence fish pond" means a fish pond appurtenant to, or used in connexion with, a dwelling or group of dwellings for subsistence of its residents, the produce of which is predominantly consumed by the residents and is not sold or bartered;

"subsistence garden" means a garden, not exceeding 0.5 hectare in area, appurtenant to, or used in connexion with, a dwelling or group of dwellings for the subsistence of its residents, the produce of which is predominantly consumed by the residents and is not sold or bartered;

"surface water" means water flowing, stored or found on the surface of the ground;

"swamp" means any shallow depression on which water collects either intermittently or permanently and where there is a small depth of surface water or a shallow depth of ground water and a slight range of fluctuation either in the surface level of the water or of the ground water level so as to permit the growth of aquatic vegetation;

"underground water" means water naturally stored or flowing below the surface of the ground and not necessarily apparent on the surface of the ground;

"use", in relation to water, includes to withdraw, pump, extract, take, use or reuse or to divert for the purpose of using or reusing that water;

"water" includes—

(*a*) water flowing or situated upon the surface of any land;

(*b*) water flowing or contained in—

(i) any river, stream, watercourse or other natural course for water;

(ii) any lake, pond, swamp, marsh or spring, whether or not it has been altered or artificially improved;

(*c*) ground water;

(*d*) such other water as the Minister may, from time to time, declare to be water;

"Water Tribunal" means the Water Tribunal established under section 122;

"water resource" means any lake, pond, swamp, marsh, stream, watercourse, estuary, aquifer, artesian basin or other body of flowing or standing water, whether above or below ground;

"water right" subject to the provisions of section 38, includes any existing right;

"water table" means—

(*a*) in pervious granular or detrital material, the upper surface of the body of free water which fills all openings in material that is sufficiently pervious to permit percolation; and

(*b*) in fractured impervious rocks and in solution openings, the surface at the contact between the water body in the openings and the overlying ground air;

"watercourse" means any natural channel or depression in which water flows regularly or intermittently;

"works" means any structure, apparatus, contrivance, device or thing for carrying, conducting, providing or utilizing water or liquid waste, but does not include hand utensils or such other contrivances as may be prescribed by rules made under this Act.

(2) In interpreting this Act, an interpretation which promotes the objectives of the Act shall be preferred to one which does not.

Application of the Act

3. The Minister may, from time to time, by notice published in the *Gazette* declare part of this Act not to apply to an area defined in the notice for a purpose defined in the action plan.

Objectives

4. The objectives of the Act are—

(*a*) to promote the rational management and use of the water resources of Malaŵi through—

(i) the progressive introduction and application of appropriate standards and techniques for the investigation, use, control, protection, management and administration of water resources;

(ii) the regulation of all public and private activities which may influence the quality, quantity, distribution, use or management of water resources;

(iii) the coordination, allocation and delegation of responsibilities among Ministers and public authorities for the investigation, use, control, protection, management or administration of water resources;

(*b*) to allow for the orderly development and use of water resources for all purposes including domestic use, the watering of stock, irrigation and agriculture, industrial, commercial and mining uses, the generation of hydroelectric or geothermal energy, navigation, fishing, preservation of flora and fauna and recreation in ways which minimize harmful effects to the environment; and

(*c*) to control pollution and to promote the safe storage, treatment, discharge and disposal of waste and effluents which may pollute water or otherwise harm the environment and human health.

Water vested in the State

5. All water resources are hereby vested in the State, subject to any rights of a user granted by or under this Act or any other written law.

Public ownership of beds and banks of watercourses and lakes and of adjacent land strips

6.—(1) The bed and banks of watercourses and lakes and the adjacent land strips are declared public land and the Authority shall determine and regulate the management thereof.

(2) No person shall cultivate or carry out any activity within the bed and banks of watercourses and lakes and their adjacent land strips except as determined by the Authority under subsection (1).

(3) The Minister, in consultation with the relevant authorities, shall determine the width of the land which is subject to this section.

(4) The Minister, in consultation with the relevant authorities, shall facilitate payment of compensation for loss of property within any land which is a subject matter of this section.

(5) Any person who contravenes subsection (2) commits an offence.

Powers and duties of the Minister

7.—(1) The Minister shall, in accordance with this Act have, and may, exercise control over every water resource.

(2) The Minister shall promote the investigation, conservation and proper use of water resources throughout Malaŵi and ensure the effective exercise and performance by any authorities or persons under the control of the Minister of their powers and duties in relation to water.

(3) The Minister shall be assisted in the discharge of his duties under this section by the Authority established under this Act.

PART II
National Water Resources Authority

Establishment of the Authority

8.—(1) There is hereby established an Authority to be known as the National Water Resources Authority.

(2) The Authority shall be—

(*a*) a body corporate with perpetual succession and a common seal;

(*b*) have power, in and by its corporate name, to sue and be sued; and

(*c*) in the exercise and performance of its powers and functions, to do and permit all such things as may lawfully be done or permitted by a body corporate in furtherance of its objects.

(3) The powers and functions of the Authority shall be exercised and performed under the direction of a governing board, which shall consist of—

(*a*) the following members appointed by the Minister—

(i) a representative of one of the established catchment management committees;

(ii) one representative of associations of water users;

(iii) one representative of a non-governmental organization (NGO) engaged in the water sector; and

(iv) one member as the Minister may, in his discretion, appoint from the private sector as representing key private sector stakeholders;

(*b*) the following *ex-officio* members—

(i) the Secretary responsible for water development or his designated representative;

(ii) the Secretary responsible for health, or his designated representative;

(iii) the Secretary responsible for tourism, or his designated representative;

(iv) the Secretary responsible for agriculture, or his designated representative;

(v) the Secretary responsible for irrigation, or his designated representative;

(vi) the Secretary responsible for land matters, or his designated representative;

(vii) the Secretary responsible for natural resources, or his designated representative;

(viii) the Secretary responsible for environment, or his designated representative; and

(ix) the Secretary responsible for transport, or his designated representative.

(4) In making the appointments, other than of the *ex-officio* members, the Minister shall have regard to—

(*a*) the educational qualifications, experience, expertise, character and integrity of potential candidates for membership; and

(*b*) the degree to which water users, or water users of particular kinds, are represented on the board at the time the appointment is made.

(5) A member, other than an *ex-officio* member, shall hold office for a period of three years and may be eligible for re-appointment from time to time.

(6) The Minister shall designate one member who is not a public officer to be the Chairperson of the Authority.

(7) Members of the Authority shall elect from amongst their number a Vice-Chairperson.

(8) An appointment under this section may be revoked, by the person or his successor in office, who made the appointment.

(9) For the purposes of this section, a vacancy in the office of Chairperson shall be deemed to be an absence from office of the Chairperson.

(10) The terms and conditions of service of a member, including the remuneration, allowances and other expenses to which he is entitled, shall be as determined by the Authority and approved by the Minister.

(11) The office of a member shall become vacant if—

(*a*) he dies, resigns or is removed from office;

(*b*) he absents himself, without valid reasons, from three consecutive meetings of the Authority of which he has had notice;

(*c*) he is adjudged bankrupt;

(*d*) he is adjudged or declared, by any competent court or tribunal, to be of unsound mind; or

(*e*) he is convicted of an offence punishable by imprisonment without an option of a fine.

(12) On vacation of office by a member, the vacancy shall be filled by a person appointed in accordance with the relevant provision of section 8 (3) under which the former member was appointed:

Provided that if the remaining period is less than six months, the Minister may decide not to have the vacancy filled until the expiry of the period.

(13) The Authority shall meet at least four times in every year.

(14) Except as otherwise provided by or under this Act—

(*a*) meetings of the Authority shall be held at such times and places as are fixed by the Chairperson; and

(*b*) the procedure for the convening of meetings and for the conduct of business at those meetings shall be as determined by the Authority.

(15) Half of the members of the Authority shall constitute a quorum at any meeting of the Authority.

(16) The Chairperson or, in the absence of the Chairperson, the Vice-Chairperson and in the absence of both the Chairperson or the Vice-Chairperson, a member appointed by the members then present, and forming a quorum shall preside at a meeting of the Authority.

(17) A decision supported by a majority of the votes cast at a meeting of the Authority at which a quorum is present shall be the decision of the Authority.

(18) The presiding member at a meeting of the Authority shall cause a record of the proceedings at the meeting to be made.

(19) Records made for the purpose of subsection (17) may be destroyed after the expiry of the period determined by the Authority.

(20) The first meeting of the Authority shall be called by the Minister in such manner as the Minister thinks fit.

Disclosure of interest

9.—(1) A member who has a direct or indirect pecuniary interest—

(*a*) in a matter which is being considered, or is about to be considered, at a meeting of the Authority; or

(*b*) in a thing done or about to be done by the Authority,

shall, as soon as possible after the relevant facts have come to his knowledge, disclose the nature of the interest at a meeting of the Authority.

(2) A disclosure at such a meeting that the member concerned—

(*a*) is a member, or is in the employment, of a specified company or other body;

(*b*) is a partner, or is in the employment, of a specified person; or

(*c*) has some other specified interest relating to a specified company or other body or a specified person, shall be deemed to be a sufficient disclosure of the nature of the interest in any matter or thing relating to that company or other body or to that person which may arise after the date of the disclosure.

(3) The Authority shall cause particulars of any disclosure made under subsection (1) or (2) to be recorded in a book kept for the purpose and that book shall be open at all reasonable hours to the inspection, free of charge, by any person.

(4) After a member has, or is deemed to have, disclosed the nature of an interest in any matter or thing under subsection (1) or (2), the member shall not, unless it is otherwise determined—

(*a*) be present during any deliberation, or take part in any decision, of the Authority with respect to that matter; or

(*b*) exercise or perform any powers or functions under this Act with respect to that thing,

as the case may require.

(5) Subsection (4) shall not apply to a member whose interest consists merely of the fact that the member is the holder of a permit.

(6) A contravention of subsection (4) shall not in itself invalidate any decision of the Authority or the exercise or performance of any power or function under this Act.

Powers and functions of the Authority

10.—(1) The Authority shall have the following powers and functions—

(*a*) to develop principles, guidelines and procedures for the allocation of water resources;

(*b*) to monitor, and from time to time reassess, the National Water Policy and the National Water Resources Master Plan;

(*c*) to receive and determine applications for permits for water use;

(*d*) to monitor and enforce conditions attached to permits for water use;

(*e*) to regulate and protect water resources quality from adverse impacts;

(*f*) to manage and protect water catchments;

(*g*) in accordance with guidelines in the National Water Policy, to determine charges to be imposed for the use of water from any water resource;

(*h*) to gather and maintain information on water resources and from time to time to publish forecasts, projections and information on water resources;

(*i*) to liaise with the relevant stakeholders for the better regulation and management of water resources;

(*j*) to advise the Minister concerning any matter in connexion with water resources;

(*k*) to assist the Minister in the coordination of hydrological and hydrogeological investigations;

(*l*) to coordinate the preparation, implementation and amendment of a water action plan and to recommend the water action plan to the Minister;

(*m*) at the request of the Minister, advise any other Minister who may request advice on—

(i) issues of policy relevant to the investigation, use, control, protection, management or administration of water; or

(ii) any other issue that may be referred to it;

(*n*) whether on request or otherwise, to review the law relating to water and advise the Minister on any amendments that may be required for the improvement or better administration of that law;

(*o*) to advise the responsible Minister, as the case may require, on any dispute between agencies involved in water management that may be referred to it; and

(*p*) to undertake any other functions conferred upon it under this Act or referred to it by the Minister from time to time.

(2) The Authority may, with the consent of the Director of Public Prosecutions given under the Criminal Procedure and Evidence Code, undertake the prosecution of any offences arising under this Act or in connexion with the performance of its functions. Cap. 8:01

(3) The Authority shall have such other powers and functions as may be conferred or imposed on it by or under this or any other Act, or as may be reasonably incidental to the exercise or performance of any power or function so conferred or imposed.

(4) Except as to the contents of any report or recommendation made by it, the Authority shall, in the exercise and performance of its powers and functions be subject to such directions as may be given from time to time by the Minister.

(5) A summary of any directions given under subsection (4) during a financial year shall be published in the Authority's annual report prepared under section 23 (1).

Committees of the Authority

11.—(1) The Authority may, for the purpose of performing its functions under this Act, establish committees and delegate to any such committee such of its functions as it considers necessary.

(2) The Authority may appoint as members of a committee established under subsection (1) persons who are or are not members of the Authority and such persons shall hold office for such period as the Authority may determine.

(3) Subject to any specific or general direction of the Authority, a committee established under subsection (1) may regulate its own procedure.

Invited persons

12.—(1) The Authority may in its discretion at any time and for any period invite any person, and the Minister may in like manner nominate an officer in the public service, to attend any meeting of the Authority or of any of its committees and take part in the deliberations of the meeting, but such person or officer shall not be entitled to vote at the meeting.

(2) Section 9 shall apply *mutatis mutandis* to a person or an officer attending a meeting of the Authority pursuant to subsection (1).

Regional offices

13. The Authority may establish such regional offices in or near any catchment area as the Authority may determine.

Staff of the Authority

14.—(1) There shall be an Executive Director of the Authority who shall be appointed by the Authority on such terms and conditions as the Authority may determine.

(2) The Executive Director shall be the chief executive officer of the Authority and, subject to the directions of the governing board, shall be responsible for the management of the affairs of the Authority.

(3) The Authority may appoint such other officers and staff as may be necessary for the exercise and performance of its powers and functions, upon such terms and conditions as it may determine.

Delegation of powers and functions

15.—(1) The Minister may, in writing, delegate to the Authority any of his powers or functions under this Act other than—

(*a*) the powers conferred by this section;

(*b*) the power to make regulations; and

(*c*) the power to determine appeals.

(2) Delegation under subsection (1) may be in relation to a matter or class of matters or to any part of Malaŵi.

(3) The Minister may in writing, revoke a delegation under subsection (1), and the fact that the Minister has delegated a power or function shall not prevent him from exercising that power or function.

(4) Powers and functions delegated under subsection (1) shall be exercised or performed in accordance with the conditions set out in the instrument of delegation.

(5) A person to whom a power or function has been delegated under this section shall have all necessary power to exercise the powers or functions delegated notwithstanding that the person would not be legally empowered were it not for this section.

(6) The person exercising the delegated powers or functions under this section may receive written or oral submission from any person on any matter within the delegation.

(7) Where in the exercise of a delegated power or performing a delegated function the opinion or discretion of the Minister is required, the person may, unless the contrary intention appears, exercise or perform the power or function upon his own opinion or discretion as the case may require.

(8) Where there is a conflict between matters to which regard has to be made with respect to the provisions of this Act and the instrument of delegation, the person acting on behalf of the Minister or an authorized person shall apply the provisions of this Act.

Water resources investigation

16.—(1) The Authority shall provide for—

(*a*) the collection, collation and analysis of data concerning the occurrence, flow, characteristics, quality and use of any water or waste;

(*b*) the systematic gauging and recording of rainfall and of the volume, flow and quality of other water or waste;

(*c*) the construction, operation and removal of gauging, recording and monitoring stations and investigation and monitoring boreholes; or

(*d*) the sampling and analysis of any water or waste.

(2) The Authority may do anything necessary or expedient for or in connexion with the exercise of the powers conferred by subsection (1).

Authority's powers to require records, etc.

17.—(1) The Authority may require any class or type of persons, or the person on whom notice is served, as the case may be, to—

(*a*) keep and maintain records;

(*b*) install, operate and maintain equipment;

(*c*) take samples, dispose of them in a particular manner or submit them to such analysis by such person or class of persons; or

(*d*) provide information to a person,

concerning the investigation, use, control, protection, management or administration of any water or concerning any waste, as may be prescribed in a regulation or notice.

(2) Anything required to be done by a regulation made or a notice given under subsection (1) shall be done at the expense of the person to whom the notice or regulation applies, unless the Authority otherwise determines.

(3) A person who contravenes or fails to comply with or causes or allows any person to contravene or fail to comply with this section, commits an offence.

(4) Any person who furnishes any information under this section or who causes or allows any statement or representation to be made which he knows to be false or misleading in a material particular commits an offence.

National monitoring of, and information on, water resources management

18.—(1) The Authority shall provide for a national monitoring and information system on water resources.

(2) The system shall provide for—

(*a*) the collection and management of data and information regarding water resources and their management; and

(*b*) procedures for gathering data and the analysis and dissemination of information on water resources.

(3) For the purposes of the system established under this section, the Authority may, by order require any person, within a reasonable time or on a regular basis, to provide it with specified information, documents, samples or materials.

(4) Regulations made under this Act may specify requirements for the keeping of records and the furnishing of information to the Authority.

(5) On payment of the prescribed fee, any member of the public—

(*a*) shall have access to information contained in any national information system; and

(*b*) shall be supplied with a copy of the Authority's annual report.

Sources of funds

19.—(1) The funds of the Authority shall consist of—

(*a*) such sums as may be appropriated by Parliament for the purposes of the Authority;

(*b*) any fees, charges, etc., payable under this Act;

(*c*) such other moneys and assets as may vest in or accrue to the Authority in the course of its functions; and

(*d*) such moneys or other assets as may accrue to, or vest in the Authority by way of grants, subsidies, bequests, donations, gifts, subscriptions, rents, interest or royalties from any person.

(2) The Authority shall keep proper books of accounts and other records relating thereto in respect of its funds and shall in every respect comply with the provisions of the Public Finance Management Act. Cap. 37:02

(3) The accounts of the Authority shall be examined and audited annually by auditors appointed by the Authority and approved by the Minister.

Application of revenue from permit charges and licence fees Cap. 37:02

20.—(1) Without prejudice to the provisions of the Public Finance Management Act, the Authority shall retain in a fund managed by it all of the revenue from water use charges payable under a permit, to be applied by the Authority in meeting costs incurred in the performance of its functions.

(2) Without prejudice to the generality of subsection (1), funds retained by the Authority under that subsection may be applied for the payment of compensation payable by the Authority under this Act, whether or not the payment is subsequently recoverable from a permit holder or other person.

Investment powers of the Authority

21.—(1) The Authority may invest any sums which are not immediately required for its objects.

Cap. 37:02

(2) Subject to the provisions of the Public Finance Management Act, the Authority may borrow either temporarily by way of overdraft or otherwise, such sums as it may require for meeting its obligations or discharging its functions under this Act.

Financial year of the Authority

22. The financial year of the Authority shall be the period commencing on the date of commencement of this Act and ending on the following 30th June and thereafter it shall be a period of twelve months ending on 30th June every year.

Annual reports

23.—(1) As soon as practicable, but not later than six months after the expiry of each financial year, the Authority shall submit to the Minister a report concerning its activities during that financial year.

(2) The report referred to in subsection (1) shall be in such form as the Minister shall approve and shall include information on the financial affairs of the Authority, and there shall be appended to the report—

(*a*) an audited balance sheet;

(*b*) an audited statement of income and expenditure; and

(*c*) such other information as the Authority may consider appropriate or as the Minister may direct.

(3) The Minister shall, during the meeting of the National Assembly next following receipt by him of the report referred to in subsection (1), lay the report before the National Assembly and subsequently the report shall be published.

Progress reports

24. The Authority shall, at the end of each financial year, produce a progress report on its activities during that period and shall publish the report.

PART III
Catchment Management Committees

Catchment areas

25.—(1) In accordance with the National Water Policy, the Authority may, by notice published in the *Gazette*, designate a defined area from which rainwater flows or drains into a watercourse, to be a catchment area for the purposes of this Act.

(2) A catchment area designated under this section may include two or more sub-catchment areas.

Establishment of catchment management committees

26.—(1) A catchment management committee may be established for a specific catchment area, after public consultation, on the proposal of the community and stakeholders concerned, or the Authority may establish a catchment management committee on its own initiative.

(2) A proposal to establish a catchment management committee shall at least contain—

(*a*) a proposed name and description of the proposed catchment management committee;

(*b*) a description of the major water resources in the proposed catchment area, including information about the current status of protection, use, development, conservation, management and control of those resources;

(*c*) the proposed functions of the catchment management committee;

(*d*) the proposed funding of the catchment management committee;

(*e*) the feasibility of the proposed catchment management committee in terms of locally available technical, financial and administrative capacity; and

(*f*) an indication of the consultation made in developing the proposal, and the result of the consultation.

(3) The Authority may call for information additional to that required under subsection (2) and may conduct an investigation regarding the establishment of a proposed catchment management committee.

Procedure for establishment of catchment management committees

27. The Authority may, in consultation with the Minister and after receiving a proposal containing the information required in terms of section 26 (1) and any additional information called for or acquired on investigation under section 26 (3) or on its own initiative by notice in the *Gazette*—

(*a*) establish a catchment management committee, give it a name and determine its area; or

(*b*) change or amend the name or area of an existing catchment management committee.

Composition of a catchment management committee

28.—(1) The members of a catchment management committee shall be chosen from among—

(*a*) representatives of ministries, departments or other public bodies responsible for matters relating to water resources in the catchment area;

(*b*) representatives of any regional development authorities and local authorities whose areas of jurisdiction or any part thereof fall within the catchment area concerned;

(*c*) representatives of farmers within the catchment area concerned;

(*d*) representatives of the business community operating within the catchment area concerned;

(*e*) representatives of the non-governmental organizations engaged in water resources management programmes within the catchment area concerned; and

(*f*) other persons who have demonstrated competence in matters relating to the management of water resources.

Functions of catchment management committees

29.—(1) Without prejudice to the provisions of section 25, a catchment management committee shall, in relation to the catchment area for which it is appointed, advise officers of the Authority at the appropriate regional office concerning—

(*a*) water resources conservation, use and allocation;

(*b*) the grant, adjustment, cancellation or variation of any licence and permit under this Act; and

(*c*) any other matters pertinent to the proper management of water resources.

(2) Subject to the relevant Catchment Management Strategy, a catchment management committee may also undertake, on its own initiative and with funding received pursuant to section 31, water resources conservation activities and works.

Authority to assist catchment management committees

30.—(1) The first meeting of a catchment management committee shall be called by the Authority in such manner as the Authority thinks fit.

(2) The Authority shall facilitate the activities of the catchment management committees by making available secretariat services and logistical and administrative support.

Funding and auditing of activities of operational catchment management committees

31.—(1) Catchment management committees wishing to engage in water resources conservation activities and works pursuant to section 29 (2)—

(*a*) shall obtain from the Authority, on request, a percentage from the proceeds of the collection of water charges, in accordance with section 120; and

(*b*) may obtain money from any other lawful source, including the Water Resources Trust Fund established under section 121, for the purpose of carrying out their functions.

(2) Catchment management committees engaging in water resources conservation activities and works and, which for these purposes receive and manage funds, shall submit to the Authority or to the provider of other funding, where applicable, an annual audited statement of their accounts.

Catchment management strategy

32.—(1) The Authority shall, at its own initiative or at the initiative of the relevant catchment management committee, formulate a catchment management strategy for the management, use, development, conservation, protection and control of water resources within each catchment area, in consultation with the relevant catchment management committee and following public consultation.

(2) In the process of formulating a catchment management strategy the Authority shall consult with the departments in charge of, respectively, forestry and the environment, and it shall take into account, but shall not be bound by, any relevant prior determination made by either department pursuant to the legislation in force.

(3) It shall be the duty of the Authority to review the catchment management strategy from time to time.

(4) A catchment management strategy shall—

(*a*) be consistent with the National Water Resources Master Plan;

(*b*) prescribe the principles, objectives, procedures for the management, use, development, conservation and control of water resources within each catchment area;

(*c*) contain water allocation plans which set out principles for allocating water; and

(*d*) provide mechanisms and facilities for enabling the public and communities to participate in managing the water resources within each catchment area.

(5) The catchment management strategy, in force for the time being, shall be published in the *Gazette*.

(6) Without prejudice to the generality of subsection (4) (*d*), the catchment management strategy shall encourage and facilitate the establishment and operation of associations of water users and for conflict resolution and cooperative management of water resources in catchment areas.

(7) The Minister, the Authority and any public authority shall, when exercising any statutory power or performing any statutory function, take into account and give effect to any catchment management strategy in force under this section.

Sensitization of users of watercourses on protection and management of watercourses and other bodies

33. The catchment management committees shall, with the technical assistance of the Authority, and with funding obtained in accordance with section 31, be under a duty to promote and sensitize all users of watercourses and water bodies within the applicable water management area on the protection and management of the watercourses and water bodies and the conservation and equitable, efficient and sustainable utilization of such watercourses and water bodies in conformity with national legislation and with regional and international water and environmental conventions.

PART IV
National Water Policy and National Water Resources Master Plan

National Water Policy

34.—(1) The Minister shall publish in the *Gazette*, the National Water Policy in accordance with which the water resources of Malaŵi shall be managed, protected, used, developed, conserved and controlled.

(2) The Minister shall periodically review the National Water Policy and may, from time to time, publish in the *Gazette* the revised policy.

(3) The National Water Policy shall prescribe the principles, objectives, procedures and institutional arrangements for the management, protection, use, development, conservation and control of water resources.

(4) The Minister, the Authority and all public bodies shall, when exercising any statutory power or performing any statutory function, take into account and give effect to the National Water Policy.

National Water Resources Master Plan

35.—(1) The Minister may, on the basis of data progressively generated under water resources investigations, require the Authority to—

(*a*) prepare, review and keep up-to-date, a comprehensive plan for the investigation, use, control, protection, conservation, management and administration of water resources for the nation; and

(*b*) recommend any revision of it.

(2) The National Water Resources Master Plan shall, among other things, address matters relating to—

(*a*) a water balance for each catchment area that compares forecasted water demand with data and information regarding water availability;

(*b*) proposed options for meeting forecasted demand for each catchment area in which forecasted water demands exceeds available supply, which options may include—

(i) water demand management programmes;

(ii) necessary infrastructure construction;

(iii) any other measure, including appropriate legal reforms considered necessary in achieving the objectives of the National Water Resources Master Plan;

(*c*) the protection of water resources from over-exploitation and from pollution; and

(*d*) the conservation of water resources, including through the recycling and re-use of wastewater, the harvesting of rainwater, and any other suitable conservation practice and technique.

(3) The Minister shall submit the National Water Resources Master Plan recommended to him under subsection (1) to the Cabinet with his recommendations within twenty-one days of receiving it.

(4) The detailed components of the National Water Resources Master Plan and procedures for its preparation, revision and recommendations to and consideration by the Minister may be as prescribed by the Minister, and if the Minister does not prescribe, as may be determined by the Authority.

Action Plan to be adhered to

36. After approval by the Cabinet, the Minister shall by notice published in the *Gazette*, issue the National Water Resources Master Plan which shall be binding to all persons and public authorities.

PART V
Water Abstraction and Use

Reservation of water resource

37.—(1) The Minister, in consultation with the district councils concerned may, by notice published in the *Gazette*, reserve part or all of the flow of a watercourse, including any ground water resource and the water stored in a public reservoir to—

(*a*) meet the domestic use of the water users concerned; or

(*b*) reasonably protect aquatic and wetland ecosystems, including their biological diversity, and to maintain essential ecosystem functions.

(2) Any water resource reserved under subsection (1) shall be taken into account in—

(*a*) the licensing of water abstractions under section 39; and

(*b*) the issuing of a permit for effluent discharge under section 92.

(3) The Minister may allow the use of a reserved water resource if such use is compatible with the purposes of the reserve.

(4) The Minister, the Authority and all public bodies shall, when exercising any power or performing any function in relation to the water resource concerned, take into account and give effect to the requirements of the reserved water resource.

Abstraction of water for domestic use, use of groundwater, and rainwater harvesting

38.—(1) Subject to subsection (4), a person having lawful access thereto may abstract water from a water resource for domestic use without obtaining a licence from the Authority under this Part.

(2) A person having lawful access thereto may abstract and use water for domestic use, subject only to public health and environmental limitations, and any other limitations that may be imposed from time to time by the Authority for purposes of efficient water management practices or in prescribed emergency circumstances.

(3) A person having lawful access thereto may abstract and use groundwater—

(*a*) where none of the necessary works are situated—

(i) within one hundred metres of any body of surface water, other than inclosed spring water, or

(ii) within a groundwater conservation area;

(*c*) by means of hand-dug boreholes; or

(*d*) by means of a borehole not deeper than ten metres.

(4) Subsection (1) shall not apply to a person who abstracts water in bulk from a water resource and supplies it to others for domestic use.

(5) A person has the right to harvest rainwater on his own land or on communal land and to use it for domestic purposes.

Abstraction and use of water subject to licence

39.—(1) No person shall abstract and use water unless authorized to do so under this Part.

(2) A licence under this Part shall be required for any of the following purposes—

(*a*) the abstraction, impoundment and use of water from a water resource; and

(*b*) the drainage of any swamp or other land.

(3) A person who—

(*a*) not being the holder of a licence under this Part, constructs or employs any works for the abstraction or impoundment of water; or

(*b*) being the holder of a licence under this Part, constructs or employs any such works in contravention of the conditions of the licence,

commits an offence.

(4) A holder of a licence authorizing the construction of works who, without the permission of the Authority, takes water from any water resource by means of any work authorized by the licence before the whole of the works authorized by the licence have been inspected and cleared commits an offence.

Application for licence

40.—(1) A person wishing to abstract and use water shall apply to the Authority in the prescribed form for a licence and the application shall contain the following information—

(*a*) the name of the applicant;

(*b*) the water resource from which the proposed abstraction will be made;

(*c*) the proposed location of the abstraction;

(*d*) the type and location of the proposed beneficial use;

(*e*) the names of owner or occupier of the land upon which the proposed beneficial use will be made;

(*f*) the proposed rate and volume of the abstraction;

(*g*) the proposed timing of the abstraction;

(*h*) a description of any waterworks necessary to accomplish the proposed abstraction and put the abstracted water to beneficial use and a proposed schedule for the completion of such waterworks;

(*i*) description of the proposed treatment, if any, that will be given to the abstracted water, including any chemicals proposed to be applied to the water;

(*j*) a description of the volume, rate and chemical composition of any effluent or return flow resulting from application of the abstracted water to beneficial use and a description of the location that any such effluent or return flow is expected to enter a water resource; and

(*k*) any additional information the Minister may prescribe.

(2) The Authority shall, on receipt of an application under subsection (1), give public notice of the application in the prescribed manner.

(3) Any interested person may notify the Authority within such period as may be prescribed that he objects to the grant of a water right and specify the grounds of such objection, upon receipt of such objection the Authority shall invite the person objecting to a hearing.

(4) The Authority shall consider every application and any objections made to it in respect thereof and after consulting such persons and authorities as it may deem necessary, submit the application together with its recommendations to the Minister.

(5) The application for a licence to abstract and use water shall be accompanied by—

(*a*) the prescribed charge; and

(*b*) where applicable, an environmental impact analysis of the proposed abstraction of water upon the environment and existing water users and water resources.

(6) The Authority may, after taking into consideration any objection that may be raised and after consultation with any person or public authority as it may see fit, grant a licence to the applicant.

(7) A grant of a licence under this Part shall not imply representation or guarantee by the Authority, authorized person or public authority that water is or will be available in the place and at the times indicated in the licence.

Criteria for issuing a licence

41.—(1) The Authority shall take the following matters into consideration in determining whether or not to issue a licence—

(*a*) whether or not the proposed abstraction and use of water are consistent with—

(i) the objectives referred to in section 4 and the National Water Policy;

(ii) the National Water Resources Master Plan; and

(iii) any reservation of water made under section 37;

(*b*) the impact of the proposed abstraction upon existing water users, water resources and the water reserved or allocated for environmental uses;

(*c*) the safe yield of the aquifer from which the abstraction is proposed, if the application is for abstraction of ground water;

(*d*) the conformity of the proposed use with the efficient water management practices;

(*e*) the likely effect of the proposed abstraction—

(i) on the quality of any water resource, and on aquatic ecosystems dependent on the resource;

(ii) on Malaŵi's obligations relating to shared waters;

(*f*) the need to ensure the efficient and beneficial use of water resources;

(*g*) any catchment management strategy applicable to the relevant water resource;

(*h*) the likely effect of the proposed water use on the water resource and on other water users;

(*i*) the existence of any traditional community and the extent of customary rights and practices in, or dependent upon, the water resource to which an application for the licence relates;

(*j*) the investments already made and to be made by the water user in respect of the water use in question;

(*k*) the strategic importance of the proposed water use;

(*l*) the probable duration of the activity or undertaking for which a water use is to be authorized; and

(*m*) any additional criteria the Minister may prescribe.

(2) The Minister may issue more than one licence to abstract and use water from one water resource, subject to such terms and conditions that will enable concurrent use of the same resource by the applicants.

(3) A licence shall, subject to this Act, remain in force for the period specified in it, and may be renewed from time to time on application by the licensee, which shall be filed no less than six months before the due expiration date of the licence.

Contents of the licence

42.—(1) A licence to abstract and use water shall specify—

(*a*) the duration of the licence, which shall be determined in accordance with the provisions of section 55;

(*b*) the location of the abstraction and location of the use;

(*c*) the water use or uses for which it is granted;

(*d*) the name and other details of the person to whom it is granted;

(*e*) the conditions under which it is granted;

(*f*) the frequency of review of the licence;

(*g*) whether the licence is subject to periodic review, suspension, amendment or cancellation in accordance with this Act;

(*h*) any fees and charges payable as prescribed in section 119; and

(*i*) any other matter as may be prescribed.

Terms and conditions of licence

43. A licence to abstract and use water shall be issued subject to—

(*a*) the achievement of the goals and objectives of the National Water Resources Master Plan;

(*b*) the protection of the environment and water resource from which the abstraction is made, the stream flow regime, and other existing and potential use of the water resource, including uses by virtue of customary rights and practices, by—

(i) setting out the specific volume of water or percentage of flow which may be abstracted;

(ii) setting out the rate of abstraction;

(iii) specifying the place where water may be abstracted;

(iv) specifying the times when water may be abstracted and used, or not used;

(v) limiting the volume of water which may be impounded and stored;

(vi) specifying locations where a watercourse may be impounded and where water would be stored;

(vii) requiring the licensee to become a member of a local association of water users, where appropriate, before water may be abstracted; and

(viii) adding any such terms regarding protection of the water resource, and stream flow regime or existing or potential uses of water resource which the Minister determines to be appropriate;

(*c*) proper water management, by—

(i) specifying efficient water resources management practices and general requirements for any water use, including water conservation measures;

(ii) requiring monitoring, analysis and reporting by the licensee on every water use dependent upon the licence, including bulk uses or local authority uses, by specifying the aspects of water use to be monitored and reported, and the devices to be used for such monitoring;

(iii) requiring the preparation and approval of a water resources management plan;

(iv) requiring the licensee to make water available to any person specified in the licence; and

(v) adding any such terms regarding proper water resources management which the Authority determines to be appropriate;

(*d*) the proper discharge or disposal of any return flow or effluent, by—

(i) specifying the water resource to which and the manner in which return flow or effluent shall be returned or disposed of;

(ii) specifying permissible levels for some or all of the chemical or physical components of the return flow or effluent;

(iii) specifying the treatment to which the return flow or effluent shall be subject, before its return or disposal;

(iv) specifying the volume and rate of discharge of return flow or effluent which may be returned or disposed of;

(v) adding such terms regarding discharge or disposal of excess flow or effluent which the Authority determines to be appropriate; and

(*e*) the accommodation of any reasonable requirements of a community.

Reference of licences to other authorities

44.—(1) Where the Authority proposes to grant, or to amend the terms of, a licence under this Part, it shall refer the proposal, together with a copy or summary of the application and appropriate plans, specifications and other information to any relevant public authority.

(2) A public authority to which a proposal is referred under subsection (1) shall inform the Authority in writing within thirty days after the day on which the proposal was referred to it—

(*a*) whether the proposal is supported or whether there are objections to it;

(*b*) whether, and if so, what special terms should be included in the proposed licence or amendment.

(3) The Authority shall—

(*a*) take into account any report and comments received under subsection (2);

(*b*) refuse to grant the proposed licence or make the proposed amendment if a competent public authority submits a written report objecting to the proposal on the grounds that public health is likely to be endangered by the proposed licence or amendment; and

(*c*) refuse to grant the proposed licence or make the proposed amendment if an Environmental Impact Assessment carried out pursuant to the provisions of the Environment Management Act and the Environment Impact Assessment Guidelines determines that the environmental is likely to be endangered by the proposed licence or amendment.

Cap. 60:02

Exemption of works

45. Subject to guidelines established by the Minister from time to time, the Authority may exempt—

(*a*) a public authority; or

(*b*) a class of persons or works,

from all or any of the provisions of section 39 on such conditions as it may deem fit.

Issue of temporary licence

46.—(1) The Authority may, if in its opinion exceptional circumstances warrant such action, grant a temporary licence authorizing, unconditionally or subject to conditions, the use of water from a water resource and construction of the works required therefor, without subjecting the application to public consultation.

(2) In considering whether or not to grant a licence in accordance with this section, the Authority shall have regard to the extent to which the grant of such a licence would be likely to interfere with the domestic requirements of other users.

(3) A licence granted in accordance with this section shall not be granted or renewed so as to be in force for a period exceeding, or for periods which in the aggregate exceed, one year.

Licence conditional on inspection of works

47. Where under section 40 (1) (*h*) a licence includes an authorization to construct necessary works, the licensee shall not commence operations under the licence unless and until the relevant works have been inspected and cleared by the Authority.

Licensee to inform Authority of change of location of water use

48. A licensee shall inform the Authority of any change in the location of use of the water allowed to be abstracted under a licence, including in particular upon the subdivision of the land on which the water is used, or for the benefit of which the water is used.

Variation of a licence owing to change in circumstances, etc.

49.—(1) Whenever it is shown to the satisfaction of the Authority that, owing to increased demand or other cause, the use of water under a licence, or the method or point of diversion or other manner in which the water is so used causes—

(*a*) a deterioration in the quality of water;

(*b*) a shortage of water for domestic purposes; or

(*c*) a shortage of water for any other purpose which in the opinion of the Authority should have priority,

it may vary the licence so as to alter the discharge or quantity of water or any other aspect of water use authorized by the licence, or alter the method or point of diversion or other specifications, terms or conditions of the licence.

(2) No licence shall be varied under this section unless notice of the proposed variation has been served on the licensee and the licensee has been given a reasonable opportunity to show cause to the Authority why the licence should not be cancelled or varied.

Cancellation of a licence

50.—(1) The Authority may cancel a licence where the licensee has—

(*a*) failed to comply with any express or implied condition to which the licence is subject;

(*b*) taken or used more water than he is entitled to take in any period;

(*c*) taken or used water for a purpose other than that for which he is entitled;

(*d*) failed to comply with any provision of this Act; or

(*e*) not made full beneficial use of the licence within the two preceding years.

(2) No licence shall be cancelled under this section unless notice of the proposed cancellation has been served on the licensee and the licensee has been given a reasonable opportunity to show cause to the Authority as to why the licence should not be cancelled.

(3) No compensation shall be payable to any licensee whose licence has been cancelled pursuant to this section.

Cancellation or variation of a licence for a public purpose

51.—(1) Subject to section 52, where the Authority is of the opinion that in order to make water available for a public purpose it is necessary to cancel or vary a licence, the Authority may cancel or vary the licence.

(2) The Minister may, by notice published in the *Gazette*, declare any purpose to be a public purpose for the purpose of this section.

(3) The Authority shall pay compensation to any licensee whose licence has been cancelled pursuant to this section.

Variation of licence following change in flows

52. Where it is established that, for any reason beyond the reasonable control of the Authority, the natural flow in a watercourse available to all users has dropped or is likely to drop so that more water is permitted to be diverted, stored, or used than is available in the watercourse, the Authority shall hold a public hearing into the matter and thereafter may amend any or all licences to divert, store, or use water from that watercourse in an equitable and fair manner as the Authority may deem appropriate.

Variation of a licence at request of licensee

53.—(1) On the application by a licensee, the Authority may vary the licence or any condition attached to a licence in accordance with the application of the licensee or on such conditions as the Authority may deem necessary having regard to the circumstances.

(2) The Authority may vary the licence so as—

(*a*) to vary the point of diversion or abstraction of the water used under the licence;

(*b*) to vary the use of water authorized by the licence; or

(*c*) to permit the mixture of waters authorized to be taken or used with those authorized to be taken or used by another licence, whether held by the same or another licensee;

(*d*) to remedy any defect whereby the licence is incomplete or indefinite in its terms and conditions; or

(*e*) to vary any other term or condition of the licence,

if the Authority is satisfied that the variation is not contrary to the public interest or the rights of others.

(3) A variation relating to—

(*a*) the use of water authorized by the licence; or

(*b*) a term or condition of a prescribed kind,

shall not be made without public consultation.

Effects of expiry or cancellation of a licence to abstract and use water

54. If a licence to abstract and use water expires and is not renewed, or is cancelled the Minister may—

(*a*) require the licensee, at the licensee's expense, to remove any liens or other restrictions preventing the free use of the abstraction works;

(*b*) order the licensee to restore, at the licensee's expense, the state of affairs which existed before a licence was issued, if doing so is reasonable and practicable under the circumstances; and

(*c*) enter into an arrangement with the licensee or any other person for maintenance of the impoundment, abstraction or effluent discharge works.

Lease of licence to abstract and use water

55.—(1) A licensee may lease his licence to another person for a period not exceeding six months, after giving thirty days' notice to the Authority.

(2) A licensee may only lease his licence to another person for a period longer than the period referred to in subsection (1) if such lease is approved by the Authority.

(3) An application for approval of the leasing of a licence under subsection (2) shall be submitted to the Authority for consideration in accordance with subsection (4).

(4) Upon receipt of an application for approval of the leasing of a licence, the Authority shall consider—

(*a*) whether the terms and conditions of the proposed lease is consistent with the terms and conditions of the licence; and

(*b*) any deviation from the terms and conditions of the licence that may impact adversely upon other persons and the environment.

(5) The Authority may, within ninety days from receipt of the application for approval of the leasing of a licence, grant the application with or without conditions or refuse the application.

Succession to a licence to abstract and use water

56. A licence may be passed on to a named licensee as a successor-in-title at death or transfer, but such passage shall not extend the duration of the licence.

Abandonment of permitted or licensed activities

57.—(1) A licensee who ceases to utilize water in accordance with the terms of his licence shall, by notice to the Authority, abandon the whole of the licence or any part capable of separation.

(2) Upon such abandonment, the Authority may direct the licensee to remove, within such time as it may specify, all or any works erected in connexion with the licence.

(3) A licensee who neglects or fails to remove the works concerned commits an offence, and the Authority may remove all or any portion of the works, and recover the cost of their removal from the licensee as a civil debt in any court of competent jurisdiction.

(4) Nothing in this section shall be construed as requiring or authorizing a licensee wholly or in part to abandon a licence contrary to the conditions of any mortgage or charge upon the land to which the licence is appurtenant.

Surrender of licence

58.—(1) Where—

(*a*) a licence is to be cancelled or varied by the Authority in pursuance of this Act;

(*b*) a licence has been granted on the basis of false or misleading information supplied by the licensee; or

(*c*) a licence has been granted in contravention of the provisions of this Act or any regulations made under this Act with respect to the terms and conditions of such a licence,

the Authority may, by notice served on the licensee, require the licensee, if he has not already done so, to surrender the licence to the Authority:

Provided however that, if subsection (1) (*c*) a defect has been detected, the Authority shall cure such defect if it is in its power to do so, whereupon this section shall not apply.

(2) A licensee who fails to comply with such a notice commits an offence.

Register of licences

59.—(1) The Authority shall establish and maintain a register of all licences issued and in force including details of the licences and their terms and conditions and the results of monitoring and enforcement action taken by the Authority regarding each licence.

(2) Information contained in the register shall be accessible by the public on payment of the prescribed fee.

Combined licence to abstract and use water and to discharge effluent

60.—(1) Where the same person needs a licence to abstract and use water and a permit to discharge effluent, the Authority shall grant to the person a combined licence to abstract and use water and to discharge effluent.

(2) A person to whom a combined licence has been issued shall not require a separate effluent discharge permit under section 92.

Duration of a licence to abstract and use water

61. A licence to abstract and use water shall be granted for a duration of at least five years.

Renewal of a licence to abstract and use water

62.—(1) A licence to abstract and use water issued under this Part may be renewed at least three months prior to its expiry, if the licensee submits an application for renewal to the Authority in the prescribed manner.

(2) When considering an application for renewal made under subsection (1) the Authority shall consider the application taking into account—

(*a*) the provisions of section 41; and

(*b*) the provisions of section 43.

Right to transfer saved water

63. A person who has saved water whether from harvesting the same or otherwise may transfer to another person the water so saved, in return for a price or free of charge:

Provided that in times of water scarcity it shall be obligatory for any person to transfer saved water to the persons who need the water, as directed by the Authority under section 65.

Easements for works

64.—(1) A licensee who authorizes the construction of works for a portion thereof that would, when constructed, be situated upon lands not held by the licensee shall acquire an easement on, over or through the land on which the works would be situated and, unless the works have previously been lawfully constructed, shall not construct or use the works unless and until he has acquired such an easement by an agreement.

(2) A licensee who wishes to bring water to, or drain water from his land over land owned or occupied by another person, may apply to the Authority for the creation of an easement over that land if he has been unable to obtain an easement by agreement with the owner or occupier of that land.

(3) A licensee who wishes to drain waste from his land over land owned or occupied by another person may apply to the Authority for the creation of an easement over that land if he has been unable to obtain an easement by agreement with the owner or occupier of that land.

(4) On receiving the application under subsection (2) or (3), the Authority shall, in the prescribed manner, give notice to the owner, occupier or any other person having an interest in that land.

(5) A person who has any objection to an application made under subsection (2) or (3) may give notice of objection to the Authority in a manner and within the period that may be prescribed.

(6) Subject to section 152 and after giving a hearing to all persons who have an interest in the land, including the applicant, who wish to be heard, the Authority may create an easement over the land in the prescribed form as may be appropriate.

(7) An easement under subsection (6) may make provision for—

(*a*) the construction of works necessary to carry water or waste across that land;

(*b*) construction of fences, bridges, crossings or other works in that land;

(*c*) the amount of compensation, if any, to be paid to the owner, occupier or other person having interest in that land,

and the person having the easement shall comply with the provisions.

(8) Any person aggrieved by the decision of the Authority under subsection (6) may appeal to the Water Tribunal against the decision, if the decision was made without his consent.

(9) If a person who has an easement fails to comply with subsection (6), the Authority may cancel the easement and notify the person and the Commissioner for Lands.

(10) If the person who has an easement fails to maintain any works he constructed under this section, the owner or occupier of the land on which the works are situated may maintain or repair the works and recover the reasonable costs as a civil debt from the person who has the easement.

(11) Any compensation due under this section which remains unpaid for an unreasonable period may be recovered as a civil debt.

(12) An easement created under this section shall terminate after six months after the date of creation, unless it is registered with the Commissioner for Lands.

Emergency powers in case of shortage of water

65.—(1) For the purposes of this Act, a drought shall be deemed to exist in any area when the Minister, upon such information as seems to him sufficient, by order published in the *Gazette*, declares that a drought exists in that area.

(2) If the Minister, on the advice of the Authority, is satisfied that, by reason of an exceptional shortage of rain or by reason of accident or other unforeseen circumstances, a serious deficiency of water for essential domestic purposes exists or is threatened in any area, he may, by order—

(*a*) declare that an emergency exists; and

(*b*) direct a person who has a supply of water in excess of his needs for domestic purposes to supply to the area concerned, or to a specified person in the area, such quantity of water, and for such period, as the order may specify.

(3) Any person so directed by an order under this section who fails to comply with the provisions of the order concerned commits an offence.

(4) An order under this section may require or authorize—

(*a*) the laying of pipes and the construction of works on any land;

(*b*) the entry on to any land by servants or agents of the Authority; and

(*c*) such other measures as the Minister may consider necessary for the giving and taking of any such water.

(5) If a person to whom an order under this section is directed fails to comply with the order, the Minister, or any person deputed by him for the purpose—

(*a*) may take possession of the water supply and operate any works of the person concerned for the drawing, diversion or use of water; and

(*b*) shall have and may exercise the person's rights in connexion with them during the period of the order, subject to any conditions imposed by the order.

(6) It shall be the duty of any person exercising any powers under this section to do so with reasonable care and in such a manner as to cause as little damage as possible in so doing, and subject to compensation for any damage done.

(7) The compensation made under subsection (5), or such proportion of it as the Minister may determine, may be recovered by the Minister, as a debt due to the Government, from a person benefiting by the supply of water under the order.

(8) A person who, without lawful authority, hinders or obstructs any person acting in pursuance of an order under this section, or interferes with any works constructed or under construction in pursuance of such an order shall be guilty of an offence.

PART VI
Control and Protection of Groundwater

Groundwater conservation areas

66.—(1) Where the Authority is satisfied that, in any area, special measures for the conservation of groundwater are necessary in the public interest—

(*a*) for the protection of public water supplies; or

(*b*) for the protection of water supplies used for industry, agriculture or other private purposes,

it may, following public consultation, by order published in the *Gazette* declare the area to be a groundwater conservation area.

(2) The Authority may impose such requirements, regulate or prohibit such conduct or activities, in or in relation to a groundwater conservation area as the Authority may think necessary to impose, regulate or prohibit for the protection of the area and its groundwater.

Issuing of licence not guarantee to supply of water

67.—(1) The issuing of a permit under this Part shall not be construed as a guarantee, express or implied of a supply of groundwater.

Permit to drill a borehole or to engage in borehole drilling programme for groundwater exploration

68.—(1) No person shall drill, construct, enlarge or otherwise alter a borehole, or engage in borehole drilling programme, for the purpose of exploring for groundwater, except in accordance with the provisions of a permit issued under subsection (4).

(2) Any person who wishes to drill, construct, enlarge or alter a borehole, or engage in a borehole drilling programme for exploring for groundwater, shall apply to the Authority for a permit to drill a borehole or to engage in borehole drilling programme in the prescribed manner.

(3) An application for a permit to construct or drill a borehole shall be made in the manner and it shall be subject to such terms and conditions as the Authority thinks fit, including a term of duration which shall not exceed one year:

Provided that, where the borehole is intended to be constructed or drilled inside the area of operation of a Water Board—

(*a*) a notice of intent under subsection (1) shall also be filed with such Board; and

(*b*) such Board may advise the Authority as to why, in the Board's opinion, an application should not be granted, but the Authority shall not be bound by the advice of the Board.

(4) Upon receipt of the application for a permit under subsection (2), the Authority shall, among other things, consider—

(*a*) the safe yield of the aquifer from which the abstraction of water is proposed to be made; and

(*b*) the conformity of the proposed use with efficient water management practices.

(5) After considering the application in accordance with subsection (3), the Authority may issue a permit to drill a borehole or to engage in a borehole drilling programme subject to the prescribed terms and conditions, and such other conditions as the Minister may prescribe.

(6) The provisions of Part V shall apply, with the necessary changes, to a permit to drill a borehole or to engage in borehole drilling programme issued under this section in relation to the renewal, transfer, succession, suspension, variation or cancellation of such permit.

(7) Unless otherwise exempted, a person constructing a borehole shall keep a record of the progress of the work, which shall include—

(*a*) measurements of the strata passed through and the specimen of such strata;

(*b*) measurements of the levels at which water was struck; and

(*c*) measurements of the quantity of water obtained at each level, the quantity finally obtained and the rest level of the water.

(8) A person to whom subsection (7) applies shall allow any person authorized by the Authority, at any reasonable time—

(*a*) to have free access to the borehole;

(*b*) to inspect the borehole and the material excavated from it;

(*c*) to take specimens of such material and of water abstracted from the borehole; and

(*d*) to inspect and take copies of or extracts from the record required to be kept under this section.

(9) Where the person constructing a borehole on any land is not the occupier of the land, the obligation to allow any person authorized by the Authority to exercise his rights under this section shall be the obligation of the occupier of the land as well as of the person constructing or drilling a borehole.

(10) The Authority may by notice, whether conditionally or subject to specified conditions, exempt any person, in such circumstances as may be specified in the notice, from the operation of subsections (7) and (8).

Submission of records

69. A person constructing or drilling a borehole, if required to keep records under this Part, shall, within one month of the cessation of the construction, send to the Authority—

(*a*) a complete copy of the record, together with the specimens referred to in the record; and

(*b*) particulars of any test made, before such cessation of the construction, of the yield of water, specifying—

(i) the rate of flow throughout the test and the duration of the test; and

(ii) where practicable, the water levels during the test and thereafter until the water has returned to its natural level;

(*c*) a statement of whether, in his opinion (as determined by testing) the water is suitable for drinking or is highly mineralized, as the case may be; and

(*d*) if required by the Authority, such water samples as it may consider necessary.

Tests on neighbouring boreholes

70.—(1) Where any borehole is being constructed within eight hundred metres of an existing borehole, the Authority may, by notice require the person constructing the borehole to apply tests, to be specified in the notice, to the existing borehole and to supply to the Authority the particulars of the results of such tests including the rate of pumping and rest levels of water.

(2) Where the borehole to which the tests are to be applied is situated on the property of a person other than the person constructing the borehole and the person constructing the well or borehole is unable for any reason to apply the test, the Authority may, by notice, require the person upon whose property the existing borehole is situate to apply the tests to be specified in the notice to him, and to supply to the Authority the particulars of the results of such tests.

Contractor deemed to be constructor

71. Where any contractor constructs or drills a borehole on land belonging to or occupied by any other person, the contractor shall be deemed, for the purposes of this Act, to be the person constructing or drilling the borehole, and he shall be jointly and severally liable with the owner of the land to the discharge of the obligations under section 69.

Records may be required to be treated as confidential

72.—(1) A person constructing or drilling a borehole or the owner or occupier of the land on which construction takes place may give notice to the Authority requesting that—

(*a*) any copy of, or extract from, the record required to be kept under this Act; or

(*b*) any specimen taken or any other particulars connected with the borehole,

be treated confidentially.

(2) In response to such a notice, the Authority shall, if sufficient cause has been shown, thereupon not allow such copy, extract, specimen or other particulars, except in so far as it contains or affords information as to water resources or supplies, to be published or shown to any person other than a member of the Authority without the consent of the person giving the notice:

Provided that, if at any time the Authority gives notice to the person that, in its opinion, his consent is unreasonably withheld—

(*a*) the person may, within three months after the notice given by the Authority, appeal to the Water Tribunal; and

(*b*) if, at the expiration of that period, no such appeal has been made or, after hearing the appeal, the Water Tribunal does not make an order restraining it from doing so, the Authority may proceed as if such consent had been given.

Waste of groundwater

73.—(1) No person shall—

(*a*) cause any groundwater to run to waste from any borehole, except for the purpose of testing the extent or quality of the supply or cleaning, sterilizing, examining or repairing the borehole;

(*b*) conduct the water from any borehole through any channel or conduit so that more than twenty per cent of the water is lost between the point of extraction and the point of use:

Provided that, where the water from any borehole is conducted through channels or conduits together with water from other sources, no person shall permit the waste of more than twenty per cent of the water in conducting the water from the point of extraction from the borehole to the point of use;

(*c*) use any water from any borehole for the purpose of domestic use or the watering of stock, except where such water is carried through pipes fitted with float valves or other satisfactory means of control, to prevent waste:

Provided that, where groundwater interferes or threatens to interfere with the execution or operation of underground works, whether water works or not, the Authority may, in any particular case, by notice permit such water to waste upon such conditions, regarding quantity and method of disposal, as the notice may specify.

Contamination and pollution of groundwater

74. Every person abstracting groundwater by means of a borehole shall, in order to prevent contamination or pollution of the water—

(*a*) effectively seal off to a sufficient depth any contaminated or polluted surface or shallow water in rock openings or soft broken ground;

(*b*) effectively seal the top of the borehole between the surface casing and the internal pump column, and the suction or discharge pipe;

(*c*) dispose of all return or waste water by means other than by return to the borehole;

(*d*) extend the borehole casing to a point not less than twenty centimeters above the elevation of the finished pump house or pump pit floor;

(*e*) use either welded or screw type borehole joints on the casing, if made of metal;

(*f*) dispose of effluents or drainage from any household, stable, factory, trade premises or other premises in such a manner as will prevent any such effluent or drainage from reaching such seal or groundwater; and

(*g*) carry out such other work as the Authority may by order direct, from time to time, for the prevention of contamination or pollution.

Authority may order special measures to safeguard groundwater resources

75. If—

(*a*) during the construction of or drilling a borehole, water is encountered in an aquifer;

(*b*) water from a water table or lower aquifer tends to flow from the upper aquifer to the lower aquifer; and

(*c*) in the opinion of the Authority this is likely to prove detrimental to the groundwater resources of the area,

the Authority may order what special measures shall be taken by the owner of the borehole so that the water from the higher aquifer cannot flow to the lower aquifer.

Artesian boreholes to be cased

76. Every artesian borehole and every sub-artesian borehole shall be efficiently cased, capped or furnished with such appliances as will readily and effectively arrest and prevent the flow therefrom over the surface of the ground or wasting from the borehole through the strata through which it passes.

Defective boreholes

77.—(1) Any borehole which encounters salt water, in this Part referred to as a "defective borehole", shall be securely cased, plugged or sealed off by the owner of the borehole, so that the salt water is confined to the strata in which it was found, and such casing, plugging or sealing shall be done in such a manner as effectively to prevent the salt water from escaping from the strata in which it was found into any other water bearing strata or on to the surface of the ground.

(2) This section shall apply to boreholes constructed or drilled before or after the commencement of this Act.

Interference with defective borehole, etc.

78. Any person who re-cases or removes the plugs or seals from a defective borehole, or deposits or causes or knowingly permits the deposit of, any dirt, rubbish or other material in any such borehole, except with the written permission of the Authority, commits an offence.

Application to carry out work on a defective borehole

79.—(1) Before any defective borehole is re-cased or the plugs are removed, the owner of the borehole, or his duly authorized representative, shall file with the Authority an application for permission to carry out such re-casing or the removal of the plugs or seals.

(2) The application shall contain such information as the Authority may require in relation to—

(*a*) the name and address of the owner of the borehole;

(*b*) its location, depth and size;

(*c*) the amount and location of casing or sealing in the borehole;

(*d*) the distance below the surface of the ground to the water level in the borehole;

(*e*) the strata penetrated;

(*f*) the distance from the surface of the ground to the top of the salt water stratum and the thickness of the salt water stratum; and

(*g*) any other matter specified by the Authority in respect of the borehole.

(3) The application shall also state the methods proposed for re-casing, re-plugging or resealing of the borehole.

Instructions to deal with defective borehole

80. The Authority, after consideration of any application under section 79, may call for additional data, and may make such investigation as it considers necessary, and if the borehole is found to contain salt water, shall by order give instructions to the applicant, specifying—

(*a*) the work that shall be done by the owner to place it in a satisfactory condition; and

(*b*) the time that shall be allowed to complete the work, and may inspect such work while it is in progress.

Authority may inspect borehole

81. The Authority may on its own initiative, or upon information or complaint from any source, make an examination of any borehole suspected of containing salt water, and may by order issue instructions for curing any defects in the borehole.

Sworn statements to be submitted

82.—(1) Upon completion of the works in pursuance of any instructions issued under this Act—

(*a*) the contractor who carries out the work; or

(*b*) if the work is done without a contractor, the owner of the borehole,

shall file with the Authority a statement sworn or affirmed specifying in detail the manner in which such work was done.

(2) The statement shall be filed within thirty days after the completion of the work.

Additional work on defective borehole

83.—(1) Upon receipt of a statement under section 82, the Authority shall determine, either from the statement or from inspection or test, whether the work has been satisfactorily performed.

(2) If the Authority determines that the work has not been satisfactorily performed, it shall, by order, issue additional instructions specifying the additional work required to place the borehole in a satisfactory condition, and specifying the time for the completion of such additional work.

(3) Upon the completion of such additional work, a statement sworn or affirmed shall be filed with the Authority as provided for in section 82.

Licensing of borehole drillers and constructors

84.—(1) No person shall engage in the trade of drilling or construction of boreholes unless the person is licensed as a borehole driller or a borehole constructor in accordance with the provisions of subsection (2).

(2) The Authority on application made to it in the prescribed manner and after being satisfied that the applicant meets the requirements specified in subsection (3) shall issue the applicant with a licence as a borehole driller or borehole constructor.

(3) The Minister shall prescribe the requirements including professional qualifications, terms and conditions that any person wishing to be issued with a licence as a borehole driller or borehole constructor under subsection (2) shall comply with and the circumstances under which a licence may be cancelled or suspended.

PART VII
Protected Areas and Controlled Activities

Protected areas

85.—(1) Where the Authority is satisfied that special measures are necessary for the protection of a catchment area or part thereof, notably from deforestation and from other land degradation activities, it may, with the approval of the Minister, by order published in the *Gazette*, declare such an area to be protected area.

(2) The Authority may impose such requirements, and regulate or prohibit such conduct or activities, in or in relation to a protected area as the Authority may think necessary to impose, regulate or prohibit for the protection of the area and its water resources.

Controlled areas in relation to drought

86. The Minister may, in relation to any water source, where the situation so requires due to shortage or anticipated shortage of water, by notice published in the *Gazette* and in such other manner appropriate for such area as the Minister may see fit, on the advice of the Authority, declare any part of Malaŵi to be a controlled area and establish a comprehensive and integrated plan for managing land, water and other natural resources within that area.

Controlled activities

87.—(1) Activities which constitute controlled activities include—

(*a*) irrigation of any land with waste water generated through any industrial activity or a water work;

(*b*) an activity aimed at the modification of atmospheric precipitation;

(*c*) artificial recharge of an aquifer with any waste or water containing waste; and

(*d*) any activity regarded by the Minister as likely to have a detrimental impact on water resources and declared by him as a controlled activity.

(2) Before declaring an activity as a controlled activity the Minister shall publish a notice in the *Gazette*—

(*a*) specifying the activity or class of activities proposed to be declared;

(*b*) listing all activities previously already declared controlled activities; and

(*c*) invite written comments on the proposed declaration to be received by him not later than sixty days after publication of the notice.

(3) No person shall undertake a controlled activity except under a permit granted by the Authority under Part VIII of this Act, *mutatis mutandis*.

PART VIII
Prevention and Control of Water Pollution

Prohibition of pollution

88.—(1) A person or public authority who, unless authorized under this Part, causes or allows—

(*a*) effluent to come into contact with any water;

(*b*) effluent to be discharged directly or indirectly into water; or

(*c*) water to be polluted,

commits an offence.

(2) Without prejudice to the provisions dealing with the safeguarding of existing lawful uses of water, subsection (1) shall apply to permits granted and works constructed before the commencement of this Act.

(3) In any proceedings for an offence under subsection (1), proof of the existence of a drain, pond, dump or other means by which effluent may be conveyed, retained or deposited as to come into contact, directly or indirectly, with water shall be *prima facie* evidence of pollution of that water.

(4) A person or public authority contravening subsection (1) through which damage is caused shall be liable to pay the cost of remedying the damage caused and restoring the environment, as far as is possible, to the condition that would have existed if the damage had not been caused.

(5) Where a person or authority fails to comply with subsection (4), the Authority may—

(*a*) apply to court for enforcement of compliance with the provisions; or

(*b*) enter any land and take such measures as may be necessary to ensure compliance with the provisions.

(6) In any proceedings under subsection (5), the court may, on application by the Authority acting on its own initiative or at the request of a catchment management committee or a Local Authority, require that person or authority to pay into court a sum not being less than one hundred per cent of the cost estimated by the Authority of remedying the damage caused and restoring the environment.

Pollution of water resources from an activity or process

89.—(1) Any person who owns, controls, occupies or uses land on which an activity or process is or was performed and which, unless authorized under this Part, causes, has caused or is likely to cause pollution of a water resource, shall take all such measures as may be necessary to prevent any such pollution from occurring, continuing or recurring.

(2) Measures referred to in subsection (1) may include—

(*a*) ceasing, modifying or controlling any activity or process causing the pollution;

(*b*) complying with any prescribed effluent standard or waste management practices;

(*c*) containing or preventing the movement of pollutants;

(*d*) eliminating any source of the pollution;

(*e*) remedying the effects of the pollution; and

(*f*) remedying the effects of any disturbance to the bed and banks of a watercourse.

(3) The Authority may direct any person who fails to take the measures required under subsection (1) or any one of them to—

(*a*) commence taking specific measures before a specific date; and

(*b*) complete them before a specific date.

(4) If a person fails to comply or to comply adequately with a directive given under subsection (3) the Authority may take the measures it considers necessary to remedy the situation and recover all costs incurred as a result thereof from the following persons—

(*a*) any person who is or was responsible for or who directly or indirectly contributed to the pollution or the potential pollution;

(*b*) the owner of the land at the time when the pollution or the potential pollution occurred or his successor in title;

(*c*) the person in control or in use of the land at the time when—

(i) the activity or the process was performed, or

(ii) the situation existed; or

(*d*) any person who negligently failed to prevent—

(i) the activity or the process being formed;

(ii) the situation from arising; or

(*e*) any other person who, in the opinion of the Authority, benefited from the measures undertaken by it under subsection (4), to the extent of such benefit.

Declaration of prohibited substances by the Authority

90. The Authority shall prescribe a list of substances which shall not be discharged under any circumstances under this Part.

91. The Minister shall, after consultation with competent authorities, prescribe standards of effluent quality with which effluent discharges shall comply.

Standards of effluent quality

92.—(1) A person who wishes to discharge effluent shall apply to the Authority for a discharge permit in the prescribed manner.

Application for effluent discharge permit

(2) The Authority shall, on receipt of an application under subsection (1), give public notice of the application in the prescribed manner.

(3) Any person with an interest in the outcome of the application made under this section may give notice of objection to the Authority in a manner and within the time prescribed.

(4) In determining whether or not to issue a permit to discharge effluent, the Authority shall consider the following—

(*a*) whether the proposed discharge is consistent with the National Water Resources Master Plan;

(*b*) the use of water from any source to which the discharge will be made;

(*c*) the standards for waterborne contaminants adopted by a competent authority;

(*d*) the impact of the discharge on existing water uses;

(*e*) the impact of the proposed discharge upon groundwater;

(*f*) any impact of the proposed effluent discharge upon the environment, including owners and occupiers of land and water resources in the vicinity of the proposed effluent discharge or construction of effluent treatment facility or disposal site;

(*g*) the effect of the proposed effluent discharge on Malaŵi's obligations relating to shared watercourses;

(*h*) the need to ensure the efficient and beneficial use of water resources; and

(*i*) any additional criteria the Minister may prescribe.

93. A permit to discharge effluent shall specify—

Contents of the permit

(*a*) the name and other details of the person to whom it is granted;

(*b*) the location of the discharge;

(*c*) the location of the relevant effluent treatment facility, if any;

(*d*) the limits of any constituent elements of the discharge;

(*e*) requirements for waterproofing or covering the relevant effluent treatment facility, if any;

(*f*) the duration of the permit, which shall be determined in accordance with the provisions of section 96;

(*g*) the conditions under which the permit is granted;

(*h*) the frequency of review of the permit; and

(*i*) whether the permit is subject to periodic review, suspension, amendment or revocation under this Act.

Terms and conditions of a discharge permit

94. A permit to discharge effluent shall be issued subject to—

(*a*) the protection of any water resource to which the discharge will be made as well as any existing or potential uses of the water resource, including environmental uses, by—

(i) setting out the specific volume of effluents that may be discharged;

(ii) setting out the rate of discharge;

(iii) specifying the concentration of certain constituents of the effluent;

(iv) specifying the times, if any, when effluents may not be discharged;

(v) specifying the locations where a discharge may, or may not, be made; and

(vi) adding only such terms regarding the protection of the water resource which the Authority may determine to be appropriate;

(*b*) the protection of any water resource, including groundwater, in the vicinity of a relevant effluent treatment facility, if any, by—

(i) specifying the location of the effluent treatment facility;

(ii) limiting the type, volume, composition or concentration of effluent discharged to the effluent treatment facility;

(iii) specifying the requirements for lining or covering the effluent treatment facility;

(iv) specifying the requirements for operating, managing or closing the effluent treatment facility; and

(v) adding any such terms for the protection of residents, water uses or water resources in the vicinity of the effluent treatment facility which the Authority may determine as appropriate;

(*c*) proper efficient discharge management, which—

(i) requires the monitoring, analysis and reporting on every discharge specifying the aspects of the discharge to be monitored and reported and specifying the devices to be used for such monitoring;

(ii) requires the preparation for the approval of the Authority of an effluent discharge management plan;

(iii) requires the payment of charges;

(iv) may require the addition of any such terms regarding proper effluent management which the Authority may determine to be appropriate; and

(v) requires the protection of public health.

Reference of permits to other authorities

95.—(1) Where the Authority proposes to grant, or to amend the terms of an effluent discharge permit, it shall refer the proposal, together with a copy or summary of the application and appropriate plans, specifications and other information to any relevant public authority.

(2) A public authority to which a proposal is referred under subsection (1) shall inform the Authority in writing within thirty days after the day on which the proposal was referred to it—

(*a*) whether the proposal is supported or whether there are objections to it; or

(*b*) whether, and if so, what special terms should be included in the proposed permit or amendment.

(3) The Authority shall—

(*a*) take into account any report and comments received under subsection (2);

(*b*) refuse to grant the proposed permit or make the proposed amendment if a competent public authority submits a written report objecting to the proposal on the grounds that public health is likely to be endangered by the proposed permit or amendment; and

(*c*) refuse to grant the proposed permit or make the proposed amendment if an Environmental Impact Assessment carried out pursuant to the provisions of the Environment Management Act and the Environmental Impact Assessment Guidelines determines that the environment is likely to be endangered by the proposed permit or amendment.

Cap. 60:02

Duration of permit to discharge effluent

96.—(1) The duration of a permit to discharge effluent may not exceed a term of five years.

(2) Subject to sections 98 and 101, a permit to discharge effluent expires at the end of its term of duration.

Renewal of permit to discharge effluent

97.—(1) A permit to discharge effluent may be renewed at least three months prior to its expiry if the permit holder submits an application for renewal to the Authority in the prescribed manner.

(2) When considering an application for renewal submitted under subsection (1), the Authority shall consider the application using the criteria for determination of applications referred to in section 92.

Review of permit to discharge effluent

98.—(1) The Authority, at any time during the duration of a permit to discharge effluent, may review such permit and amend the terms and conditions, if it considers it to be in the public interest.

(2) Before the Authority amends the terms and conditions of a permit to discharge effluent under subsection (1), the Authority may invite the permit holder to make representation in respect of the amendment.

Transfer of permit to discharge effluent

99.—(1) A holder of a permit to discharge effluent may apply to the Authority for approval to transfer his permit to another person.

(2) Upon receipt of an application for transfer of a permit to discharge effluent, the Authority shall—

(*a*) evaluate whether the terms and conditions of the proposed transfer are consistent with the terms and conditions of the permit;

(*b*) evaluate any deviation from the terms and conditions of the permit that may have an adverse impact upon other persons or the environment; and

(*c*) give the proposed transferee and any interested persons an opportunity to make representations with regard to the application, if they so wish.

(3) The Authority, within sixty days of receipt of the application for a transfer of a permit to discharge effluent, may grant the application, with or without additional conditions, or deny the application.

Succession to permit to discharge effluent

100. A permit to discharge effluent may pass to the named person as a successor-in-title at death or transfer, but that passage of the permit to a successor-in-title does not extend the duration of the permit.

Suspension and cancellation of permit to discharge effluent

101.—(1) Subject to subsection (2), the Authority may cancel a permit to discharge effluent, or suspend it in whole or in part, if—

(*a*) the permit holder fails to comply with this Act or any of the terms or conditions of the permit;

(*b*) the permit holder fails to commence discharge operations or effluent treatment facility construction operations within the period stipulated in the permit;

(*c*) having commenced with the discharge of effluent or construction of an effluent treatment facility, the permit holder ceases the discharge or construction; or

(*d*) it is in the public interest to do so.

(2) The Authority may not suspend or cancel a permit referred to in subsection (1), without giving the permit holder an opportunity to make representations within thirty days of receipt of the notification of the Authority's intention to suspend or cancel such permit.

Effects of expiry or cancellation of permit to discharge effluent

102. If a permit to discharge effluent expires and is not renewed, or is cancelled prior to its expiry, the Authority may—

(*a*) order the permit holder to restore, at the permit holder's expense, the state of affairs that existed before the permit was granted, if doing so is reasonable and practicable under the circumstances; or

(*b*) enter into an arrangement with the permit holder or any other person for the maintenance of the effluent discharge works.

Pollution of water resources from spillage

103.—(1) If an incident occurs in which a harmful substance which may find its way into a water resource spills, then the person responsible for the incident or the owner of the substance involved in the incident or the one in control of the substance involved in the incident at the time of the incident or any other person with knowledge of the incident shall, as soon as reasonably practicable after obtaining knowledge of the incident, report to—

(*a*) the Minister;

(*b*) the Authority;

(*c*) the Malaŵi Police Service or to the relevant District Council; and

(*d*) the relevant catchment management committee.

(2) The person responsible for the incident, the owner of the substance involved in the incident and the person in control of the substance involved in the incident at the time of the incident shall—

(*a*) take all reasonable measures to contain and minimize the effects of the incident;

(*b*) perform clean-up procedures;

(*c*) remedy the effects of the incident;

(*d*) take such measures within such specified time as the Authority may either verbally or in writing direct; and

(*e*) compensate any affected community for any and all damage suffered to life and property.

(3) Any verbal directive by the Authority shall be confirmed in writing within fourteen days, otherwise the directive shall be deemed to have been withdrawn.

(4) If the person specified in subsection (2) fails to comply or to adequately comply with a directive of the Authority, or if the Authority be unable to give the directive timeously it may itself take the measures it considers necessary to—

(*a*) contain and minimize the effects of the incident;

(*b*) perform clean-up procedures; or

(*c*) remedy the effects of the incident.

(5) The Authority may recover all reasonable costs incurred by it from the persons specified in subsection (2) jointly or severally as a result of taking measures under subsection (4).

PART IX
Government Waterworks

Powers of Authority to undertake works

104.—(1) Subject to the provisions of this Act and the National Water Resources Master Plan prepared under Part IV the Authority may for purposes of sustainable development of water resources or the performance of any of its functions, under this Act—

(*a*) construct, use or operate any works;

(*b*) abstract and impound the water from any watercourse or borehole, or

(*c*) alter the course of any watercourse.

(2) Any land needed for purposes of subsection (1) may be acquired in any manner provided by law for the acquisition of land for public purposes.

State schemes and community projects

105.—(1) In this Part—

"community project" means a project operating under a licence for one or more purposes which are—

(*a*) connected with the use of water or the drainage of land situated entirely or for the most part, within a given area; and

(*b*) classified by the Authority, with the approval of the Minister, as community purposes,

which has been declared by the Authority by notice published in the *Gazette*, to be a community project for the purposes of the Act;

"state scheme" means—

(*a*) a scheme, whether formulated in detail or not, for the use for any public purpose of the whole or part of a water resource; or

(*b*) a scheme for draining any land,

which has been declared by the Minister after consultation with the Authority, by notice published in the *Gazette*, to be a state scheme for the purposes of this Act.

(2) For the purposes of the definition of "state scheme" in subsection (1), "public purpose" includes any of the following—

(*a*) the supply of water, or of electrical energy derived from the energy of moving water, to the public or any section of the public;

(*b*) the drainage or reclamation of lands;

(*c*) the protection of any water resource, its source or catchment;

(*d*) identification and development of a retarding basin for the control and management of flood water or any other measures for its control or disposal;

(*e*) the conservation or improvement of water quality;

(*f*) the distribution and allocation of water among the beneficiaries of the scheme;

(*g*) the measurement of water; or

(*h*) the storage or impoundment of water for purposes of bulk distribution, including the construction of reservoirs for impounding surface run-off and for regulating stream flows.

Precedence of schemes and projects

106.—(1) A state scheme shall take precedence over all other schemes for the use of water or the drainage of land.

(2) A community project shall take precedence over all other schemes for the use of water or the drainage of land, except a state scheme.

(3) The Minister—

(*a*) may direct that a state scheme or community project be executed in augmentation, modification or improvement and, subject to the provisions of this Act, so as to supersede any other works for the use of water; and

(*b*) may at any time order that any works contemplated or under execution or completed be aided from public moneys to such extent as may be appropriated by Parliament.

Construction of works for state schemes

107.—(1) The Authority may, after reasonable notice to any landholder concerned, construct and maintain upon any land such works as it may deem necessary or desirable for the purposes of any state scheme.

(2) Compensation on just terms shall be payable by the Government to the owner of the land on which any such works are constructed, but in assessing the amount of compensation payable, the Minister shall take into consideration any benefit accruing to the land by the construction of the works and any adverse effect on the land caused by the works, as the case may be.

(3) The cost of construction and maintenance of any such works shall be paid out of moneys appropriated by Parliament.

Community projects

108.—(1) The Authority shall not issue a licence to abstract and use water to a community project unless—

(*a*) the proposed project is approved by the persons owning or occupying at least two-thirds of the particular area concerned in the project; and

(*b*) provision is made by the project for any adequate alternative supply of water to be supplied to permit holders likely to be adversely affected and unable to benefit from the scheme.

(2) No licence for a community project shall be cancelled or varied except with the consent of the Minister.

Contribution towards schemes and projects

109. Any person who, in the opinion of the Minister, will benefit from the scheme or project shall, if the Minister so determines, contribute towards the cost of the state scheme or community project in cash or in kind.

PART X
Safety of Dams and Flood Management

Definitions

110.—(1) In this Part—

Cap. 53:03
Cap. 53:05

"approved professional person" means a person registered under the Engineers Act, and National Construction Industry Act, and approved by the Authority after consultation with the Engineers Board and the National Construction Industry Council as the case may be;

"dam" includes any existing or proposed structure which is capable of containing, storing or impounding water, including temporary impoundment or storage, whether that water contains any substance or not;

"dam with a safety risk" means any dam—

(*a*) which can contain, store or dam more than 50,000 cubic metres of water, whether that water contains any substance or not, and which has a wall of a vertical height of more than five metres, measured as the vertical difference between the lowest downstream ground elevation on the outside of the dam wall and the non-overspill crest level or the general top level of the dam wall;

(*b*) belonging to a category of dams declared under section 112 (2) to be dams with a safety risk; or

(*c*) declared under section 112 (3) (*a*) to be a dam with a safety risk;

"owner of a dam" or "owner of a dam with a safety risk" includes the person in control of that dam; and

"task" includes a task relating to designing, constructing, altering, repairing, impounding water in, operating, evaluating the safety of, maintaining, monitoring or abandoning a dam with a safety risk.

Blockage of watercourses

111.—(1) No person shall engage in any construction activity that blocks or otherwise impedes the flow of water in a watercourse unless a licence authorizing the activity has been obtained in accordance with the provision of Part V of this Act.

(2) Subsection (1) shall apply regardless of whether an activity is directly instrumental to the abstraction of water from the watercourse or not:

Provided however that, if the activity is directly instrumental to the abstraction of water from the watercourse, the relevant abstraction licence shall imply an authorization to carry out a construction activity under this section.

(3) The Authority may take all reasonable measures to remove or to mitigate the effects of an unauthorized blockage of a watercourse and may recover the cost of such measures from the person or persons responsible for the blockage.

(4) Any person responsible for causing the unauthorized blockage of a watercourse shall be responsible for any damage to persons, property, or the environment caused by the unauthorized blockage, which damage shall be determined and assessed by a court of law.

(5) The Authority may bring an action for damage against any person or persons responsible for the blockage of a watercourse, for the purpose of compensation for any damage to the environment caused by the blockage.

Control measures for dams with safety risk

112.—(1) An owner of a dam shall—

(*a*) before submitting an application for a licence under Part V or within the period specified, provide the Authority with—

(i) any information, drawings, specifications, design assumptions, calculations, documents, copies of the Environmental Impact Assessment Report and test results requested by the Authority; and

(ii) a copy of the Environmental Impact Assessment Report and certificate issued in accordance with the Environment Management Act; and Cap. 60:02

(*b*) give any person authorized by the Authority access to the dam, to enable the authorized officer to determine whether—

(i) the dam is a dam with a safety risk;

(ii) the dam should be declared to be a dam with a safety risk;

(iii) a directive should be issued for specific repairs or alterations to the dam; or

(iv) the owner has complied with any provisions of this Act applicable to the dam.

(2) The Authority may by notice published in the *Gazette* declare a category of dams to be dams with a safety risk.

(3) The Authority may—

(*a*) direct the owner of a dam with a safety risk to submit, at the owner's cost, and within a period specified by the Authority, a report by an approved professional person regarding the safety of that dam; and

(*b*) direct the owner of a dam with a safety risk to undertake, at the owner's cost, and within a period specified by the Authority, any specific repairs or alterations to that dam which are necessary to protect the public, property or the resource quality from a risk of failure of the dam.

(4) The Authority shall afford affected persons the opportunity to petition for the review and evaluation of any dam reasonably believed to be a dam with a safety risk and shall provide the owner of any dam that is the subject of such a petition, a right to respond.

(5) If the owner of the dam fails to comply with the directive contemplated in subsection (3) (*b*), within the period specified, the Authority may undertake the repairs or alterations and recover the costs from the owner.

(6) Before issuing a directive, the Authority shall—

(*a*) be satisfied that the repairs or alterations directed are necessary, adequate, effective and appropriate to reduce the risk to an acceptable level; and

(*b*) consider the impact on public safety, property, the resource quality and socio-economic aspects if the dam fails.

Responsibilities of approved professional persons

113.—(1) When carrying out a task under this Part, an approved professional person also has a duty of care towards the Government and the general public.

(2) An approved professional person appointed to carry out a task on a dam shall—

(*a*) ensure that the task is carried out according to acceptable dam engineering practices;

(*b*) keep the prescribed records;

(*c*) compile the prescribed reports; and

(*d*) where the task includes constructing, altering or repairing a dam, issue a completion certificate to the owner of the dam to the effect that the task on that dam has been carried out according to the applicable design, drawings and specifications.

(3) An approved professional person appointed to carry out a dam safety evaluation shall—

(*a*) consider whether the safety norms pertaining to the design, construction, monitoring, operation, performance and maintenance of the dam satisfy acceptable dam engineering practices; and

(*b*) compile a report on the matters contemplated in (*a*) according to the prescribed requirements and submit the signed and dated report to the owner of the dam within the prescribed period.

Registration of dams with safety risk

114.—(1) The owner of a dam with a safety risk shall register that dam with the Authority.

(2) An application for registration shall be made within one hundred and twenty days—

(*a*) after the date on which the dam with a safety risk becomes capable of containing, storing or impounding water;

(*b*) after the date on which an already completed dam is declared to be a dam with a safety risk; or

(*c*) after publication of a notice declaring a category of dams to be dams with a safety risk, as the case may be.

(3) A successor-in-title to an owner of a dam with a safety risk shall promptly inform the Authority of the succession, for the substitution of the name of the owner.

Factors to be considered in declaring dams with safety risk

115. In declaring a category of dams or a dam to be a category of dams or a dam with a safety risk, the Authority shall consider—

(*a*) the need to protect the public, property and the resource quality against the potential hazard posed by the dam or category of dams;

(*b*) the extent of potential loss or harm involved;

(*c*) the cost of any prescribed measures and whether they are reasonably achievable;

(*d*) the socio-economic impact if such a dam fails;

(*e*) in the case of a particular dam, also—

(i) the manner in which that dam is designed, constructed, altered, repaired, operated, inspected, maintained or abandoned;

(ii) the person by whom that dam is designed, constructed, altered, repaired, operated, inspected, maintained or abandoned; and

(iii) the manner in which the water is contained, stored or impounded in that dam.

Exemptions

116.—(1) The Minister may, on the recommendation of the Authority, exempt a dam belonging to a certain category, by notice published in the *Gazette*, from compliance with any provision of this Part or any regulation made under this Act, on conditions determined by the Minister on the recommendation of the Authority.

(2) The Minister may withdraw the exemption or impose further or new conditions in respect of the exemption.

(3) Before recommending an exemption, the Authority shall consider—

(*a*) the degree of risk or potential risk posed by the dam or category of dams to public safety, property and the resource quality;

(*b*) the manner of design, construction, alteration, repair, impoundment of water in, operation or abandonment of the dam or category of dams;

(*c*) the supervision involved in the dam or category of dams;

(*d*) alternative measures proposed for regulating the design, construction, alteration, repair, operation, maintenance, impoundment of water in, inspection or abandonment of the dam or category of dams and the effectiveness of these measures;

(*e*) the knowledge and expertise of the persons involved in any task relating to the dam or category of dams;

(*f*) comments solicited from the surrounding communities;

(*g*) the costs relating to the dam or category of dams;

(*h*) any security provided or intended to be provided for any damage which could be caused by the dam or category of dams;

(*i*) recommendations made in an environmental impact assessment or an environmental audit report; and

(*j*) whether the dam or category of dams are permitted in terms of a licence or any other authorization issued by or under any other Act.

Regulations regarding dam safety and prevention of flood risk

117.—(1) The Minister may make regulations regarding dam safety including—

(*a*) the establishment of a register of approved professional persons for dealing with dams with a safety risk;

(*b*) the provision of technical audit of the work of approved professional persons;

(*c*) classifying dams into categories;

(*d*) standard specifications regarding the construction, maintenance and repair of dams;

(*e*) requiring the owner of a dam with a safety risk to accomplish regular monitoring of the dam, to the extent and in the manner prescribed;

(*f*) requiring the registration of a specific dam with a safety risk, and setting out the procedure and the processing fee payable for registration;

(*g*) requiring an approved professional person appointed for a specific purpose for a specific dam to submit information, drawings, reports and manuals; and

(*h*) specifying time periods that shall be complied with.

(2) In making regulations under subsection (1), the Minister shall consider—

(*a*) the expertise required for the effective design, construction, alteration, repair, operation, maintenance and abandonment of a dam in the category concerned; and

(*b*) the qualifications and experience needed to provide the expertise for a particular category of tasks.

(3) Before making regulations under subsection (1), the Minister shall consult the relevant professional categories and any other appropriate statutory bodies.

Measures for flood mitigation and control

118. For the purpose of preventing or minimizing the risk of flooding and flood damage, the Authority may do any of the following—

(*a*) prohibit the construction on submersible lands or dikes, levees or other structures likely to hinder the run-off of flood-water; provided that authorization may be granted for the development of such structures if they are determined to be necessary for the protection of already existing residences or other private structures;

(*b*) alter or demolish dikes, embankments, levees, structures or other works, irrespective of their legal status, if they are determined by the Authority to hinder water run-off or to extend the flood plain with harmful results;

(*c*) prohibit the growing of crops, the building of structures or the placing of deposits on land located between a watercourse and any protective dikes, embankments or levees;

(*d*) cooperate with Local Authorities in determining the geographic extent of floodplain areas and assist such Authorities in regulating the development and use of lands within such areas; and

(*e*) in consultation with the Ministry responsible for Local Government, develop regulations providing for the control and management of storm water within municipal areas.

PART XI
Water Charges and Financial Provisions

Charges

119.—(1) The Minister may, on the recommendation of the Authority, by notice published in the *Gazette*, prescribe charges for—

(*a*) services provided by the Minister, the Authority, a public authority or authorized person under this Act;

(*b*) the abstraction and use of water under a licence granted under this Act;

(*c*) the discharge of effluents under a discharge permit granted under this Act; or

(*d*) any other licence or permit granted under this Act.

(2) The water abstraction charges determined by the Minister shall be based on a pricing strategy that takes into consideration—

(*a*) the need to differentiate among geographical areas, categories of water uses and water users;

(*b*) the need to achieve an equitable and efficient allocation of water and water conservation;

(*c*) the need to adhere to sound water management practices based on the "user pays" and the "polluter pays" principles; and

(*d*) the need to provide for incentives for timely payment of the charges and disincentives for non-payment of same.

Collection and use of water fees and charges

120.—(1) The Authority shall levy and collect charges and fees prescribed under section 119 (1) and it shall deposit the proceeds from the collection thereof into a separate account owned and operated by the Authority.

(2) A percentage of the proceeds from the collection of water charges and fees, to be determined on a yearly basis by the Minister on the recommendation of the Authority, shall be earmarked for use by the catchment management committees for their statutory purposes and paid out to them on request:

Provided that such percentage shall in no case be less than twenty per cent of the total amounts collected in any one year.

(3) The Authority shall apply the balance of the proceeds from the collection of charges in the pursuit of its statutory purposes.

(4) The Authority shall submit yearly to the Minister an audited statement of accounts under this section.

Water Resources Trust Fund

121.—(1) There is hereby established a fund to be known as the Water Resources Trust Fund (hereinafter referred to as the "Fund").

(2) The objective of the Fund is to assist in financing the conservation and management of water resources in Malaŵi.

(3) There shall be paid into the Trust Fund—

(*a*) such moneys as may be appropriated by Parliament for the purposes of the Fund;

(*b*) such moneys as may be received by the Fund from donations, grants, and bequests from whatever source; and

(*c*) such other moneys as may, by or under any Act, be payable to the Fund.

(4) The Fund shall be managed by trustees from time to time appointed and holding office under a trust deed, to be drawn-up by the Minister.

(5) The trustees shall develop and apply principles governing the grant of moneys from the Fund and for achieving the objective of the Fund.

(6) There shall be paid from the Fund such grants as the trustees may, from time to time, authorize in furtherance of the objective of the Fund.

PART XII
WATER TRIBUNAL

Establishment of Water Tribunal

122.—(1) There is hereby established a tribunal to be known as the Water Tribunal.

(2) The Water Tribunal shall have jurisdiction throughout Malaŵi, with power to conduct hearings anywhere in Malaŵi.

Composition of the Water Tribunal

123.—(1) The Water Tribunal shall consist of the following persons appointed by the Minister—

(*a*) a Chairperson;

(*b*) a Deputy Chairperson; and

(*c*) three other persons.

(2) The Minister shall appoint the Chairperson, and the Deputy Chairperson of the Water Tribunal on the recommendation of the Judicial Service Commission, provided that the Chairperson shall be a person qualified to hold the office of a judge of the High Court of Malaŵi.

(3) Only persons with knowledge of law, engineering, water resources management or related field, may be appointed to the Tribunal.

(4) A member of the Water Tribunal shall hold office for a period of five years and may be reappointed for one more period of five years.

(5) The terms and conditions of the members of the Water Tribunal shall be determined by the Minister in consultation with the Minister of Finance.

Vacancy in the office of a member of the Water Tribunal

124.—(1) The office of a member of the Water Tribunal shall become vacant if the member—

(*a*) dies or resigns;

(*b*) becomes bankrupt;

(*c*) adjudged or declared to be of unsound mind;

(*d*) is convicted of an offence punishable by imprisonment; or

(*e*) has had his appointment terminated in accordance with subsection (2).

(2) The Minister may, after consultation with the Judicial Service Commission and after giving the member an opportunity to make representations and after considering those representations, for good reason terminate the appointment of any member of the Water Tribunal.

Support staff and funds of the Water Tribunal

125.—(1) Administrative support for the Water Tribunal shall be provided by officials of the Ministry responsible for water affairs.

(2) Expenses of the Water Tribunal shall be paid out of money appropriated by Parliament for that purpose.

Indemnity of the Tribunal and its members

126. The Water Tribunal and the members of the Water Tribunal shall not be liable for an act or omission committed in good faith in the course of performing their functions under this Act.

Jurisdiction of the Water Tribunal

127.—(1) An appeal shall lie to the Water Tribunal at the instance of any aggrieved person who has a right or proprietary interest which is directly affected by a decision or order of the Authority, the Minister or a catchment management committee concerning any matter regarding water resources management, a permit or licence under this Act, and the Water Tribunal shall hear and determine any such appeal.

(2) In addition, the Water Tribunal shall have such jurisdiction to hear and determine disputes, and shall have such other powers and functions, as may be conferred or imposed on it by or under this or any other written law.

Time for lodging appeal

128. No appeal shall be entertained by the Water Tribunal unless it is lodged, where no period is so prescribed, within thirty days after the date on which written notice was served on the appellant notifying him of the decision or order against which he wishes to appeal:

Provided that the Water Tribunal may in any case, for good cause shown, admit an appeal after the time limited for lodgment of an appeal has expired.

Determination of appeals and disputes Cap. 18:01

129.—(1) In proceedings on any matter before it, the Water Tribunal shall have and may exercise all the powers vested in Commissioners under the Commissions of Inquiry Act.

(2) In determining an appeal, the Water Tribunal may affirm, quash or vary the decision or order concerned, as justice requires.

(3) In determining a dispute, or in exercising any other function, the Water Tribunal shall decide the matter on the merits of the case and may make such order as, in its judgment, will do justice between the parties.

(4) Any person aggrieved by the decision of the Water Tribunal may apply to the High Court for judicial review:

Provided that on a matter of law, an appeal shall lie to the High Court.

Rules and procedures of the Water Tribunal

130. The Water Tribunal shall determine its own procedures and rules for or with respect to the lodgment, hearing and disposal of appeals and other matters before it.

PART XIII
Associations of Water Users

Establishment and purposes of associations of water users

131.—(1) An association of water users (hereinafter called an "association") may be established by the agreement of the simple majority of a group of water users, at their initiative or also at the

initiative of the Authority, for one or a combination of the following purposes—

(*a*) to manage, distribute and conserve water from a source used jointly by the members of the association;

(*b*) to manage groundwater resources in a Groundwater Conservation Area established under Part VI;

(*c*) to acquire and operate an abstraction licence or a discharge permit under this Act;

(*d*) to resolve conflicts between members of the association related to the joint use of a water resource;

(*e*) to collect water user charges and fees on behalf of the Authority; and

(*f*) to represent the special interests and values arising from water used for a public purpose, such as in an environmental or conservation area.

(2) A group of water users for the purpose of subsection (1) shall comprise any user of water from a common stream or other source irrespective of the purpose of that use.

Approval and registration of associations of water users

132.—(1) The proposed members of an association shall prepare a constitution in the form set out in the Schedule hereto and submit such constitution to the Authority for approval in accordance with the procedure as the Minister may prescribe in regulations made under this Act.

(2) The Minister may, by regulation, amend the constitution set out in the Schedule hereto.

(3) Upon request of a group of water users intending to establish an association, the Authority shall provide assistance in formulating the constitution.

(4) A management committee shall be the executive organ of the association and shall be elected and have the powers as set out in the constitution prepared under subsection (1).

Registration of associations of water users, compulsory membership implied

133.—(1) Upon approval by the Authority of the constitution prepared under section 132, the association shall be registered in the Register maintained by the Authority in accordance with section 134.

(2) With effect from the date of registration in the Register, all water users within the area of an association as defined in the constitution shall be required to become members of the association and shall be bound by the constitution.

(3) Any person who has reasonable grounds to object to becoming a member of an association of water users under subsection (2) shall

lodge an appeal to the Minister in accordance with the provisions of section 142.

(4) The Authority shall cause membership of an association to be recorded on the abstraction licence or on the effluent discharge permit of each member issued in accordance, respectively, with Parts V and VIII of this Act and in the Register maintained by the Authority in accordance with section 134.

Register of associations of water users

134.—(1) The Authority shall establish and maintain a Register in which it shall record the particulars of associations registered with the Authority.

(2) The Authority may determine additional particulars of associations registered with the Authority to be included in the Register.

(3) Information contained in the Register shall be accessible by the public on payment of prescribed fee.

Power of Authority to give directions

135. In any case where the Authority is satisfied that an association does not perform its functions satisfactorily, it may give directions to the association relating to the performance of the functions of the association. Such directions may refer to—

(*a*) the division and distribution of water amongst the members of an association;

(*b*) the management and protection of any water source;

(*c*) the drainage of the land where water is used; and

(*d*) any other matter which the Authority considers necessary or desirable.

Disestablishment of associations of water users

136.—(1) The Minister may, on the recommendation of the Authority, by notice published in the *Gazette*, disestablish an association of water users—

(*a*) in the circumstances provided for in the constitution of the association;

(*b*) if it is in the best interest of the association or its members;

(*c*) if an investigation of its affairs or financial position reveals that disestablishment is appropriate;

(*d*) if the Authority has taken over a power or duty of the association as a result of dissensions among the management committee or its members; or

(*e*) if the association is no longer active or effective.

(2) Before disestablishing an association of water users the Minister shall—

(*a*) publish a notice in the *Gazette*—

(i) stating the intention to disestablish the association of water users;

(ii) setting out the reasons for disestablishing the association of water users; and

(iii) inviting written comments on the proposal, which comments shall be submitted by a date which may not be earlier than sixty days after the publication of the notice; and

(*b*) consider all comments received by the specified date.

(3) Upon disestablishment of an association of water users, the Authority shall enter a corresponding record in the Register it keeps under section 134, and on the abstraction licence or on the effluent discharge permit of each member, issued in accordance with Parts V and VIII of this Act, respectively.

Winding-up of affairs of associations of water users

137.—(1) When an association of water users is disestablished, its affairs shall be wound-up—

(*a*) as provided for in its constitution; or

(*b*) by a person appointed by the Minister in accordance with directives given by the Minister if the constitution does not provide for winding-up.

(2) The costs of winding-up an association of water users shall be a cost against the estate of the association.

(3) If the affairs of an association of water users are wound-up, the Minister may direct that an amount equivalent to any financial contribution with interest made to the association from public funds be reimbursed, before assets are distributed among the members of the association.

(4) No transfer duty, other tax or duty is payable in respect of the transfer of any assets under subsection (3).

PART XIV
Miscellaneous Provisions

Entry by Authority for monitoring of water resources

138.—(1) An employee or agent of the Authority, on the instructions of the Authority, may without warrant enter onto any land and inspect any water resource located within or accessible from the land concerned, in order to take such measures as the Authority may think fit for the purpose of—

(*a*) conserving or regulating the water resource, or preserving it from pollution or protecting the bed over which it lies or flows;

(*b*) removing any obstruction from, or for clearing and deepening, the bed; or

(*c*) preventing the illegal diversion, waste or pollution of the water resource or interference with any such bed.

(2) A person authorized by the Authority may enter and remain on land for purposes of performing functions or exercising powers conferred under this Act and may take such measures and construct or operate works as may be necessary for the investigation, monitoring, use, control, protection, management or administration of water resources.

(3) Subject to section 152, an authorized person may enter any land for the purpose of investigating water resources and may—

(*a*) construct works;

(*b*) install and equip gauging, recording and monitoring stations;

(*c*) investigate or monitor boreholes and ancillary works on any land;

(*d*) make surveys;

(*e*) take measurements or samples; or

(*f*) make alterations or remove any of the above.

(4) Whatever is attached to land does not become part of the land for the purposes of giving the owner or occupier of land a proprietary interest in it.

Obligations on entry on land

139.—(1) In exercising the powers under section 138, the authorized person shall—

(*a*) cooperate, as much as possible, with the owner or occupier of the land;

(*b*) stay on the land only for as long as it is reasonably necessary;

(*c*) remove from the land, on completing any works, all plant, machinery, equipment, goods or buildings brought on to the land, other than anything that the owner or occupier of the land agrees may be left there; and

(*d*) leave the land as nearly as possible in the condition in which it was prior to the entry being made.

(2) Subject to section 138 (1) an authorized person shall not enter on to the land or premises without first giving reasonable notice, whether written, verbal or otherwise, to the landholder or other responsible person in charge of the land or premises, and any such entry shall be at a reasonable hour:

Provided that an authorized person may enter without giving notice if—

(*a*) he has reason to believe that a provision of this Act or of any regulation or order made under this Act has been or is about to be contravened;

(*b*) he is unable to give notice within a reasonable time having regard to all the circumstances; or

(*c*) he has reasonable grounds for not giving notice.

(3) If so requested by the owner or occupier of the land or premises, the authorized person shall produce evidence of his right or permission, as the case may be, to enter on to the land.

(4) It shall be the duty of any person exercising any powers under this section to do so with the reasonable care and in such manner as to cause as little damage as possible in so doing.

Inspection of land in relation to water use

140.—(1) An inspector may enter land for purposes of—

(*a*) inspecting works or use of water; or

(*b*) taking samples or making tests, to find out whether—

(i) water is being wasted, misused or polluted;

(ii) the terms of any water permit, waste discharge permit or any other permit granted under this Act are being complied with; or

(iii) an offence is being committed against this Act, regulation or an order made under this Act is otherwise being complied with.

(2) An inspector may, without warrant, enter any land or premises for the purpose of ascertaining whether there is or has been any contravening of the provisions of this Act or of any regulation or order made under this Act in relation to any water resource.

Establishment of bodies to implement international agreements

141.—(1) The Minister, acting in consultation with other relevant Ministers, may establish bodies to implement—

(*a*) international agreements relating to the management and development of water resources; or

(*b*) regional agreements relating to the management and development of water resources shared with other countries in the promotion of regional cooperation over shared water resources.

(2) Whenever it appears to the Minister expedient to do so, he may consult with his counterpart within the Southern African Development Community (SADC) on matters relating to water resources management in line with the SADC Protocol on Shared Watercourses.

(3) The Minister may share relevant information with other state, regional and international organizations regarding water and water research, subject to the limitations such as requirements of state security.

General appeals

142.—(1) Except as otherwise provided under this Act, any person aggrieved by a decision of the Authority, authorized person or public authority made under this Part of the Act may, within one month, appeal to the Minister in a prescribed manner.

(2) A person who fails, without reasonable cause or neglected to exercise his right of objection under this Act, shall not have a right to appeal under subsection (1).

(3) Where a person is still aggrieved with the decision of the Minister, he may appeal to the Water Tribunal.

General offence and penalty

143. A person who neglects or fails to comply with any order or requirement given or imposed on him by or under this Act commits an offence and on conviction shall be liable to a fine of K1,000,000 and to four years imprisonment.

Specific offences

144.—(1) Any person who diverts, dams, stores, abstracts or uses water or constructs or maintains any waterworks or in any way interferes with the flow of watercourse other than in accordance with a right granted under this Act commits an offence and, upon conviction shall be liable to a fine of K5,000,000 and to eight years imprisonment.

(2) Any person who discharges effluents in contravention to the provisions of this Act commits an offence and upon conviction shall be liable to a fine of K10,000,000 and to ten years imprisonment.

(3) Any person who fails to comply with a notice given by the Authority requiring him to take measures specified therein to avoid or mitigate damage to water resources commits an offence and shall be liable to an administrative penalty.

(4) Any person who continues to exercise a water right previously granted to him after suspension or variation of the same by the Minister commits an offence and shall be liable to an administrative fine.

(5) Any person who continues to exercise a water right previously granted to him after determination or diminution of the same by the Minister commits an offence and shall be liable to an administrative penalty.

(6) Any person who fails to comply with any condition, express or implied, subject to which a right was granted or who abstracts or uses water for a purpose other than the one authorized in the grant, commits an offence and shall be liable to an administrative fine and in addition to any requirement which the Minister may impose.

(7) Any person who prevents, obstructs or refuses entry upon his land by the Authority or any member or agent thereof for purposes of inspecting any works thereon or ascertaining the amount of water being abstracted commits an offence and shall be liable to an administrative penalty.

(8) Any person who refuses, fails or neglects to demolish or to change the use of waterworks as required of him by the Authority commits an offence and shall be liable to an administrative penalty and in addition to any suspension of right which the Authority may impose.

(9) Any person who refuses, fails or neglects to demolish any unlawfully constructed works after being ordered by the Authority to demolish the same commits an offence and shall be liable to an administrative fine and where the Authority demolishes the unlawful works, the Authority shall recover all expenses incurred as a civil debt from the person.

(10) Any person who, after being ordered by the Authority to modify or to demolish works previously constructed under a right which has been determined, refuses, fails or neglects to do so commits an offence and shall be liable to an administrative penalty.

(11) Any person who prevents, constructs or refuses entry upon his land by the Authority or any member or agent thereof for the purposes of conducting investigations and surveys commits an offence and shall be liable to an administrative penalty.

(12) Any person who interferes with or damages a hydrometeorological station, water quality station, hydrological station, hydrogeological station, groundwater monitoring station or any equipment thereof of works connected therewith commits an offence and shall be liable to an administrative penalty and if the equipment or works, as the case may be, have been damaged so as to require replacement or reconstruction, the person responsible shall be liable further to pay the costs of replacement or reconstruction, as the case may be.

(13) Any person who prevents, obstructs or refuses entry upon any land by a representative or agent of a catchment management committee for the purposes specified under this Act commits an offence and shall be liable to an administrative penalty.

(14) Any person who refuses or fails to submit himself to the jurisdiction of a catchment management committee by refusing, failing or neglecting to comply with directions, rules, regulations, by-laws or guidelines of the catchment management committee commits an offence and shall be liable to an administrative penalty.

(15) Any person who fails to provide the Minister within the time specified by him with any data, information, documents or materials required by the Minister under this Act commits an offence and shall be liable to an administrative penalty.

(16) A water management institution which fails to make information at its disposal available to the public under this Act commits an offence and shall be liable to an administrative penalty.

(17) Any person who undertakes a controlled activity without a permit granted under this Act commits an offence and shall be liable to an administrative penalty and the controlled activity undertaken shall thereupon be forthwith stopped by the Minister.

Miscellaneous offences

145.—(1) No person shall—

(*a*) willfully obstruct, molest or hinder any inspector or other employee of or person authorized by the Minister or the Authority acting in the exercise or performance of his powers and functions under this Act;

(*b*) without the written permission of the Authority, knowingly or wilfully—

(i) deface, alter or remove; or

(ii) cause to be defaced, altered or removed,

any survey mark, water gauge, weir or measuring device or other work, structure or appliance installed with the approval of the Authority for the purposes of water control or investigation;

(*c*) willfully hinder or interrupt, or cause to be hindered or interrupted, any permit holder, or his employee, contractor or agent, in the lawful exercise or performance of any powers and functions under this Act;

(*d*) without lawful authority, willfully let off or discharge water from the works of any permit holder so that the permit holder loses the use of that water;

(*e*) without lawful authority, lay, erect or construct, or cause to be laid, erected or constructed, any work to connect with the work of any permit holder which is capable of drawing water from that work;

(*f*) unlawfully interfere with the works or water supply of any permit holder; or

(*g*) neglect or fail to comply with any lawful order given under this Act.

(2) A person who contravenes the provisions of subsection (1) commits an offence.

(3) Any person who—

(*a*) causes or allows water to be wasted or misused; or

(*b*) takes or uses water for a purpose other than provided by the water permit,

commits an offence.

(4) Any person who—

(*a*) assaults, threatens, resists, obstructs, hinders or delays the authorized person or a public authority in the performance of any function or duty under this Act; or

(*b*) allows or encourages another person to do any of the acts under paragraph (*a*),

commits an offence.

(5) Where a person is convicted under subsection (2), the court may, in addition to any other penalty, order that person to pay, by way of compensation, any person who may have suffered any damage as a result of the action for which that person is convicted.

(6) Any person who—

(*a*) interferes;

(*b*) attempts to interfere; or

(*c*) allows another person to interfere, with any hydrological station,

commits an offence.

Proceedings for offences

146. Without prejudice to the rights of any person to bring proceedings in respect of an offence, the Minister or the Authority may, subject to section 148, institute and maintain criminal proceedings in any court against any person accused of an offence under this Act or under any rules or regulations made under this Act.

Penalties for offences

147.—(1) Any person convicted of an offence under this Act, or under any regulations or rules made under this Act for which no other penalty is provided shall be liable to a fine of K1,000,000 and to four years imprisonment and where the person continues the contravention, shall be liable to a fine of K5,000 for every day during which the offence continues.

(2) A person who is convicted of the same offence subsequently shall be liable to a fine of K10,000,000 and to ten years imprisonment and where the person continues the contravention, shall be liable to a fine of K20,000 for each day during which the offence continues.

(3) Where under this Act penalty is provided for a continuing or subsequent offence, the penalty shall apply—

(*a*) in the case of a continuing offence, if the person continues to contravene the provision for which he was convicted after the date on which he was convicted; or

(*b*) in the case of a subsequent offence, if the person contravenes the same provision for which he was convicted earlier.

Administrative penalties

148.—(1) If the Authority is satisfied on reasonable grounds that a person has contravened this Act, the Authority may impose administrative penalties on the person by doing one or more of the following—

(*a*) giving the person a written warning;

(*b*) directing the person to do a specified act, or refrain from doing a specified act, for one or more of the following purposes—

(i) to remedy the effects of the contravention;

(ii) to compensate persons who have suffered loss because of the contravention;

(iii) to ensure that the person does not commit further contravention;

(*c*) requiring the person to pay monetary penalty of K2,000,000; or

(*d*) requiring the person to pay monetary penalty of K10,000 for each day during which the contravention continues.

(2) Before taking action under subsection (1), the Authority shall give the person written notice of the proposed action, specifying the grounds for it and the facts supporting those grounds, and allowing twenty-one days after the notice is given for the person to ask for a hearing on the matter. If the person requests a hearing on the matter, the Authority shall hold a hearing before taking the action. The hearing shall be held in private unless the person consents to the hearings being held in public.

(3) A person on whom an administrative penalty has been imposed and who fails or refuses to comply with the administrative penalty commits an offence and, on conviction shall be liable to a fine of K5,000,000 and to five years imprisonment.

(4) Where the administrative penalty imposed by the Authority is a monetary penalty and the person on whom the monetary penalty has been imposed does not pay the monetary penalty for more than thirty days from the date of the initial demand in writing by the Authority, the amount in respect of the monetary penalty shall be recoverable by the Authority as a civil debt.

Offences by bodies corporate relating to state of mind

149.—(1) Where it is necessary to establish, for the purposes of this Act, the state of mind of a body corporate in relation to particular conduct, it is sufficient to show that—

(*a*) the conduct was engaged in by a director, employee or agent of the body corporate within the scope of his actual or apparent authority; and

(*b*) the director, employee or agent had the state of mind.

(2) A reference in subsection (1) to the state of mind of a person includes a reference to—

(*a*) the knowledge, intention, opinion, belief or purpose of the person; and

(*b*) the person's reasons for the intention, opinion, belief or purpose.

(3) A reference in this section to engaging in conduct includes a reference to failing or refusing to engage in conduct.

Offences by bodies corporate relating to liability of directors

150. Where an offence against a provision of this Act or regulations made hereunder is committed by a body corporate, each director of the body corporate also shall be guilty of the offence and on conviction shall be liable to the same penalty unless it is established that he took reasonable precaution and exercise due diligence to avoid the commission of the offence.

Penalties for offences by bodies corporate

151. Where a body corporate is convicted of an offence under this Act, the court may, if the court thinks fit, impose a pecuniary penalty not exceeding an amount equal to five times the amount of the maximum pecuniary penalty that could be imposed by the court on an individual convicted of the same offence.

Damage caused by the Minister, etc., to be compensated

152.—(1) Where damage is caused to land through the exercise of powers conferred upon the Minister, the Authority or an authorized officer by this Act, the Government shall compensate all parties having an interest in that land.

(2) For purposes of this section, damage to land includes—

(*a*) deprivation of possession of the surface land;

(*b*) damage to the surface of land and any improvements, trees or crops;

(*c*) damage to stock; or

(*d*) all consequential damage.

(3) Compensation under this section may be—

(*a*) in the form of money;

(*b*) provision of an alternative supply of water;

(*c*) exchange of land for another piece of public land; or

(*d*) any other type of compensation which the Minister may consider appropriate.

(4) In calculating monetary compensation—

(*a*) for damage to land under this section;

(*b*) in respect of compulsory acquisition of any interest in land.

Prescribed guidelines

153. The Minister may, on the advice of the Authority, from time to time, prescribe guidelines to be followed by any authorized person or public authority while exercising their powers under this Act.

Decision to be in regard to objectives

154. While exercising his powers and functions under this Act, the Minister, Authority, authorized person or any other person shall have regard to—

(*a*) the objectives of this Act;

(*b*) any relevant international agreement regulating the use of water to which Malaŵi is a party;

(*c*) the provisions of the water action plan;

(*d*) any policy of the Government concerning the decentralization of administrative responsibilities;

(*e*) any guidelines prescribed by the Minister under this Act; and

(*f*) any delegation that may have been made by the Minister.

Protection of the Minister and others from liability

155. No matter or thing done or omitted to be done by—

(*a*) the Minister, the Authority, a catchment management committee or the Water Tribunal;

(*b*) any person acting under the direction of the Minister; or

(*c*) any member of or person acting under the direction of the Authority, the catchment management committee, the Water Tribunal authorized under this Act,

shall, if the matter or thing was done or omitted in good faith for the purpose of executing this Act or any rule, regulation or order made under this Act, subject the Minister or any such member of the Authority, Committee, or Water Tribunal or person in his personal capacity to any action, suit, claim or demand whatsoever.

Public consultation

156.—(1) A requirement imposed by or under this Act for a person (in this section called the "designated person") to undertake public consultation in relation to any application made, or action proposed to be taken, under this Act shall be construed as a requirement to ensure that this section is complied with in relation to that application or action.

(2) The designated person shall publish or broadcast, as the case may be, a notice, in relation to the application or proposed action—

(*a*) in the *Gazette*;

(*b*) in at least one national newspaper circulating in the area to which the application or proposed action relates; and

(*c*) in at least one local radio station broadcasting in that area.

(3) The notice shall, in each case—

(*a*) set out a summary of the application or proposed action;

(*b*) state the premises at which the details of the application or proposed action may be inspected;

(*c*) invite written comments on or objections to the application or proposed action;

(*d*) specify the person or body to which any such comments are to be submitted; and

(*e*) specify a date by which any such comments are required to be received, not being a date earlier than thirty days after publication of the notice.

(4) The designated person shall make arrangements for the public to obtain copies, at reasonable cost, of documents relating to the application or proposed action which are in the possession of the designated person.

(5) The designated person shall consider—

(*a*) any written comments received on or before the date specified under subsection (3) (*e*); and

(*b*) any comments, whether in writing or not, received at any public meeting held in relation to the application or proposed action at which the designated person was represented, or pursuant to any other invited to comment.

(6) The designated person shall publish, through the same media as were employed pursuant to subsection (2), notice of the fact that a copy of the decision in writing of the designated person in relation to the application or proposed action, and of the reasons therefor, is available for public inspection at the same premises as were notified under subsection (3) (*b*).

(7) Where regulations made under this Act so require, the designated person shall cause a public meeting to be held in relation to the application or proposed action.

Regulations

157.—(1) The Minister may make regulations, not inconsistent with this Act, for or with respect to any matter which by this Act is required or permitted to be prescribed, or which is necessary or expedient to be prescribed for carrying out or giving effect to this Act.

(2) Without prejudice to the generality of subsection (1), such regulations may make provision for or with respect to—

(*a*) abstraction of groundwater and works therefor;

(*b*) inspection of works;

(*c*) plans and specifications to be submitted by applicants under this Act;

(*d*) charges for water use under a permit and fees for licences;

(*e*) forms to be used under this Act;

(*f*) provide for the registration of existing users of water and structures;

(*g*) the duration, granting, amending, renewing, suspending, varying or cancelling of permits or licences as the case may be, or any other conditions;

(*h*) provide for and regulate the making of objections and the time in which objections shall be made;

(*i*) provide for the prevention of waste, misuse or pollution of water;

(*j*) providing for the formation, functions and conduct of associations of water users;

(*k*) for safety in dam construction; and

(*l*) generally for the better carrying out of the provisions of this Act.

(3) The Authority may make rules, not inconsistent with this Act, for or with respect to any matter which by this Act is required or permitted to be prescribed by the Authority.

Cap. 1:01

(4) Notwithstanding section 21 (*e*) of the General Interpretation Act, the regulations or rules made under this section may create offences in respect of any contravention of the regulations or rules and may, for any such offences, impose a fine of up to K250,000 and to imprisonment for two years.

PART XV
Repeals, Savings and Transitional Provisions

Transitional provisions

158. At the commencement of this Act—

Cap. 61:01

(*a*) no person shall sink any borehole or use any water pursuant to the provisions of the Mines and Minerals Act without a permit to construct or to drill a borehole issued under section 68 of this Act, and without a licence to extract groundwater issued under section 39;

Cap. 61:01

(*b*) no consent for alluvial or river locations under the provisions of the Mines and Minerals Act shall be given without the prior written approval of the Authority, and any consent given shall be subject to conditions that the Authority may require;

(*c*) reference to the Minister in so far as it relates to issues relating to water resources in the Mines and Minerals Act shall be deemed to be a reference to the Minister under this Part of the Act; Cap. 61:01

(*d*) the provisions dealing with works and uses existing before the commencement of this Act shall apply to existing permits and rights to use water granted under the Mines and Minerals Act exercised by the Minister and the Authority in accordance with the provisions of this Act. Cap. 61:01

Notification of existing rights

159.—(1) Every person claiming an existing right shall, within twelve months from the date on which this Act comes into operation, notify the Authority of such claim.

(2) Every existing right shall determine if the person entitled thereto fails to notify the Authority in accordance with subsection (1).

Authority to record existing rights and to issue licence

160.—(1) Where the Authority receives a notification under section 159, it shall carry out investigations to verify the existence of the right and if satisfied shall record such right and issue a licence in respect thereof.

(2) Where an existing right has been recorded and a corresponding licence issued in accordance with subsection (1), the existing right shall be subsumed by such licence and dealt with in the manner prescribed for abstraction licences under Part V.

Application of other relevant laws

161. Wherever the provisions of this Act are inconsistent with the provisions of—

(*a*) the Environment Management Act; Cap. 60:02

(*b*) the Fisheries Management and Conservation Act; Cap. 66:05

(*c*) the Forest Act; Cap. 63:01

(*d*) the Inland Shipping Waters Act; Cap. 71:01

(*e*) the Waterworks Act; Cap. 72:01

(*f*) the Mines and Minerals Act; or Cap. 61:01

(*g*) any other written law, the provisions of this Act shall apply.

Repeal and savings

162.—(1) The Water Resources Act is hereby repealed.

(2) Any subsidiary legislation made under the Act repealed under subsection (1) in force immediately before the commencement of this Act— Cap. 72:03

(*a*) shall remain in force unless in conflict with this Act and be deemed to be subsidiary legislation made under this Act; and

(*b*) may be repealed or amended by subsidiary legislation made under this Act.

SCHEDULE

Model Constitution of an Association of Water Users

s. 132

1. The Constitution of the Association of Water Users:

There is hereby formed the Association of Water Users (hereinafter referred to as the "Association").

The Association, including its management committee, shall have the status of a legal person and in that capacity it shall be capable of suing and being sued.

The liability of any venture of the Association shall be limited.

The members of the Association shall be villagers, institutions, companies, committees and government authorities or any person natural or legal, as may be users of water from sources located within the area of operation of the Association.

2. The objects of the Association:

The objects of the Association shall be to—(*delete those not applicable*)

(*a*) manage, distribute and conserve water from a source used jointly by the members of the Association;

(*b*) to construct, rehabilitate, operate and maintain any works for the purposes of management of the water resource in its area of operation;

(*c*) arbitrate in the resolution of conflicts among holders of water abstraction licences and/or effluent discharge permits within its area of operation;

(*d*) agree by consensus of its members equitable reductions in the quantities of water abstracted from the source under its responsibility in times of drought or other restrictions on resource availability;

(*e*) obtain and operate any water abstraction licence and/or effluent discharge permit or any other permit under the provisions of the Water Resources Act;

Cap. 72:03

(*f*) do such other things as may be considered necessary by a majority of its members in order to manage the water resources in its area of operation in a fair and equitable manner in accordance with the intent and provisions of the Water Resources Act.

Cap. 72:03

3. The area of operation of the Association:

The area of operation of the Association shall be as shown on the attached map.

4. Annual General Meeting and Extraordinary General Meetings:

An annual general meeting shall be held at least once each year, not more than fifteen months following the previous annual general meeting. An extraordinary general meeting of the Association may be called by five per cent of members giving two weeks notice to the Secretary in writing.

One-third of the full number of members representing no fewer than four from each of the upper and the lower area of the catchment or from each village present shall constitute a quorum.

Voting can be exercised by a member or proxy in favour of another member provided the proxy form is in the hands of the Secretary prior to the meeting.

Decisions at the annual general meeting shall be made by simple majority vote, including decisions on the assessments to be levied of members and on the budget of the Association.

5. Management Committee:

A management committee shall be elected at the annual general meeting of the Association and shall consist of six elected members from among the membership of the Association.

The committee so elected may sue and be sued in the name of the Association for moneys or otherwise, and shall have the powers to bind the Association by contract.

The committee shall collect and receive any moneys due to the Association and pay moneys owed by the Association from time to time and open and maintain a bank account through its authorized officers and submit such annual audited accounts to the Annual General Meeting and to the National Water Resources Authority.

The management committee shall meet not less than once in each quarter of the year and all elected members must be present.

The management committee shall decide by a two-thirds majority vote.

The management committee shall also decide the extent, manner and time of levying the assessments laid down by the annual general meeting of the Association.

The management committee shall appoint and employ such employees as may be necessary to fulfil the purposes of the Association.

6. Liability of members:

The liability of members is limited to the amount of unpaid charges and interest thereon owing by them to the Association.

7. Liability of Association:

The Association shall not be liable for any indebtedness other than that contracted by its management committee in conformity with this constitution.

8. General duties of members:

Each member hereby undertakes with other members and each of them as follows—

(*a*) to pay all assessments levied against him/her by the Association;

(*b*) not to draw from the source more water than the amount specified in the member's abstraction licence, or as determined by the committee if this is the object of the Association, and, in general; and

(*c*) to observe the rules of the Association.

IRRIGATION

An Act to make provision for the sustainable development and management of irrigation, protection of the environment from irrigation related degradations, establishment of the National Irrigation Board and for matters connected therewith or incidental thereto 16 of 2001 G.N. 2/2013

[31st January, 2002]

PART I
Preliminary Provisions

1. This Act may be cited as the Irrigation Act. Short title

2. In this Act, unless the context otherwise requires— Interpretation

"Board" means the National Irrigation Board established under section 5;

"Chairman" means the Chairman of the Board who is elected under section 6 (3);

"committee" means a committee of the Board established under section 11;

"drainage" means removal of excess surface and ground water from agricultural land;

"existing Government smallholder irrigation scheme" means a smallholder irrigation scheme specified in the Schedule;

"Executive Secretary" means the Executive Secretary of the Board who is appointed under section 21;

"farm" includes garden, plot or any other agricultural holding;

"farmer" means an owner or subsector of an agricultural holding or a tenant;

"Fund" means the Irrigation Fund established under section 25;

"immediate family member", in relation to any person, means that person's spouse, child, parent, brother, sister, grandchild or grand parent;

"irrigation" means application of water, confined in time and space, enabling satisfaction of water requirements of a crop at a given time of its vegetative cycle or to bring the soil to the desired

moisture level outside the vegetative cycle and, in the case of a field, includes one or more water applications per season;

"irrigation consultant" means any person engaged to carry out civil works related to irrigation and drainage;

"irrigation management authority" means any local community organization established for the purpose of promoting local participation in the development and management of irrigation and includes any irrigation scheme, club, cooperative or association;

"irrigation scheme" means a systematic and orderly irrigation programme covering a defined area of land regardless of the type or system of irrigation employed;

"member" means a member of the Board;

"Policy" means National Irrigation Policy and Development Strategy;

"public watercourse" means a public watercourse which is commonly used for irrigation; and

"Register" means the register kept by the Board under section 40.

PART II
National Irrigation Policy and Development Strategy

Policy to rank paramount

3. Every public officer and any authority in Malaŵi exercising or performing powers, duties or functions in connexion with or concerning the commitment of the Government in development and management of irrigation in Malaŵi as declared in the National Irrigation Policy and Development Strategy (in this Act otherwise referred to as the "Policy") shall, in the exercise of his powers or the performance of his duties or functions, consider and treat the Policy as ranking paramount in the business of the Government and shall further consider it to be his paramount duty to act with all due diligence and dispatch in taking such action as is required or necessary to give effect to the Policy.

Publication and revision of Policy

4.—(1) The Policy shall be published by the Minister for general distribution and copies of its publication shall be made freely available and without charge in and outside Malaŵi to bodies connected with irrigation.

(2) Following any change in the Policy or following any legislative or statutory action or other action having similar effect taken by the Government in pursuance or in the implementation of the Policy, the Minister shall publish in the *Gazette* the changes.

PART III
Establishment of the Malaŵi Irrigation Board

Establishment of the Malaŵi Irrigation Board

5. There is hereby established a Board to be known as the Malaŵi Irrigation Board (in this Act otherwise referred to as the "Board").

Composition of the Board

6.—(1) The Board shall consist of—

(*a*) six persons, who shall be appointed by the Minister, at least four of whom shall be appointed from industry, academic, research and irrigation institutions;

(*b*) two local farmers who shall be appointed by the Minister from irrigation organizations; and

(*c*) the following *ex officio* members—

(i) the Secretary for Agriculture or his representative;

(ii) the Secretary for Lands or his representative;

(iii) the Secretary for Water Development or his representative; and

(iv) the Controller of Irrigation Services.

(2) A representative of an *ex officio* member referred to in subsection (1) shall be designated by, or on behalf of, the *ex officio* member by a notice in writing to the Board to attend the meetings of the Board and, upon such designation, such representative shall not attend to the business of the Board by representation.

(3) The Chairman shall be elected by the Board from among its members:

Provided that no member appointed under paragraph (*c*) of subsection (1) shall be elected as Chairman.

Tenure of office and vacancies

7.—(1) Subject to subsection (2), a member, other than an *ex officio* member, shall hold office for a period of three years and shall be eligible for re-appointment for another three-year term but the office of the member shall become vacant—

(*a*) if he resigns by giving one month notice in writing to the Board;

(*b*) upon his death;

(*c*) if he is absent without valid excuse from three consecutive meetings of the Board of which he has had notice;

(*d*) if he becomes an undischarged bankrupt;

(*e*) if, upon conviction of any offence of moral turpitude, he is sentenced to a term of imprisonment exceeding six months without the option of a fine;

(*f*) if he becomes of unsound mind; or

(*g*) if he participates, directly or indirectly, in an activity which is in contravention of this Act.

(2) A member, other than an *ex officio* member, shall be subject to removal by the Minister on grounds of incompetence, incapacity or being compromised in the exercise of his duties to the extent that his ability to give objective advice is seriously in question.

(3) On vacation of office by a member, the vacancy shall be filled by a person appointed in accordance with the provisions of section 6 (1) (*a*) under which the former member was appointed:

Provided that if the remaining period is less than six months, the Minister may decide not to have the vacancy filled until the expiry of the period.

Allowances and expenses of members

8.—(1) Members or members of a committee shall be paid such an allowance as the Minister shall determine.

(2) The Board may make provision for the reimbursement of any reasonable expense incurred by a member or a member of a committee in connexion with the business of the Board or the committee.

Policy directions

9. The Board may, where necessary, seek the general direction of the Minister on the manner in which it is to carry out its duties under this Act.

Proceedings of the Board

10.—(1) Subject to the other provisions of this Act, the Board may regulate its own procedure.

(2) The Board shall meet for the transaction of business at least once every three months at such places and at such times as the Chairman may determine.

(3) An extraordinary meeting of the Board may be called by the Chairman upon written notice of not less than seven days received from any member and shall be called if at least four members so request in writing:

Provided that if the urgency of any particular matter, does not permit the giving of such notice, an extraordinary meeting may be called upon by giving a reasonable notice.

(4) Half of the members shall form the quorum of any meeting of the Board.

(5) There shall preside at any meeting of the Board—

(*a*) the Chairman; and

(*b*) in the absence of the Chairman, such member as the members present and forming a quorum may elect among their number for the purpose of that meeting.

Committees of the Board

11.—(1) The Board may, for the purpose of performing its functions under this Act, establish other committees and delegate to any such committee such of its functions as it considers necessary.

(2) The Board may appoint as members of a committee established under subsection (1) persons who are or are not members of the Board and such persons shall hold office for such period as the Board may determine.

(3) Subject to any specific or general direction of the Board, a committee may regulate its own procedure.

Minutes of meetings

12. The Board shall cause minutes to be kept of the proceedings of every meeting of the Board and of every meeting of a committee.

Disclosure of interest by members

13.—(1) If any member is present at a meeting of the Board or of any committee at which any matter which is the subject of consideration is a matter which that person or his immediate family member or his professional or business partner is directly or indirectly interested in a private or professional capacity, he shall, as soon as is practicable after the commencement of the meeting, disclose such interest and, unless the Board or the committee otherwise directs, that person shall not take part in any consideration or discussion of, or vote on, any question touching on such matter.

(2) A disclosure of interest shall be recorded in the minutes of the meeting at which it is made.

Protection of members

14. No action, suit or other proceedings shall be brought or instituted personally against any member or a member of a committee in respect of any act done in good faith in the course of carrying out the provisions of this Act.

Invited persons

15.—(1) The Board may in its discretion at any time and for any period invite any person, and the Minister may in like manner nominate an officer in the public service, to attend any meeting of the Board or of any of its committees and take part in the deliberations of the meeting but such person or officer shall not be entitled to vote at the meeting.

(2) Section 14 shall apply, *mutatis mutandis*, to a person or an officer attending a meeting of the Board or committee pursuant to subsection (1).

Oath of secrecy

16. Every—

(*a*) member;

(*b*) member of a committee;

(*c*) employee of the Board; and

(*d*) consultant in the service of the Board,

shall, upon assumption of his office, take such oath of secrecy as may be approved by the Board or as may otherwise be prescribed under this Act.

Prohibition of publication or disclosure of information by unauthorized persons

17.—(1) No person shall, without the consent in writing given by or on behalf of the Board, publish or disclose to any person, otherwise than in the course of his duties, contents of any document, communication or information which relates to, and which has come to his knowledge in the course of, his duties under this Act.

(2) Any person who contravenes subsection (1) shall be guilty of an offence and liable to a fine of K100,000 and to imprisonment for five years.

PART IV
Functions and Powers of the Board

Functions of the Board

18.—(1) The functions of the Board shall be to advise Government and other stakeholders on policy matters relating to irrigation and drainage.

(2) Without prejudice to the generality of subsection (1), the Board shall—

(*a*) approve standards and guidelines for the development and management of irrigation and drainage;

(*b*) consider and advise on proposals for the enactment of legislation that may affect irrigation and drainage;

(*c*) review progress of the development and management of irrigation and drainage at national level;

(*d*) act as a forum for information sharing;

(*e*) conduct an inquiry into any matter falling within the scope of the functions of the Board;

(*f*) exercise authority affecting registration of irrigation consultants under this Act; and

(*g*) promote and maintain cooperation in irrigation and drainage with similar bodies in other countries and with international bodies connected with irrigation and drainage.

Powers of the Board

19. Subject to the directions of the Minister, whether general or special, the Board shall have the power to do all such things as are incidental or conducive to the carrying out of its functions under this Act.

PART V
The Secretariat of the Board

Secretariat of the Board

20. The secretariat of the Board shall consist of the Executive Secretary and such other suitably qualified public officers as may be required for the proper administration of this Act.

Executive Secretary of the Board

21.—(1) The Board shall appoint, on such terms and conditions as it may determine, an Executive Secretary of the Board who shall be the chief executive of the Board and shall in addition perform such duties as the Board shall assign to his office and ensure the effective administration and implementation of this Act.

(2) For the avoidance of doubt, the Executive Secretary shall be appointed from within or without the civil service.

(3) Without derogation from the generality of the responsibilities and duties of the Executive Secretary conferred under subsection (1), the Executive Secretary shall be responsible for the day to day administration of the Board.

(4) The Executive Secretary, or such other officer of the Board as the Executive Secretary may designate, shall attend meetings of the Board and of any committee and may address such meetings but shall not vote on any matter:

Provided that the person presiding at any meeting may, for good cause, require the Executive Secretary or such other officer to withdraw from such meeting.

(5) Section 14 shall apply, *mutatis mutandis*, to the Executive Secretary and other employees of the Board.

Other employees

22.—(1) The Board may appoint, on such terms and conditions as it may determine, such other employees, subordinate to the Executive Secretary, as it considers necessary for the performance of its functions and to assist the Executive Secretary in discharging his duties and responsibilities.

(2) The Board may delegate to the Executive Secretary the appointment of employees of the Board of such junior ranks as the Board shall specify.

Disclosure of interests by employees, etc.

23.—(1) An employee of the Board or a consultant to the Board who, or whose immediate family member, is directly or indirectly interested in a private, professional or official capacity in any matter being considered by the Board shall disclose such interest.

(2) A disclosure of interest under subsection (1) shall be made to the Executive Secretary who shall take such decision as he considers appropriate in each case and submit a report thereon to the Board.

Functions of the secretariat of the Board

24.—(1) The secretariat of the Board shall be responsible for implementing the programmes of the Board.

(2) Without prejudice to the generality of subsection (1), the secretariat of the Board shall—

(*a*) provide administrative backup services to the meetings and other functions of the Board;

(*b*) compile and present to the Board irrigation and drainage programmes for review;

(*c*) manage and coordinate the Fund in accordance with general and specific directions of the Board;

(*d*) prepare and submit annual progress reports for consideration by the Board; and

(*e*) perform such other functions as may be assigned to it by the Board.

PART VI
Irrigation Fund

Establishment of the Irrigation Fund

25.—(1) There is hereby established a fund to be known as the Irrigation Fund (in this Act otherwise referred to as the "Fund").

(2) The Fund shall consist of—

(*a*) such sums as shall be appropriated by Parliament for the purposes of the Board;

(*b*) any levy imposed pursuant to section 33;

(*c*) advances made to the Fund under section 27;

(*d*) such sums as are paid under this Act by way of fees, fines or other penalties;

(*e*) such sums or other assets as may be received by the Board under subsection (3); and

(*f*) such moneys as may otherwise vest in or accrue to the Board.

(3) The Board may—

(*a*) accept money by way of grants or donations from any source in or outside Malaŵi;

(*b*) with the approval of the Minister, raise by way of loans from any source, in or outside Malaŵi, such money as it may require for the discharge of its functions; and

(*c*) charge and collect fees in respect of programmes, publication, documents and other services provided by the Board.

The Fund to vest in the Minister Cap. 37:01

26. The Fund shall be vested in the Minister and, subject to this Act and the Finance and Audit Act, shall be administered in accordance with his directions.

Advances to the Fund

27. If in any financial year the income of the Fund together with any surplus income brought forward from a previous year is insufficient to meet the actual or estimated liabilities of the Fund, the Minister responsible for finance may make advances to the Fund in order to meet the deficiency or any part thereof and such advances shall be made on such terms and conditions, whether as to repayment or otherwise, as the Minister responsible for finance may determine.

Objects of the Fund

28. The objects for which the Fund is established shall be the development and management of irrigation and drainage.

Application of the Fund

29. Without derogation from the generality of section 28, the Fund may be applied for the purposes of—

(*a*) financing, by way of loans or grants, any research or study carried on, by or for the benefit of persons or organizations engaged in irrigation and drainage;

(*b*) the acquisition of land, equipment, materials and other assets and the construction of buildings in order to promote the objects of the Fund;

(*c*) paying the cost of any irrigation scheme which the Minister, on the recommendation of the Board, considers to be in the interest of the development and management of irrigation and drainage;

(*d*) meeting any expenses of the Board and those arising from the establishment and maintenance of the Fund; and

(*e*) any purpose which the Minister, on the recommendation of the Board, considers to be in the interest of the objects of the Fund.

Books and other records of accounts, audit and reports of the Fund

30.—(1) The Minister shall cause to be kept proper books and other records of account in respect of receipts and expenditure of the Fund.

(2) The accounts of the Fund shall be audited by the Auditor General who shall have all the powers conferred upon him by the Finance and Audit Act. Cap. 37:01

(3) The Minister shall cause to be prepared, as soon as practicable, but not later than six months after the end of the financial year, an annual report on all the financial transactions of the Fund.

(4) The report under subsection (3) shall include a balance sheet, an income and expenditure account and the annual report of the Auditor General and shall be laid by the Minister before the National Assembly.

Holdings of the Fund

31.—(1) All sums received for the purposes of the Fund shall be paid into a bank account and no amount shall be withdrawn therefrom except by means of cheques signed by such persons as are authorized in that behalf by the Minister.

(2) Any part of the Fund not immediately required for the purposes of the Fund may, on the recommendation of the Board, be invested in such manner as the Minister, after consulting with the Minister responsible for finance, may determine.

Financial year

32. The financial year of the Fund shall be the period of twelve months ending on 30th June in each year or on such other date as the Minister may specify by order published in the *Gazette*:

Provided that the first financial year of the Fund may be a period shorter or longer than twelve months as the Minister shall determine, but in any case not longer than eighteen months.

Levy

33. The Board may, from time to time, by order published in the *Gazette*, impose a levy.

PART VII
Local Community Participation

Purpose of this Part

34. The purpose of this Part is to provide for local community participation in development and management of irrigation and drainage.

Irrigation management agreement

35.—(1) For proper management of irrigation, the Minister may, on the recommendation of the Board, enter into an irrigation management agreement with an irrigation management authority providing for—

(*a*) a management plan; and

(*b*) assistance to be provided by the Government.

(2) Subject to performance of unfulfilled obligation under an irrigation management agreement to the right of third party, an irrigation management agreement may be terminated by either party.

Minister may make rules

36.—(1) The Minister may, on the recommendation of the Board, make rules for the better carrying into effect of the purposes of this Part.

(2) Without prejudice to the generality of subsection (1), the rules may—

(*a*) provide for development and management of irrigation and drainage;

(*b*) facilitate the establishment of irrigation management authorities for the benefit of the local communities;

(*c*) encourage District Assemblies, nor-governmental organizations, the private sector and other relevant institutions to contribute towards provision of irrigation extension services, in accordance with guidelines provided by the Government;

(*d*) authorize payments of grants or bonus out of public funds for encouragement of irrigation; and

(*e*) prescribe a mechanism for sharing costs between the Department of Irrigation and irrigation management authorities with regard to development and management of irrigation and drainage.

Incentives to farmers

37. The Minister shall, on the recommendation of the Board and in consultation with the Minister responsible for finance, determine—

(*a*) such fiscal incentives as may be necessary for the promotion of irrigation farming; and

(*b*) such measures as may be necessary for preventing the failure or non-viability of irrigation farming.

Rectification order

38.—(1) The Minister may, on the recommendation of the Board, issue a rectification order against any person whose acts or omissions have or are likely to have adverse effects on a public watercourse.

(2) A rectification order under subsection (1) shall specify—

(*a*) the particulars of the person or persons against whom it is made;

(*b*) the period within which anything required to be done under the rectification order shall be done;

(*c*) the penalties which may be imposed for non-compliance with the rectification order; and

(*d*) such other matters as the Minister may, on the recommendation of the Board, consider necessary with respect to rectification measures.

(3) For avoidance of doubt, a rectification order under subsection (1) may be issued against all users of a public watercourse and may also specify how the expenses in respect of rectification measures shall be apportioned amongst the users.

PART IX
Registration of Irrigation Consultants

Restriction on engagement of irrigation consultants

39.—(1) After the expiration of six months from the date of coming into operation of this Act, no person shall be engaged as an irrigation consultant unless he is registered under this Act.

(2) Any person who contravenes subsection (1) shall be guilty of an offence.

Register

40. The Board shall keep a Register in which the name of every person, immediately on his being accepted for registration by the Board, shall be registered, showing against his name such particulars as the Board shall from time to time deem necessary, and the Board shall enter into such Register all changes of registration particulars.

Qualification for registration as an irrigation consultant

41.—(1) No person shall be registered as an irrigation consultant unless he shall at the date of his application for registration have attained the age of twenty-five years, paid the prescribed registration fee and either—

(*a*) passed a qualifying examination approved by the Board and have had not less than three years post qualification practical experience in the work of an irrigation consultant; or

(*b*) satisfied the Board that he possesses a qualification which, in the opinion of the Board, furnishes a sufficient guarantee of the possession of the requisite knowledge and skill for the efficient practice of the work of an irrigation consultant.

(2) Notwithstanding subsection (1), the Board shall not register any person as an irrigation consultant unless it is satisfied that his professional and general conduct has been such as should not, in the opinion of the Board, debar him from registration.

Striking out

42. The Board shall have power to strike out of the Register a name of a registered person who shall have been found guilty of unprofessional conduct as defined in regulations made under section 55.

Unauthorized entry, etc., in the Register

43. Any person who, without the authority of the Board in that behalf, given generally or specially—

(*a*) makes any material entry in the Register;

(*b*) alters or changes any entry in the Register in any material particular; or

(*c*) gives false information to the Board or to any person knowing it to be false or having cause to believe it to be false with a view to securing his registration or the registration of another person, whether or not he or that other person is registered, shall be guilty of an offence.

Remuneration not recoverable by unregistered persons

44. A person who is not registered on the Register shall not be entitled to recover remuneration in respect of irrigation consultancy work done by him.

PART IX
Offences and Penalties

Wilful damage, etc. of canals

45.—(1) Mo person shall wilfully damage irrigation canals drains or associated infrastructure.

(2) No farmer shall fail to maintain irrigation canals, drains and associated infrastructure in his agricultural holding if the holding is within a communal irrigation scheme.

(3) Any person who contravenes subsection (1) or subsection (2) shall be guilty of an offence.

Destructive practices

46.—(1) No person shall—

(*a*) engage in practices which are destructive or potentially destructive to the catchment area of a river or public watercourse supplying water to an irrigation scheme or farm; or

(*b*) permit livestock to graze, otherwise than as prescribed by the Minister, in dambo areas under irrigation.

(2) Any person who contravenes subsection (1) shall be guilty of an offence and liable to a fine of K100,000 and to imprisonment for five years.

Setting or permitting fire

47.—(1) No person shall—

(*a*) set or cause to be set on fire crops on an irrigation scheme or farm; or

(*b*) without reasonable cause, refuse to assist in averting, fighting or extinguishing a fire on an irrigation scheme or farm.

(2) Any person who contravenes subsection (1) shall be guilty of an offence and liable to a fine of K100,000 and to imprisonment for five years.

Encroachment prohibited

48.—(1) No person shall graze livestock or permit livestock to encroach upon any irrigation scheme or farm on which there is a crop which has not been harvested or which has been harvested but not removed.

(2) Any person who contravenes subsection (1) shall be guilty of an offence and liable to a fine of K100,000 and to imprisonment for five years.

Applying prohibited chemicals and substances

49.—(1) The Minister may, by notice published in the *Gazette*, prohibit the application on an irrigation scheme or farm of any chemical or substance.

(2) Any person who applies or causes to be applied on an irrigation scheme or farm any chemical or substance prohibited under subsection (1) shall be guilty of an offence and liable to a fine of K200,000 and to imprisonment for ten years.

PART X
Miscellaneous Provisions

Secrecy to be observed

50.—(1) A member, a member of a committee and every person employed under this Act shall not disclose to any person, except in the performance of his duties under this Act or when required to do so by any written law, any information which he may have acquired in the course of his duties in relation to the financial or business affairs of any person, undertaking or business.

(2) Any person who contravenes subsection (1) shall be guilty of an offence and liable to a fine of K100,000 or to an amount equivalent to the financial gain generated by the offence, if such amount be greater, and to imprisonment for five years.

Failure to comply with directives, etc.

51. Any person who—

(*a*) contravenes or fails to comply with any provision of this Act or any regulations made hereunder, or any directive or order lawfully given, or any requirement lawfully imposed under this Act or any regulation made hereunder; or

(*b*) omits or refuses—

(i) to furnish any information when required by the Board to do so; or

(ii) to produce any document when required to do so by a notice sent by the Board; or

(*c*) knowingly furnishes any false information to the Board, shall be guilty of an offence.

General penalty

52. A person guilty of an offence for which no specific penalty is provided shall be liable to a fine of K60,000 or to an amount equivalent to the financial gain generated by the offence, if such amount be greater, and to imprisonment for three years.

Appeals

53.—(1) Any person aggrieved by the decision of the Board may, within thirty days thereof, appeal in writing to the Minister.

(2) Any person aggrieved by the decision of the Minister may, within thirty days thereof, apply to the High Court for judicial review of the decision of the Minister.

Keeping of records

54.—(1) The Minister may, on the recommendation of the Board, prescribe activities in respect of which records shall be kept for purposes of this Act and may require any person in possession or control of such records to transmit the records to the Board at such intervals as he may determine.

(2) Any person who—

(*a*) fails to keep records required under this Act; or

(*b*) fraudulently or knowingly alters any such records,

shall be guilty of an offence and liable to a fine of K40,000 and to imprisonment for two years.

Regulations

55.—(1) The Minister may, on the recommendation of the Board, make regulations for the better carrying into effect of the purposes of this Act.

(2) Without prejudice to the generality of subsection (1), the regulations may provide for—

(*a*) anything required to be prescribed under, or for the purposes of, this Act;

(*b*) any forms required for the purposes of this Act;

(*c*) fees payable in respect of any service provided by the Board;

(*d*) the furnishing of reports to the Minister on irrigation and drainage;

(*e*) the form of awards and certificates to be awarded by the Board;

(*f*) the manner of and conditions for recognition by the Government of associations and other bodies engaged in irrigation and drainage;

(*g*) the procedure to be followed in handing over existing Government smallholder irrigation schemes to local communities;

(*h*) the management of irrigation schemes;

(*i*) reports to be made for the purposes of this Act; and

(*j*) the definition of unprofessional conduct, the mode of inquiry into and the method of dealing with such conduct and the penalties which may be imposed upon a registered person found guilty of such conduct.

(3) Any regulation made under this Act may, notwithstanding the provisions of section 21 (*e*) of the General Interpretation Act, prescribe a fine of up to K20,000 and imprisonment for up to one year for an offence committed against any provision of such regulation. Cap. 1:01

CHAPTER 73:01

ELECTRICITY

An Act to make provisions for the regulation of the generation, transmission, wheeling distribution, sale, importation and exportation, use and safety of electricity and for matters connected therewith or incidental thereto 22 of 2004 12 of 2016 G.N. 39/2007

[28th December, 2007]

PART I
Preliminary

1. This Act may be cited as the Electricity Act. Short title

2. In this Act unless the context otherwise requires— Interpretation 12 of 2016

"Authority" means the Malaŵi Energy Regulatory Authority established under section 3 of the Energy Regulation Act. Cap. 73:02

"average selling price" means the weighted average of the price paid by the single buyer in its contracts with generators, imports and any other supply obtained by the single buyer; 12 of 2016

"bulk consumer" means a consumer that is allowed to buy electricity directly from a generator; 12 of 2016

"case of emergency" with reference to a right of entry on or to land or premises conferred under this Act, means a case in which the person requiring entry to the land or premises in question has reasonable cause to believe that circumstances exist which are likely to endanger life or property, and that immediate entry to such land or premises is necessary to verify the existence of the circumstances or to ascertain the cause or to effect a remedy;

"customer" means a person purchasing electricity;

"consumer" means a person using electricity;

"contract of supply" means a contract between the operator of an electricity undertaking and any other person for the supply of electricity to that person;

"distribution" means the conveyance of electricity at less than 66,000 volts, or as may be prescribed by notice in the *Gazette*, from the transmission grid to customers through a distribution power system, and the terms "distribute" and "distributing" have corresponding meanings;

"distributor" means a person distributing electricity;

"distribution line" means any cable underground or overhead line for the distribution or reticulation of electricity from an electricity undertaking to a customer, together with any transformers, switchgear or other works necessary to, and used in connexion with, such cable underground or overhead line, and the buildings or such part thereof as may be required to accommodate transformers, switchgear and other works;

"electricity" means electric energy generated from hydro, thermal, coal, diesel, oil, biomass, gas, photovoltaic, wind, nuclear and any other source as defined in Energy Laws;

"electricity undertaking" means any installation works or services for the commercial generation, transmission, wheeling, distribution or supply of electricity which is owned or operated by a licensee, and 'electricity undertaker' bears a corresponding meaning;

Cap. 73:02 "energy laws" has the meaning ascribed thereto in the Energy Regulation Act;

"generation" means the production of electricity for sale, and the terms 'generate' and 'generating' have corresponding meanings;

"generator" means a person generating electricity;

"generation station" means any station for generating electricity, including any building, plant and machinery used for the purpose and all accessories necessarily incidental thereto, together with the site thereof, and any site intended to be used for such a station;

12 of 2016 "Grid Code" means the set of rules made by the Authority for operation, dispatch and reporting of the Malaŵi electricity supply industry;

12 of 2016 "independent power producer" means a person that privately builds, owns and operates facilities to generate and sell electricity to the Malaŵi electricity supply industry;

"interconnected system" means all high voltage electricity lines of 66,000 volts and above, or as may be prescribed by notice in the *Gazette*, including the related substations and associated equipment and generation stations to which they are connected and any distribution system connected thereto;

12 of 2016 "licensee" means the holder of a licence granted by the Authority under this Act for the generation, transmission, distribution, importation

or exportation of electricity, system and market operator and single buyer of electricity;

"Load Dispatch Centre" means a business area within the system and market operator which is used for coordination of generation, transmission and distribution of electricity in the interconnected electricity system; 12 of 2016

"power purchase agreement" means a contract between a generator and a single buyer or between a single buyer and a distributor to buy electricity for a pre-established period of time; 12 of 2016

"regulated consumer" means a consumer that must buy electricity from a distributor; 12 of 2016

"rural electrification" means grid or off-grid extension of distribution lines and generation of electricity in rural and remote areas whose internal rate of return is up to a maximum value set by the Authority, line voltage level is less than 66 kilovolts and generation capacity is up to 5 megawatts; 12 of 2016

"single buyer" means a licensee responsible for buying electricity from generators; 12 of 2016

"supply" means the sale of electricity to customers;

"supplier" means a person supplying electricity;

"system and market operator" means a licensee responsible for operating the transmission system and the electricity market of Malaŵi; 12 of 2016

"transmission" means the conveyance of electricity at 66,000 volts or more, or as may be prescribed by notice published in the *Gazette*, from generators or import points to distributors or large customers or export point through a transmission power system, and the terms "transmit" and "transmitting" have corresponding meanings;

"transmitter" means a person transmitting electricity;

"wheeling of power" means the transmission of power from a seller to a buyer using a transmission system of one grid to a load outside the grid boundary. 12 of 2016

PART II

Licences

Electricity supply activities to be carried on under licence 12 of 2016

3.—(1) A person shall not carry on or be engaged in any activity for the supply of electricity, including the export of electricity from, and import of electricity into, Malaŵi, without a generation, transmission, importation, exportation, system and market operation, single buyer or distribution licence, as the case may be, issued by the Authority.

(2) The activities in the electricity supply industry for which a licence is required are—

(*a*) generation of electricity for sale;

(*b*) operation of a transmission network;

(*c*) operation of a distribution network for the supply of electricity;

(*d*) importation of electricity into Malaŵi;

(*e*) exportation of electricity out of Malaŵi;

12 of 2016 (*f*) system and market operation; and

12 of 2016 (*g*) buying electricity from generators.

(3) The Authority has the power—

(*a*) to determine whether any person is carrying on or engaging in any activity for the supply of electricity; and

(*b*) to order any person not holding a licence and who is required to apply for and hold a licence under this Act to cease carrying on or be engaged in any activity in the generation, transmission, importation, exportation or distribution of electricity.

Licensees to hold only one type of licence 12 of 2016

4.—(1) Save as provided for in subsection (2), a licensee shall not be granted more than one type of licence listed in section 3 (2).

12 of 2016 (2) A holder of a transmission licence before commencement of this Act, shall hold simultaneously licences for distribution, imports, exports, system and market operator and single buyer.

12 of 2016 (3) A person may hold more than one generation licence.

(4) A licensee breaches this section if he or she holds more than five per cent shares in another company which holds a licence under this Act.

12 of 2016 (5) A person that holds a licence for generation may also hold a licence for exportation.

Application for licences 12 of 2016

5.—(1) A person required to hold a licence under this Act shall apply to the Authority for a generation, transmission, system and market operator, single buyer, exportation, importation or distribution licence, as the case may be.

12 of 2016 (2) On commencement of this Act, the Authority shall issue licences for system and market operation and single buyer to the current holder of transmission and distribution licences.

12 of 2016 (3) On commencement of this Act, the Authority shall issue a licence for the generation facilities currently in the country.

Mode and procedure of application for licence

6.—(1) Every application for a licence shall be made to the Authority and be advertised by the Authority at the expense of the applicant, in the prescribed manner.

(2) Every application for the licence shall be accompanied by—

(*a*) licence application fees as the Authority shall prescribe by notice published in the *Gazette*; and

(*b*) a schedule of the proposed tariffs which a licensee intends to charge customers.

(3) Any person may object to the issuing of the licence, and any such objection shall be submitted to the Authority in the prescribed manner and time.

(4) The Authority shall consider an application under subsection (1) and any objection thereto, and may for that purpose arrange for a public hearing of the application at a suitable time and place of which not less than fourteen days' notice shall be given to the applicant and every objector.

(5) At the hearing of an application under subsection (4) the applicant and any objector may be represented by a legal practitioner and may lead evidence in support of the application or objection.

(6) Not later than thirty days after conclusion of a hearing in terms of subsection (4) or if no hearing was arranged, thirty days after the expiry of the period allowed for the submission of objections in terms of subsection (3), the Authority shall either grant or refuse the application for the issue of a licence.

(7) If an application for the issue of a licence is refused, the Authority shall inform the applicant in writing of the reasons for the refusal.

(8) If an application for the issue of a licence is granted, the Authority shall issue the licence in the prescribed manner and the licence shall—

(*a*) specify the particular activity authorized by the licence;

(*b*) define the area in respect of which the licence is issued;

(*c*) contain or have attached to it any conditions imposed in relation to the licence in accordance with this Act; and

(*d*) contain a schedule specifying the approved tariffs that may be charged by the licensee to its customers.

Criteria for consideration of application for licence

7.—(1) The Authority shall, in considering the application for the issue renewal, amendment or transfer of a licence, give due consideration to matters or activities which may adversely affect, or result in damage to, the environment or the rights of others, weighed against the advantages in general that may be derived from the grant of the application.

(2) Without derogating from the generality of the provisions of subsection (1) the Authority may—

(*a*) request from the applicant, an environmental and social impact assessment study indicating the extent of any potential damage to or pollution of the environment or social disruption and the steps proposed to be taken by the applicant to prevent or minimize such damage or pollution and to restore the environment generally and in terms of existing environmental legislation;

(*b*) request the applicant to submit details of the technical and economic-financial resources available to the applicant to execute the work, to operate the system in an effective, efficient and safe manner and to carry on the business to which the application or licence relates, substantiated by documentary proof where applicable;

(*c*) request the applicant to submit details of its shareholding structure and related business interests as would be material in terms of section 4 (4);

(*d*) take into consideration the extent to which the activities of the applicant may be detrimental to or adversely affect the rights and operation of other licensees or their customers in their area of operation; and

(*e*) take into consideration the ability of the applicant to provide an effective service to customers.

Incomplete premises

8.—(1) If an application for a licence is made in respect of premises which still require work of a structural nature to be carried out including the installation of plant and equipment, before operations under the licence can be commenced, the Authority may, upon approval of the plans in respect of such work grant the licence subject to compliance with such conditions and requirements, and within such period, as the Authority may determine before the licence can be issued.

(2) The Authority shall in writing inform the applicant of the conditions and requirements imposed under subsection (1).

(3) The Authority may at any time, on application of the applicant concerned—

(*a*) withdraw or amend any condition or requirement referred to in subsection (1);

(*b*) extend or further extend the period referred to in subsection (1); and

(*c*) approve an amended plan in respect of the premises.

(4) When the Authority is satisfied that the subsection (1) have been completed in accordance with the approved plan thereof, the conditions and requirements have been complied with and the premises are suitable for the purpose for which they will be used under the licence, the Authority shall issue such licence.

(5) A licence granted in terms of subsection (1) shall lapse if it is not issued before the expiration of the period referred to in that subsection or any extension thereof under subsection (3) (*b*).

Conditions of a licence

9.—(1) A licence shall be subject to such conditions as may be prescribed under this Act.

(2) Without derogating from the generality of the power conferred by subsection (1) conditions prescribed under that subsection may include provisions relating to—

(*a*) implementation of environmental impact mitigation measures proposed by the licensee in his or her application;

(*b*) the obligation of the licensee, upon cessation of the activities carried on under the licence concerned, with regard to the destruction, dismantling or removal of any buildings, walls, installations, equipment, structures, waste dumps or other facilities erected or used for purposes of, or in connexion with, those activities, whether on the premises of the licensee or elsewhere, and the restoration of any land disturbed by such activities;

(*c*) the furnishing by the licensee of acceptable security for compliance with any condition contemplated in paragraph (*a*) or (*b*) or acceptable security for compliance with duties of a licensee under this Act; and

(*d*) lodging with the Authority of annual returns containing prescribed particulars.

Amendment or revocation of licences

10.—(1) Subject to section 11, the Authority may revoke or amend a licence or a condition of a licence

(*a*) on application, or with the consent, of a licensee;

(*b*) upon material breach by the licensee of any of the conditions of the licence or the provisions of this Act, or the Energy Regulation Act; or Cap. 73:02

(*c*) if subsequent to granting of the licence it is discovered that information furnished in connexion with that application was incorrect or incomplete in a material respect.

(2) The provisions of section 6 shall apply *mutatis mutandis* to applications for amendment or revocation of a licence under subsection (1).

Breach of conditions of licence Cap. 73:02

11. If a licensee fails to comply with his licence, the conditions on which it was granted or the provisions of this Act or the Energy Regulation Act, or modifies the purpose for which the licence was granted, or fails to commence or complete any works required in his licence, the Authority may serve him or her a notice in writing requiring him to comply within such reasonable period as the Authority may determine, and where the licensee fails to comply, the Authority may—

(*a*) call for any security provided by the licensee to rectify the breach where feasible;

(*b*) impose such penalties or sanctions as may be provided for under this Act or the Energy Regulation Act, or the licensing conditions of such licensee which may include recovery in a court by the Authority from such licensee of any profit earned by the licensee as a result of the non-compliance; Cap. 73:02

(*c*) amend the licence; and

(*d*) revoke the licence or suspend the licence and appoint new managers, for a period not exceeding one year, to manage the operations of the licensed activity temporarily while conducting competitive bidding to identify a licensee to take over that licensed activity.

Duration and renewal of licences 12 of 2016

12.—(1) Unless sooner revoked under section 10, a licence shall remain valid for such period as shall be prescribed in the licence which period shall not exceed—

(*a*) in the case of a generation licence, fifty years;

(*b*) in the case of a transmission licence, thirty years;

(*c*) in the case of a distribution licence, twenty years;

(*d*) in the case of a licence to export or import electricity, thirty years; and

(*e*) in the case of a system and market operator and a single buyer, twenty-five years. 12 of 2016

(2) A licensee may within a period of not less than twelve months before the date fixed for the termination of the licence, make application to the Authority for a renewal of such licence and the application shall be made in accordance with this Act.

(3) A licence shall be renewed if the Authority is satisfied that the licensee has acted in accordance with the terms and conditions of the licence and the provisions of this Act, and that renewal of such licence will further enhance the objectives of this Act.

Transfer of licence

13.—(1) A licence may not be transferred or ceded to any other person, unless the Authority has granted approval therefor.

(2) An application for the transfer of a licence shall—

(*a*) be made by the licensee and proposed transferee jointly;

(*b*) be submitted to the Authority; and

(*c*) be advertised at the expense of the applicant, in the prescribed manner.

(3) Any objection to the transfer of a licence shall be submitted to the Authority in the prescribed manner.

(4) The Authority shall consider an application in terms of subsection (1) and any objection thereto, and may for that purpose, at its discretion, arrange for public hearing of the application at a suitable time and place of which not less than fourteen days notice shall be given to the applicants and every objector.

(5) At a hearing of an application under subsection (4), the applicant and an objector may be represented by a legal practitioner and may lead evidence in support of the application or objection.

(6) Not later than thirty days after conclusion of a hearing under subsection (4) or, if no hearing was arranged, thirty days after expiry of the period allowed for the submission of objections under subsection (3), the Authority shall either grant or refuse the application for transfer.

Rural electrification licensees

14. The Authority may, by notice published in the *Gazette*, prescribe special and less onerous licensing regulations in respect of applications for rural electrification.

Register of licences

15. The Authority shall keep and maintain a public register of licences issued, including the following information—

(*a*) the terms and conditions of each licence; and

(*b*) such other information as may be prescribed or required under this Act.

PART III

Tariffs

Licensees to charge only approved tariffs 12 of 2016

16.—(1) Subject to the provisions of this Part, a licensee shall not charge any customer any tariffs higher than those specified in the schedule of approved tariffs for his or her licence.

(2) The schedule of tariffs approved by the Authority under subsection (1) shall comprise—

(*a*) a base tariff determined in accordance with the principles laid down in section 18; and

(*b*) a tariff adjustment formula which takes into consideration exchange rate movement, consumer price index increases and other unavoidable cost increases and expected efficiency gains in the sector.

(3) The expected efficiency gains referred to in subsection (2) for distribution licensee shall include—

(*a*) reduction of technical and non-technical losses; 12 of 2016

(*b*) accounts receivables of not more than sixty days;

(*c*) connexion rates;

(*d*) customer-employee ratio; and

(*e*) any other performance indicator as deemed necessary by the Authority. 12 of 2016

(4) The Authority shall determine the components of the base tariff from time to time, by notice published in the *Gazette*. 12 of 2016

(5) The Authority shall, every four years, revise the base tariff and review the tariff adjustment formula referred to in subsection (2) for all licensees, with the exception of generation licensees. 12 of 2016

(6) At the end of four years and before the Authority approves the new base tariff or new tariff adjustment formula for the next period, the base tariff and respective tariff adjustment formula shall remain in force. 12 of 2016

(7) The generation component of the base tariff shall be adjusted based on the respective power purchase agreements, and informed by the single buyer to the Authority. 12 of 2016

(8) Every licensee, with the exception of a generation licensee, shall publish the approved tariff or any revision thereof in a manner prescribed by the Authority. 12 of 2016

(9) A single buyer shall publish the tariff agreed in each power purchase agreement, as well as the resulting average selling price. 12 of 2016

Public hearing before tariff revision

17.—(1) Before revising the base tariff and the tariff adjustment formula in accordance with section 16 (5) the Authority shall publish the proposed tariff revision and may cause tariff studies to be carried out.

(2) Any objection to the tariff revision shall be submitted to the Authority in the prescribed manner and time.

(3) The Authority shall consider the objections and tariff studies in terms of subsection (1), and shall for that purpose, arrange for a public hearing of the tariff revision at a suitable time and place of which not less than fourteen days notice shall be given.

(4) At a hearing in terms of subsection (3) any objector may be represented by a legal practitioner and may lead evidence in support of the objection.

(5) Not later than thirty days after conclusion of a hearing under subsection (3), the Authority shall either revise the tariff or leave it as it may be or modify the proposed revisions.

Criteria for granting or revising tariffs

18.—(1) The tariff of charges for new entrants or revision of tariff of charges provided under this Act shall be approved by the Authority and shall be set at levels sufficient to allow the licensee an opportunity to recover his costs of service, including a reasonable return on capital and encourage efficiency.

(2) In addition to the principles set in subsection (1), the Authority shall have regard to the following when setting or revising tariff of charges—

(*a*) predictability of adjustments;

(*b*) financial sustainability of licensees;

(*c*) price stability;

(*d*) equity and fairness;

(*e*) cost of service;

(*f*) quality of service; and

(*g*) the value of the Malaŵi Kwacha in relation to foreign currencies.

PART IV

12 of 2016

Transmission, Distribution, System and Market Operator and Single Buyer Licensee

Transmission licence
12 of 2016

19.—(1) The Authority shall issue a transmission licence to the system and market operator to build, operate and maintain the transmission network in Malaŵi.

(2) The Authority shall issue additional transmission licences to generators that need to connect their plants with the network owned and operated by the system and market operator.

(3) On recommendation of the single buyer and upon approval by the Minister, the Authority may issue a transmission licence to a person different from a transmission operator to build, operate and maintain transmission facilities:

Provided that the holder of this licence shall operate under the coordination of the transmission licensee, following the orders of the system and market operator licensee.

Duties and functions of a transmission licensee and a distribution licensee
12 of 2016

20.—(1) The duties and functions of the transmission licensee shall be to—

(*a*) build, operate and maintain the transmission network in Malaŵi;

(*b*) undertake transmission planning in collaboration with the single buyer licensee;

(*c*) provide information for the single buyer licensee's planning activities;

(*d*) coordinate the operation of the transmission system with the system and market operator licensee;

(*e*) comply with the operation procedures and criteria established in the market rules and Grid Code for the reliable and economic operation of the transmission system; and

(*f*) coordinate the importation and exportation of electricity as instructed by the single buyer licensee.

(2) The duties and functions of the distribution licensee shall be to—

(*a*) plan, build, operate and maintain the distribution network in Malaŵi;

(*b*) supply electricity to consumers;

(*c*) take meter readings, prepare and deliver invoices, and collect payments from consumers;

(*d*) provide information to the single buyer licensee for planning and forecasts purposes;

(*e*) coordinate the operation of the distribution system with the system and market operator licensee;

(*f*) forecast the electricity consumption in each node or zone supplied by the licensee at every time segment of the day; and

(*g*) provide information to the system and market operator licensee for the daily generation dispatch.

Duties and functions of system and market operation licensee
12 of 2016

20A.—(1) The duties and functions of the system and market operator licensee shall be, to—

(*a*) guarantee to all generation plants a fair dispatch and non-discriminatory access to the transmission system;

(*b*) own, manage and operate the Load Dispatch Centre in a non-discriminatory manner and at least cost in the interconnected system;

(*c*) plan and control the daily operation of the integrated and interconnected system;

(*d*) dispatch generation in line with market rules and the Grid Code;

(*e*) optimize the use of reservoirs, taking into consideration other water usages and environmental constraints;

(*f*) supervise and coordinate the real time operation of the market;

(*g*) meter and settle transactions between licensees;

(*h*) determine the actual power of generation units of the interconnected system;

(*i*) determine the valued balance of the movement of electricity resulting from the integrated operation of the system;

(*j*) provide accurate information to licensees and companies interested to invest in the sectors;

(*k*) manage imports and exports arising from the operation of the Southern Africa Power Pool's Day Ahead electricity market;

(*l*) represent Malaŵi in the Southern Africa Power Pool;

(*m*) submit periodic reports to the Authority in respect of each of the functions in this subsection; and

(*n*) perform such other duties incidental to and connected with the objective of the Load Dispatch Centre.

(2) For the purposes of subsection (1), "Southern Africa Power Pool" means a cooperation of the national electricity companies in Southern Africa that have created a common power grid between their countries and a common market for electricity.

Duties and functions of single buyer licensee
12 of 2016

20B. The duties and functions of the single buyer licensee shall be to—

(*a*) prepare a long term forecast of demand, taking into consideration the targets of electricity supply coverage and expected economic growth in consultation with the Minister;

(*b*) undertake least cost long-term generation and transmission expansion plan;

(*c*) prepare a ranking of generation projects to be tendered out with the approval of the Minister;

(*d*) prepare a ranking of transmission projects to be built, in coordination with the transmission licensee, with the approval of the Minister;

(*e*) organize, with the approval of the Minister, open tenders for independent power producers that shall comply with guidelines established by the Authority;

(*f*) evaluate unsolicited proposals from independent power producers and recommend to the Minister for approval;

(*g*) negotiate and submit power purchase contracts to the Authority for approval, and sign the contracts with the independent power producers;

(*h*) prepare the annual generation forecast;

(*i*) conclude power purchase agreements with generation licensees;

(*j*) conclude power supply contracts with distribution licensees; and

(*k*) conclude power purchase agreements for importation and exportation of electricity.

Power sales and purchase contracts 12 of 2016

21.—(1) In order to comply with their obligations to meet the total demand for electricity within their area of distribution, distributors shall sign electricity supply contracts with the single buyer licensee at rates agreed upon between the parties and approved by the Authority.

12 of 2016

(2) All licensees shall sell or purchase bulk power through the single buyer licensee.

12 of 2016

(3) Upon approval by the Authority, a bulk consumer may buy power directly from generators.

Import and export of power 12 of 2016

22.—(1) The single buyer licensee shall, under licence from the Authority, whenever there is need for additional generation capacity, consider purchase of power from other countries through international interconnectors.

12 of 2016

(2) The single buyer licensee shall under licence from the Authority, whenever there is excess generation capacity or reserve capacity when feasible, consider sale of power to other countries through international interconnectors.

12 of 2016

(3) Apart from the single buyer licensee no other licensee shall be licensed to import or export power into and out of Malaŵi, respectively:

Provided that a distribution licensee may be licensed to export power out of Malaŵi if such export is through a distribution line, and provided further that export of power shall not affect the local capacity to meet the demand for power at any time.

Wheeling of power

23. The wheeling of power through the Malaŵi transmission system shall be in accordance with the principles of the Southern Africa Power Pool.

Third party access 12 of 2016

24.—(1) A transmission licensee who is licensed to transmit electricity may not, upon the request of another licensee, refuse that licensee the right of transmitting electricity through its electrical or transmission line against payment of compensation at a rate approved by the Authority, except if such refusal is reasonably based on an insufficiency of technical availability of capacity:

12 of 2016

Provided that in case of insufficiency of technical availability of capacity, the allocation shall be based on the economical dispatch of generation.

(2) For purposes of this section there is a rebuttable presumption that there is always available capacity in the transmission system until the contrary is demonstrated by the transmission licensee to the satisfaction of the Authority.

(3) The tariff of charges charged by a transmission licensee shall be approved by the Authority and the tariff shall reflect cost of service and be non-discriminative.

Load Dispatch Centre

25. A transmission licensee shall own, manage and operate the Load Dispatch Centre which shall be responsible for coordination of generation, transmission, load dispatch and distribution in a non-discriminatory manner and at least cost in the interconnected system.

Functions and reports of the Load Dispatch Centre

26.—(1) A transmission licensee shall, through the Load Dispatch Centre, be responsible for the following functions—

(*a*) the planning and control daily of the integrated operation of the interconnected system to ensure satisfaction of demand through safe, reliable and low cost operation;

(*b*) the carrying out of load dispatch in real time at minimum cost;

(*c*) the determination of the actual power of generation units of the interconnected system;

(*d*) the determination of the valued balance of the movement of electricity resulting from the integrated operation of the system; and

(*e*) the performance of such other duties incidental to and connected with the objective of the Load Dispatch Centre.

(2) A transmission licensee shall submit periodic reports to the Authority in respect of each of the functions in subsection (1).

PART V

System Operation

12 of 2016

Requirements of the Load Dispatch Centre
12 of 2016

27.—(1) The Load Dispatch Centre shall perform daily the economical dispatch of generation, in accordance with the market rules and the Grid Code.

(2) Every generator shall comply with the instructions of the Load Dispatch Centre and shall inform the Load Dispatch Centre daily of its availability.

Transmission or distribution licensee not to own a generation station

28. No transmission licensee or distribution licensee shall be licensed to build, own or operate and maintain a generation station for sale of power whether for firm or standby purpose.

29. A transmission and distribution licensee shall conduct its operations in accordance with the Grid Code.

Transmission or distribution licensee to conduct operations in accordance with Grid Code
12 of 2016

30. All generators shall sign power sale agreements with the single buyer for sale of their power at a price to be agreed between the parties but approved by the Authority.

Generators to sell power to single buyer
12 of 2016

PART VI

Distribution

31. Subject to the terms and conditions of a licence issued in accordance with this Act and the Energy Regulation Act, every distributor shall supply electricity to every consumer who is in a position to make satisfactory arrangements for payment under a contract of supply with that operator.

Duties of Distributor
Cap. 73:02

32. Where a distributor unduly refuses to supply any applicant with electricity, the applicant may appeal to the Authority, which shall determine the conditions under which the distributor shall undertake such supply.

Delays in supply

33. A consumer shall not be entitled to a standby supply of electricity from the distributor in respect of any premises unless that consumer has agreed to pay and has given security to pay, such minimum annual sum as shall give to the distributor a reasonable return (which return shall be determined by the Authority) on any capital expenditure and any other standing charges which may be incurred in meeting the maximum demand for the premises.

Standby supply

34. A distributor shall test any installation of an applicant before a supply of electricity:

Provided that the testing of such installation shall not render the operator liable in law for any damages or injury flowing from defective installations of applicants.

Customers' installation testing

35. A customer shall ensure that the operations of his or her system does not interfere with the smooth and safe operation of the licensee's system to which he or she is connected.

Interference with licensee's system

PART VII

Inspection, Accidents, Inquiries and Investigations

Entry and inspection of premises

Cap. 73:02

36. The Authority, or any person authorized by it in writing, may at all reasonable times enter any premises or any licensed activity for the purpose of ascertaining whether or not the provisions, of this Act or the Energy Regulation Act, or the conditions of any licence are being complied with, or for the purpose of any inspection which is incidental to or connected with the carrying out of the duties of the licensee.

Licensee to report accidents

37.—(1) A licensee shall send to the Authority notice of any accident of such a kind as to have caused, or likely to have caused, loss of life or serious personal injury which has occurred in any part of such licensee's works or equipment, together with notice of any loss of life or serious personal injury occasioned by any such accident.

(2) Nothing contained in subsection (1) shall absolve the licensee from the duty of complying with the provisions of any other written law relating to the reporting of accidents.

Inquiries and investigations

38.—(1) The Authority may, at its own instance or on receipt of a complaint or inquiry relating to the supply of electricity, appoint any person to make inquiries in respect thereof and report thereon to the Authority.

(2) On receipt of a report under subsection (1), the Authority may—

(*a*) issue such notice, licensing conditions, guidelines, or directives as it is empowered to do under this Act or the Energy Regulation Act; or

Cap. 73:02

(*b*) institute a formal investigation.

(3) The Authority shall on receipt of a complaint regarding unlawful conduct by a licensee, institute a formal investigation in respect of that complaint.

(4) Upon instituting a formal investigation under subsection (2) or (3) the Authority may appoint any person to chair the investigation and as many persons as may be necessary to assist with the investigation; and the person so appointed and the persons assisting him may summon witnesses and conduct the investigation in accordance with the procedure the Authority shall publish in the *Gazette*.

(5) On completion of the investigation under subsection (4) the person chairing it shall submit his written report thereon to the Authority.

(6) On receipt of the report under subsection (5), the Authority—

(*a*) may refer it to the Attorney General for his consideration;

(*b*) if a licensee is involved—

(i) may issue notice, licensing conditions, guidelines, or directives as it is empowered to do or make under this Act or the Energy Regulation Act; or Cap. 73:02

(ii) may amend or revoke the licence of that licensee in accordance with this Act or the Energy Regulation Act; and Cap. 73:02

(*c*) shall give a copy of the report to a concerned customer or consumer or affected person who requests for it.

PART VIII

Rights Over Land

Wayleaves over land Cap. 69:02

39.—(1) Subject to the Public Roads Act, a licensee may, for the purpose of the construction, maintenance, carrying on or extension of any of its works, place, lay down or carry any transmission line or distribution line or water pipeline or other equipment through, over or under any land whatsoever:

Provided that the licensee shall not, without the consent of the owner, be entitled under this section to interfere with any existing building.

(2) A licensee shall, not less than thirty days before placing, laying down or carrying any transmission line, or distribution line, water pipeline or other equipment through, over or under any land without the consent of the owner, lessee or occupier of such land, give notice of the intended work either by notice published in the *Gazette* or in a paper in general circulation.

(3) Every notice referred to in subsection (2) shall—

(*a*) describe the nature of the intended work;

(*b*) describe the name of the place where the plan of the intended work shall be open for inspection during normal hours of business; and

(*c*) be served on any person resident in Malaŵi whose place of residence is known to the licensee, its staff or agents, and who is known or believed to be the owner, lessee or occupier of any land through, over and under which it is intended that any transmission or distribution line, water pipeline or other equipment shall be carried.

(4) If the place of residence of any person who is believed by the licensee, its officers, servants or agents to be the owner, lessee or occupier of any land is not known to the licensee, its staff or agents, or if for any reason it is not possible to effect service of the notice upon such persons, then, or in either of those events, the licensee shall cause such notice, or a true copy thereof, to be posted in a conspicuous position upon such land.

(5) If the owner, lessee or occupier of any land through, over or under which it is intended that any transmission line or distribution line, water pipeline or other equipment shall be placed, laid down or carried, objects to the intended work and shall have served notice in writing of such objection at the office of the licensee at any time within the period of thirty days referred to in subsection (2), the intended work, in so far as it affects the land of the person serving such notice of objection, shall not be commenced unless the Authority approves the commencement of the intended work notwithstanding such objection.

(6) Where any notice of objection is given in accordance with subsection (5), the Authority may appoint such person or persons as it may think fit to make inquiry into the necessity, propriety or desirability of the intended work, and into the objections made thereto, and to report to the Authority in respect of those matters and on receiving the report of such person or persons, the Authority may make a decision either to allow the intended work, with such modifications, if any, or disallow the intended work, as it may deem necessary.

(7) Nothing in this section shall authorise or empower the licensee to lay down or place any transmission line or distribution line, water pipeline or other equipment in, through or against any building, or in, on or through any land covered with buildings, without the consent of the owner, lessee or occupier thereof, so however that any overhead line and any support, stay, strut or structure required for the sole purpose of supporting any overhead line may be placed in, on, through or over any land or against any building with the consent of the Authority if, in his opinion, the consent of such owner, lessee or occupier is being unreasonably

withheld, and in any such case, the Authority shall determine the amount of compensation, whether by way of payment of a lump sum or an annual rental, or of both, to such owner, lessee or occupier.

(8) If the owner, lessee or occupier of any land in, on, through or over which any transmission line or distribution line, water pipeline or other equipment is placed, laid down or carried, or, in the case of a street, the local or other authority concerned, shall require and request that the position of such transmission line or distribution line, water pipeline or other equipment be changed, the Authority may, by notice in writing, order the licensee to alter the position of such transmission line or distribution line, water pipeline or other equipment, subject to such conditions as, in the absence of agreement between the parties, may be specified by the Authority.

(9) Where any rights over land have been acquired by a licensee, whether by an agreement or under this Part, then, notwithstanding the fact that those rights may not have been registered against the title to the land which they relate in accordance with the written law relating to registration of title or deed, those rights shall be binding on the owner of such land and on the successor in title.

Right of entry on land

40.—(1) Any member, or staff or agent of the licensee, duly authorized in that behalf by the licensee, and any contractor executing any work for the licensee together with its agents and staff may, on giving to the occupier such notice as, having regard to all the circumstances of the case, is reasonable, enter upon land at any time between the hours of six o'clock in the forenoon and six o'clock in the evening for the purpose of surveying, setting out and marking the line of any intended transmission line or distribution line, water pipeline or other equipment.

(2) It shall be lawful for the licensee or any person in that behalf duly authorized by the licensee in writing any time between the hours of six o'clock in the forenoon and six o'clock in the evening, or, in the case of emergency, at any other time, to enter into and upon any premises, through, or under which the licensee has placed a transmission line or distribution line, water pipeline or other equipment, in order to perform and carry out the licensee's purpose on such and or premises, or to maintain, remove, repair or replace any such transmission line or distribution line, water pipeline or other equipment or carrying out any works urgently needed to be done in relation thereto.

Trees or buildings interfering with electricity supply and equipment

41.—(1) Where, on any land, trees or undergrowth of any kind obstruct or interfere with the construction, working or supply and maintenance of any transmission line, distribution line, water equipment, pipeline or other equipment, the licensee may give to the owner, lessee or occupier of the land upon which such trees or growth are situated not less than fourteen days' notice in writing of its intention to enter upon the land and to cut down or to trim such trees or growth, and after the expiry of the time limit in the notice, may enter upon the land and effect such notified intention.

(2) The owner, lessee or occupier, on receiving notice in accordance with subsection (1), may at his or her own expense and at any time before the expiry of the time limit in the notice, but in consultation with the licensee to ensure safety, cut down or trim the trees or undergrowth so as to comply with the requirements of the licensee in that regard.

(3) Notwithstanding the provisions of subsection (1) and after taking such immediate action which is essential in order to protect any transmission line, distribution line, water pipeline or other equipment from damage by any trees or undergrowth on any land, the licensee may without any notice to the owner, lessee or occupier, enter upon such land and cause such trees or undergrowth to be cut down or trimmed in such a manner as may be necessary to prevent the anticipated or other damage.

(4) Except with the permission of the licensee, no person shall erect any building or structure in the wayleave or in such a position or in such a manner as likely to interfere with the supply of electricity through any transmission line or distribution line and if after a transmission line or distribution line has been constructed, any person erects any building or structure in the wayleave or in such a position or in such a manner as likely to interfere with the supply of electricity through such transmission line or distribution line the licensee may request such a person to remove or adjust such a building or structure as may be necessary; and if such person fails or omits to comply with such a request, the licensee may apply to the Authority for an order for the removal or adjustment of the building or structure and, after such inquiry as it may deem necessary, the Authority may make such order as it deems fit.

(5) No person, owner, occupier or lessee shall grow trees or undergrowths or allow trees or undergrowths to grow or to be grown on the land he owns, occupies or leases in such a manner as likely to interfere with the supply of electricity through any transmission or distribution line of the licensee.

Breaking up of streets

42.—(1) Subject to subsection (2), where the licensee has acquired the right to place the transmission line or distribution line across, under or along any street either in accordance with the Act or any other written law, the licensee may break up any street in which such right has been acquired and may from time to time as may be necessary repair, alter or remove any such lines.

(2) Before the licensee exercises any power conferred by this section, it shall give to the local or other authority concerned and to respective owners of all water pipes, telephone cables or other installations at least thirty days notice in writing of its intention to exercise such power:

Provided that in any case of emergency, the licensee shall give notice thereof to such authority and to respective owners of all water pipes, telephone cables or other installations, as soon as is practically possible after the emergency has arisen.

(3) Except in cases of emergency, the powers conferred by this section shall only be exercised under the superintendence of the local authority or other authority concerned, and according to such specifications and such plan showing the route along which the transmission lines or distribution lines are to be erected as may be approved by that authority, or if any difference arises with regard to the specification, plan or route, then according to such specification and such plan as may be approved by the Authority:

Provided that if the authority concerned fails, within reasonable time, to exercise the powers of superintendent conferred by this section, after such notice shall have been given to the authority, then the licensee may exercise those powers without superintendent of the authority.

(4) Every licensee that carries out any work authorized by this section shall—

(*a*) comply with the relevant by-laws and regulations of the local or other authority concerned;

(*b*) complete the work with reasonable dispatch;

(*c*) reinstate and make good the street opened or broken up in the course of such work and remove therefrom all material remaining as a result of the work;

(*d*) leave the street in all respects in a clean and tidy state; and

(*e*) cause all works to be at all times properly fenced and guarded and to be adequately marked with warning lights during the hours of darkness while the street is in the course of being opened, broken up or obstructed.

(5) If a licensee fails to comply with subsection (4), the local authority or other authority concerned may cause to be carried

out, at the expense of the licensee, any work necessary for the due discharge of that duty.

Licensees' equipment not part of the land

43. Any lines, meters, fittings, works or apparatus belonging to a licensee and lawfully placed or installed in or upon any premises not in his possession shall, whether or not fixed to any part of such premises, remain the property of and may be removed by the licensee, and are not liable to be taken in execution under any process of law or any proceedings in insolvency or liquidation against the owner or occupier of such premises.

Compensation for damage caused by licensee

44.—(1) The licensee shall make good to the reasonable satisfaction of the local or other authority, or the owner, as the case may be, of all public and private roads, streets and paths opened or broken up by the licensee in the course of its operations and shall also pay fair and reasonable compensation or rent or both for all losses or damage caused in the execution of any of its powers conferred by this Act.

(2) Where a dispute arises as to whether any road, street or path has been adequately made good, or as to the amount of compensation or annual rent to be paid under subsection (1), such dispute shall be referred to a Resident Magistrate having jurisdiction in the District in which the cause of the dispute arose and for that purpose the Resident Magistrate shall have jurisdiction in all of such disputes irrespective of the amount of compensation or rent involved and may make such award as he deems fair and reasonable to the person who is found to be entitled thereto.

(3) Either party to the dispute may appeal from the decision of the Resident Magistrate to the High Court.

PART IX
Offences and Penalties

Offences

45.—(1) Any person who carries on in any manner any activity for the supply of electricity in contravention of this Act, or fails to carry out any order or decision of the Authority made or given under this Act or otherwise contravenes the provisions of this Act, shall be guilty of an offence.

(2) Without prejudice to the right of a licensee to recover for any illegal consumption of electricity, including costs associated with such recovery, a customer or any other person who—

(*a*) illegally connects electricity to any premises;

(*b*) disturbs or tampers with any electricity meter or other measuring instrument or apparatus;

(*c*) denies access to premises for inspections by authorized personnel of the licensee or the Authority; or

(*d*) damages or vandalizes any electricity installation equipment or apparatus,

shall be guilty of an offence.

(3) Any transmitter who denies access on his system to licensees shall be guilty of an offence.

Penalties

46. Any person who is guilty of an offence under this Act shall be liable to a fine of K5,000,000 and to imprisonment for ten years.

PART X

Miscellaneous Provision

Consumer and customer education brochure

47. The Authority shall develop and publish an information brochure and other modes of communication for consumer and customer education on the structure and price regulation or on technical, safety and legal aspects of the electricity supply industry.

Resolution of disputes by the Authority

48.—(1) The Authority shall, if requested by a party to a dispute, act as a mediator or arbitrator in disputes between licensees or between a licensee and its customer or a licensee and the Coordination Centre relating to—

(*a*) the right to supply electricity;

(*b*) the duty to supply electricity;

(*c*) the tariffs and charges at which electricity is applied;

(*d*) delays in or refusal to supply electricity; and

(*e*) the quality of electricity supply and the provision of services in connexion therewith.

(2) The Authority may act as mediator or arbitrator in any matter in respect of which a licensee or customer requests the Authority to act as such.

(3) The Authority may, on approval of the parties involved, appoint a suitable person to act as mediator or arbitrator on its behalf and any action or decision of a person so appointed shall be deemed to be an action by or decision of the Authority.

(4) The Authority shall by notice published in the *Gazette* prescribe the procedure to be followed and arbitration fees to be paid in arbitrating a dispute and the decision of the Authority, shall be binding on the disputing parties, subject only to the right of each party to appeal to the High Court as provided in this Act.

Service of notice

49. Any notice or other document required or authorized to be given, delivered or served under this Act may be given, delivered or served—

(*a*) by delivering it to the person to whom it is to be given or delivered or on whom it is to be served;

(*b*) by leaving it at the usual or last known place of abode of that person;

(*c*) by sending it in a prepaid registered letter addressed to that person at his usual or last known place of abode or postal address;

(*d*) in the case of company, by delivering it to the secretary or clerk thereof at its registered or numbered office or by sending it in a prepaid registered letter addressed to the secretary or clerk of the company at that office; or

(*e*) if it is not practicable after reasonable enquiry to ascertain the name or address of a person to whom it should be given or delivered or on whom it should be served, as being a person having an interest in land, being the person to whom by the description of the person having that interest in the premises (naming those premises) to which it relates, or by delivering it to some person on the premises or, if there is no person on the premises to whom it can be addressed, by affixing a true copy of it to some conspicuous part of the premises.

Distribution licensee may discontinue supply for non-payment, etc.
12 of 2016

50.—(1) A licensee shall not vary or discontinue a supply which is required to be constantly maintained except—

(*a*) for causes beyond the control of the licensee; or

12 of 2016

(*b*) where the consumer has failed to pay charges lawfully due in accordance with the conditions of supply or any written law, as the case may be; or

12 of 2016

(*c*) where the consumer has failed to comply with the conditions of supply or any written law and failed to remedy his default within seven days of receiving written notice from the licensee calling upon him to do so.

(2) A licensee may temporarily vary or discontinue a supply of electricity under subsection (1)—

12 of 2016

(*a*) without prior notice to a consumer likely to be affected—

(i) where such action is necessary to prevent danger to life or damage to property;

(ii) in any emergency, from whatsoever cause arising, to ensure the proper working of the licensed activity or of any other licensed activity with which it is interconnected;

(iii) by the automatic operation of a protective device installed to disconnect supply of electricity in fault conditions; or

(iv) by the automatic or hand operation of a device installed to disconnect a supply of electricity in terms of the conditions or agreement to supply; or

(*b*) on giving not less than twenty-four hours notice—

(i) for the purposes of making alterations or additions to a system;

(ii) for normal maintenance work; or

(iii) for testing a device referred to in paragraph (*a*) (iii) or (iv).

Right of appeal to the High Court

51.—(1) Any person aggrieved by the decision or action of the Authority under this Act may appeal to the High Court by way of petition and lodged within three months from the date of the decision or action of the Authority.

(2) The Chief Justice may make such rules as he considers proper in relation to the procedure on the hearing of such appeals, including the appointment and remuneration of assessors and regulating the costs of the appeal.

By-laws, rules, codes and guidelines
12 of 2016

52.—(1) The Authority may make by-laws, rules, codes and guidelines to give effect to this Act or for its better administration.

(2) The by-laws, rules, codes and guidelines to be promulgated by the Authority under subsection (1) for distribution licensees shall apply to rural electrification schemes.

Repeal and savings
Cap. 73:01

53.—(1) Subject to subsection (2), the Electricity Act is hereby repealed.

(2) Anything done in accordance with the Electricity Act repealed by subsection (1), prior to the commencement of this Act and which may be done in accordance with the provisions of this Act shall be deemed to have been done in accordance with this Act.

(3) Any subsidiary legislation made or deemed to have been made under the Electricity Act, repealed by subsection (1) in force immediately before the commencement of this Act— Cap. 73:01

(*a*) shall remain in force, unless in conflict with this Act, and shall be deemed to be subsidiary legislation made under this Act; and

(*b*) may be replaced, amended or repealed by subsidiary legislation made under this Act.

(4) All licences issued by the Electricity Council in accordance with the Electricity Act repealed by subsection (1), prior to the commencement of this Act, if not in conflict with the provisions of this Act, shall be deemed to be licences granted by the Authority in accordance with this Act.

PART I
Preliminary Provisions

1. These By-laws may be cited as the Electricity By-laws. Citation

2. In these By-laws, unless the context otherwise requires— Interpretation

"additional earth" means earthing equipment of an approved type, applied after the issue of a safety document;

"applicant" in relation to a service, means a natural person or legal entity in the process of seeking to become a customer of a service provider;

"apparatus" means any item of electrical machinery or equipment in which conductors are used or supported, or of which they form part;

"auditor" means a person registered as an accountant or auditor in terms of the Public Accountants and Auditors Act; Cap. 53:06

"authorized person" means an authorized person appointed by the licensee in writing to carry out specific operational duties;

"billing error" means an error by a service provider resulting in incorrect charges to the customer—

(*a*) billing errors include—

(i) incorrect meter readings or clerical errors by a service provider representative, such as applying the wrong rate;

(ii) performing an incorrect calculation; or

(iii) failure by the service provider to send a bill to a customer;

(*b*) billing errors do not include—

(i) errors resulting from theft or unauthorized use, switched or mismarked meters by other than the service provider;

(ii) inaccessible meter location; or

(iii) failure of the customer to take advantage of a rate or condition of service that may apply;

"business day" means any day other than Saturday, Sunday or a public holiday;

"cable" means an insulated conductor or an assemblage of such conductors enclosed within a common sheathing;

"caution notice" means a notice in writing conveying a warning against interference;

"circuit main earth" means earthing equipment of an approved type, applied before the issue of, and at a position recorded in a safety document;

"Committee" means the Electrical Installations Permits Committee established under these By-laws;

"competent person" means a person appointed by a licensee in writing—

(*a*) having sufficient technical knowledge or experience to enable him avoid danger and who may be nominated to receive and clear specified safety documents; or

(*b*) being capable of installing electrical installations and of altering, extending and maintaining existing electrical installations;

"complaint" means any communication by an applicant or a customer to a service provider alleging—

(*a*) the service provided by the service provider to be inadequate and in need of improvement;

(*b*) a breach of the contract, if any, under which the service provider provides electricity service to that customer; or

(*c*) a breach by the service provider of any applicable law;

"conductor" means a bar, tube, wire or line used for conducting electricity;

"customer installation" means the consumer's electrical wiring together with any electricity consuming device connected with such installation;

"control engineer" means—

(*a*) for the generation control centre, an engineer responsible for the operation of the generation equipment;

(*b*) for the Load Dispatch Centre, an engineer responsible for coordinating generation, transmission and supply operation; or

(*c*) for the Area Control Centre, an engineer responsible for the operation of the distribution systems in a designated area;

"danger" means a risk to health, life or bodily injury;

"danger notice" means a notice of durable material inscribed with the word "DANGER" in white letters at least 31 mm in height together with a red symbol, illustrating a skull and cross-bones, all on a red background;

"dead" means disconnected from a live system and fully discharged;

"designated engineer" means an engineer appointed by a licensee to be responsible for the application of these By-laws;

"disconnexion notice" means a notice stating—

(*a*) in bold-face at the top of the notice: "Disconnexion Notice";

(*b*) the date on or after which disconnexion will occur;

(*c*) that if the customer disputes the reason for disconnexion, the customer may file a complaint with the service provider and request that the Authority mediates or arbitrates the dispute between the customer and the service provider in the event that the customer remains unsatisfied with the service provider's reason for disconnexion of service to the customer; and

(*d*) the address and telephone numbers of the Authority;

"earth" means the conductive mass of the earth, whose electric potential at any point is conventionally taken as zero;

"earthed and connected with earth" means connected with the general mass of earth in such manner as will ensure at all times an immediate and efficient discharge of electricity and cognate expressions shall be construed accordingly;

"electrical inspector" means a person appointed in accordance with by-law 102;

"electrical installation work" means the installation, alteration or repair, wholly or partially, of any conductor, apparatus or system of wiring in or upon premises, connected or intended to be connected to a supply of electricity;

"electrical installations person" means a person who carries out electrical installations work and holds a valid permit issued under these By-laws;

"electric line" means a cable, overhead line or other equipment intended to be used for the purpose of conveying, transmitting or distributing electricity together with any casing, covering, tube, pipe or insulation surrounding or supporting the same, or any part thereof or any apparatus connected therewith for the purpose of conveying, transmitting or distributing electricity;

"estimated system expansion cost" has the meaning given in by-law 179;

"extra-low-voltage" means normal operating voltage not exceeding 30 volts alternating current or 50 volts direct current;

"failing load" means a load on a support which, if exceeded will result in the conductor not being supported in accordance with these By-laws;

"high-voltage" means voltage exceeding 650 volts AC;

"high-voltage live line work" means work in an approved manner on the conductors or apparatus of a high-voltage overhead line, with the conductors being live;

"immediate supervision" means supervision by a person, having adequate technical knowledge, experience and competence, who is continuously available at the location where work or testing is in progress and attends the work area as is necessary for the safe performance of the work or testing;

"insulated conductor" means a conductor covered with insulation suitable for the normal operating voltage;

"insulation" means non-conducting material rounding or supporting a conductor or any part thereof;

"isolated" means disconnected from an associated plant, apparatus or conductor by an isolating device in the isolating position or by adequate physical separation with sufficient gap;

"isolating device" means a device for rendering plant and apparatus isolated;

"key-safe" means an approved type of device used for the secure retention of keys;

"Licensed Activity" means an activity for the generation, distribution, transmission, import or export of electricity for which a licence is intended to be or has been granted under the Act;

"limitation-of-access" means a safety document that defines the limits and nature of work that may be carried out from the ground level in high voltage substations or when verbal instructions are not considered sufficient for that purpose, and where a permit-to-work or sanction-for-test is not applicable on medium voltage network;

"live" means electrically charged;

"line conductor" means a conductor of an overhead line;

"low-voltage" means normal operating voltage exceeding 30 volts AC or 50 volts direct current but not exceeding 250 volts;

"main" means an electric line through which electricity is supplied or is intended to be supplied by the service line;

"medium-voltage" means normal operating voltage exceeding 250 volts but not exceeding 650 volts;

"metal armouring" means a metal wire or a metal type completely covering a cable and manufactured as an integral part of the cable;

"metal sheathing" means a continuous and water tight metal sleeve surrounding a cable and manufactured as an integral part of the cable;

"metal-work" means any metal-work other than—

(*a*) a conductor and its associated live parts; or

(*b*) an earth conductor;

"overhead line" means a conductor erected above ground and in the open air and includes any pole-mounted substation or switchgear associated therewith;

"permit" means a permit issued under these By-laws;

"permit-to-work" means a safety document specifying the high-voltage apparatus made safe to work on and the work that is to be carried out;

"personal supervision" means supervision by a person having adequate technical knowledge, experience or competence such that he is always in the presence of the person being supervised while the work or testing is being carried out;

"plant" means a mechanical plant including all machinery and equipment not elsewhere defined as apparatus;

"pole mounted substation" means transformer equipment, high-voltage switchgear or high-voltage apparatus mounted on a support and associated with the operation and control of an overhead line;

"private owner" means—

(*a*) a person producing electricity for own use and not for sale; and

(*b*) a person who generates electricity for own use and in these By-laws, where the context admits, licensee includes a private owner;

"protective multiple earthing" means more than one connexion with earth in accordance with these By-laws;

"ring-fence" means the keeping of separate accounting records in respect of a licensed activity so that revenue and cost, assets and liabilities, reserves and provisions of or reasonably attributable to the licensed activity are separately identifiable in the books of the licensee from those of any other activity, business or operations of the licensee;

"safety distance" means the distance from the nearest high-voltage exposed conductor not earthed, or from an insulator, supporting a high-voltage conductor which must be maintained to avoid danger;

"safety document" means a limitation of access, permit-to-work or sanction-for-test;

"safety lock" means a device, for instance a padlock, used exclusively for approved purposes, such as locking off the points at which the circuit can be energized, and different from all other standard locks used in systems;

"sanction-for-test" means a safety document specifying the high-voltage apparatus made safe for testing, and the conditions under which the testing is to be carried out;

"senior authorized person" means an authorized person appointed in writing by a licensee, to carry out specific operational duties that may include authority to issue and cancel safety documents;

"service cable" means the final cable provided by the service provider connecting to the service provider's network;

"service line" means an electric line through which electricity may be supplied or is intended to be supplied by the licensee to a consumer either from a mains or directly from the premises of the licensee;

"service provider" means a person licensed by the Authority as a distributor of electricity;

"special pricing agreement" means an agreement between a licensee who distributes electricity and a customer whereby the licensee, notwithstanding these By-laws, offers to the customer charges or tariffs lower than those approved by the Authority for that licensee;

"supply terminals" means the end of a service line at which the supply of electricity is delivered from the said line to the consumer;

"support" means a structure or pole for supporting an overhead line and includes any stay or strut associated therewith;

"switching" means the operation of circuit breakers, isolators, disconnectors, fuses or other methods of making or breaking an electrical circuit or the application and removal of circuit main earths;

"system" means an electrical system in which conductors and apparatus are electrically connected to a common source of supply;

"system expansion" means an expansion of the capacity of a service provider's network, including transformer upgrading, in order to connect more customers to an area served by the existing distribution network;

"system extension" means an extension of a service provider's existing electricity distribution system to an area not previously served by the service provider and shall not include a customer service cable;

"tariff" means a price or schedule of prices for the supply and distribution of electricity to customers by a service provider as approved by the Authority;

"terms and conditions of service" means, with respect to any particular service provider, the terms and conditions on which the Authority has authorized the service provider to sell electricity to its customers;

"telecommunication" bears the meaning as defined in the Communications Act; Cap. 68:01

"telecommunication line" bears the meaning as defined in the Communications Act; Cap. 68:01

"telecommunication lines protection" means standards to enforce section 40 (2) (*b*) of the Communications Act; Cap. 68:01

"voltage" means—

(*a*) the electro-motive force existing between any pair of live conductors forming part of the common supply of electricity or between any part of either of such conductors and earth; and

(*b*) in the case of alternating current, means the virtual voltage or root-mean square value as determined by the square root of the mean value of the squares of the instantaneous values of the voltage during complete cycle;

"working and access clearance" means the distance to be maintained from the nearest live exposed high-voltage conductor, to ensure observance of the safety distance in work on systems; and

"working party" means—

(*a*) persons under the immediate supervision of a competent or senior authorized person and shall be a member of the working party; or

(*b*) a competent or senior authorized person when working alone.

PART II
Licensing

Licence application fees

3. A person applying for issue, transfer, amendment or renewal of a licence shall pay the application fee specified in Part A of the First Schedule hereto.

Objects of licensing system

4. The objects of the licensing system are to promote—

(*a*) effective, reliable and appropriate systems of electricity supply;

(*b*) long-term sustainability of resources;

(*c*) efficiency and cost effectiveness;

(*d*) management of quality of supply and services;

(*e*) responsiveness to the interests of customers;

(*f*) justice, equity and transparency in the electricity supply industry;

(*g*) health and safety of persons;

(*h*) responsible protection of the environment;

(*i*) recognition and response to regional policies, objectives and developments; and

(*j*) responsiveness to customers, private, non-governmental and statutory institutions where to do so would support the purposes of the Act.

Applications

5.—(1) An application for the issue, renewal, amendment or transfer of a licence shall be made in Form EA 1 for generation, Form EA 2 for transmission, import or export and Form EA 3 for distribution contained in Second Schedule hereto and shall be accompanied by the appropriate application fee in accordance with by-law 3 hereof.

(2) Any person making an application shall, in so far as it is applicable to an application, include the following information in an application under paragraph (1)—

(*a*) the name, nationality and postal, physical and business address of the applicant, and in the case of an application for a transfer of a licence, this information shall be provided with regard to both the licensee and the proposed transferee;

(*b*) the type of application, namely an application for the issue, renewal, amendment or transfer of a licence;

(*c*) the type of activity to which the application applies, namely generation, transmission, supply, distribution, importation or exportation of electricity;

(*d*) in the case of an application for the issue or amendment of a licence—

(i) the proposed location of where the applicant intends to erect or alter plant;

(ii) a description, including a schematic layout, of the proposed plant which the applicant intends to erect or alter; and

(iii) a description, including a schematic layout, of the area within which the applicant intends to carry out the activities to be authorized under the licence;

(*e*) in the case of an application for the issue of a licence, a complete list of the standard tariffs which the applicant intends to charge, to be specified in the schedule of approved tariffs to be contained in the relevant licence; and

(*f*) in the case of the issue, renewal, amendment or transfer of a licence, an outline of the intended operational and business plan, unless such plan has already been submitted during a previous application and has not changed in which case such previous plan shall be attached;

(*g*) in the case of an application for a licence, an estimate of the expected income and expenditure during the first full year of operation and one additional year of the relevant activity to be carried on by the applicant under a licence;

(*h*) in the case of an application for the issue, amendment or transfer of a licence, copies of letters of recommendation as to the credit worthiness of the applicant or transferee from at least one local commercial bank and one reputable international bank;

(*i*) in the case of an application for the issue, amendment or transfer of a licence, a copy of the advertisement referred to in by-law 6 and a copy of the newspaper in which such advertisement was placed;

(*j*) in the case of application for amendment or transfer of licence, the reasons for such amendment or transfer shall be given;

(*k*) such other particulars the Authority may require in general or in the case of a particular type of or particular licence, or in terms of the Act or any subsidiary legislation made thereunder, in order to enable the Authority to make a decision on such application or on conditions to be imposed on a licence in terms of the Act.

(3) The Authority shall not consider any application unless the Authority has received all the prescribed information.

Advertising

6.—(1) An applicant applying for the issue, amendment or transfer of a licence shall submit an advertisement to that effect to the Authority which shall be advertised by the Authority at the cost of the applicant not more than fourteen days prior to the submission of such application to the Authority.

(2) An advertisement referred to in paragraph (1) shall be published in at least one daily newspaper circulating in Malaŵi.

(3) The advertisement shall—

(*a*) specify the information required in terms of by-law 5 (2) (*a*), (*b*), (*c*) and (*d*) (*i*); and

(*b*) list the information required in terms of by-law 5 (2) (*d*) (ii) and (iii), (*e*), (*f*) and (*g*) and indicate clearly the physical address where such complete information can be inspected during normal business hours by any interested person.

Objections

7.—(1) Any person desiring to object against an application advertised in terms of by-law 6 may, within a period of thirty days after the date of the publication of an advertisement, lodge a written objection against such application with the Authority.

(2) The objection, shall be lodged in Form EA 4 contained in the Second Schedule hereto, and the person objecting shall include the following information in the objection—

(*a*) his name, nationality, postal and physical address;

(*b*) a copy of the newspaper in which the advertisement was placed;

(*c*) the nature of his interest *vis-à-vis* the application; and

(*d*) his detailed reasons for the objection.

(3) The Authority shall provide the applicant to whom the objection relates, a complete copy of the objection within seven days of such objection being lodged with the Authority.

(4) Where there has been no objection or where the Authority considers that the objections are not serious or that they can be adequately addressed in correspondence with the person objecting and the applicant, the Authority shall not call for public hearing but in all other cases the Authority shall call for a public hearing.

(5) If no public hearing is to be held with regard to an application, the Authority shall give the relevant applicant at least fourteen days to respond to the Authority in writing to an objection lodged in terms of this by-law.

PART III
Installation Permits

Division 1
The Committee

Establishment of Committee

8.—(1) There is hereby established an Electrical Installation Permits Committee.

(2) The Committee shall consist of the following members—

(*a*) two persons representing the Authority who shall be Chairperson and Secretary, respectively;

(*b*) one person representing the holders of a distribution and supply licences;

(*c*) one qualified and practicing electrical engineer appointed by the Board of Engineers;

(*d*) one person representing the National Construction Industry; and

(*e*) a recognized person from the renewable testing and training centre for renewable energies.

Rules and procedures

9. The Committee shall, with the approval of the Authority, make such rules and procedures as may, in the opinion of the Committee, be necessary for the performance of the Committee's functions under these By-laws.

Permit required

10.—(1) A person shall not practice as an electrical installations person unless he is in possession of a valid permit issued by the Authority.

(2) A permit under these By-laws may be issued to an individual person or to a firm or a company, as the case may be:

Provided that a permit issued to a company or a firm shall be on condition that the firm or company has in its employment a person who possesses a valid permit issued by the Authority.

(3) A Permit issued to a firm or a company on account of an employee who possesses a permit ceases to be valid when that employee ceases to be employed by the firm or company.

(4) No person holding a permit under these By-laws shall be used for purposes of application by a firm or a company unless such person is an employee of that firm or company.

(5) A person employed by a company or firm may obtain a permit issued under these By-laws notwithstanding the fact that such company or firm is in possession of its own valid permit.

Meetings of the Committee

11.—(1) The Committee shall meet at such times as the Committee may determine.

(2) At any meeting of the Committee, three members shall form a *quorum*.

Technical qualifications

12.—(1) A person shall not be considered for a permit under these By-laws unless he possesses any of the following technical qualifications—

(*a*) a Degree from a recognized university in the relevant field of study;

(*b*) a Higher Technician's Diploma from a recognized institution;

(*c*) an Ordinary Technician's Diploma from a recognized institution;

(*d*) a City and Guilds Certificate;

(*e*) a Craftsman's Certificate from a recognized institution;

(*f*) a Degree, Diploma or Certificate in the relevant field of renewable energy technologies from a recognized university or institution or other qualification acceptable by the Committee; or

(*g*) any other technical qualification recognized by the Committee.

(2) The Committee shall use the qualifications under paragraph (1) and relevant experience to determine the class of permit which the Committee shall issue to each respective applicant.

Types of permit

13.—(1) The Committee may, subject to such conditions as it may impose, issue any of the following types of permit—

(*a*) CLASS A for carrying out all and any kind of class of electrical installation work;

(*b*) CLASS B for carrying out electrical installation work of such medium value or complexity, including heavy low-voltage and simple high-voltage connexions up to 33 kV;

(*c*) CLASS C for carrying out electrical installation work of such small value including—

(i) installation in multi-storied building and other big buildings of complex design and commercial buildings; or

(ii) installation of light plants of up to a level of 400 volts;

(*d*) CLASS D for carrying out work restricted to any specialized class of electrical installation work, including—

(i) installation in residential premises not exceeding five bedrooms; and

(ii) repairs on equipment of up to 240 volts;

(*e*) CLASS E for carrying out specialized fields such as—

(i) centralized cooling and refrigeration;

(ii) installation of generator sets;

(iii) solar systems and other renewable energy technologies; and

(iv) electrical installation systems and designs.

(2) The Committee shall consider an application for a permit within a period of thirty days from the date of application.

(3) A permit issued under these By-laws may be renewed but shall not be transferable.

(4) Subject to by-law 14, a permit issued under these By-laws shall be renewed annually on 31st December.

Division 2
Application for Permit

Application for permit

14.—(1) An application for a permit shall be submitted in writing to the Committee and the permit shall be issued in the prescribed form and subject to such conditions as the Committee may determine.

(2) Every person issued with a permit under these By-laws shall exhibit such permit at all times in his usual place of business.

(3) Every person applying for a permit shall pay the permit fees specified in Part E of the First Schedule hereto.

Companies and organizations

15.—(1) Every company or firm applying for a permit under these By-laws shall have amongst its staff persons qualified to be issued with Class A or B categories of permit and shall pay the permit fees specified in Part F of the First Schedule hereto.

(2) Whenever a company or firm holding a licence under these By-laws does not have amongst its staff persons qualified to be issued with class A or B category of permit, the firm or company's permit shall automatically be cancelled.

Conditions to be satisfied

16. Any person who applies to the Committee for a permit shall be required to satisfy the Committee—

(*a*) that he is at least eighteen years of age and is a fit and proper person to conduct the business of electrical installations;

(*b*) that he has satisfactory knowledge of the latest edition of the rules and regulations and of all legislation applicable to the type of installation specified in the permit he is applying for;

(*c*) that he has made adequate provisions for the carrying out of his work and for the supervision of his staff;

(*d*) that he has suitable premises from which to conduct his business;

(*e*) that he has suitable instruments to enable him carry out the recognized tests on the type of installation to which his permit applies; and

(*f*) that in the case of renewal of a licence, the standard of work and the conduct of business have been satisfactory during the period of validity of the previous permit.

Voting

17. In the event of non-consensus among the members of the Committee when deciding whether to grant a permit or not, the matter shall be decided by a majority vote, taken at a meeting at which at least two-thirds of all the members are present.

Grant of permit

18. The Committee shall make recommendation to the Authority which permit to grant to an applicant and the Authority shall issue the said permit to the applicant.

Cancellation of permit

19.—(1) The Committee may, at any time, refuse to grant or renew a permit or cancel a permit if it is satisfied that the person has failed to comply with any conditions contained in these By-laws.

(2) In case of refusal to grant a permit or cancellation of a permit, the Committee shall request the applicant concerned in writing, to appear in person or by representation, before the Committee and show cause why the Committee should not exercise its power under paragraph (1) of this by-law.

Obtaining information

20. In order to obtain any information and to carry out any inspection as provided under these By-laws, the Committee may, at its direction, request any person to carry out any such inspection or tests as it may require and to furnish a report of such inspection to the licensee.

PART IV
Supply and Quality of Service

Division 1
Supply

Declared method of supply to consumers

21.—(1) Subject to paragraph (4), before giving a supply of electricity to a consumer, a licensee shall declare, in writing, to the consumer the standard type of current and number of phases, the standard frequency and the standard voltage at which the licensee proposes to deliver the electricity to the supply terminals.

(2) Subject to paragraph (4), for the purposes of paragraph (1)—

(*a*) the standard type of current and number of phases shall be alternating current, one or three phases;

(*b*) the standard frequency shall be fifty cycles per second;

(*c*) the standard voltage shall be—

(i) 230 volts phase to neutral for a single-phase supply; or

(ii) 400 volts phase to phase for three-phase supply.

(3) A licensee shall constantly maintain the standards referred to in paragraph (2) (*a*), (*b*) and (*c*), subject to a permissible variation—

(*a*) of frequency, between a lower limit of 48.75 cycles per second and an upper limit of 51.25 cycles per second;

(*b*) of voltage of plus or minus six *per centum* of the voltage stated in paragraph (2) (*c*).

(4) A licensee may depart from paragraph (1), (2) or (3), with the approval of the Authority—

(*a*) by agreement with a consumer to whom it is intended to give an individual supply of electricity from a distributing main to be used solely for the purposes of that one consumer;

(*b*) by agreement with each consumer, in a group of consumers to whom it is intended to give a supply of electricity from a common distributing main for the group;

(*c*) in giving a supply of electricity at high-voltage in accordance with a published tariff; or

(*d*) in giving a special supply of electricity for purposes outside the terms of the licensee's published tariffs:

Provided that a departure made in accordance with this paragraph to a consumer shall not adversely affect any other consumer.

(5) Before giving a supply of electricity to a consumer in accordance with paragraph (4), the licensee shall declare, in writing, to the consumer the type of current and, if alternating current, the number of phases and frequency and the voltage at which he proposes to deliver the electricity to the supply terminals.

(6) Where a supply of electricity is given in accordance with paragraph (4) a licensee shall constantly maintain supply as declared in paragraph (5), subject to a permissible variation—

(*a*) of frequency, if alternating current, not exceeding two and a half *per centum* above or below the declared frequency;

(*b*) of voltage, not exceeding six *per centum* above or below the declared voltage where the special agreement for the supply stipulates a different permissible voltage variation.

(7) Before giving a bulk supply of electricity to another licensee for redistribution, the licensee supplying the electricity shall declare in writing to the licensee receiving the electricity the type of current and, if alternating current, the number of phases and frequency and the voltage at which it is proposed to deliver the electricity:

Provided that where the bulk supply is alternating current intended for redistribution to consumers to whom paragraphs (1), (2) and (3) apply—

(*a*) the declared frequency shall be fifty cycles per second which shall be constantly maintained subject to the permissible variations set out in paragraph (3) (*a*);

(*b*) any limits to voltage variation agreed between the two licensees, with the approval of the Authority, shall be such as will not adversely affect any consumer in respect of paragraph (3) (*a*).

(8) Except for causes beyond the control of the licensee and subject to paragraph (7)—

(*a*) any permissible variation provided for in this by-law to a declared frequency of fifty cycles per second shall be compensatory adjusted to give a mean frequency of fifty cycles

per second as far as practicable in each continuous period of twenty-four hours;

(*b*) any permissible variation provided for in this by-law to a declared voltage may be exceeded during control operations on the system for a period not longer than ten consecutive minutes.

(9) Subject to the terms and conditions of a contract of supply between a licensee and a consumer, nothing provided under this by-law shall prevent the licensee and the consumer, by agreement, to terminate the contract of supply made in accordance with paragraphs (1), (2) and (3) and substituting therefor a new contract of supply made in accordance with paragraphs (4), (5) and (6), or vice versa provided that no other consumer is adversely affected by such substitution.

Licensee to provide constant supply

22.—(1) Subject to paragraph (2), from the time a licensee begins to supply electricity through a distributing main or service line, he shall maintain a supply of electricity in terms of the agreement, sufficient for the use of each consumer entitled for the time being to be supplied therefrom and that supply shall be constantly maintained to each consumer without change—

(*a*) in the declared method of supply set out in by-law 21 except as provided for therein;

(*b*) in the relationship between the neutral conductor and earth or between the neutral conductor and any phase conductor;

(*c*) in the phase rotation, except by agreement in writing between a licensee and a consumer with the approval of the Authority provided that no other consumer is adversely affected thereby.

(2) A licensee shall not lessen or discontinue a supply which is required to be constantly maintained in accordance with paragraph (1) except—

(*a*) for causes beyond the control of the licensee;

(*b*) where the consumer has failed to pay charges lawfully due in accordance with the conditions of supply or any written law, as the case may be;

(*c*) where the consumer has failed to comply with the conditions of supply or any written law and failed to remedy his default within seven days of receiving from the licensee a notice calling upon him to do so; or

(*d*) where required or permitted by the provisions under these By-laws.

Licensee may lessen or discontinue supply

23.—(1) A licensee may temporarily lessen or discontinue a supply of electricity referred to in by-law 22—

(*a*) without prior notice to a consumer likely to be affected—

(i) where such action is necessary to prevent danger to life or damage to property;

(ii) in any emergency, arising from whatsoever cause, including any political cause, to ensure the proper working of the licensee or any other undertaking with which it is interconnected;

(iii) by the automatic operation of a protective device installed to disconnect a supply of electricity in faulty conditions;

(iv) by the automatic or hand operation of a device installed to disconnect a supply of electricity in terms of the conditions or agreement to supply;

(*b*) on giving not less than twenty-four hours notice—

(i) for the purposes of making alterations or additions to a system;

(ii) for normal maintenance work; or

(iii) for testing a device referred to in subparagraph (*a*) (iii) or (iv) above.

(2) A licensee shall resume the normal supply of electricity as soon as it is safe and expedient to do so after the temporary lessening or discontinuance referred to in paragraph (1).

(3) The notice required in accordance with paragraph (1) (*b*) shall state the period during which the supply may be affected and shall—

(*a*) be served on all affected consumers;

(*b*) be published in a newspaper circulating in the area affected; or

(*c*) be announced on radio operating in the area affected.

(4) In temporarily lessening or discontinuing a supply of electricity in the circumstances set out in paragraph (1) (*a*) (ii), a licensee, unless all his consumers are affected thereby, may select which consumer or group of consumers shall have lessened or continued supply.

Licensee shall not permanently connect

24.—(1) A licensee shall not permanently connect a consumer's installation or part thereof with his low-voltage or medium-voltage electric lines if he or a person authorized by him is aware that the

connexion, if made, would cause a dangerous leakage of electricity from such installation or part thereof.

(2) A licensee shall not permanently connect a consumer's installation or part thereof with his high-voltage electric lines unless he or a person authorized by him is satisfied that the high-voltage portion of the consumer's installation is of a standard of construction and safety not less than that required for a licensee's high-voltage works in accordance with these By-laws.

Disconnexion of works in certain circumstances

25.—(1) Every section of a licensee's works, including cables and overhead lines, which is in such a faulty condition so as to cause or is likely to cause death or injury to any person or damage to any property and where the condition becomes known to the licensee or to a person authorized by him to operate the section, the licensee or the duly authorized person shall disconnect from the supply of electricity immediately and shall not reconnect it until the faulty condition of the section is remedied.

(2) Every section of a licensee's works, including cables and overhead lines, which because of a faulty condition, is causing interference with the use of a telegraph line and where the faulty condition becomes known to the licensee or to a person authorized by him to operate the section, the licensee or the dully authorized person shall disconnect from the supply of electricity and shall not reconnect it until the faulty part of the section is remedied.

(3) Nothing provided under paragraph (1) or (2) shall prevent a licensee from temporarily reconnecting a section referred to therein to a supply of electricity for testing purposes where such temporary reconnexion can be made without risk to life or property.

Protection of telegraph lines Cap 68.01

26. A licensee shall comply with the Communications Act in regard to protection of telegraph lines where—

(*a*) a cable laid by him crosses or is in close proximity to an underground telegraph line; or

(*b*) an overhead line installed by him crosses or is in close proximity to an overhead telegraph line.

Inspection and testing

27.—(1) A consumer shall not be relieved of any liability or responsibility for inspecting, testing or maintaining, in a safe condition, his own installation by virtue of any obligation to inspect or test placed on a licensee.

(2) For the purposes of by-law 24 (2) or by-law 25, a licensee may, in lieu of an inspection or test by himself or by a person authorized by him, accept from a consumer a certificate in approved form given on behalf of the consumer by an electrical installations person or competent

person that the consumer's installation or part thereof has been inspected and tested in a manner approved by, and with results satisfactory to, the licensee.

(3) A consumer shall cause his electrical wiring to be tested every five years and maintain and keep a record thereof until the next installation testing and the record shall indicate the particulars of the installations person who carried out the inspection and the work or repairs done, if any.

Availability of By-laws

28. A licensee shall keep a copy of these By-laws at each office, depot or service centre attached to his licensed activity.

Division 2

Construction of Licensee's or Private Owner's Works

Design and protection of works

29.—(1) The works of a licensee shall—

(*a*) be sufficient in size and rating to perform their intended functions;

(*b*) be designed, constructed, installed and protected, where necessary, with such material and of such quality as to prevent danger;

(*c*) be specially designed and constructed or additionally protected where exposed to—

(i) the weather;

(ii) wet conditions;

(iii) vermin;

(iv) corrosion;

(v) flammable surroundings;

(vi) dust; or

(vii) explosive atmosphere,

so as to prevent danger from such exposure.

(2) A licensee shall ensure that conductors and live parts, except as otherwise provided for in these By-laws are—

(*a*) where necessary, fully insulated and mechanically protected; or

(*b*) placed and safeguarded to prevent danger.

(3) A licensee shall ensure that high-voltage conductors and high-voltage live parts, unless completely surrounded and protected by earthed metal, have the minimum section clearances set out in the Third Schedule hereto or are guarded by a protective barrier in order to prevent inadvertent touching or dangerous approach by a person standing on any floor-level, walkway, stairway or working platform.

Switch gear

30. A licensee shall ensure that a switch, fuse-switch, circuit-breaker or isolating link is—

(*a*) accurately adjusted to make and maintain good contact;

(*b*) provided with an operating handle which is insulated from the electrical conductors;

(*c*) arranged in such a way that it cannot accidentally reclose from the open position;

(*d*) arranged so as to make and break all live poles of the supply simultaneously, except in the case of fuses or where an isolating link is intended for use on a circuit not carrying load; and

(*e*) designed or constructed so that in breaking a live circuit an arc is not maintained.

Fuse

31. A licensee shall ensure that a fuse is designed, constructed, installed and protected in such a manner that—

(*a*) it effectively interrupts the circuit current under fault or abnormal overload conditions; and

(*b*) the fusible portion may be readily be removed or replaced without danger.

Automatic circuit-breakers

32. A licensee shall ensure that an automatic circuit-breaker is designed, constructed, installed and protected in such a manner that—

(*a*) it effectively interrupts the circuit current under fault or abnormal overload conditions;

(*b*) there is no danger from overheating or arcing or the scattering of hot oil when it operates; and

(*c*) where arranged for manual closing, the operating mechanism provides trip-free operation.

Joints and connexions

33. A licensee shall ensure that an electrical joint or connexion is designed, constructed, installed and protected in such a manner that—

(*a*) electrical conductivity is maintained satisfactorily;

(*b*) its insulation, where insulation is necessary, is suitable for the formal operating voltage; and

(*c*) its mechanical strength is suited to its location and environment.

Isolating and protective devices

34.—(1) A licensee shall ensure that isolating and protective devices—

(*a*) for disconnecting all voltages from any part of a system; and

(*b*) starting and stopping every motor,

are provided to prevent danger.

(2) Every part of a system shall be protected from excess current except a control or other circuit where such protection may be undesirable or unnecessary.

Switchboard

35.—(1) A licensee shall ensure that a switchboard is designed, constructed, installed and placed in such a manner that the—

(*a*) parts which have to be handled or adjusted are readily accessible from the working platform; and

(*b*) measuring instruments and indicators are observable from such platform:

Provided that where such handling, adjustment or observation is made from another position, such additional precautions as are necessary to prevent danger shall be taken.

(2) A licensee shall ensure that a low-voltage or medium-voltage switchboard which has bare conductors normally exposed that they can be touched—

(*a*) is located in an area specially provided or be suitably fenced or enclosed; or

(*b*) has a working platform or passageway that has—

(i) a firm and even floor;

(ii) adequate means of access free from danger;

(iii) a clear head-room of not less than 2.12 metres; and

(iv) a clear width of not less than 1.2 metres measured from any bare conductor or a clear width of 2.43 metres between bare conductors arranged in switchboards on opposite sides of the same passageway.

Building for electrical purposes

36.—(1) A building constructed by a licensee for the accommodation of any of his works shall—

(*a*) be substantially constructed and designed for its intended purposes;

(*b*) be arranged in a such manner to prevent, as far as practicable, access thereto except by a doorway or gateway;

(*c*) enclose the works in such a manner that they cannot readily be interfered with from outside;

(*d*) be ventilated, kept dry and made vermin-proof, as far as practicable;

(*e*) have fixed outside each entrance a notice of durable material inscribed with the word "DANGER" in white letters of at least 3.13 centimetres in height on a red background; and

(*f*) have fixed inside, printed instructions as to the proper first-aid treatment of persons suffering from electric shock.

(2) Where the building referred to in paragraph (1) is below ground level, the licensee shall ensure that—

(*a*) it has adequate means of access by a door or trap-door with a staircase or ladder securely fixed and so placed that no live part of a system or conductor shall be within reach of a person thereon; and

(*b*) where a person is to be regularly employed therein and high-voltage is present, it has access referred to in subparagraph (*a*) by door and staircase only.

Outdoor substations

37.—(1) Any part of a licensee's works for the transformation, control, regulation or switching of electricity in the open air shall, except as otherwise provided for in these By-laws—

(*a*) be completely enclosed in a metal casing connected with earth at all points below a height of 3.0 metres from the ground;

(*b*) be mounted on the supports of an overhead line; or

(*c*) be enclosed by a fence not less than 1.8 metres in height fitted with a suitable anti-climbing device for the purpose of preventing access not authorized by the licensee.

(2) A licensee shall ensure that a notice of durable material inscribed with the word "DANGER" in white letters of at least 3 centimetres in height on a red background shall be fixed to the metal casing, supports or fence referred to in paragraph (1) (*a*), (*b*) or (*c*).

Earthing of metal-work

38.—(1) A licensee shall ensure that—

(*a*) metal-work attached to or forming part of a metal or reinforced concrete support and a metal transformer case or metal switch handle mounted thereon is connected with earth;

(*b*) metal-work attached to or forming part of a wooden support which is liable to become dangerous because of leakage across or failure of the insulation—

(i) is connected with earth if the metal-work is within 3 metres of the ground; or

(ii) where the metal-work is not connected with earth and is more than 3 metres above the ground, it has effective secondary insulation sufficient to withstand the voltage to earth.

(2) Notwithstanding subparagraph (*b*), where a metal-work is mounted on a wooden support, a licensee shall ensure that—

(*a*) a metal transformer case together with its associated metal-work and a metal switch handle is connected with earth;

(*b*) a high-voltage switch is inserted in the operating rod between the switch handle and the switch insulator capable of withstanding the normal operating voltage where such switch handle is within 3 metres of the ground.

(3) A licensee shall ensure that metal cradle or a stay-wire is—

(*a*) connected with earth; or

(*b*) has inserted insulation capable of withstanding the normal operating voltage.

(4) A licensee shall ensure that a metal armouring or metal sheathing, except sheathing intended for use as a concentric neutral conductor at earth potential—

(*a*) is connected with earth;

(*b*) has earth continuity maintained by a separate earth conductor across any joint-box or terminal enclosure associated with the cable; and

(*c*) where the joint-box or enclosure referred to in subparagraph (*b*) is of metal and bonded thereto.

(5) Save as otherwise provided in these By-laws, the licensee shall ensure that any metal-work associated with or forming part of a licensee's works, unless isolated from and not likely to come into contact with live parts or with earthed metal-work, is connected with earth.

Earthing of consumer's installation

39.—(1) Where a licensee provides protective multiple earthing in accordance with Part V, he shall, before supplying a consumer with electricity therefrom, interconnect with his own earthing arrangements the main earthing conductor of the consumer's installation.

(2) In any other case other than that set out in paragraph (1), a licensee may, before supplying a consumer with electricity, permit an interconnexion between his own earthing arrangements and the main earthing conductor of the consumer's installation, subject to such conditions as the licensee considers necessary.

Earth electrodes

40. A licensee shall ensure that an earth electrode is installed in a way that no voltage gradient is maintained at ground-level which may cause danger to life.

Leakage to earth

41. A licensee shall ensure that where metal-work is earthed, the associated earthing system is designed, constructed and maintained in a way that any leakage resulting from contact of negligible resistance between a live conductor or live part and any metal-work connected with earth is sufficient to operate the protective device which is installed to make that conductor or part dead.

Arc-suppression coil

42. Nothing provided under by-law 41 shall prevent a licensee from using an arc-suppression coil inserted between the transformer or generator neutral and earth in such a manner as to ensure that in the event of a live conductor or live part coming into contact with earth or with any metal-work connected with earth an arc between that conductor or part and earth is immediately suppressed and the voltage of that conductor or part thereof is reduced to prevent, as far as reasonably practicable, the risk of accident therefrom.

Service lines on consumer's premises

43.—(1) A licensee shall ensure that a service line has a suitable fusible cut-out or circuit-breaker as a protective device placed, as near as practicable, to the supply terminals on the consumer's premises.

(2) A protective device referred to in paragraph (1) shall be—

(*a*) supplied and installed by a licensee or, in the event of agreement between him and the consumer, by the consumer;

(*b*) of adequate rupturing capacity, suitably enclosed and of fire-resisting construction;

(*c*) placed at a position to be selected by the licensee after consultation with the consumer; and

(*d*) inserted in each live conductor and not in any neutral conductor permanently connected with earth.

(3) Where supply of electricity is provided at high-voltage, a licensee shall make provision that—

(*a*) the protective device referred to in paragraph (1) can be isolated from the service line; and

(*b*) the consumer can cut off all voltage at or after the supply terminals without danger.

Construction and installation of cables

44.—(1) A licensee shall ensure that a cable is fully insulated for the normal operating voltage and is of a type and construction and is laid or installed in a manner suited to its particular environment and shall take into account—

(*a*) by-law 29 (*a*), (*b*) and (*c*);

(*b*) the normal usage of the ground in which any part of it is to be laid; and

(*c*) any foreseeable risk of damage to the cable and danger to persons, property and to other electrical services, water, gas, sewerage and telegraph services, railways and constructional works at or below ground-level.

(2) A licensee shall ensure that a component used with a cable is of a type and construction and is laid or installed in a manner suited to that cable and shall take into account—

(*a*) paragraph (1); and

(*b*) by-law 33 where a joint or connexion is necessary.

Metallic protection for high-voltage cables

45.—(1) A licensee shall ensure that a high-voltage cable is laid or installed so that it is completely surrounded and protected by earthed metal as provided—

(*a*) by its own metal sheathing or metal armouring; or

(*b*) by an extraneous metallic covering.

(2) A licensee shall ensure that a joint, connexion or termination of a high-voltage cable is surrounded and protected by earthed metal.

(3) Notwithstanding paragraph (1) or (2), the surrounding and protection by earthed metal referred to therein may be omitted in a power station, substation, switch-room or similar premises designed for electrical purposes:

Provided that where it is omitted, the high-voltage cable, joint, connexion and terminal shall—

(*a*) have the section clearances required in accordance with by-law 29 (3); or

(*b*) be guarded by a protective barrier to prevent inadvertent touching or dangerous approach by a person standing on a normal floor-level, walkway, stairway or working platform.

Identification of neutral conductor, cable labeling and insulation test

46.—(1) A licensee shall ensure that a neutral conductor of a cable can, at its termination, be permanently identified so that it is readily and uniformly distinguishable from other conductors.

(2) Where two or more cables forming part of different circuits terminate at adjacent positions, a licensee shall ensure that each circuit—

(*a*) is permanently labeled on its exterior or on its terminating box or component; or

(*b*) has other means of identification so that it is readily distinguishable from other circuits.

(3) A licensee shall ensure that a cable is subject to an insulation test after being laid or installed before being connected to a supply of electricity and that it is not connected if the connexion would result in an electrical leakage which might be a danger to persons or property.

(4) A licensee shall ensure that no cable is permanently connected to a supply of electricity unless tests have been carried out—

(*a*) to ensure compliance with these By-laws; and

(*b*) to establish electrical continuity of conductors.

Division 3
Standards of Measurement

Fundamental electrical units

47.—(1) The fundamental electrical units of measurement shall be—

(*a*) the ohm;

(*b*) the ampere; and

(*c*) the volt,

and the value of each is set out in Part I of the Sixth Schedule hereto.

(2) Denominations of standards for the fundamental electrical units referred to in paragraph (1) are set out in Part II of the Sixth Schedule hereto.

(3) Limits of accuracy attainable in the use of standards denominated in paragraph (2) are set out in Part III of the Sixth Schedule hereto.

Derived electrical units

48. The electrical unit for the measurement of electricity shall be the kilowatt-hour and the value of such unit shall be derived from the fundamental units referred to in by-law 62 and shall be set out in Part IV of the Sixth Schedule hereto.

Measurement of electricity

49.—(1) The amount of electricity supplied by the licensee shall, except where otherwise agreed between the consumer and the licensee, with the approval of the Authority, be ascertained by means of an appropriate meter or meters supplied by the licensee.

(2) In addition to a meter which may be placed upon the premises of a consumer to ascertain the amount of the supply, the licensee may place upon those premises such meter or other apparatus as may be desired for the purpose of ascertaining or regulating the amount of electricity supplied to the consumer, the number of hours during which the supply is taken, the maximum rate of supply taken by the consumer or any other quantity or time connected with the supply.

(3) A meter used by a licensee for measuring a supply to a consumer of electricity in kilowatt/hours shall have permissible limits of error in registration not exceeding two decimal point five *per centum* above nor below a true and precise registration of kilowatt/hours.

Division 4
Quality of Service and Supply Standards

Quality of service and supply standards

50.—(1) A holder of a transmission licence and every holder of a distribution licence shall comply with and adhere to the quality of service and supply standards set out in the Tenth Schedule hereto.

(2) Persistent or gross breach of the standards referred to in paragraph (1) by a licensee may lead to suspension, amendment or cancellation of the licence by the Authority.

PART V
Safety Code Rules

Division 1
Application of Part

Application of this Part

51.—(1) This Part shall apply to electrical systems and to associated plant and apparatus under licensees' or private owners' ownership or control.

(2) Rules, documents or procedures issued by other authorities or licensees may apply in accordance with management instructions, but where no such rules, documents or procedures have been issued, or if there is a conflict between such rules, documents or procedures with these By-laws, these By-laws shall prevail.

Division 2
General Provisions

Information and instruction

52.—(1) Each licensee shall sufficiently inform and instruct its employees about the system, plant or apparatus affected by a particular operation or work, and the rules, procedures or documents which apply to such licensee's operations.

(2) A licensee shall, in addition to paragraph (1), furnish information to other persons not being its employees who are likely to be exposed to danger by the operations or work of the licensee, to such extent as may, in the licensee's opinion be reasonably practicable.

Variation

53. The Authority may, in exceptional or special circumstances, vary these By-laws and issue additional guidelines to such extent as may, in the opinion of the Authority, be necessary to achieve the objectives of these By-laws.

Special procedures

54. A licensee shall ensure that work on or testing of apparatus, conductors or plant to which these By-laws are for special reasons not applicable, shall be carried out according to a special procedure, which shall adhere to the safety requirements prescribed under these By-laws.

Objections

55.—(1) A person who receives instructions regarding the operation of or work upon a licensee's systems and associated plant and apparatus shall, if he has an objection on safety grounds against the carrying out

of such instructions, lodge the objection with the person issuing the instructions.

(2) Where an objection has been raised under paragraph (1), the licensee or other concerned entity shall institute investigations into the merits of the objection and, if necessary, refer the matter to an immediate supervisor for a decision before proceeding with the operation or work.

Accident and dangerous occurrences

56. Every electrical accident and dangerous occurrence involving a licensee's system shall be reported immediately to the appropriate control engineer who shall report to the designated engineer.

Duties

57.—(1) A person engaged in the operations or work on electrical systems and associated plant and apparatus shall comply with these By-laws and other related rules and legal procedures relevant to his duties.

(2) A person shall not neglect his duties on the ground that he is ignorant of the relevant legal requirements and procedures.

(3) A person who has any doubts concerning duties shall report the matter to an immediate supervisor for advice before proceeding with the work.

Safety equipment and protective clothing

58.—(1) Every licensee shall obtain and issue to its employees safety equipment and protective clothing which comply with the standards approved by the Authority.

(2) Each employee working under circumstances requiring safety precautions shall wear appropriate protective clothing and foot wear or such other protective clothing, as may be necessary, having regard to the work that employee may be involved in.

Electric shock

59.—(1) Every licensee shall train each person involved with the operation of or work upon the licensee's system and associated plant and apparatus in the treatment of electric shock.

(2) Every licensee shall provide each employee with a copy of these By-laws.

Division 3
General Safety Precautions

Access to work in operational premises

60.—(1) No person shall, without authority, enter or have access to any operational premises such as a control room, substation, switching station or underground chamber belonging to or under the control of a licensee.

(2) A barrier, door or gate restricting access to an underground chamber or other confined space, substation or tunnel shall be kept

locked and the control of the keys shall be in accordance with approved procedure.

(3) A person shall not enter or work in any indoor substation or confined space such as an underground chamber, tunnel, vessel, tank, pit, culvert or pipeline without the consent of a senior authorized person.

(4) Where it becomes necessary for a person to enter and work in any of the places specified under paragraph (3), adequate safety precautions shall be taken against danger arising from toxic and flammable or abnormal temperature.

(5) Safety precautions under paragraph (4) include—

(*a*) use of approved natural or forced ventilation or air conditioning;

(*b*) wearing approved breathing apparatus;

(*c*) testing the atmosphere using approved specialized equipment;

(*d*) prohibition of smoking and use of exposed flame; and

(*e*) posting a person outside such place to keep in constant touch with the person engaged in the work with appropriate rescue equipment, ready and capable of assisting in an emergency.

(6) A person using the apparatus under paragraph 5 (*b*) shall be specially trained in its use.

(7) Before a person enters an area under this by-law, he shall be issued with a limitation-of-access, and the arrangements for access and work and the precautions to be taken shall be in accordance with approved procedures.

Vessel containing flammable substance

61.—(1) A person shall not smoke or expose a flame near any flammable substance.

(2) A person shall not engage in work involving application of heat unless that person has taken all practical precautions to prevent a fire or explosion. The prevention of fire or explosion shall be by removal of the flammable substance and any fumes, or by rendering them non-explosive and non-flammable.

(3) A person shall not enter a vessel that has recently been emptied of oil or other flammable or toxic substance unless a senior authorized person is satisfied that all dangerous vapours have been expelled, and a limitation-of-access has been issued.

Work in fire protected areas

62.—(1) Unless alternative approved safety procedures apply because of special circumstances, before access or work is carried out in an enclosure protected by automatic fire-extinguishing equipment—

(*a*) the automatic control shall be rendered inoperative and the equipment left on manual control, and a caution notice attached;

(*b*) the precautions taken to render the automatic control inoperative and the conditions under which it may be restored shall be noted on a safety document or written instruction issued for such access or work or other activity; and

(*c*) the automatic control shall be restored immediately after the persons engaged in the work have withdrawn from the enclosure.

(2) Only approved portable fire-extinguishers shall be made available and shall be the only extinguishers to be used near live apparatus and conductors.

(3) In the handling of fire-extinguishers, the safety distances specified in by-law 87 shall be maintained.

(4) After the discharge of a portable fire-extinguisher in an enclosed space, personnel shall leave the space until the precautions specified in by-law 76 (3) have been taken.

(5) After an explosion, fire or discharge of a fire-extinguisher in an enclosed space, the space shall be adequately ventilated before any person enters it.

Work on poles, towers and high structures

63.—(1) A person shall not climb any pole unless that pole has been tested in a manner approved by the Authority and climbing and descending a pole shall be by approved means and methods.

(2) A person shall not climb a pole which is impaired by decay or damage, or whose stability is in doubt until that pole has been supported by approved means.

(3) Where a pole is supported as provided under paragraph (2), the pole shall be climbed by one person at a time or access to its top may be by other approved means independent of the pole.

(4) A person gaining access to work on a tower, pole or other high structure shall use safety belts, harnesses or other safety equipment of an approved type.

(5) A person working on a tower, pole or other high structure shall be in visual range of another person who shall be fully conversant with approved rescue procedures.

(6) Every gate or device to prevent climbing of towers and gantries supporting high-voltage conductors shall always be kept secured in an approved manner, and access shall be controlled by a senior authorized person or an authorized person in receipt of an appropriate safety document.

Access to high-voltage apparatus and conductors

64.—(1) Guards to an access ladder, barrier, door or gate on or in an outdoor compound preventing access to a live high-voltage conductor shall be kept secured in an approved manner, and access to them shall be according to approved procedure.

(2) Any barrier, door or gate preventing access to a totally enclosed chamber, cubicle or cell containing live high-voltage conductors shall be kept locked and the keys shall be accessible only by a senior authorized person.

(3) Any spout shutter not required for immediate work or operation shall, if the spout is otherwise made accessible, be locked and the key accessible only by a senior authorized person.

High-voltage switching

65.—(1) High-voltage switching shall not be carried out by any person other than an authorized person, a senior authorized person or by remote control directed by a control engineer.

(2) Notwithstanding paragraph (1), an authorized person may, for the purpose of training and acting under the personal supervision of a senior authorized person, carry out high-voltage switching.

(3) Except in cases of emergency, high-voltage switching shall not be carried out without the authority of the appropriate control engineer.

(4) When a control engineer gives authority for high-voltage switching to be carried out, he shall communicate directly with the person intending to carry out the switching, and where for special reasons direct communication is not possible, an approved procedure shall be followed.

(5) Before any high-voltage switching is carried out on any system that may affect another system, the control engineer authorizing the switching shall communicate with the control engineer of the other system and the switching shall be agreed between them and recorded in the respective control books of all control engineers concerned.

(6) Where high-voltage switching is to be carried out for issuing a safety document and there are two or more control functions involved, in the absence of a standing agreement for such matter, the control engineers concerned shall—

(*a*) agree on the person to be in control of the part of the system in the isolated state and to be responsible for giving consent to the issuing of a safety document; and

(*b*) such agreement between the control engineers shall be recorded in the respective control log books by each control engineer.

(7) Where there are special requirements to be complied with before, during or after high-voltage switching operations, approved procedures

shall apply and special provisions shall be made to ensure that the control engineers, the operators and others affected are aware of their responsibilities.

(8) High-voltage switching with the control engineer's authority shall be carried out without undue delay and all such switching or switching in emergency, shall be reported to the control engineer as soon as possible. For emergency switching, the circumstances demanding such switching shall be reported at the same time.

(9) If a switchgear shows any sign of distress, the operator shall report its condition to the control engineer who shall in turn report to a higher authority in order to have it examined before taking a decision about further operation.

(10) An operator shall, while operating a switching gear mounted on a pole or other structure from ground level where necessary, wear rubber gloves or use other approved equipment.

(11) A person shall not undertake switching or work on high-voltage equipment by signal or pre-arranged understanding after an agreed interval of time.

Records

66.—(1) Every message by telephone or otherwise relating to the operation of a high-voltage system shall be recorded down and shall be read back to the sender to ensure that it has been accurately received.

(2) A control engineer shall ensure that a record is made of the time and particulars of all high-voltage switching including that carried out by the control engineer by remote control.

Failure of supply

67.—(1) A failure of supply to or from any part of a high-voltage system from whatever cause, shall immediately be reported to the control engineer.

(2) During a failure of supply, all apparatus and conductors shall be regarded as live unless they are isolated and proved dead by approved means.

Voltage testing devices

68.—(1) Voltage testing devices shall be of an approved type and shall be used in accordance with approved procedures.

(2) Voltage testing devices shall be tested in an approved manner immediately before and after use, and where this is not practically possible, in accordance with other approved procedures.

Division 4
Safety Precautions for Work on or near High-Voltage Systems

General requirements

69.—(1) Subject to the exceptions specified in this by-law and those expressly allowed by individual rules, a person shall not undertake any

repair, maintenance, cleaning, alteration or such work, on or within the safety distance of an exposed conductor, part of a high-voltage system distance of an exposed conductor or part of a high-voltage system unless such parts of the system are—

(*a*) dead;

(*b*) isolated and all practicable steps taken to lock off from all points of supply, including voltage and auxiliary transformers, common earthing equipment and other sources from which the apparatus and conductors may become live, with caution notices fixed at all points of isolation;

(*c*) earthed by approved means at all points of disconnexion of high-voltage supply from the system or between such points and the point of work;

(*d*) screened where necessary to prevent danger, and danger notices are attached to apparatus containing live conductors and attached near other live conductors;

(*e*) identified at the point of work by approved means; and

(*f*) released for work by the issue of an appropriate safety document that shall not be issued unless such person is fully conversant with the precise parts of the systems, apparatus and conductors to be worked upon, the nature and extent of the work to be done and the safety precautions to be taken.

(2) It is the duty of the person issuing the appropriate safety documents to ensure compliance with the provisions of paragraph (1).

(3) Notwithstanding the provisions of paragraph (1)—

(*a*) work such as cleaning and painting of earthed metal enclosures, connexions or disconnexions of circuits to or from live high-voltage systems, live line testing and live insulator washing may be carried out but only according to approved procedures;

(*b*) as a safeguard for personnel carrying out cleaning and painting works on substations, the system diagram in the appropriate local office shall be marked to show the work locations;

(*c*) high-voltage live line on high-voltage overhead lines may be carried out but only according to approved procedures; and

(*d*) where the design of apparatus does not allow strict compliance with all the requirements in paragraph (1) and if an operational procedure for carrying out the work does not exist, the work shall be carried out—

(i) in accordance with special instructions issued by an authorized person to ensure that safety is achieved; and

(ii) under the personal supervision of the authorized person, with the control engineer kept informed of the circumstances.

Isolation of apparatus and conductors

70.—(1) Isolation or reconnexion of high-voltage apparatus or conductors shall not be initiated except with the sanction of the control engineer.

(2) Safety locks shall be used to lock all switchgears at points where the circuit on which work is to be carried out is likely to be energized and the keys for such locks shall be kept in a key safe, if provided, or in some other safe place under the control of an authorized person.

(3) Safety locks shall be fitted to the switchgear at all points of isolation immediately following the sectionlization of defective apparatus.

(4) Details of the isolation referred to in paragraph (1) and the deposit of safety lock keys associated with the isolation shall be recorded by the Control Centre.

(5) Where the circuit on which work is to be carried out is controlled only by fuses or links, the fuses or links (and carriers) shall—

(*a*) be removed and kept in a safe place preferably in the possession of the person responsible for issuing the safety documents;or

(*b*) where such removals are not practicable approved procedures to ensure safety shall be followed.

(6) When the mechanical isolation of a voltage transformer involves physical difficulty in withdrawal to achieve total high-voltage isolation, the withdrawal of the voltage transformer, secondary fuses or links may be accepted as isolation, and fuses or links so withdrawn shall be kept in a safe place in the possession of the person responsible for issuing the safety document and caution notices shall be fixed at all points of isolation.

Earthing

71.—(1) Where high-voltage apparatus or conductors are to be discharged and earthed in accordance with by-law 84 (1), the discharging and earthing shall be done when reasonably practicable, by using a circuit-breaker or earthing switch provided for the purpose of making the earthing connexion, and where a circuit-breaker is used, the trip feature shall be rendered inoperative before closing and unless this is not practicable it shall then be done afterwards. After closing, the circuit-breaker or earthing switch shall be locked in the earthed position, so that it remains inoperative while it is in the circuit main earth.

(2) Where circuit-breaker is used to make the earth connexion, the operation of closing to earth shall be carried out locally and SCADA shall not be used for this purpose.

(3) Where subparagraph (1) is not reasonably practicable or not applicable, the high-voltage apparatus and conductors shall be checked by means of an approved testing device to verify that they are not live, and may then be discharged and earthed by an earthing lead applied by means of an approved earthing appliance.

(4) Where work is carried out on an overhead system to which a consumer remains connected, a circuit main earth shall be provided and maintained between that consumer and the point of work.

(5) Due to the possibility of low-voltage and high-voltage inversions such as those from customers' generation, care shall be taken when using earthing lead following a test with the conductor to verify that the circuit is not live, and one conductor shall be earthed and subsequent tests carried out to verify that the remaining conductors are not live before applying an earth to them.

(6) Earthing leads and associated clamps shall be of an approved type and of adequate capacity for duty at the point of application, and shall be adequately maintained and always examined immediately before use.

(7) Subject to paragraph (1), the general procedure to be followed when using earthing leads shall be as follows—

(*a*) the circuit shall be verified that it is not live and where practicable, checked by means of an approved voltage testing device or other approved means;

(*b*) the circuit shall be verified that it is not live and, where practicable, checked by means of an approved earthing pole or other approved appliance and care shall be taken to ensure that good contact is made and that earthing leads are clearly visible;

(*c*) earthing leads shall be connected to earth before being connected to the phase conductors and shall only be connected to the phases by means of an approved earthing pole or other approved appliance. Care shall be taken to ensure that good contact is made and that earthing leads are clearly visible;

(*d*) all phases shall be earthed, even if work is to be carried out only on one phase;

(*e*) earthing leads shall not be applied in any cell or compartment in which there is any exposed metal live at high-voltage that may be a source of danger, and shall be applied so that they remain clearly visible as far as it is reasonably practicable;

(*f*) when earthing leads are being removed, each lead shall be disconnected from its phase conductor by means of an approved earthing appliance before it is removed from its earth connexion; and

(*g*) for earthing on spout contacts of metal-enclosed switchgear, only approved appliances shall be used and a person shall not insert a hand or tool into contact with spouts for this purpose.

(8) A person shall not operate a high-voltage earthing switch or circuit main earth connected or disconnected, except with the consent of the control engineer, or under the terms of a sanction-for-test, or by an authorized person or by a competent person acting under the personal supervision of a senior authorized person.

(9) Each operation of circuit main earths shall be reported to the control engineer as soon as possible after completion, and when operating to a high-voltage switching schedule, the application or removal of circuit main earths shall be reported to the control engineer at the appropriate control break.

(10) The location of each circuit main earth shall be recorded on the safety document.

(11) Additional earths applied after the issue of a permit-to-work or sanction-for-test may be attached or removed by a competent person.

Approach to exposed live high-voltage conductors or insulators supporting them

72.—(1) The safety distances designated in the Seventh Schedule shall be maintained at the respective system voltages between any part of a person or object and the nearest exposed live high-voltage conductor.

(2) A distance of three hundred millimetres (300) shall be maintained at all system voltages, from the portion of insulators supporting live high-voltage conductors which is outside the appropriate safety distance to the conductors.

(3) Subject to the provisions of paragraph (4), a person shall not allow any part of his body or any other object not provided for within the approved procedures, to approach exposed high-voltage conductors or insulators supporting such conductors within the safety distances specified in paragraph (2)—

(*a*) unless the conductors have been made safe for work and a safety document issued as required by by-law 84 (1); and

(*b*) such person's hands shall be kept below shoulder height when in the vicinity of the exposed live high-voltage conductors, unless it is unavoidable.

(4) When a person is applying an approved voltage testing device to high-voltage conductors contained within the open spouts of metal enclosed switchgear, it is allowable for those parts of the body of such

person required to do the task to approach within the safety distances specified in paragraph (2), subject to approved procedures.

(5) Where exposed high-voltage conductors are not isolated, the only objects that shall be made to approach them or the insulators supporting them, within the safety distances specified in paragraph (2), shall be insulated devices approved for high-voltage live line work or approved voltage testing devices.

(6) Where exposed conductors are isolated but not proved dead, the only objects that shall be caused to approach them or the insulators supporting them within the safety distances specified in paragraph (2), shall be insulated devices approved for high-voltage live line work or approved voltage testing devices.

(7) Where exposed high-voltage conductors in a substation have been isolated, a circuit main earth may be applied to the apparatus following a visual examination to confirm that adequate isolation has been achieved.

(8) Taking account of the nature and location of the work and the hazards and the presence of persons, an authorized person or the person in charge of the work, shall establish working and access clearances to ensure that the safety distances specified in paragraph (2) are maintained, both in respect of those persons present and the objects being handled.

(9) Where work is to be carried out within a one metre distance of the safety distance specified in paragraph (2), a supervisor shall ascertain if any of the following additional precautions have been taken before work commences—

(*a*) danger notices or red pennants are attached to the pole or structure at a distance not less than that specified in that paragraph; or

(*b*) a limitation-of-access has been issued defining the work to be carried out in the vicinity of live conductors and detailing any specified potential hazards to be avoided.

(10) Danger notices or red pennants shall be attached by a senior authorized person or engineer or by a competent person acting under personal supervision of an authorized person or senior competent person.

Work in substations and switching stations containing exposed live high-voltage conductors

73.—(1) The following provisions apply to a zone of work—

(*a*) when work is to be carried out in a substation, or switching station in which there are exposed live high-voltage conductors, the zone of work shall be properly identified by an authorized person, and shall be defined as far as possible by the use of approved barrier roping, yellow demarcation ribbons or by other approved means and shall be arranged so that the specified working and access clearances, from the nearest exposed live conductor or supporting insulator to

ground level or platform or access way which may be repaired to be used, are established;

(*b*) the zone of work to be defined at ground level shall be only that in which the work is to be carried out;

(*c*) if the work cannot be carried out without leaving the ground level or a platform or access way, the working and access clearances shall be obtained from the nearest exposed live high-voltage conductor to the points from which work is actually carried out, and in such cases, access shall only be by means of an approved ladder or other approved means;

(*d*) a person shall not climb any structure to gain access, and in the case of terminal poles in substations, access shall be in accordance with approved procedures;

(*e*) if the work is such that the specified working and access clearances are not sufficient to avoid danger, other suitable arrangements shall be made;

(*f*) the approved barriers or roping shall be clearly visible, so far as it is reasonably practicable, and shall not be supported by any structure carrying electrical apparatus or conductor and shall not carry any notice; and

(*g*) at ground level, the section so defined shall be clearly distinguished by green flags by day or, if not otherwise satisfactorily illuminated, by green lights at night, fixed on separate supports and suitably spaced within the safe boundary. Danger notices shall be attached to adjoining apparatus containing live conductors or adjacent conductor supports at the limits of the zone of work.

(2) Where necessary to prevent danger, the means of access to and from the zone of work shall be defined in an approved manner.

(3) The working and access clearance required at the zone of work under paragraph (1) shall be as specified in by-law 87 (8).

(4) The following provisions apply to the use of portable ladders and long objects where there are exposed live conductors—

(*a*) the type of portable ladders shall be approved and shall be of no greater length than is required for the work involved;

(*b*) portable ladders and other long objects shall not be used without the permission of an authorized person, who shall define the conditions of use to the senior authorized person in charge of the work, the movement and erection of such ladders and objects shall then be carried out only under the personal supervision of the senior authorized person and shall be carried only in a horizontal position and as near the ground as reasonably practicable;

(*c*) portable ladders provided for giving access to fixed ladders which terminate above ground level, and to provide access in other approved cases, shall be padlocked in position or otherwise secured by a senior authorized person while work is being carried out; and

(*d*) all portable ladders within substations, or switching stations shall be securely locked to a suitable anchorage when not in use.

(5) The following provisions apply to the use of cranes, scaffolds and other equipment—

(*a*) when cranes, scaffolds or other equipment and materials transported by vehicles or otherwise are taken into or out of a substation, the route to be followed shall be agreed by an authorized person, and the cranes, scaffolds or other equipment shall be connected to the substation earthing system as soon as reasonably practicable;

(*b*) the limits of operation of such equipment shall be defined by an authorized person to a senior authorized person who shall be in charge of the work, and thereafter the equipment shall be erected or moved only within such limits under the personal supervision of the senior competent person.

(6) Danger notices, barriers and screens shall be fixed or moved only by, or under the personal supervision of an authorized person.

(7) In the event of a lightning storm, work on exposed conductors in outdoor substations or outdoor switching stations, or on apparatus directly connected to exposed conductors shall cease immediately where necessary, to prevent danger, and the control engineer shall be informed.

Permit-to-work

74.—(1) A permit-to-work shall be issued by a senior authorized person before any work is carried out on any apparatus or conductor.

(2) A permit-to-work shall only be issued with the knowledge of the control engineer, who shall maintain a record of the issue and cancellation of each permit-to-work.

(3) When working on a high-voltage switching schedule, the issue and cancellation of a permit-to-work shall be recorded by the control engineer after its issue as soon as it is practicable.

(4) Where more than one working party is involved in work on apparatus or conductors associated with the same circuit main earths, the authorized person in charge of the high-voltage switching schedule shall record the issue of all safety documents on his copy of the high-voltage switching schedule or danger envelope.

(5) If after agreement with the control engineer, it is found necessary to move any point of isolation located between the zone of work and

a live high-voltage system, every outstanding permit-to-work shall be cancelled and new ones issued for any subsequent work on the apparatus.

(6) A permit-to-work shall be explained and issued to the person in direct charge of the work, who after reading its contents and confirming that he understands it and is conversant with the nature and extent of the work to be done, shall sign receipt and its duplicate.

(7) The recipient of a permit-to-work shall be a competent person who shall retain the permit-to-work in his possession at all times while work is being carried out.

(8) Where more than one working party is involved, a permit-to-work shall be issued to the competent persons in direct charge of each working party and they may, where necessary, be cross-referenced with each other.

(9) A permit-to-work shall be cleared and cancelled—

(*a*) when work on the apparatus or conductor for which it was issued has been completed;

(*b*) where it is necessary to issue a sanction-for-test, in which case, all permits-to-work that are associated with the apparatus and conductors to be tested shall be cancelled;

(*c*) where it is necessary to change the person in charge of the work detailed on the permit-to-work; or

(*d*) at the discretion of an authorized person, when it is necessary to interrupt or suspend the work detailed on the permit-to-work.

(10) The recipient shall sign the clearance and return the permit-to-work to a senior authorized person who shall cancel it and inform the control engineer, and in all cases, the recipient shall indicate in the clearance section whether the work is complete or not, and whether all gears and tools have been removed or not.

(11) Where more than one permit-to-work have been issued for work on high-voltage apparatus or conductors associated with the same circuit main earths, the control engineer shall ensure that all such permits-to-work have been cancelled before the circuit main earths are removed.

(12) Where there is a requirement for a permit-to-work to be temporarily withdrawn or suspended, such withdrawal or suspension shall be in accordance with an approved procedure.

Sanction-for-test

75.—(1) A sanction-for-test shall be issued by a senior authorized person initiating the testing under these By-laws before any testing is carried out on any apparatus or conductor.

(2) Apparatus shall be connected to earth in accordance with by-law 84 (*c*) prior to the issue of a sanction-for-test.

(3) A sanction-for-test shall only be issued with the knowledge of the control engineer, who shall maintain a record of the issue of each sanction-for-test or its cancellation.

(4) When working on a high-voltage switching schedule, the issue or cancellation of a sanction-for-test shall be recorded by the control engineer after its issue or cancellation as soon as it is practicable.

(5) A sanction-for-test shall be explained and issued to a person in direct charge of the testing, who after reading its contents and confirming that he understands it and is conversant with the nature and extent of the testing to be done, shall sign its receipt and duplicate.

(6) The recipient of a sanction-for-test shall be a senior authorized person who shall retain the sanction-for-test in his possession at all times whilst tests are being done.

(7) When testing on apparatus for which a sanction-for-test has been issued is suspended or completed, the recipient shall sign the clearance and return the sanction-for-test to an authorized person who shall cancel it and inform the control engineer.

Procedure for temporary withdrawal or suspension

76. Where there is a requirement for a sanction-for-test to be temporarily withdrawn or suspended, such withdrawal or suspension shall be in accordance with an approved procedure.

Limitation

77.—(1) A limitation-of-access shall be issued by an authorized person or a senior authorized person specially authorized to do so, when it is considered necessary to have written instructions to avoid danger and when a permit-to-work or a sanction-for-test is not applicable.

(2) Where a limitation of access is required for work above ground level in a high-voltage substation, it shall only be issued by an authorized person with the knowledge of the control engineer.

(3) A person issuing a limitation-of-access shall determine from the nature of the work, occasions when the control engineer shall record its issue and cancellation.

(4) A limitation-of-access shall, when there is danger, be issued for the following types of activity—

(*a*) work in proximity to, but outside the working and access clearance from exposed live high-voltage conductors;

(*b*) when work is to proceed in the vicinity of an overhead line and the line is made dead in accordance with by-law 84;

(*c*) access to and work in underground chambers and similar confined spaces;

(*d*) work on plant operated by or containing compressed air or other gases; or

(*e*) such other access or work as may be specified by a designated engineer.

(5) A limitation-of-access shall be explained and issued to the person in direct charge of the work, who after reading its contents and confirming that he understands it and is conversant with the nature and extent of the work to be done, shall sign its receipt and duplicate.

(6) The recipient of a limitation-of-access shall be an authorized person who shall retain it in his possession at all times whilst work is being carried out.

(7) Where more than one working party is involved, a limitation-of-access shall be issued to the competent persons severally having personal supervision of each working party.

(8) A limitation-of-access shall be cancelled by the recipient signing the clearance and returning the limitation-of-access for cancellation to an authorized person or senior authorized person specially authorized to do so.

Division 5

Safety Precautions and Procedures Applicable to Low-Voltage Systems

General

78.—(1) Where work or testing is carried out on or near low-voltage apparatus and conductors—

(*a*) precautions shall be taken to prevent danger of body injury due to electric arc or electric shock;

(*b*) the conductors shall be covered with insulation and screening, and the adequacy of these materials to prevent danger shall be assessed before work or testing is carried out; and

(*c*) precautions appropriate to work on or near exposed conductors shall be applied.

(2) Danger may arise in the following circumstances—

(*a*) where a person confuses apparatus and conductors which have been made dead with those which remain live;

(*b*) dead apparatus and conductors are accidentally or inadvertently made live;

(*c*) if a person accidentally or inadvertently makes contact with adjacent live conductors; or

(*d*) if inadequate precautions are taken during live work or testing.

(3) The term "earthed" when applied to the low-voltage system, comprises the bonding of the phase conductors (including any switch or earth wire) to the neutral conductors by means of an approved device or leads.

(4) Control and operation of low-voltage systems shall be in accordance with an approved procedure, and only persons appointed in accordance with an approved procedure shall carry out activities such as switching and the live testing of low-voltage systems.

(5) Work or testing of low-voltage apparatus and conductors shall be carried out by a competent person, and where working arrangements so require, approved procedures for the control of work, including the issue of a safety document shall apply.

(6) Where work or testing involves the initial connexion or the re-arrangement of conductors to a consumer, the electricity supply shall not be provided to the consumer until checks have been made at an appropriate point on the system to ensure correct polarity at the supply terminals and where necessary, in the case of a three-phase supply, the phase rotation shall additionally be checked.

(7) A person shall not erect or dismantle a low-voltage overhead line under a live high-voltage overhead line without the authority of an authorized person, who shall ensure that when necessary, because of insufficient clearance, the high-voltage line is made dead and a permit-to-work issued.

(8) When a low-voltage overhead line conductor is to be raised or lowered or otherwise held on temporary support or connexions, approved procedures shall be followed to ensure that no danger is caused at locations such as road or rail crossing where other persons may be present.

Requirements for work on dead low-voltage apparatus

79.—(1) When work is to be carried out on dead low-voltage apparatus—

(*a*) the conductors shall be isolated from all sources of supply from the system;

(*b*) where the isolating devices are lockable, safety locks shall be applied;

(*c*) if components such as fuses and links are removable, they shall be removed;

(*d*) caution notices shall be securely fixed at all points of isolation; and

(*e*) keys and removed components shall be kept in a secure place in the possession of the person in charge of the work.

(2) Conductors shall be earthed using an earthing device or earthing leads approved for use on the conductors concerned.

(3) Except when work on a low-voltage system is being carried out as part of approved high-voltage live line work, the following requirements apply—

(*a*) if the work requires a point of isolation to be established on a high-voltage system, an appropriate safety document shall be issued;

(*b*) if the work requires a high-voltage system to be made dead, isolated and earthed, a permit-to-work shall be issued; and

(*c*) if the work is being done in conjunction with work on a high-voltage system which has been made dead, isolated and earthed, the work shall be included on the permit-to-work issued for the high-voltage work.

(4) Suitable precaution shall be taken by approved screening or other approved means to avoid danger from inadvertent contact with adjacent live conductors including, where necessary, the fixing of danger notices to apparatus containing live conductors adjacent to other live conductors and at the limits of the zone in which the work may be carried out.

(5) Where conductors are likely to become live due to the operation of a consumer's generator, the following precautions shall be taken to prevent danger—

(*a*) the conductors shall be isolated from the consumer's system; or

(*b*) the conductors shall be earthed on an earth provided between the point of work and the consumer's system.

(6) Before work is connected, the apparatus and conductors shall be identified and proved dead at the point of work by means of an approved voltage testing device, and whilst work is in progress, any live working method that can reasonably be applied to minimize the risk of danger from the conductors being accidentally or inadvertently made live shall be used.

Precautions for work on live low-voltage cables

80.—(1) A cable to be worked on shall be identified in accordance with the following—

(*a*) unless the point of work can be visually traced from a point where the conductors are accessible and have been proved dead at that point, it will be necessary to open the cable as if it is live and test each conductor with an approved voltage testing device; and

(*b*) if the cable has been damaged or is faulty, it shall not be presumed dead, and consequently, the test shall be made at a safe distance from the suspected point of damage on fault and the cable shall be visually traced from the point of test to the suspect point

of damage or fault. Appropriate precautions shall be taken to avoid danger from electric arcing until the point of damage or fault is located.

(2) Where work is to be carried out on an auxiliary cable which may be subject to induced voltage from a high-voltage circuit, additional precautions to prevent danger from these voltages shall be taken in accordance with approved procedures.

Precautions for work on dead low-voltage overhead lines

81.—(1) Bare open-wire low-voltage conductors shall be earthed using approved earthing leads, and where insulated but unscreened conductors are present, the requirements for live working shall be observed until the conductors have been proved dead.

(2) Any unearthed steelwork such as an offset racket or the upper portion of a stay above the insulator shall be treated as live until it is or the conductors have been proved dead.

Work on live low-voltage apparatus and conductors

82.—(1) A person shall not carry out low-voltage live work except in accordance with an approved procedure, which shall ensure adequate protection from danger from electric shock and inadvertent short-circuiting of the conductors.

(2) Where low-voltage live work is to be carried out, the authorized person in charge of the working party shall make an assessment of the site conductors, and the work shall only commence where site conditions enable work to be done safely.

(3) If the site conditions become unsafe, low-voltage live working shall be suspended and the following requirements shall be followed—

(*a*) the apparatus to be worked on shall be visually inspected to ascertain if it is in a satisfactory condition;

(*b*) there shall be adequate working space and safe means of escape;

(*c*) the working space and the apparatus to be worked on shall be adequately illuminated; and

(*d*) if the work is to be done outdoors, it shall only be done if weather conditions are not unduly adverse.

(4) Every person who carries out live working shall be an authorized person and shall have received appropriate training in the particular low-voltage live working procedure, and adequately instructed by the senior authorized person in charge of the working party.

(5) Tools and equipment approved for that purpose shall be the only tools used for work on, or the testing of low-voltage apparatus and conductors.

(6) A person shall not carry out work which involves, or is equivalent to a manipulation of bare live conductors unless accompanied by another person who shall be available to render or obtain assistance in an emergency.

Precautions for work on live low-voltage cables

83.—(1) A cable to be worked on shall be identified by approved means, and all metal-work adjacent to the point of work shall be adequately shrouded with approved insulating material to prevent inadvertent contact. The metallic sheaths of cables shall be bonded to each other with an approved insulated conductor before jointing and cutting to ensure continuity of the electrical circuit through the sheath.

(2) Unless alternative approved procedures allow, during all work including the change of cut-outs, only one conductor shall be bared at a time and insulating gloves and an insulating mat shall be used.

Precautions for work on live low-voltage overhead lines

84.—(1) Where work is carried out on live overhead lines, any unearthed steelwork such as an offset bracket shall be proved dead using an approved voltage testing device.

(2) When work is carried out on insulated but un-screened low-voltage conductors, a person working on such conductors shall wear insulated gloves and use insulated tools to prevent danger that may arise if the insulation has deteriorated or is damaged.

Application of high-voltage rules to work on low-voltage apparatus and conductors

85. Safety rules applicable to work on high-voltage systems, apparatus and conductors may, with the necessary modifications, be applied to work on low-voltage systems, apparatus and conductors in accordance with approved procedures.

Testing and adjustment of low-voltage apparatus

86.—(1) Testing and adjustment including functional testing may be made with low-voltage apparatus live if a person making such testing and adjustment uses approved insulated tools and instruments.

(2) If the testing or adjustment requires covers to be removed so that terminals or connexions that are live or can be made live are exposed or temporarily disconnected, precautions shall be taken to prevent unauthorized access to or interference with the apparatus. Such precautions shall include, where necessary, personal supervision or erection of suitable barriers or screening and the display of danger notices.

(3) If the conductors are to be made dead in order to avoid danger, appropriate requirements under by-laws 94 and 95 shall be applied.

(4) In this Part, "low-voltage" applies to a licensee's 400/240V distributing mains and services.

PART VI
Wiring

Division 1
General

Administration of by-laws

87.—(1) The Authority or any of its authorized members or officers or other person authorized by it shall, subject to any special or general directions of the Authority, be responsible for the administration and the proper execution of these By-laws, and shall have such powers of entry and inspection for such purposes as the Authority may specifically or generally direct.

(2) Any member or officer of the Authority or any other authorized person referred to in paragraph (1) shall be deemed to have been appointed as an electrical inspector.

Application of by-laws

88.—(1) Subject to paragraphs (2) and (3) and by-law 151, these By-laws shall apply to every consumer and every private owner.

(2) Divisions 2, 3 and 4 shall not apply to—

(*a*) the construction, installation, quality, alteration, operation, control, protection, inspection and testing of parts of a consumer's or private owner's installation which are used exclusively for mining or factory purposes at a mine or factory where such parts comply with the electrical provisions of any written law relating to such construction, installation, quality, alteration, operation, control, protection, inspection and testing at a mine or factory.

(3) By-law 125 shall not apply to the construction of a substation by a consumer or private owner for the accommodation of a high-voltage part of his installation where such substation complies with any written law relating to its construction.

Inspection of installations

89.—(1) All installations made prior to the coming into force of these Regulations shall be required to be inspected by an electrical installations person and be issued with a Certificate of Installation by the electrical installations person within two years of the coming into force of these Regulations.

(2) All electrical installations shall be inspected by an electrical installations person and issued with a Certificate of Compliance every five years from the date of their previous Inspection Certificate.

Procedure for settling disputes

90. Where a difference arises between a consumer and a licensee, such dispute shall be resolved in accordance with the Energy Regulation Act.

Prior notification to undertaker

91.—(1) Before any work is commenced on a new installation or on any alteration or extension to an existing installation, an electrical installations person or a competent person, authorized by a consumer or prospective consumer, as the case may be, to carry out the work, shall, for and on behalf of the said consumer or prospective consumer—

(*a*) advise the licensee in writing with reference to—

(i) the purpose, type and extent of the proposed work;

(ii) the electrical loading of equipment for which the supply or additional supply, as the case may be, is required;

(*b*) obtain from the licensee in writing details of—

(i) the type of current, number of phases and frequency if alternating current, and voltage at which the licensee proposes to deliver electricity to the supply terminals;

(ii) the licensee's property which is to be accommodated in accordance with by-law 107;

(iii) the meter panel and connexions required in accordance with by-law 107;

(iv) earthing requirements; and

(v) proposed tariff.

(2) Where the work referred to in paragraph (1) is commenced it shall—

(*a*) not thereafter be changed in relation to its purpose, type, extent and electrical loading except as may be agreed with the licensee; and

(*b*) be executed to suit the licensee's stated specification details referred to in paragraph (1) (*b*).

Accommodation to be provided

92.—(1) A consumer requiring a supply of electricity, or a consumer receiving a supply of electricity who requires an alteration in the terms of his original electricity supply agreement involving a change in the licensee's metering arrangements, shall unless otherwise agreed in writing with the licensee, provide all necessary accommodation on his premises for the undertaker's property as is necessary to provide the said supply or change in metering arrangements, as the case may be.

(2) Accommodation referred to in paragraph (1) shall be located at a position to be agreed between the consumer and the licensee and be of a type, design and size required by the licensee.

(3) Where the accommodation referred to in paragraph (1) is outside a building, it shall be fully weatherproofed and have no means of access other than by a lockable door.

(4) Where the accommodation referred to in paragraph (1) is located in a substation, switch room, or similar compartment designed solely for

electrical purpose, such place shall have a lockable door and shall not be used for purposes other than accommodation of the licensee's property.

(5) Where a group of shops, offices, flats, tenements, or workshops is to be erected for occupation by separate tenants or a building is to be converted for such use and it is intended that each tenant shall have an individually metered supply of electricity, the owner of the building shall—

(*a*) provide such accommodation at one or more places as may be required by the licensee for his meters and other property; and

(*b*) ensure that each tenant has—

(i) free access to the meter registering the tenant's supply of electricity for checking and inspecting purposes; and

(ii) a main switch and fuses or a circuit-breaker necessary for controlling the tenant's supply of electricity situated in that part of the building occupied by the tenant.

Meter panels and connexions

93.—(1) A consumer who has provided accommodation in accordance with by-law 107 shall supply two copies of a plan to a scale of not less than 1:500 on which it shall be agreed between him and the licensee the route of the service mains and entry point to the premises.

(2) The consumer shall further unless otherwise agreed in writing with the licensee—

(*a*) supply and fix in a manner and at a position to be agreed between the consumer and licensee, a meter panel of the size, type, design and construction required by the licensee;

(*b*) supply and fix such additional component parts as may be required for the operation of transformer metering where such metering is to be used;

(*c*) supply all necessary meter loops, line and load connexions; and

(*d*) where the service line to be used is an overhead line, supply and fix, at a position to be agreed between the consumer and licensee, internal service mains and roof shackles.

Custody of licensee's property

94.—(1) A consumer shall take all reasonable steps necessary to ensure the safe custody of the licensee's property installed on the consumer's premises for or incidental to the supply of electricity.

(2) Accommodation provided by a consumer under the provisions of these By-laws for the licensee's property shall be maintained by the consumer, his servants and agents in a fit and proper state.

(3) A consumer, his servants and agents on whose premises property belonging to a licensee is accommodated for or incidental to the supply of electricity shall not, in relation to the said property—

(*a*) permit access thereto by a person other than—

(i) the licensee;

(ii) a person authorized by the licensee; or

(iii) an electrical inspector;

(*b*) unless permitted by the licensee—

(i) remove or attempt to remove the property from its position;

(ii) remove or attempt to remove any lock or seal attached to the property;

(iii) connect thereto or disconnect therefrom, a consumer's installation or other electrical circuit; or

(iv) alter, adjust, handle, operate, tamper or interfere with the property in any way.

Disconnexion in certain circumstances

95.—(1) Any part of a consumer's installation which is in a faulty condition as to have caused or is likely to cause death or injury to any person or damage to any property shall, on the faulty condition becoming known—

(*a*) subject to by-law 34 (2), immediately be disconnected by that consumer or person from the supply of electricity; and

(*b*) subject to paragraph (3), not be reconnected until the faulty condition of the said part has been remedied.

(2) Any part of a consumer's installation, which, due to a faulty condition, is causing interference with the use of a telecommunication line, shall, on the faulty condition becoming known to the consumer or to a person authorized by him to operate the installation—

(*a*) subject to regulation 34 (2), be disconnected by that consumer or person from the supply of electricity; and

(*b*) subject to subregulation (3), not be reconnected until the faulty condition of the said part has been remedied.

(3) Any part of an installation disconnected in accordance with paragraph (1) or (2) may be reconnected to a supply of electricity for testing purposes where such temporary reconnexion can be made without risk to life or property.

Connexion of neutral with earth

96.—(1) On a single-phase two-wire or three-phase four-wire consumer's installation operating at low-voltage or medium-voltage supplied from the consumer's own generator or transformer, one

generator or transformer winding directly supplying that voltage shall have—

(*a*) if single-phase, one pole or its neutral point earthed; and

(*b*) if three-phase, its neutral point earthed.

(2) Where a consumer's installation operates at a high-voltage and is designed for operating with an earthed neutral, the neutral of the generator or transformer winding shall be earthed at the point of generation or transformation:

Provided that where the generator or transformer feeds a remote transformer, via a transmission line, the neutral of the generator or transformer shall be required to be earthed if the neutral of the transformer is earthed at the point of the remote transformation.

(3) On a consumer's installation which is high-voltage and designed for operating with an insulated neutral—

(*a*) provision shall be made to indicate a displaced neutral; and

(*b*) precautions shall be taken against a breakdown of insulation.

(4) Save for operational purposes on a consumer's high-voltage installation, a conductor which is connected to earth in accordance with this regulation shall be interrupted by a fuse, switch, circuit-breaker, link or other means whilst any phase conductor of the installation remains live.

Protection of telecommunication

97. A consumer shall comply with the standards for telecommunication lines protection where—

(*a*) a cable by him crosses or is in close proximity to an underground telecommunication line; or

(*b*) an overhead line installed by him crosses or is in close proximity to an overhead telecommunication line.

Guidance and instructions

98.—(1) For the guidance of a person authorized by the consumer to operate, control or work on or near the consumer's installation, whether under supervision or otherwise, where high-voltage may be present, the consumer shall issue instructions regarding the working procedure to be followed to ensure maximum safety.

(2) The instructions referred to in paragraph (1) shall, where the person is engaged in inspection, testing, cleaning, repairs, painting or constructional or general maintenance work in proximity to live high-voltage conductors, require that person to observe the minimum section clearance set out in the Seventh Schedule hereto.

Certificate of inspection and testing

99. A consumer who wishes to supply a certificate for the purposes of by-law 27 (2), as read with by-law 35 (2), that his installation or part thereof has been inspected and tested shall furnish a certificate which shall be executed by either an electrical installations person or a competent person.

Division 2
Construction of Consumer's Installations

Design and mechanical protection

100.—(1) A consumer's installation shall have conductors—

(*a*) sufficient in size and power rating for purposes for which the supply of electricity is to be used; and

(*b*) constructed, installed and protected so as to prevent, as reasonably practicable, danger to person or property.

(2) The consumer's installations shall not be temporarily or permanently added to unless—

(*a*) it has been ascertained that the current rating and condition of the existing installation, which will have to carry the additional load and the earthing arrangements, are adequate for the increased loading; and

(*b*) by-law 106 has been complied with.

(3) Where the consumer's installation or any part thereof is exposed to adverse weather, corrosive atmosphere or other adverse conditions, the installation or that part shall be constructed and, additionally or alternatively, protected to prevent danger to any person or property arising from such exposure:

Provided that where the conditions comprise exposure to flammable surroundings or an explosive atmosphere, the consumer's installation shall—

(*a*) be protected by a flameproof enclosure of an appropriate standard of construction; and

(*b*) be of such construction as to prevent danger or have intrinsically safe characteristics so as to prevent danger to any person or property.

(4) Conductors and live parts of a consumer's installation shall be—

(*a*) insulated and further effectively protected where necessary; or

(*b*) so placed and safeguarded as to prevent, so far as is reasonably practicable, danger to any person or property.

(5) Medium-voltage conductors and medium-voltage live parts of a consumer's installation shall be—

(*a*) completely enclosed in earthed metal which is electrically continuous and adequately protected against mechanical damage; or

(*b*) so constructed, installed and protected as to prevent, is reasonably practicable, danger to any person or property.

(6) Subject to by-law 129, high-voltage conductors and high-voltage live parts of a consumer's installation shall—

(*a*) be completely surrounded and protected by earthed metal;

(*b*) have the minimum section clearance set out in the Seventh Schedule; or

(*c*) be guarded by a protective barrier to prevent inadvertent touching or approach by a person standing at floor level or on a walkway, stair or working platform.

Electrical protection

101.—(1) Every distinct circuit of a consumer's installation shall be protected against excess current by means of a suitable fuse or automatic circuit-breaker—

(*a*) of adequate breaking capacity; and

(*b*) suitably located and of such construction as to—

(i) prevent danger from overheating, arcing or the scattering of hot metal when it comes into operation; and

(ii) permit the ready renewal of the fusible metal without danger to any person or property.

(2) No fuse, non-linked switch or non-linked circuit-breaker shall be inserted in a conductor connected with earth.

(3) A single-pole switch may only be inserted in a live conductor.

Isolation and control position

102.—(1) Except in the case of an unmetered service line, effective means suitably placed for ready operation shall be provided so that all voltage may be cut off from every part of a customer installation as may be necessary to prevent danger, and such means shall include a fireman's emergency switch on the exterior of a building, where necessary, to disconnect a high-voltage discharge-lamp installation or an electrified barrier.

(2) An electricity consuming device which requires operation or attention in normal use shall be installed so that adequate means of access and working space are afforded for such operation or attention.

(3) An electric motor shall be controlled by an efficient switch or switches for starting and stopping and the switch or switches shall be placed so as to be readily accessible to and easily operated by the person in charge of the motor.

Earthing of metal-work

103.—(1) Metal-work of a consumer's installation enclosing, supporting or otherwise associated with conductors operating at a

voltage in excess of extra-low-voltage shall, where necessary to prevent danger, be connected with earth.

(2) Metal-work attached to or forming part of a metal or reinforced concrete support and any metal transformer-case or metal switch handle mounted thereon shall be connected with earth.

(3) Subject to paragraph (4), metal-work attached to or forming part of a wooden support which is liable to become dangerous of leakage across or failure of the insulation shall—

(*a*) if the metal-work is not more than 3 metres above the ground, be connected with earth; and

(*b*) where the metal-work is more than 3 metres above the ground, be connected with earth or have effective secondary insulation sufficient to withstand the voltage to earth.

(4)—(*a*) A metal transformer-case together with its associated metal-work and any metal switch handle shall be connected with earth if it is mounted on a wooden support; and

(*b*) a high-voltage switch with a switch handle not more than 3 metres above the ground shall have inserted in the operating rod between the switch handle and the switch, an insulator capable of withstanding the normal operating voltage if it is mounted on a wooden support.

(5) A metal cradle or stay-wire shall—

(*a*) be connected with earth; or

(*b*) have inserted insulation capable of withstanding the normal operation voltage.

(6) Metal armouring or metal sheathing, except sheathing intended for use as a concentric neutral conductor or earth potential, shall—

(*a*) be connected with earth;

(*b*) have earth continuity maintained by a separate earth conductor across any joint-box or terminal enclosure associated with the cable; and

(*c*) where the joint-box or enclosure referred to in subparagraph (*b*) is of metal, be bonded thereto.

(7) Save as is otherwise provided in these By-laws, any metal-work associated with or forming part of the consumer's installation shall, unless isolated from and not likely to come into contact with live parts or with earthed metal-work, be connected with earth.

Protection against earth leakage

104.—(1) Every circuit of a consumer's installation shall be protected against the persistence of earth leakage currents liable to be a danger to any person or property.

(2) Where metal-work is earthed in accordance with the provisions of these By-laws, the associated earthing system shall—

(*a*) incorporate a protective device which makes any live conductor or live part dead when there is leakage as referred to in paragraph (1), between that live conductor or live part and any metal-work connected with earth; and

(*b*) be designed, constructed and maintained so that the leakage referred to in subparagraph (*a*) is sufficient to operate the protective device.

Arc-suppression coils

105. In addition to the protective device referred to in by-law 119 (2) (*a*), an arc-suppression coil may be inserted between a transformer or generator neutral and earth in such a manner as to ensure that in the event of a live conductor or live part coming into contact with earth, or with any metal-work connected with earth, an arc between that conductor or part and earth shall be immediately suppressed and the voltage of that conductor or part shall be reduced so as to prevent, as far as reasonably practicable, danger to any person or property.

Earthing of installation

106.—(1) Where a licensee operates a protective multiple earthing system in accordance with Division 4 of Part IV—Supply and Quality of Service of these By-laws and connexions with his own earth arrangements, the main earthing conductor of the consumer's installation, before supplying a consumer with electricity therefrom, an earth electrode or electrodes shall be installed by the consumer at or on his premises by arrangement with and to the satisfaction of the licensee and shall also be interconnected with the said earthing arrangements.

(2) Save as is provided in paragraph (1), where there is an interconnexion between the earthing arrangements of the licensee and the main earthing conductor of the consumer's installation, the consumer shall comply with the conditions considered necessary by the licensee in accordance with the Part IV—Supply and Quality Service of these By-laws.

(3) Where there is no interconnexion between the earthing arrangements of the licensee and the main earthing conductor of the consumer's installation, the consumer shall provide and install his own earthing arrangements to ensure compliance with these By-laws.

(4) An earth electrode of a consumer shall be installed so that no voltage gradient is maintained at ground level which may cause danger to life and property.

Electrode boilers

107.—(1) In this by-law—"electrode boiler" includes an electrode type of water heater.

(2) An electrode boiler shall—

(*a*) be used only on alternating current; and

(*b*) have an isolating and protecting circuit-breaker.

(3) The circuit-breaker referred to in paragraph (3) (*b*) shall—

(*a*) be of the multi-pole linked type arranged to disconnect the supply from all electrodes simultaneously;

(*b*) have an over-current protective device for each electrode;

(*c*) have a locking-off device to prevent the electrode boiler inadvertently being made live whilst a person is working thereon;

(*d*) is arranged for direct hand operation from a position near the boiler, and be readily accessible and visible to a person using the boiler;

(*e*) if not arranged for direct hand operation from a position near the boiler, have remote control by a hand-operated switch or push-button—

(i) with a lamp or other instrument to provide visual indication of the "ON" and "OFF" condition of the electricity supply fixed at or near the boiler; and

(ii) readily accessible and visible to a person using the boiler;

(*f*) where the boiler is to be operated at high-voltage, have automatic tripping in the event of phase currents becoming unbalanced to the extent of ten *per centum* of the full load current of the boiler:

Provided that—

(i) the margin may be increased to fifteen *per centum* where the higher setting is essential to ensure operational stability; and

(ii) an inverse time-element device may be associated with the automatic tripping to prevent unnecessary tripping where the imbalance is momentary or of short duration.

(4) The earthing system of electrode boiler shall, in addition to complying with by-laws 117 and 118, include—

(*a*) the bond together of—

(i) the metallic shell and other metal-work of the boiler;

(ii) any water pipes or steam pipes of metal in metallic contact with the said shell or other metal-work; and

(iii) any metal armouring or metal sheathing of a cable providing a supply of electricity to the said boiler;

(*b*) the connexion of bonded metal-work referred to in subparagraph (*a*) to the neutral conductor and to the main earthing terminal of the consumer's installation.

(5) In the case of electrode boiler, the neutral conductor, main earthing conductor and bonding and the connexions to such bonding shall have a current-carrying capacity not less than that of any live or phase conductor at all points except in a subsidiary tripping-circuit where the current-carrying capacity shall be in accordance with the designed tripping-circuit current.

(6) An electrode boiler of a type other than a three-phase three-electrode balanced-load type shall not be connected to a supply of electricity otherwise than by means of a double-wound transformer situated within the same building as the said boiler or as close as is practicable and on the same premises.

Auto-transformers

108.—(1) An auto-transformer shall not be fed from a circuit operating at a voltage exceeding low-voltage unless such auto-transformer is used—

(*a*) in motor starting or control-gear;

(*b*) in conjunction with and installed adjacent to a capacitor which is employed for improving the power factor; or

(*c*) in a high-voltage discharge-lighting circuit.

(2) An auto-transformer shall not be used to supply—

(*a*) a socket-outlet;

(*b*) a portable appliance unless the auto-transformer is contained therein;

(*c*) an electric toy or model;

(*d*) earthed concentric wiring; or

(*e*) an extra-low-voltage circuit.

(3) An auto-transformer shall—

(*a*) if used for step-up purposes—

(i) be supplied only from a system in which the neutral conductor is earthed; and

(ii) have the neutral conductor connected to the common pole of the primary and secondary windings;

(*b*) if used for step-down purposes, have the secondary winding insulated for the maximum voltage likely to be applied to the primary winding.

(4) Where an auto-transformer is used for step-up purposes, means of isolation required in accordance with by-law 116 shall be arranged to disconnect all primary supply conductors simultaneously.

Capacitors

109.—(1) Save in the case of a capacitor incorporated in apparatus for the sole purpose of radio interference suppression; or where the capacitor is so small that no risk of electric shock can arise therefrom, a capacitor shall have a high resistance leak or other means for the prompt and automatic discharge of electricity immediately the supply thereto is disconnected.

Indoor substations

110.—(1) Subject to by-law 103 (3), a substation constructed by a consumer for the accommodation of a high-voltage part of his installation shall—

(*a*) be substantially constructed and designed specifically for its intended purposes; and

(*b*) be arranged so—

(i) as to prevent, as far as practicable, access thereto except by a doorway or gateway; and

(ii) that no hinged door opens inwards;

(*c*) enclose the said part of the installation, as far as practicable;

(*d*) be ventilated, kept dry and made vermin-proof, as far as practicable;

(*e*) have fixed outside each entrance a danger notice; and

(*f*) have prominently displayed inside, printed instructions as to the proper first-aid treatment of persons suffering from electric shock.

(2) Subject to by-law 103, a substation referred to in paragraph (1) constructed below ground level shall—

(*a*) have adequate means of access by a door or trap door with a staircase or ladders securely fixed and placed so that no live part of the system or conductor is within reach of a person thereon; or

(*b*) where a person is to be regularly employed therein, have the access referred to in paragraph (*a*) by door and stair case only.

Outdoor substations

111.—(1) Any part of the consumer's installation for the transformation, control, regulation or switching of electricity in the open air shall, save as is otherwise provided for in Division 3 or 4—

(*a*) be mounted on the supports of an overhead line;

(*b*) be enclosed by a fence not less than 1.8 metres in height, fitted with a suitable anti-climbing device for the purpose of preventing access not authorized by the consumer; or

(*c*) where subparagraph (*a*) or (*b*) is not complied with, have all parts below the height of 3 metres from the ground completely enclosed in a metal casing.

(2) A danger notice referred to in paragraph (1) (*a*), (*b*) or (*c*), shall be fixed to the supporters, fence or metal casing, as the case may be.

Division 3
Underground Cables

Construction and installation

112.—(1) An underground cable shall be fully insulated for the normal operating voltage and shall be of a type and construction and be laid or installed in a manner suited to its particular environment and having regard to—

(*a*) by-law 116;

(*b*) the normal usage of the ground in which any part of it is to be laid; and

(*c*) foreseeable risk of damage to the cable and danger to persons, property and to other electrical services, railways and constructional works at or below ground level.

(2) A component used with an underground cable shall be of a type and construction and shall be laid or installed in a manner suited to that cable and having regard to the provisions of—

(*a*) paragraph (1); and

(*b*) by-law 127 in circumstances where a cable joint or connexion is necessary.

Joints and connexions

113. An electrical joint or connexion associated with an underground cable shall be designed, constructed, installed and protected in a manner that—

(*a*) electrical conductivity is maintained satisfactorily;

(*b*) its insulation, where insulation is necessary, is suitable for the normal operating voltage; and

(*c*) its mechanical strength is suited to its location and environment.

Metallic protection of high-voltage cables

114.—(1) Subject to paragraph (3), a high-voltage underground cable shall be laid or installed so that it is completely surrounded and protected by earthed metal as provided by—

(*a*) its own metal sheathing or metal armouring; or

(*b*) an outer metallic covering.

(2) Subject to paragraph (3), a joint, connexion or termination of a high-voltage underground cable shall be completely surrounded and protected by earthed metal.

(3) In a power station, substation, switch-room or similar premises designed for electrical purposes, it shall not be necessary for a high-voltage cable, joint, connexion or termination to be completely

surrounded and protected by earthed metal where the cable, joint, connexion or termination has the minimum section clearance, or is guarded by the protective barrier required in accordance with by-law 115 (5).

Identification and insulation test

115.—(1) A neutral conductor of an underground cable shall, at its termination, be permanently identified so that it is readily and uniformly distinguishable from other conductors.

(2) Where two or more underground cables forming part of different circuits terminate at adjacent positions, each circuit shall—

(*a*) be permanently labelled on its exterior or on its terminating box or component; or

(*b*) have other means of identification, so that it is readily distinguished from other circuits.

(3) An underground cable shall not be subject to an insulation test after being laid or installed and before being connected to a supply of electricity, and it shall not be so connected if the connexion would result in an electrical leakage which might be a danger to persons or property.

(4) No underground cable shall be permanently connected to a supply of electricity unless tests have been made—

(*a*) to ensure compliance with these By-laws, and in particular by-law 118 (1) and (2); and

(*b*) to establish that there is electrical continuity of conductors.

Division 4
Overhead Lines

Overhead lines

116. This Division shall apply to overhead lines other than—

(*a*) an overhead crane wire or trolley wire;

(*b*) an overhead line consisting entirely of insulated conductors enclosed in earthed metal sheathing or earthed metal armouring;

(*c*) a conductor used above ground and in the open air as a fence specially designed for the control of the movement of animals;

(*d*) an overhead telecommunication line;

(*e*) an overhead line and substation within a fenced enclosure specially erected by the consumer operating such line and substation for the purpose of prohibiting entry not authorized by him where such fence is not less than 1.8 m in height and is fitted with a suitable anti-climbing device.

Constructional materials requirements

117.—(1) Line conductors shall be of acceptable conductor materials—

(*a*) line conductors and earth conductors are of copper, cadmium copper, steel-cored copper, aluminium, steel-cored aluminium, aluminium alloy, copper-clad steel, galvanized steel, stainless steel or any compatible combination of these materials;

(*b*) cradle supporting wires and stay-wires are of stranded galvanized steel or of material of not less than equivalent strength and durability;

(*c*) a support is made from wood, metal or reinforced concrete or a combination of these materials and where wood or metal is used in the construction of a support, such wood or metal is protected against decay or corrosion as far as is reasonably practicable;

(*d*) supports and the foundations thereof are constructed and placed, taking into account the characteristics of the ground in which they are embedded and to the load which they are to carry; and

(*e*) insulators are—

(i) of durable materials; and

(ii) designed to withstand the mechanical loading and electrical stresses of normal operating conditions.

(2) Cradle supporting wires and stay-wires shall be of stranded galvanized steel or a material of a strength and durability not less than that of stranded galvanized steel.

(3) A support shall be of wood, metal or reinforced concrete or a combination of these materials and any other acceptable materials, and where wood or metal is used in the construction of a support, such wood or metal shall be protected, as far as is reasonably practicable, against decay or corrosion.

(4) Supports and the foundations hereof shall be constructed and placed having regard to the characteristics of the ground in which they are embedded and to the load, which they are to carry.

(5) Insulators shall—

(*a*) be of durable materials; and

(*b*) be designed to withstand the mechanical loading and electrical stress of normal operating conditions.

Minimum heights and insulation

118.—(1) A line conductor near a building or other permanently raised position existing at the time of erection of the line shall—

(*a*) if operating at extra-low-voltage, low-voltage or medium-voltage, be insulated at all places within a distance of 1.83 m from any part of such building or raised position; and

(*b*) if operating at high-voltage, be completely surrounded and protected by earthed metal or have the minimum section clearance or protective barrier required in accordance with by-law 115 (5) between it and any part of such building or raised position.

(2) Service lines in the terminal span of a connexion between an overhead line and a building, or in a span between one building and another building, shall be insulated conductors.

(3) The point of attachment of a service line shall—

(*a*) where connexion is to an overhead line, be at a support:

Provided that a vertical service connexion may be made elsewhere if it does not exceed 3.1 metres in length; and

(*b*) where connected to a building, be at a terminating device securely fixed to the building.

(4) A conductor, other than an earth conductor, leading to or from a transformer or other apparatus as a pole-mounted substation shall, at all points below a height of 3.7 m from the ground, be insulated and, in the case of a high-voltage conductor, shall have earthed metal sheathing or earthed screening.

(5) The height above ground of a line conductor, other than an extra-low-voltage, low-voltage or medium-voltage insulated line conductor, shall be not less than the appropriate height specified in the Third Schedule or such greater height as may be required either for compliance with by-law 112 or 115 in accordance with by-law 135.

(6) Subject to by-law 135, the height above ground of an extra-low-voltage, low-voltage or medium-voltage insulated line conductor shall not be less than—

(*a*) where the line is above a road normally accessible to vehicular traffic, 5.5 metres;

(*b*) save as is provided in subparagraph (*c*), where the line is not above a road normally accessible to vehicular traffic, 4.3 metres; and

(*c*) in the case of a service line in the terminal span of a connexion between an overhead line and a building or in a span between one building and another building, 3.1 metres at any point where the line is not above a road normally accessible to vehicular traffic.

(7) Where an earth conductor, stay-wire or cradle fitted between supports crosses a road normally accessible to vehicular traffic, the height thereof above the road surface shall not be less than 5.5 metres.

(8) Any minimum height or clearance required by these By-laws shall be maintained under any conditions of loading and temperature likely to occur in the area concerned.

Unmetered service lines

119.—(1) A consumer shall comply with the directions of a licensee in relation to the design and construction of a line or part of a line—

(*a*) where a consumer installs an unmetered service line on his premises;

(*b*) or where a part of the consumer's installation is to be solely operated and controlled by the licensee; and

(*c*) where the licensee in accordance with the Supply Regulations is required to ensure that such service line or such part of the installation is suitable for its intended purpose and is installed to prevent, as far as practicable, leakage of electricity to adjacent metal.

(2) Where the consumer has no effective means of cutting off the voltage to a line or part of a line referred to in paragraph (1) he shall, if a disconnexion is required, immediately notify the licensee that it is required.

(3) Where a licensee has advised the consumer of any remedial measures necessary to correct any defect, deficiency or faulty condition which may exist in a line or part of a line referred to in paragraph (1), the consumer shall effect such remedial measures to the satisfaction of the licensee, after the said line or part of the line has been disconnected from the supply of electricity for that purpose.

Overhead lines crossing railway tracks

120. Where an overhead line crosses a permanent railway track having a gauge of not less than 1.1 metres, the following conditions shall apply—

(*a*) the height above the rail of—

(i) a line conductor, shall not be less than the appropriate height specified in the Fifth Schedule; and

(ii) an earth conductor, stay-wire or cradle between supports, shall not be less than 7 metres;

(*b*) there shall be no joints in the crossing span;

(*c*) the crossing shall be made at right angles or as near thereto as practicable and shall be not less than 70 degrees, unless permission in writing therefore has been obtained from the authority responsible for the operation of the railway; and

(*d*) the length of span at the crossing shall be as short as is reasonably practicable, and notwithstanding by-law 136 (6), line conductors used at the crossing shall be stranded with not less than 0.42 square centimetres cross-section area copper or its equivalent conductivity.

Different voltages in proximity

121.—(1) Where a high-voltage overhead line crosses an extra-low-voltage, low-voltage or medium-voltage overhead line or where line conductors forming part of such differing systems are erected on the same supports, provision shall be made to guard against the extra-low-voltage, low-voltage or medium-voltage system being charged above its normal voltage.

(2) Where a pilot circuit is installed and operated as part of an overhead line system, paragraph (1) shall apply thereto and such pilot circuit shall be installed and operated with due regard to any dangers which may arise from its use.

Loading conditions and factors of safety

122.—(1) In calculating the strength of the various constituent parts, including supports of an overhead line, the following basic conditions shall be assumed—

(*a*) a minimum temperature of zero degrees Celsius;

(*b*) the wind pressure acting on the projected area of line conductors and supports not exceeding 12.2 metres in height shall not be less than 1 kilogram per square centimetre, and of those exceeding 12.2 metres but not exceeding 36.6 metres in height shall be not less than 1.1 kilogram per square centimetre; and

(*c*) in the case of conductors, earth wires and round, elliptical or hexagonal poles used as supports, the area on which the pressure acts shall be taken as sixty *per centum* of the projected area, and in the case of lattice or composition structures, as one and one-half times the projected area of the constituent parts of one side.

(2) In the design of spans of over 122 metres the assumed wind load on conductors and earth wires may be reduced to seventy *per centum* of the calculated load.

(3) In the design of spans, due regard shall be given to the possibility of injurious conductor vibration by wind effects.

(4) A support shall be designed so that the failing load operating conditions shall be not less than the resultant of simultaneous horizontal and vertical loads calculated in accordance with the provisions of this by-law multiplied by the following factors—

(*a*) where the support is of metal or concrete, 2.5; and

(*b*) where the support is of wood, 3.5.

(5) Subject to paragraph (6) and load in a line conductor, earth conductor, insulator, joint or cradle component or an associated fitting, under operating conditions shall not exceed 50 *per centum* of its ultimate breaking load.

(6) The minimum permissible size for a single line conductor shall be such as to have an ultimate breaking load of not less than 360 kg and shall not be less in gauge than No. 10 British Standard Wire Gauge.

Periodic testing and inspecting

123.—(1) Where metal-work is required to be earthed in accordance with by-law 117, the earthing system of the overhead line with which it is associated, shall be tested at least one point by the consumer or by a person authorized by him—

(*a*) before commissioning such overhead line; and

(*b*) thereafter, at intervals of not more than five years; and repaired if necessary.

(2) The purpose of a test made in accordance with paragraph (1) shall be to ensure that the leakage result from contact of negligible resistance between a line conductor and any metal-work connected with earth is sufficient to operate the protective device installed in accordance with by-law 118 to make that line conductor dead.

(3) An overhead line and its supports and any outdoor substation shall be inspected from ground level or above, by the consumer or by a person authorized by him—

(*a*) before commissioning; and

(*b*) thereafter, at intervals not exceeding five years after the date of inspection referred to in subparagraph (*a*); and repaired if necessary.

(4) A test or inspection made in accordance with this by-law shall be recorded by the person making the test or inspection and such records shall be retained by the consumer until the next test or inspection is made.

Danger notices

124. There shall be fixed in a prominent position at every pole mounted substation a danger notice.

Unauthorized climbing of supports

125. In order to prevent, as far as is reasonably practicable, climbing which has not been authorized by a consumer, an anti-climbing device shall be fitted—

(*a*) at every support for a pole-mounted substation; and

(*b*) at every support which has broken surface within 3.1 metres of the ground.

Division 5
Protective Multiple Earthing

Provision of protective multiple earthing

126. Where a consumer operates or is about to operate a transformer supplying low-voltage or medium-voltage to a single-phase two-wire or three-phase four-wire installation and is satisfied that protective multiple earthing is necessary in order to improve the general factor of safety in relation to earthing of metal-work, he may provide protective multiple earthing in accordance with this Division.

Application of protective multiple earthing

127. Protective multiple earthing shall—

(*a*) only be applied to the consumer's electricity operating at low-voltage or medium-voltage; and

(*b*) when so applied, extend to every such line of a group supplied with electricity from a common transformer at the said voltage:

Provided that no such line shall be directly interconnected in a permanent manner with any other line supplied with electricity from any part of another system not similarly earthed.

Limitations

128. A transformer which is to supply the low-voltage or medium-voltage to an electric line provided with protective multiple earthing shall be arranged so that—

(*a*) an earthing connexion is taken from the metal-core or metal-work closely associated with the higher voltage winding to an earth electrode; and

(*b*) another earthing connexion is taken from the neutral point on the low-voltage or medium-voltage winding to the same earth electrode with its own resistance area.

Connexions at transformers

129. Where a cable is used as an electric line provided with protective multiple earthing, it shall be arranged so that—

(*a*) an earthing connexion is taken from the metal-core or metal-work closely associated with the higher voltage winding to an earth electrode; and

(*b*) another earthing connexion is taken from the neutral point of the low-voltage or medium-voltage winding to the same earth electrode or to another earth electrode with its own resistance area.

Use of cables

130.—(1) Where a cable is used as an electric line provided with protective multiple earthing and is laid underground such cable shall—

(*a*) have a neutral conductor of the same material as, and be of a cross-sectional area not less than, any phase conductor; and

(*b*) have metal sheathing or metal armouring.

(2) The metal sheathing or metal armouring or, if the cable had both metal sheathing and metal armouring, the metal sheathing and metal armouring and the neutral conductor referred to in paragraph (1) shall be bonded together and also bonded to—

(*a*) the earthing connexion referred to in by-law 143 (*b*) at the transformer position; and

(*b*) an earth electrode or electrodes installed at points at or near the end of each line.

Use of overhead lines

131.—(1) Where an overhead line is used as an electric line provided with protective multiple earthing, such line shall—

(*a*) have a neutral conductor of the same material as, and of a cross-sectional area not less than, any phase conductor; or

(*b*) have two neutral conductors of the same material as, and each of a cross-sectional area not less than one-half that of any phase conductor.

(2) The neutral conductor or the two neutral conductors referred to in paragraph (1) (*a*) or (*b*) shall be bonded to—

(*a*) the earthing connexion referred to in by-law 143 (*b*) at the transformer position; and

(*b*) earth electrodes installed at regular intervals as far as practicable, along the route of the line at branching points and at the final pole of each line.

Use of cables and overhead lines

132.—(1) Where an underground cable and an overhead line are used in association with each other, an electric line provided with protective earthing, by-law 145 or 146, shall apply respectively, to the cable and the overhead line, except that bonding to the earth connexion at the transformer position referred to in by-law 145 (2) (*a*) or 146, as the case may be, may be omitted in the case of—

(*a*) an underground cable which starts at a position remote from the transformer if that cable is fed from an overhead line which has such bonding to the earth connexion at the transformer position; and

(*b*) an overhead line which starts at a position remote from the transformer if that line is fed from an underground cable which has such bonding to the earth connexion at the transformer position.

(2) At every point where an underground cable and an overhead line referred to in paragraph (1) are connected with each other, each neutral conductor of the said cable and line and the metal sheathing or metal armouring of the cable shall be bounded together.

Overall resistance

133. By-laws 144, 145 and 147 shall not have been complied with until it has been established that the overall resistance to earth of a neutral conductor—

(*a*) is such that the fuse, circuit-breaker or other protective device of the high-voltage side of the transformer will operate safely in the event of a breakdown between the transformer windings;

(*b*) does not exceed ten ohms; and

(*c*) is such that by-laws 119 and 120 where applicable, can be complied with efficiently.

Neutral and earth conductor

134. No fuse switch, circuit-breaker, link or device, other than a bolted link, for interrupting continuity, shall be inserted in a neutral or earth conductor used for protective multiple earthing purposes.

Separate installations

135. Where a supply of electricity is delivered from an electric line provided with protective multiple earthing to a separate installation, and whether such installation is to be operated and used by the consumer or by another person, the consumer, before providing an earth connexion thereto, shall satisfy himself in regard to the separate installation that—

(*a*) metal-work enclosing, supporting or in proximity to, or likely to come into contact with any live conductor or live part is bonded together by one or more earth-continuity conductors;

(*b*) the overall resistance to earth of the system is such that by-law 119 can be complied with efficiently; and

(*c*) by-law 149 has been complied with.

Division 6
Private Generation and Supply

Application to private owner

136.—(1) Subject to by-law 103 (2), this Part shall apply to every private owner.

(2) Divisions 1, 2, 3, 4 and 8 shall, *mutatis mutandis*, apply to a private owner and to his electrical installation as they apply to a consumer and a consumer's installation.

Consumer and private owner

137.—(1) A private owner shall erect and maintain a switchboard for each generator to control supply therefrom and shall fit to each switchboard, as a minimum requirement—

(*a*) the appropriate supply contract controls and protective apparatus specified in Part I of the Eight Schedule hereto; and

(*b*) where two or more private generators are to be operated, in parallel—

(i) if it is two-wire system, a reverse-current trip in series with the live conductor of each generator;

(ii) if it is a three-wire system, a reverse-current trip in series with each out conductor of each generator; and

(iii) if they are compounded generators, an equalizer connexion by means of—

(A) a single-pole switch from each generator to an equalizer bus-bar so arranged that each switch is interlocked so that it shall be closed before the main switch is closed and opened after the main switch is opened;

(B) a multi-pole linked-switch arranged and interlocked to perform the same sequence of operations as described for single-pole switches, with operating coil of a circuit-breaker connected to a pole other than that to which the equalizer connexion is made;

(C) where a direct-current generator is connected in parallel with a secondary battery—

(*aa*) a reverse-current trip, which may be of the cut-out type, connected between the generator and the battery;

(*bb*) safe means for isolating the battery from the generator;

(*cc*) protection of the battery by means of a fuse or circuit-breaker against excessive charge or discharge currents;

(*dd*) an ammeter to measure the current supplied by the generator;

(*ee*) an ammeter with a mid-point zero or so, switched so as to measure separately the charge and discharge currents of the battery; and

(*ff*) a voltmeter arranged to measure separately the voltage of the generator and of the battery;

(D) where compounded generators are operated in parallel, an ammeter connected to the pole other than to which the equalizer connexion is made;

(E) where a direct-current generator operates a three-wire system, an arrangement to prevent the balance being disconnected whilst the outer conductors are live;

(F) the appropriate instrument specified in Part II of the Eighth Schedule hereto; or

(G) where an altering-current generator is operated—

(*aa*) a speed indicator for the prime-mover or a frequency indicator; or

(*bb*) if two or more generators are to be operated in parallel, a synchronizing device.

(2) Where an instrument fitted to the switchboard in accordance with paragraph (1) is required to make more than one measurement, provision for this shall be made by a suitable switch or plug.

(3) If the generator of a private owner is arranged for automatic starting or for remote control, the prime-mover shall have local

overriding control for stopping the prime-mover and for preventing automatic starting—

(*a*) fixed nearby; and

(*b*) labelled with clear operating instructions.

Liquid and gaseous fuel

138. A private owner shall—

(*a*) where liquid or gaseous fuel for the generating plant is piped from outside the plant room, provide a quick-acting valve to cut off the supply of fuel with the valve—

(i) fixed near the door to the plant room in a conspicuous position; and

(ii) labelled with clear operating instructions; and

(*b*) arrange to trap or drain and disperse safely any leaking or surplus fuel and ensure that none is permitted to enter any sewer.

Plant rooms

139.—(1) A private owner shall ensure that any room in which his generating plant is to be erected and maintained—

(*a*) is of such size that the plant can be easily and adequately serviced and maintained;

(*b*) is adequately ventilated; and

(*c*) is provided with the exhaust pipes or ducts necessary to discharge exhaust fumes from the rooms to the outside air and clear of any window, door or fresh-air intake of any building.

(2) A plant room described in paragraph (1) shall have adequate artificial lighting, in addition to any natural lighting and discharge-lighting shall not be used in a position where it may cause rotating machines to appear to be stationary.

Protection of batteries

140. A private owner whose generator is connected with a secondary battery installation shall erect and maintain a switchboard for that installation and shall fit to the switchboard, as a minimum requirement—

(*a*) safe means—

(i) for isolating the battery from the load or from the charging circuit or simultaneously from both; and

(ii) where the charging circuit is arranged to share the load, for isolating the charging circuit from the battery and from the load;

(*b*) a suitable fuse or circuit-breaker with overhead trip to protect—

(i) the battery from excess charge and discharge currents; and

(ii) the charge circuit from excess charge currents;

(*c*) where the circuit is not a rectifier circuit which prevents a reversal of current, a reverse-current trip, which may be of the cut-out type;

(*d*) an ammeter with a mid-point zero or so, switched so as to measure separately the charge and discharge currents;

(*e*) a voltmeter with an "off" position to prevent continuous discharge and to indicate—

(i) battery terminal voltage; and

(ii) where the charging circuit has no cut-out, the voltage of the charging circuit separately from the battery terminal voltage;

(*f*) where the charging circuit shares the load with the battery, an ammeter to measure the current output of the charging circuit.

Installation of batteries

141.—(1) A battery in a battery installation connected with the generator of a private owner shall—

(*a*) have insulated supports for each cell of glass or vitreous porcelain which is part of the container;

(*b*) have insulated battery stands;

(*c*) have connected bolts—

(i) of a non-corrosive type; or

(ii) coated with petroleum jelly;

(*d*) have spray arrestors on open cells;

(*e*) if not portable, contain no celluloid in its construction; and

(*f*) if portable, and with celluloid in its construction, have suitable safeguards at the charging location to prevent ignition of the celluloid and the spread of fire.

(2) A room containing a battery installation connected with the generator of a private owner shall—

(*a*) be adequately ventilated to the outside air; and

(*b*) where sulphuric acid is used as an electrolyte, ensure its construction is—

(i) of non-corrosive material; or

(ii) painted with acid-resisting paint.

Labeling

142. All machinery, switchgear and instruments associated with the generation and supply of electricity of a private owner shall be indelibly labelled so as to indicate their functions and ratings.

Connecting private plant

143. A plant of a private owner shall not be interconnected, either directly or indirectly, with the electrical works lines or cables of a licensee or other person unless—

(*a*) there is an agreement in writing for such interconnexion between the private owner and the owner of the said works, lines or cables; and

(*b*) adequate safeguards are installed to prevent accidental or uncontrolled interconnexion.

Private owner to comply with relevant by-laws

144. Every private owner shall ensure that technical standards prescribed by these By-laws are complied with whenever applicable and shall, where appropriate, have the same obligations as a licensee or consumer, as the case may be.

Division 7
Offences

Offences and penalties

145. Subject to by-law 103 (2) and (3), a consumer or a private owner who erects or operates an electrical installation for or in connexion with the generation, transmission, distribution, connexion, installation and use of electricity, whether on his premises or elsewhere, and whether such installation is constructed, operated, maintained, repaired, tested or inspected otherwise than in accordance with the provisions of these By-laws commits an offence.

PART VII
CUSTOMER SERVICE

Division 1
Objectives

Objectives

146. The objectives of this Part are to ensure that customers—

(*a*) receive safe and reliable electricity from service providers;

(*b*) have access to information about an electricity service; and

(*c*) have a mechanism for redress for complaints against service providers.

Division 2
Customer Information and Education

Information and obtaining service

147. A service provider shall, on request from an applicant or a customer—

(*a*) provide to the applicant or customer any information or assistance necessary to enable the applicant or customer become aware of the service provided by the service provider; and

(*b*) facilitate the provision of the service on application by the applicant or customer.

Billing and metering information

148. A service provider shall, on the request by a customer, provide to the customer information regarding the service provider's—

(*a*) method of reading meters;

(*b*) method of preparing bills; and

(*c*) meter reading and billing cycle.

Modifications to tariffs, terms and conditions of service

149.—(1) A service provider shall, within seven days of the Authority's approval of—

(*a*) its tariffs or terms and conditions of service;

(*b*) any material change to its tariff, or terms and conditions of service; or

(*c*) adjustment of its tariff under the automatic Tariff Adjustment Formula,

publish a notice informing its customers of the approval and any material effects the changes will have on the customers.

(2) The service provider shall publish the information referred to in paragraph (1) once in any two daily newspapers in general circulation in Malaŵi.

Information on tariffs, terms and conditions of service

150.—(1) A service provider shall keep a complete copy of its tariffs and terms and conditions of service at each of its business offices.

(2) Upon request from an applicant or a customer, the service provider shall provide to the applicant or customer, at a reasonable price, a copy, and explanation of the tariff and terms and conditions of service applicable to the service that the service provider may provide to the applicant or is providing to the customer.

Information on customer usage

151. Upon request from any of its customers, a service provider shall provide a concise statement of the actual consumption and billing of electricity by that customer for each billing period during the previous twelve months:

Provided, however, that this obligation shall not apply if the service provider has, during the same period, provided such information to the customer making the request.

Information on service provider performance

152. Upon request from any of its customers, a service provider shall either—

(*a*) provide, at a reasonable cost, a copy of any annual report that it has provided to the Authority during the past twelve months; or

(*b*) direct the customer to an easily accessible establishment where the reports may be obtained or inspected.

Customer information programmes

153. A service provider shall establish a reasonable programme to inform its customers of the following information, and shall, in any

event, provide the following information at each of its customer service centres, and if requested by a customer, to that customer by mail—

(*a*) information on the rights and responsibilities of customers, including—

(i) an explanation of a customer's right to file a complaint with the service provider and to request that the Authority mediate or arbitrate any dispute between the customer and the service provider; and

(ii) any materials related to the rights and responsibilities of customers published by the Authority;

(*b*) a postage prepaid envelop addressed to the Authority's dispute resolution centre together with any forms needed by its customers to—

(i) make a request to the Authority that it mediate or arbitrate any dispute between the customer and the service provider; or

(ii) appeal against a decision by the service provider not to provide service to an applicant;

(*c*) information about the consequences of unauthorized use and theft of electricity;

(*d*) information about safety issues associated with the use of electricity; and

(*e*) statistical and other information concerning the service provider's sales, number of customers, sources of electricity supply and contact information for the service provider's customer service centres.

Division 3
Customer Service Centres and Customer Complaints

Operation of a customer service centre

154.—(1) A service provider shall maintain at least one customer service centre for the purpose of addressing and resolving applicant and customer service matters in each city, town or district served by the service provider.

(2) All customer service centres shall operate during normal business hours on each business day.

Information about customer service centres

155.—(1) A service provider shall display the telephone number and mailing address of its customer service centres on its customer's bills.

(2) A service provider shall provide information concerning its customer service centres in announcements run on national radios and in local newspapers at least once every three months.

Filing a complaint with a service provider

156.—(1) An applicant or customer may make a verbal or written complaint to a service provider by communicating the complaint to the service provider's customer service centres.

(2) Upon communication of a complaint, the service provider shall—

(*a*) immediately assign the complaint a registration number and provide this number to the applicant or customer;

(*b*) immediately inform the applicant or customer of the service provider's procedures for handling complaints and the applicant's or customer's rights with regard to the complaint, including the customer's right to request that the Authority mediate or arbitrate any dispute between the customer and the service provider if the customer remains unsatisfied after the service provider has responded to the complaint; and

(*c*) investigate the inquiry and provide a written response to the applicant or customer within fourteen days.

Division 4
Establishing a Service

Application process

157.—(1) All service providers shall prepare and maintain a standardized application form to be completed by applicants seeking service from the service provider.

(2) The application form shall be simple and easily understood, shall incorporate the applicable tariffs and terms and conditions of service by reference, and shall make no substantive changes to the applicable tariffs and terms and conditions of service:

Provided that the service provider may request such additional reasonable information as may be required in each case.

(3) A service provider shall require all applicants to complete and sign the standard application form in order to become a customer.

Effect of application

158.—(1) A service provider shall respond to an application for service to an applicant within fourteen days and indicate the cost required for such service.

(2) An application form submitted to a service provider shall upon being accepted form a binding contract between the applicant and the service provider, which binding contract shall remain in effect until the service has been discontinued and all other obligations of the parties thereto have been satisfied.

Confidentiality

159. All information provided by an applicant shall be considered confidential by the service provider, and no service provider shall release such information without the prior written consent of the applicant.

Obligation to provide service and grounds for refusal

160. A service provider shall provide electricity to any applicant located within its service area:

Provided that the service provider may refuse to serve an applicant if—

(*a*) the applicant fails to comply with any regulation issued by the Authority related to the provision of the service requested by the applicant;

(*b*) the applicant's electrical equipment is known to be of such character that satisfactory service cannot be given, or the applicant's equipment does not comply with—

(i) any written law, or

(ii) technical standards approved by the Authority or technical standards contained in the terms and conditions of customer service;

(*c*) the applicant applies for service at a location where a customer receive, or continues to receive service where there are unpaid charges arising from services provided to that location remain outstanding if the service provider can prove that the applicant intends to assist the prior customer in avoiding payment;

(*d*) the applicant owes an undisputed debt to any service provider for the same kind of service being requested;

(*e*) the applicant owes a disputed debt to any service provider for the same kind of service being requested and the applicant has not paid a cash deposit pursuant to Division 5 of this Part;

(*f*) the applicant fails to provide collateral to the service provider, when collateral may be required pursuant to Division 5 of this Part; or

(*g*) the applicant applies for the service at a location which is within the restricted servitude.

Notice of Refusal of service

161. If a service provider refuses to provide service to an applicant, the service provider shall provide the applicant with a written notice of such refusal to provide service within fourteen days of the request, and the notice shall contain—

(*a*) the grounds for refusal to provide service, or an explanation of how to remedy the cause for refusal; and

(*c*) the applicant's options for recourse to the Authority pursuant to by-law 177.

Applicant's recourse to the Authority

162.—(1) An applicant who is refused service for any reason may appeal, using the forms promulgated by the Authority, within fourteen days of the applicant's receipt of the service provider's decision refusing to provide service.

(2) If the Authority finds the service provider to have inappropriately denied service to the applicant—

(*a*) the applicant shall be deemed to have submitted an application form to the service provider on the date of the Authority's decision; and

(*b*) the service provider shall provide the requested service to the applicant in accordance with these By-laws and the applicable terms and conditions of service.

Commencement of service

163. Subject to by-law 180, a service provider shall connect service to an applicant within thirty days of the applicant's delivery of a completed installation form to the service provider and the required payment.

System extensions

164.—(1) Where a service provider needs to make a system extension or a system expansion in order to provide an applicant with electricity, then the service provider may not refuse to provide the services requested by the applicant unless—

(*a*) the system extension or system expansion is not technically feasible; and

(*b*) the applicant agrees to pay the service provider for the costs to be incurred by the service provider in constructing and installing the system extension (the "System Extension Cost") or expanding the capacity of the existing system in the area already serviced.

(2) In the event that the applicant agrees to pay the applicant's portion, then the service provider may refuse to begin making the system extension or system expansion until the applicant has deposited the estimated system extension cost or system expansion cost, as the case may be, with the service provider.

(3) Under no circumstances shall a service provider charge a system extension cost or a system expansion cost to an applicant that exceeds the estimated system extension cost or system expansion cost by more than twenty per cent.

System extension or expansion cost refunds

165.—(1) When charging applicants, for new connexions, consideration for future connexions shall be taken into account by the service provider in areas with low potential for connexions as long as this fact is made clear in writing to the applicant.

(2) In the event that an applicant, has paid for a system extension cost or system expansion cost in areas of low potential for connexions and additional customers connect, within five years of the completion of the system improvement to which the applicant's portion related, to the distribution system of the service provider using any part of the system

extension or system expansion paid for by the applicant, then the service provider shall—

(*a*) charge a portion of the system extension cost or system expansion cost paid by the applicant to each such customer; and

(*b*) refund the amount charged to such customers to the applicant that paid for the system extension cost or system expansion cost.

Division 5
Treatment of Capital Contributions

Service provider to treat contribution as trust funds

166.—(1) All monies paid to a service provider as contribution to a system extension cost or system expansion cost shall be placed in a separate bank account operated by the service provider for such purposes.

(2) Monies placed in the system extension or system expansion bank account shall be regarded by the service provider as trust funds until they are actually used for the purpose of system expansion or system extension they were paid for.

(3) Monies paid in the system extension or system expansion bank account shall begin to attract interest at the ruling bank rate on the expiry of the period prescribed for connexion of the customer as specified in the Standard of the Quality of Service and Supply Standards contained in the Ninth Schedule hereto.

Requirement to provide acceptable collateral

167. A service provider may, when acting pursuant to a pre-established and non-discriminatory policy approved by the Authority, require an applicant to provide, and a customer to maintain, collateral in an amount not greater than the service provider's reasonable estimate of the amount of charges the applicant will incur over any two months' period.

Payment before reconnexion

168. A service provider may require an applicant who was previously a customer of the service provider and whose service was disconnected for non-payment of bills or theft of service to pay all amounts due to the service provider before connecting or reconnecting the service.

Division 6
Metering and Control Equipment

Installation

169. A service provider shall, prior to providing electricity to an applicant or location that has not yet received electricity from the service provider—

(*a*) provide a meter appropriate for the services the applicant has requested and arrange for its installation in a location that is easily

accessible for reading of the meter, and agreeable to both the service provider and the applicant; and

(*b*) certify the accuracy of the meter before providing service to the customer.

Access to metering equipment

170. The following terms shall govern service provider access to metering equipment installed in accordance with by-law 184 at the customer or applicant's premises—

(*a*) service provider personnel shall carry a valid identification card with a photograph when entering places where customers metering devices are kept;

(*b*) customers shall be required to provide access only to service provider's personnel that are able to provide valid identification pursuant to subparagraph (*a*); and

(*c*) service provider personnel working on customer meters and measuring devices including reading, maintenance and installation, shall do so during normal business hours except in the case of service termination due to unauthorized use of electricity, or if the service provider and the customer agree otherwise.

Meter testing and accuracy

171.—(1) Where a customer requests a service provider to test the accuracy of a meter and the customer pays for the meter test, the service provider shall test the meter within thirty days of receiving the payment thereof.

(2) The service provider shall notify the customer at least five days prior to performing the test so that the customer may observe the testing if the customer wishes to do so.

(3) If the test reveals that the meter has a margin of error of two decimal point five per cent or less, then the customer shall not be refunded the meter testing cost paid.

(4) In the event that the test reveals the meter to have a margin of error of more than two decimal point five per cent, and to have resulted in the overcharging of the customer, then the service provider shall adjust the customer's bill for the previous twelve months, or back to the date of which the service provider last tested the meter, whichever occurred later, and credit the overcharges charged to the customer within such period to the customer's account and refund to the customer the meter testing cost paid.

Obtaining meter data

172.—(1) The service provider shall read meters at least once every month.

(2) If the service provider is unable to obtain a customer's meter readings during the service providers normal business hours, having exercised due diligence pursuant to the service provider's established

policy, then the service provider may estimate the amount of electricity consumed by the customer and make any necessary adjustments on subsequent bills.

Division 7
Service Quality and Continuity

Continuous service

173.—(1) All service providers shall use their reasonable efforts to ensure that they can provide electricity to their customers at all times.

(2) When interruption does occur, a service provider shall re-establish service within the shortest possible time consistent with prudent operation principles, so that the smallest number of customers are affected.

(3) Each service provider shall make reasonable provisions to meet emergencies resulting from a failure of service, and shall issue instructions to its employees covering procedures to be followed in the case of an emergency in order to prevent or mitigate the interruptions or impairment of service.

Records of interruptions

174.—(1) Except for momentary interruptions lasting not more than two minutes each and which do not cause a major disruption of service, each service provider shall keep a complete record of all emergency and scheduled interruptions.

(2) The Authority shall be notified in writing of any interruption in service affecting the entire system or any of its major divisions that lasts more than two minutes.

(3) The record under paragraph (1) shall show the cause of interruption, the date, time, duration, approximate number of customers affected, and in cases of emergency interruptions, the remedy and steps taken to prevent recurrence.

(4) Every service provider shall issue quarterly and annual reports to the Authority containing the aggregate version of the record provided under paragraph (1).

(5) The Authority may further prescribe the contents of any record under paragraph (1).

Minimum service standards

175.—(1) Minimum service standards or customer service charter developed by the service provider and approved by the Authority shall be adhered to by the service provider at all times.

(2) The minimum service standards or customer service charter shall provide for—

(*a*) continuity of service;

(*b*) maintenance of proper customer relations;

(*c*) the right of a service provider to refuse service in exceptional circumstances;

(*d*) the right of the service provider to demand a deposit from customers against future service;

(*e*) the adoption of proper billing procedures;

(*f*) the establishment of principles governing new construction; and

(*g*) the procedure for abandonment or discontinuance of service.

Division 8
Customer Obligations and Rights

Obligations of the customer

176. The customers shall—

(*a*) use electricity in a manner that pays due regard to its scarcity and value as a resource;

(*b*) protect service provider meters and similar equipment from vandalism and damage;

(*c*) use electricity in a manner that does not endanger peoples lives and property;

(*d*) use electricity equipment conforming to the service provider's supply agreement and the Act; and

(*e*) not trespass onto or tamper with the service provider's equipment.

Disconnexion of service

177. A service provider shall not disconnect electricity supply to a customer except for the following reasons—

(*a*) non-payment of bills more than sixty days in arrears:

Provided that the service provider delivers a disconnexion notice to the customer's address five days before service is disconnected;

(*b*) unauthorized use or theft of electricity;

(*c*) refusal to grant access at reasonable times to equipment installed upon the premises of the customer for the purpose of inspection, meter reading or maintenance;

(*d*) failure to reimburse the service provider for repairs to, or replacement of the service provider's property used to supply service, when such repairs or replacements are necessitated by negligence on the part of the customer;

(*e*) misrepresentation of identity for the purpose of obtaining service;

(*f*) actions adversely affecting the safety of any customer or the integrity of the service provider's distribution system;

(*g*) failure to comply with the credit requirements set in Division 5; and

(*h*) any other reasons identified in the applicable terms and conditions of service.

Situations in which disconnexion is prohibited

178. A service provider shall not disconnect service to a customer solely for the following reasons—

(*a*) delinquency in payment for service by a previous occupant of the premises; or

(*b*) failure to pay charges not properly reflected on a service provider's bill.

Disconnexion of service during dispute over a bill

179. Where a customer has disputed a bill and has filed a complaint with its service provider related to such bill or requested that the Authority mediate or arbitrate the dispute, then the service provider shall not discontinue service to a customer because of failure to pay the disputed portion of a bill:

Provided that the service provider may require the customer to pay that part of a bill that is not in dispute and if the customer fails to pay the undisputed portion of the bill, the service provider may discontinue service to the customer subject to all applicable provisions of these By-laws.

Diagram and specifications

180. If, at any time after the date of commencement of these By-laws, an initial connexion is made to any customer premises, the customer shall, if a service provider so requires, provide the service provider with a diagram of the circuits on the customer premises, starting from the point of supply and the specifications of the electrical installation to be installed on the customer premises.

Electrical installation

181.—(1) A customer shall be responsible for the installation and maintenance, at its own expenses, of the electrical installation on the customer premises from the point of supply in accordance with the requirements of these Regulations and the standards applicable to the wiring of premises.

(2) No electrical installation may extend from one customer premises to another or if the customer premises comprises more than one building, from one building to another without prior approval of the service provider.

Fault on electrical installation

182.—(1) If any fault develops on the electrical installation on any customer premises, the customer shall—

(*a*) immediately switch off the supply by means of the switch provided for that purpose on the distribution board and, where

considered necessary, request the service provider to disconnect the supply to the customer premises; and

(*b*) cause the necessary steps to be taken to remedy the fault on the electrical installation.

(2) The service provider is not obliged to effect any repair to the electrical installation on the customer's premises, but shall repair any damage which may have been caused to the service apparatus as a result of the fault on the electrical installation.

(3) Where, owing to a fault as envisaged in paragraph (1) a service provider repairs the damage caused to the service apparatus in accordance with paragraph (2), the customer shall—

(*a*) reimburse the service provider for any expenses which the service provider incurs in connexion with the repair; and

(*b*) pay to the service provider the fee determined by the service provider in its schedule of tariffs for the disconnexion of the supply of electricity and for the subsequent restoration of the supply.

Equipment to be provided by the customer

183.—(1) A customer shall, at his own cost, erect, connect, operate and maintain in good order—

(*a*) all circuits from the point of supply, referred to in the contract of supply, to the electrical installation;

(*b*) all apparatus necessary for controlling the said circuits, including efficient apparatus for automatically isolating any circuit which may break down; and

(*c*) other equipment which the service provider requires the customer to install.

(2) The said circuits, electrical installation, apparatus and equipment and the adjustment thereof shall be accepted to the service provider.

(3) The service provider shall be entitled to recover from the customer, any loss or expense which the service provider incurs for damage to the service provider's plant and equipment or otherwise because of failure by the customer to comply with this by-law.

(4) The electrical installation and all other electrical equipment belonging to the service provider shall be accommodated separately on the customer premises in a manner which distinguishes clearly between the electrical equipment which is the property of the customer and the electrical equipment which is the property of the service provider.

(5) The electrical equipment of the customer shall be of a design and construction in line with good industry practices, properly installed and maintained by the customer, and shall in all respects comply with the standards applicable to the wiring of premises.

(6) The customer shall at all reasonable times grant to the service provider unhindered access to the electrical installation for the purposes of inspection and, where necessary, approval.

(7) The customer shall provide adequate equipment for the protection of the electrical installation after ascertaining the nature of the protection equipment which the service provider installed at the point of supply.

(8) It shall be the responsibility of the customer to take the necessary measures to protect itself where its business is of such a nature that a voluntary or involuntary outage may cause a cessation of, or damage to, its plant or operations.

(9) A customer may at no time exceed the rated capacity of the distribution line or cable, equipment or apparatus which the service provider provides, and the service provider may provide and install apparatus designed and arranged to interrupt the supply of electricity to the customer premises in the event of an overload occurring.

Charges in case of improper use

184.—(1) If a customer uses electricity supplied to the customer's premises for any purpose, or deals with the supply of electricity to the customer's premises in any manner, which, in the opinion of the service provider, interferes with or is likely to interfere with the efficient supply of electricity by the service provider to any other premises, the service provider may, without prior notice, suspend the supply of electricity to the customer's premises.

(2) The service provider must restore any supply of electricity suspended in terms of paragraph (1), if—

(*a*) the cause of the suspension of the supply has been permanently remedied or removed to the satisfaction of the service provider; and

(*b*) the fees which the service provider determines in its schedule of tariffs for the suspension and restoration of, as well as any other arrears for, the supply of electricity and costs for physical damage caused by the customer to the equipment of the service provider have been paid.

Division 9
Billing

Details on bills

185.—(1) A service provider's bill to a customer shall provide the following details—

(*a*) the amount of the bill, including, as applicable, separate line items for the Energy Regulation Levy, the Rural Electrification Levy, duties, fees and taxes, any discounts or penalties, and past due amounts:

Provided that the levies shall be made only on the basic charges for consumption;

(*b*) the date and reading of the meter at the beginning and the end of the billing period;

(*c*) the due date of the bill;

(*d*) the applicable tariff; and

(*e*) any conversions from meter reading units to billing units:

Provided that where the bill is in the form of a prepaid sale of electricity the receipt thereof shall contain the information stated in paragraphs (*a*) to (*e*) above.

(2) All receipts for payments for electricity consumption issued by the service provider to the customer shall contain all the information indicated in paragraph (1) of this By-law.

Information on billing and payment history

186. A service provider shall provide to an applicant or a customer a breakdown of charges at the time service is initially installed or is modified, and upon request by a customer, a service provider shall also provide receipts for any amount paid by a customer.

Records retention

187.—(1) A service provider shall maintain monthly billing records for each customer account for at least two years after the date the bill is mailed.

(2) Billing records shall contain sufficient data to reconstruct a customer's billing for a given month.

(3) Copies of a customer's billing records may be obtained by that customer on request at a reasonable cost.

Adjustments for billing error

188. If a billing error is discovered, a service provider shall account for the billing error in the next month's bill as follows—

(*a*) if charges are found to be higher than the correct amount, an adjustment shall be made for the entire period of the over billing, and the service provider shall pay interest on the amount of the overcharge at a rate set by the Authority:

Provided, however that the service provider shall not pay interest on the amount of the correction if the service provider corrects the over billing within one month of making the error.

(*b*) if charges are found to be lower than the correct amount, then the service provider may retroactively bill the customer for any under-billed amount that would have been payable by the customer no more than three months prior to the date the under-billed amount is billed to the customer, and the service provider shall not charge interest on under-billed amounts; and

(*c*) where it is established that the under-billed amount was due to fraud or illegal transaction by the customer, the service provider shall be entitled to recover the full amount with interest at a rate to be approved by the Authority.

PART VIII
Tariffs and Charges

Division 1
Applications

Application

189. This Part shall apply to applicants or holders of licences for—

(*a*) generation;

(*b*) distribution;

(*c*) transmission or export or import; and

(*d*) any other licensed activity.

Objectives

190. The objectives of this Part are to—

(*a*) provide customers with fair and reasonable price structures consistent with the maintenance of a financially and operationally secure electricity supply system;

(*b*) structure the costs reflected in the tariff in such a way as to encourage customers to make efficient use of generation, transmission and distribution assets;

(*c*) encourage licensees towards efficient use of and electrical plant and increased operational effectiveness based on financial benefits and penalties;

(*d*) provide all licensees in the electricity supply industry with a fair and reasonable return for their service and production, including a reasonable profit;

(*e*) encourage customers towards efficient and economical use of energy based on price signals;

(*f*) provide a structure for the formulation of the incentive based tariffs, taking into account the limited scope of competition in the current market system configuration;

(*g*) provide for a tariff structure that accommodates future progress towards a commercially competitive market system;

(*h*) provide for a tariff structure and regulatory environment that gives confidence to current and prospective investors in the Malaŵi electricity industry;

(*i*) provide for tariff structure and a regulatory environment that promotes public safety, health and environmental protection; and

(*j*) provide for a tariff structure and a regulatory environment that promotes a social responsibility without sacrificing the need for cost recovery and financial sustainability on the part of the service provider.

Division 2
Tariff Principles

General duties of licensee

191.—(1) A licensee shall—

(*a*) carry out its licensed activities in an effective and efficient manner;

(*b*) work towards the long-term and sustainable provision of electricity and the development of electricity services;

(*c*) where applicable, to develop a fair and transparent electricity pricing methodology;

(*d*) avoid the making of exorbitant profits with regard to its licensed undertaking to the detriment of customers; and

(*e*) endeavour to facilitate national economic and social objectives in the electricity industry.

(2) The Authority shall endeavour to ensure that licensees comply with paragraph (1).

Ring-fence accounting

192.—(1) A licensee shall, within the period stipulated in its licence conditions, fully ring-fence every Lincensed Activity in accordance with this by-law.

(2) In order to give effect to paragraph (1), a licensee shall, in respect of the Licensed Activity—

(*a*) maintain ring-fence accounting records; and

(*b*) in respect of each financial year, prepare consistent and uniform financial statements comprising of the following—

(i) an income statement;

(ii) a balance sheet;

(iii) a cash-flow statement;

(iv) an asset register; and

(v) a statement showing the amounts paid as Energy Regulation Levy and Rural Electrification Levy.

(3) The statements referred to in paragraph 2 (*b*) shall be accompanied by notes showing separately for each Licensed Activity and in appropriate detail—

(*a*) the amounts of any revenue, cost, asset, liability, reserve or provision which has either been charged from or to any other activity;

(*b*) business or operations of the licensee, whether licensed or not; and

(*c*) a description of that charge.

(4) A licensee who has commenced ring-fence accounting of its Licensed Activity as provided in paragraph (1) shall—

(*a*) submit to the Authority a report by its auditor stating whether, in the auditor's opinion, the statements referred to in paragraph (2) (*b*)—

(i) have been prepared in accordance with these By-laws; and

(ii) give a true and fair reflection of the financial affairs of the licensed activity;

(*b*) the submission referred to in paragraph (*a*) shall be made—

(i) not later than six months or any longer period as the Authority may determine after the end of the licensee's first full financial year; and

(ii) after the date on which the lincensee would have commenced the ring-fence accounting; and

(iii) thereafter, annually.

Allowable assets, revenue and costs

193.—(1) The Authority may, with regard to the ring-fence accounting of a Licensed Activity for different categories of licensees, issue guidelines in accordance with the Act pertaining to the following—

(*a*) revenue, costs, assets, liabilities, reserves and provisions which the Authority deems allowable as forming part of or emanating from the licensed activity;

(*b*) any method or formula for allocating overhead expenses; and

(*c*) a standardized asset valuation schedule for all licensees.

(2) Any guidelines issued under this by-law may—

(*a*) distinguish the different types of licensed activities; and

(*b*) be specific for the category of licensees to which such rules or guidelines relate.

Principles

194. In implementing these By-laws and furthering their objectives, regard shall be given to the following underlying and guiding principles—

(*a*) tariffs shall be based on accurate cost information provided by licensees and on a transparent formulation and review process;

(*b*) tariffs shall be structured and developed in a way that will reflect variations in costs imposed on the system at the time of use, and seasonal factors, consumer load profile, voltage levels and similar factors; and

(*c*) tariffs shall reflect a true cost of service and provide clear price signals to customers on the economic and efficient use of energy.

Regulation of costs and investments

195.—(1) A licensee shall be responsible for justifying that costs or investments included in the formulation of tariffs are reasonable in the circumstances, and the Authority may reject the costs if it considers them to be unreasonable or imprudent.

(2) To clarify a regulatory situation and allow for eventual differentiation in regulatory control, there shall be a clear separation of activities and costs between potentially competitive activities and naturally monopolistic activities.

Licence conditions

196. The following licence conditions are particularly relevant to the tariffs setting process and shall consequently be taken into account by every licensee—

(*a*) accounting records shall be maintained and financial statements produced in accordance with the regulatory accounting standards determined by the Authority;

(*b*) a reasonable apportionment of common costs into tariff cost categories shall be carried out in accordance with accepted business practices, and the Authority shall be informed of the allocation methods used;

(*c*) there shall be no cross-subsidies between customers or groups of customers for different activities undertaken by the licensee, except with a prior approval of the Authority;

(*d*) the licensee shall ensure that any activity, including tariff setting, does not impede competition in the industry;

(*e*) the licensee's tariffs shall be consistent with maintaining an acceptable level of quality and reliability;

(*f*) the structure of the tariff shall encourage the improvement of operational and economic efficiency; and

(*g*) tariffs shall be developed in accordance with these by-laws.

Components of tariff computation

197.—(1) The components of base tariff computation for each licensee shall be in accordance with the Tariff Methodology approved by the Authority in respect of each particular licence and may include the following general categories of costs—

(*a*) power acquisition related costs;

(*b*) operation and maintenance costs;

(*c*) investment related costs;

(*d*) return on investment;

(*e*) adjustment factors for system losses, inflation and foreign exchange; and

(*f*) other costs as approved by the Authority.

(2) A licensee shall structure its tariffs in the schedule of tariffs according to this by-law and include tariff components in a way that the schedule of tariffs appropriately reflects the following main types of costs—

(*a*) demand related costs;

(*b*) energy related costs;

(*c*) shared customer's related costs; and

(*d*) customer specific costs.

(3) The manner in which the structuring referred to in paragraph (2) shall be effected, shall be determined by the Authority.

(4) In the interests of economic and rational use and consumption of electricity, and whenever feasible, a licensee shall—

(*a*) provide customers with an option of time of use of tariffs for the variable energy component of the tariff that reflects the difference in the cost of supply in off-peak periods; and

(*b*) ensure that the option and its structure is authorized in its schedule of tariffs prior to offering the option to its customers.

(5) Only the specific costs allowable by the Authority and associated with the activities of each licence shall be included in the tariff computation.

Automatic tariff adjustment formula

198.—(1) A licensee may adjust his tariffs in accordance with the tariff adjustment formula specified in the Tenth Schedule hereto.

(2) A licensee shall not adjust tariffs without verification and approval by the Authority.

(3) A licensee may publish and implement new tariffs if the Authority does not respond to the licensee's application for tariff adjustment after thirty days of receiving the application.

Special pricing agreements

199.—(1) A licensee that distributes electricity may include special pricing agreements in its schedule of approved tariffs.

(2) The licensee may only conclude a special pricing agreement with a customer if the customer complies with any of the following—

(*a*) the electricity costs of the customer represent a percentage that equals to or exceeds the percentage of the total electricity costs of that customer as determined by the Authority; and for this purpose the Authority shall decide the manner of determining the costs and also which costs may be taken into consideration;

(*b*) the electricity load factor of the customer equals or exceeds the percentage for the continuous period which the Authority determines; or

(*c*) any other criteria which the Authority may determine.

(3) When considering whether or not to approve charges or tariffs relating to a special pricing agreement, the Authority may request the licensee to submit to the Authority any information which the Authority deems necessary.

(4) Once the Authority is satisfied with the requirements outlined in paragraph (1) it shall not be necessary for the concerned licensee to send to the Authority for approval any particular special pricing arrangement with a customer, but the licensee shall be required to send a copy of that agreement to the Authority for information and monitoring.

PART IX
Miscellaneous

Surcharges and levies

200. A licensee collecting surcharges and levies shall—

(*a*) distinguish the surcharges and levies in its billing and receipts issued from the electricity tariffs it charges;

(*b*) indicate the surcharges and levies in its billing and receipts issued in a transparent and understandable manner; and

(*c*) recover the surcharges and levies from customers in accordance with the applicable laws.

Licence fees

201.—(1) If an application for the issue, renewal, amendment or transfer of a licence, has in terms of the Act been granted by the Authority, the applicant must, prior to the issue, renewal, amendment or transfer of such licence, pay the appropriate fee prescribed in Schedule B.

(2) The above fees shall be paid for any additional generation capacity and distribution load above the original load.

Register of licences

202.—(1) The Authority must keep and maintain a register, in such form as may be determined by the Authority, in respect of every licence issued under the Act, and in which register shall be recorded—

(*a*) the name of every holder and joint holder of the licence;

(*b*) the type of licence issued and the area in respect of which the licence has been issued;

(*c*) the conditions imposed on the licence;

(*d*) the names of the persons, if any, to whom any interest in any licence has been granted, ceded, transferred or assigned and the nature of such interest;

(*e*) revocations, amendments and cancellations of licences; and

(*f*) such other particulars as may, from time to time, be determined by the Authority.

(2) The register shall, during normal office hours, be open for inspection by any interested person at the place of business of the Authority, and any such person may request copies or extracts of any entry in the register and the Authority shall provide the person with such copies or extracts on payment of the cost thereof.

Information about installation

203. Any electrical installations person who completes or directs the completion of any electrical installation work which is to be connected to a supply system shall—

(*a*) when such supply is to be delivered by the licensee, submit to the licensee a "Completion of Installation" report in such form as the Committee shall require; and

(*b*) in all other cases give information to a licensee or private owner under the Act, including the completion date and a summary of the work carried out.

Discipline

204.—(1) Every person issued with a permit under these By-laws shall exhibit a high degree of discipline in the performance of his work.

(2) The licensee shall monitor the professional performance of a permit holder under these By-laws and shall report any case of malpractices to the Authority.

(3) The Committee may, at any of its sittings consider any case reported under subregulation (2) and may, depending upon the gravity of the case, recommend to the Authority which may suspend a permit holder from practising for a period determined by the Authority or cancel the permit.

Appeals

205. A person aggrieved by any decision of the Authority concerning the refusal or cancellation of a permit may apply in writing within fourteen days of the date of such refusal or cancellation for mediation or arbitration under the Energy Act.

General offences and penalties

206.—(1) Any licensee or person who contravenes any provision of these By-laws commits an offence and shall, on conviction, be liable to a fine of K2,000 and to imprisonment for six months.

(2) In addition to the penalties provide for the offences under these By-laws, a court may also order that the guilty person repay any expenses incurred by the Authority or any other person as a consequence of the offence.

207. Every permit holder shall pay the annual permit renewal fees specified in the First Schedule hereto. Annual fees

208. All permits issued under any previous subsidiary legislation by licensees shall be deemed to have been issued under these By-laws by the Committee but shall be subject to renewal at the end of December every year. Transitional arrangement

FIRST SCHEDULE

PART A

APPLICATION FEES by-law 3

Nature of Fee	*Fee* K t
Application fee for—	
(*a*) issue of licence	5,000 00
(*b*) renewal of licence	50,000 00
(*c*) amendment of licence	25,000 00
(*d*) transfer of licence	50,000 00

PART B

FEES FOR ISSUING, RENEWAL OR TRANSFER OF LICENCE
INTERCONNECTED SYSTEM by-law 5

	Matter	*Amount Payable*
B. 1	GENERATION RELATED LICENCES:	
CAT. I	Larger Generators, 50 MVA or above . .	USD40,000 per 50 MVA or part thereof payable in Malaŵi Kwacha equivalent.
CAT. II	Medium Generators,10 MVA and above but less than 50 MVA	USD20,000 fixed, plus USD 10,000 per 25 MVA or part thereof payable in Malaŵi Kwacha equivalent.
CAT. III	Small Generators, 0.5 MVA and above but less than 10 MVA	USD10,000 payable in Malaŵi Kwacha equivalent.
CAT. IV	Very Small Generators, less than 0.5 MVA	USD5,000 payable in Malaŵi Kwacha equivalent.

Matter		*Amount Payable*
B. 2 Transmission, Import or Export Related Licences:		
	Transmission, import or export	USD60,000 payable in Malaŵi Kwacha equivalent.
B. 3 Distribution Related Licences:		
CAT. I	Larger Distributors, 50 MVA or above . .	USD40,000 payable in Malaŵi Kwacha equivalent.
CAT. II	Medium Distributors, 10 MVA and above but less than 50 MVA.	USD 15,000 fixed plus USD5,000 per 10 MVA or part thereof.
CAT. III	Small Distributors, 2 MVA and above but less than 10 MVA	USD5,000.
CAT. IV	Very Small Distributors—	
	(*a*) 0.5 MW and above but less than 2 MVA	USD2,500;
	(*b*) less than 0.5 MVA	USD1,250.

PART C

Isolated Grid Systems Combined Generation and Distribution — by-law 152

Matter		*Amount Payable*
CAT. I	Medium Generators, 10 MVA and above but less than 50 MVA	USD25,000 plus USD10,000 per 25 MVA or part thereof payable in Malaŵi Kwacha equivalent.
CAT. II	Small Generators, 2 MVA and above but less than 10 MVA	USD15,000 payable in Malaŵi Kwacha equivalent.
CAT. III	Very Small Generators, less than 2 MVA	USD10,000 payable in Malaŵi Kwacha equivalent.

PART D

Licence Fees for Import or Export of Electricity — by-law 5

CAT. I	Export or Import of Electricity at 33 kV or below.	USD10,000 payable in Malaŵi Kwacha equivalent.

PART E

INSTALLATION PERMIT FEES FOR INDIVIDUAL APPLICANTS by-law 14

Class of Permit	*Application Fees*	*Annual Renewal Fees*
A	K10,000	K5,000
B	K9,000	K4,500
C	K8,000	K4,000
D	K7,000	K3,500
E	K8,000	K4,000

PART F

INSTALLATION PERMIT FEES FOR COMPANY OR FIRM AS APPLICANTS by-law 14

Class of Permit	*Application Fees*	*Annual Renewal Fees*
A	K20,000	K10,000
B	K18,000	K9,000

PART G

The fees for amendment of any licence specified under this First Schedule shall be ten per cent of the above fees.

SECOND SCHEDULE

REPUBLIC OF MALAŴI

ELECTRICITY ACT

(CAP. 73:01)

ELECTRICITY BY-LAWS

APPLICATION FOR LICENCE TO GENERATE ELECTRICITY FOR SALE by-laws 5 and 7

FORM EA 1

SECTION A

PARTICULARS OF APPLICANT

A. 1 Full name of Applicant: .....

A. 2 Address of Applicant, or in the case of a body corporate, the registered office: .....

A. 3 Telephone Number of Applicant: .....

A. 4 Fax Number: .....

A. 5 E-mail Address: .....

A. 6 Details of Contact Person:

Full Name: .....

Telephone Number: .....

Fax Number: .....

E-mail Address: .....

A. 7 Legal form of applicant: .....

A. 8 If the applicant is a company provide the following details—

(*a*) full names of shareholders (holding more than 5% of shares) and their holding percentages;

(*b*) full names and occupation of Directors;

(*c*) Certificate of Incorporation; and

(*d*) Memorandum and Articles of Association.

SECTION B

COMMENCEMENT DATE, PURPOSE AND DURATION OF LICENCE

B. 1 Desired date from which the licence (if granted) is to take effect:

.....

B. 2 Duration of the licence from commencement date: .....

B. 3 Purpose for which electricity is to be generated: .....

B. 4 Type of application (issue, transfer, amendment or renewal):

.....

SECTION C

PARTICULARS OF GENERATING STATION

(To be provided for each generating station separately)

C. 1 Name of generating station: .....

C. 2 Location of generating station: .....

C. 3 Address of generating station:

C. 4 Details of Contact Person:

Full Name: .....

Telephone Number: .....

Fax Number: .....

E-mail Address: .....

C. 5 Type and age of generating station (thermal, nuclear, hydro, pumped storage, gas turbine, diesel generator, solar, wind or other including equipment description): .....
.....

C. 6 Date on which the generating station was commissioned for an existing station or the expected commissioning date for a proposed station: .....
.....

C. 7 The installed capacity of each unit within the generating station (MW): .....

C. 8 Life span of each generation station: .....

C. 9 Maximum generating capacity (MW) expected to be available from the generating station and energy to be produced (kWh):

	Max. MW	Total Energy (kWh)	Own Use kWh	For sale kWh
YEAR 1				
YEAR 2				
YEAR 3				
YEAR 4				
YEAR 5				
YEAR 6				
YEAR 7				

C. 10 Estimate of the energy conversion efficiency of—

(*a*) Turbine: .....

(*b*) Generator: .....

(*c*) Estimated overall station: .....

SECTION D

PARTICULARS OF ANY LONG-TERM ARRANGEMENTS WITH ENERGY SUPPLIERS

(To be provided for each generating station separately)

D. 1 Name of Transmission company: .....
.....

D. 2 Particulars of the contractual arrangements (attach draft contract if in place):

.....
.....
.....

SECTION E

GENERATION BUSINESS

(To be provided for each generating station separately)

E. 1 Details of proposed major maintenance programmes, including the expected cost and duration thereof, covering the next five years:

.....
.....
.....

E. 2 Details of major generating station rehabilitation and modifications dates, cost and description for the next five years:

.....
.....
.....
.....

E. 3 Details of generating station expansion, dates, cost and description:

.....
.....
.....
.....

E. 4 Particulars of power sales agreements and tariffs therein:

.....
.....
.....
.....

E. 5 Particulars of anticipated outages and duration thereof as a result of E1 and E2 above:

.....
.....
.....
.....

SECTION F

FINANCIAL INFORMATION

F. 1 Income Statement:

Provide statements and annual forecasts of sales, revenues and costs. Attach copies of the current and/or budgeted balance sheet, rate of return, profit and loss account and source and application of funds for current and next two years. Indicate major cost items such as staff costs, maintenance.

F. 2 Investment Programme:

Investment Programme for current and the next five years. Attach copies of the detailed scheme or schemes prepared by a competent engineer and mode and cost of financing such a scheme.

F. 3 Fixed Assets:

Summary of total assets of all generating plant.

F. 4 Audited Accounts:

Provide copies of the latest audited accounts of the applicant.

F. 5 Letters of Reference from Banks:

Provide one letter of recommendation as to credit worthiness from a local commercial bank and one from a reputable international bank.

SECTION G

INFORMATION ON HUMAN RESOURCES

G. Personnel:

(*a*) Submit details of the number of staff and employees and their categories and grades in the service of or to be recruited by the applicant, showing their qualifications and number of years of experience in similar jobs.

(*b*) Provide *curriculum vitae* of top management personnel of the applicant.

SECTION H

ENVIRONMENTAL CONSIDERATION

H. (*a*) Provide a brief description of the likely negative impact of the generation facility on natural resources and the environment and mitigation measures proposed.

(*b*) Provide a copy of the approved environmental mitigation plan (if any) by the relevant authority.

SECTION I

PERMITS FROM OTHER GOVERNMENT DEPARTMENTS OR REGULATORY AUTHORITIES

I. Permits:

Submit copies of permits or approvals issued by public or local authority or other regulatory agencies necessary for the operation of the generating plant.

SECTION J

ADVERTISING NOTICE

Attach draft copy of the notice of advertisement as to representations or objections.

SECTION K

TARIFFS

Provide a schedule of the proposed tariffs.

SECTION L

ADDITIONAL INFORMATIONAL

Provide any other relevant information which the applicant wishes to include with this application:

.....
.....
.....
.....

Signed: ..... Date: .....

Receipt acknowledged by: ..... Date: .....

REPUBLIC OF MALAŴI

ELECTRICITY ACT

(CAP. 73:01)

ELECTRICITY BY-LAWS

APPLICATION FOR LICENCE TO TRANSMIT OR TO IMPORT OR TO EXPORT ELECTRICITY — by-law 5, FORM EA 2

SECTION A

PARTICULARS OF APPLICANT

A. 1 Full name of applicant: .....

A. 2 Address of applicant, or in the case of a body corporate, the registered office:

.....

.....

A. 3 Telephone Number of Applicant: .....

A. 4 Fax Number: .....

A. 5 E-mail Address: .....

A. 6 Details of Contact Person:

Full Name: .....

Telephone Number: .....

Fax Number: .....

E mail Address: .....

A. 7 Legal form of applicant: .....

A. 8 If the applicant is a company provide the following details—

(*a*) Full names of shareholders (holding more than 5% of shares) and their holding percentages;

(*b*) Full names and occupation of Directors;

(*c*) Certificate of Incorporation; and

(*d*) Memorandum and Articles of Association.

SECTION B

COMMENCEMENT DATE, PURPOSE AND DURATION OF LICENCE

B. 1 Desired date from which the licence (if granted) is to take effect:

.....

B. 2 Duration of the licence from commencement date:

.....

B. 3 Description of the purpose for the licence:

.....

.....

B. 4 Type of application (issue, transfer, amendment or renewal):

.....

SECTION C

AREA TO WHICH THE APPLICATION RELATES

C. 1 Provide a sufficient description of the area to which the application relates (attach map showing routes of the transmission lines):

.....

.....

C. 2 Provide a list of local authorities covered by the area of transmission:

.....

.....

C. 3 Electricity will be imported from or exported to:

.....

SECTION D

DETAILS OF THE TRANSMISSION SYSTEM

D. 1 Provide an overview of the existing system and plan for the next five years, which includes—

D. 1.1 The Physical system:

(*a*) telecommunication and telecontrol plant schedule and ages thereof;

(*b*) large-scale map showing geographical location of plant and facilities;

(*c*) single line diagram of the transmission system;

(*d*) supply and delivery points, metering arrangements and policies, location, type, reading, calculating charges and billing systems; and

(*e*) list, description and age of transformers, switchgear and associated equipment.

D. 1.2 System Characteristics:

(*a*) energy entering the system at supply points:

(*b*) energy leaving the system at delivery points:

(*c*) electrical losses:

(*d*) maximum power transfer capability (lines + transformers); and

(*e*) maximum fault levels at all interfaces.

D. 2 Provide similar information for works to be purchased as well as location thereof.

SECTION E
TRANSMISSION BUSINESS

E. 1 Provide your proposed policy and practice in respect of charging for the usage of the transmission system:

.....

.....

E. 2 Analyse total purchases; (kWh; Kwacha) from your suppliers of electricity (generators and your customers distributors) for current year and the next five years:

.....

.....

.....

.....

E. 3 Provide your pricing policy for electrical energy trading:

.....

.....

E. 4 Attach a schedule of the proposed tariffs and prices for bulk supply.

E. 5 Attach a copy (if any) of the power purchase agreement with a generator or other supplier.

E. 6 Attach a copy of the power sales agreement with distributors.

E. 7 Details of proposed major maintenance programmes including expected costs and duration thereof for the next five years:

.....

.....

.....

.....

E. 8 Details of major rehabilitation and modifications or upgrading, dates, costs and description for the next five years:

.....

.....

.....

.....

SECTION F

FINANCIAL INFORMATION

F. 1 Income Statement:

Provide statements and annual forecasts of sales, revenues and costs. Attach copies of the current and/or budgeted balance sheet, rate of return, profit and loss account and source and application of funds for current and the next two years. Indicate major cost items such as staff costs, maintenance.

F. 2 Investment Programme:

Investment Programme for current and the next five years. Attach copies of the detailed scheme or schemes prepared by a competent engineer and mode and cost of financing such a scheme.

F. 3 Fixed Assets:

Summary of total assets of all transmission plant.

F. 4 Audited Accounts:

Provide copies of the latest audited accounts of the applicant.

F. 5 Letters of Reference from Banks:

Provide one letter of recommendation as to credit worthiness from a local commercial bank and one from a reputable international bank.

SECTION G

INFORMATION ON HUMAN RESOURCES

G. Personnel:

(*a*) Submit details of the number of staff and employees and their categories and grades in the service of or to be recruited by the applicant, showing their qualifications and number of years of experience in similar jobs.

(*b*) Provide *curriculum vitae* of top management personnel of the applicant.

SECTION H
ENVIRONMENTAL CONSIDERATION

H. 1 Provide a brief description of the likely negative impact of the transmission facility on natural resources and the environment and mitigation measures proposed:

.....

.....

.....

.....

H. 2 Provide a copy of the approved environment mitigation plan (if any) by the relevant authority.

SECTION I
PERMITS FROM OTHER GOVERNMENT DEPARTMENTS OR REGULATORY AUTHORITIES

I. Permits:

Submit copies of permits or approvals issued by public or local authority or other regulatory agencies necessary for the operation of the transmission system.

SECTION J
ADVERTISING NOTICE

Attach draft copy of the notice of advertisement as to representations or objections.

SECTION K
TARIFFS

Provide a schedule of the proposed tariffs.

SECTION L

(*a*) Full names of shareholders (holding more than 5% of shares) and their holding percentages;

(*b*) Full names and occupation of Directors;

(*c*) Certificate of Incorporation; and

(*d*) Memorandum and Articles of Association.

SECTION B

COMMENCEMENT DATE, PURPOSE AND DURATION OF LICENCE

B. 1 Desired date from which the licence (if granted) is to take effect:

.....

B. 2 Duration of the licence from commencement date: .....

B. 3 Description of the purpose for which a supply is to be distributed:

.....

.....

B. 4 Type of application (issue, transfer, amendment or renewal):

.....

SECTION C

AREA TO WHICH THE APPLICATION RELATES

C. 1 Provide sufficient information (maps, etc.) of the area or areas to which the application relates:

.....

.....

.....

C. 2 Provide a list of local authorities covered by the area of distribution:

.....

.....

.....

SECTION D

TECHNICAL INFORMATION

Submit single line diagram(s) of the system by means of which the applicant intends to supply electricity. Identify any parts of that system which will not be in possession or control of the applicant. The diagram should show the applicant's points of supply (input).

D. 1 Domestic metering details:
Number of customers on— . . . . Prepayment metering;
Conventional credit metering;
Ripple control/load limiting devices;
AMR metering system.

D. 2 Commercial metering details:
Number of customers on— . . . . Conventional credit metering;
Prepayment metering;
Maximum demand metering;
AMR metering.

D.3 Industrial metering:
Number of customers on— . . . . Maximum demand metering;
Time of day metering;
Remote metering.

D. 4 Special Agreements:
Number of customers on— . . . . Maximum demand metering;
Time of day metering.

D. 5 Transformer Capacity:

		Number	*Ages*	*(kVA) Capacity*
D. 5.1	Power transformers (kV)			
D. 5.2	Distribution transformers (kV)			

D. 6 Lines:
Total Circuit length (Km) when commissioned

D. 6.1	Distribution Lines 66 kV (if not part of Transmission)			
D. 6.2	Distribution Lines 33 kV			
D. 6.3	Distribution Lines 11 kV			
D. 6.4	400/230 Volts			

D. 7 Cables:
Total Circuit length (Km) when commissioned

D. 7.1	Distribution 33 kV			
D. 7.2	Distribution Cables 11.kV			
D. 7.3	Distribution Cables LV/MV			

SECTION E

DISTRIBUTION BUSINESS

E. 1 General:

Provide projected details of the following—

	Year 1	Year 2	Year 3	Year 4	Year 5
Number of consumers					
Total kWh Sales					
Total energy (kWh) purchased					
Percentage (kWh) losses					

E. 2 Consumer Profile:

Tariff	Number of Consumers				Sales (kWh)				Total Revenue (k, 000)					Growth Rate Consumer Nos./ Sales
	Year 1	Year 2	Year 3	Year 4	Year 1	Year 2	Year 3	Year 4	Year 1	Year 2	Year 3	Year 4	Average consumer Numbers	Average Sales Growth
Domestic Urban														
Domestic Rural														
General														
Maximum Demand (Low-Voltage)														
Maximum Demand (Medium-Voltage)														
Optional Demand (Off-peak)														

E. 4 Provide details of long-term power purchase agreements:

.....

.....

.....

.....

E. 5 Attach details of proposed tariff structure for each category of consumers:

.....

.....

.....

.....

E. 6 Provide details of your policy regarding capital contribution, connexion and reconnexion charges, inspection charges, etc.:

.....

.....

.....

.....

E. 7 Provide details of proposed major maintenance programmes including expected cost and duration thereof covering the next five years:

.....

.....

.....

.....

E. 8 Provide details of major rehabilitations and modifications and dates, costs and description thereof for the next five years:

.....

.....

.....

.....

E. 9 Details of distribution expansion programme including dates, description and how much of it will be for rural electrification for the next five years:

.....

.....

.....

.....

SECTION F
FINANCIAL INFORMATION

F. 1 Income Statement:

Provide statements and annual forecasts of sales, revenues and costs. Attach copies of the current and/or budgeted balance sheet, rate of return, profit and loss account and source and application of funds for current and next two years. Indicate major cost items such as staff (as staff) costs, maintenance.

F. 2 Investment Programme:

Investment Programme for current and the next five years. Attach copies of the detailed scheme or schemes prepared by a competent engineer and mode and cost of financing such a scheme.

F. 3 Fixed Assets:

Summary of total assets of all distribution plant.

F. 4 Audited Accounts:

Provide copies of the latest audited accounts of the applicant.

F. 5 Letters of Reference from Banks:

Provide one letter of recommendation as to credit worthiness from a local commercial bank and one from a reputable international bank.

SECTION G
INFORMATION ON HUMAN RESOURCES

G. 1 Personnel:

(*a*) Submit details of the number of staff and employees and their categories and grades in the service of or to be recruited by the applicant, showing their qualifications and number of years of experience in similar jobs.

(*b*) Provide *curriculum vitae* of top management personnel of the applicant.

SECTION H
ENVIRONMENTAL CONSIDERATION

Provide a brief description of the likely negative impact of the distribution facility on natural resources and the environment and mitigation measures proposed.

SECTION I
PERMITS FROM OTHER GOVERNMENT DEPARTMENTS OR REGULATORY AUTHORITIES

Submit copies of permits or approvals issued by public or local authority or other regulatory agencies necessary for the operation of the distribution system.

SECTION J

ADVERTISING NOTICE

Attach a draft copy of the notice of advertisement as to representations or objections.

SECTION K

TARIFFS

Provide a schedule of the proposed tariffs.

SECTION L

ADDITIONAL INFORMATION

Please provide any other information which the applicant wishes to include with this application:

Where/when issued: .....

A. 8 Company Registered? (if yes attach copy of certificate).

A. 9 Company affiliated to Electrical Contractors Association? .....

A. 10 Attach copy of old Registration Certificate (if upgrading): .....

A. 11 Category in which registration is sought: .....

A. 12 If application is on behalf of a limited liability company, state the following—

(*a*) Foreign/Local Malaŵian: .....

(*b*) Paid-up capital K.....

(*c*) Date of incorporation: .....

(*d*) Place of incorporation: .....

(*e*) Name of Managing Director: .....

Address: .....
.....

SECTION B

B. 1 Give details of the technical qualifications of your staff indicating which members of your staff will be in actual control of the work and attach copy of their professional certificates.

Name	Position in Organization	Qualifications

B. 2 Give below, details of what tools, equipment and transport facilities you own and which are in sound working order and have valid certificates and are currently licensed where required:

.....
.....
.....
.....

B. 3 For those applying for upgrading only—

Give details of works completed during past three years:

Value of Contract	Class of work	Location of Project	Client

B. 4 Have you ever failed to complete any work awarded to you? If so why?

.....
.....
.....

Present number of staff employed:

Craftsmen	Supervisors (state where trained)	Labourers

B. 5 Give two names and full addresses of referees (Electrical Engineers/consultants or other relevant competent professionals) who know you or under whom you have recently carried out work (Reference letters to be attached).

.....
.....
.....
.....

SECTION C

C. 1 Are you familiar with the Laws of Malaŵi relating to your trade. If so, please list them down. Do you hold copies of these relevant legislations?

.....

.....

.....

.....

C. 2 Remarks: .....

.....

.....

.....

.....

C. 3 A council appointed official might be required to make a physical verification of the information given herein. Do you have any objections?

.....

C. 4 Declaration:

I, the above mentioned applicant, hereby solemnly and sincerely declare that the information I have given above is true in every respect to the best of my knowledge and belief and that I have read the Act and the regulations made under the Act and understanding that, if registered, I shall be bound thereby and by any amendments thereto, for as long as my name shall remain on the register.

Declared at: ....

Signature of Applicant

Before me on this ..... day of ....., 20.....

.....

Commissioner for Oaths

This declaration must be signed, in the case of an application by a limited liability company, by the Managing Director or Secretary, and in the case of a partnership, by the principal partner or where none is resident in Malaŵi, by the local representative.

C. 5 **FOR OFFICIAL USE ONLY—**

(*a*) Date Received: .....

(*b*) Date sent to the Installations Permits Committee: .....

(*c*) Date of approval of application: .....

(*d*) Allocated Contractor Identification Number: .....

(*e*) Registration Certificate Number: .....

(*f*) Receipt Number of Registration fees: .....

(*g*) Allocated MERA Working Licence Number: .....

(*h*) Remarks: .....

Dated this ..... day of ....., 20.....

.....

Chief Executive Officer
Malaŵi Energy Regulatory Authority (MERA)

THIRD SCHEDULE

MINIMUM SECTION CLEARANCE

by-laws 29, 113 and 115

Normal operating voltage between bare line conductors—	Minimum clearance from any point on or about the permanent equipment where a man may be required to stand (measures from the position of the feet).	
	To the nearest unscreened live Conduct in air	To the nearest part not at earth potential of an insulator supporting a live conductor
	Metres	*Metres*
1. Not exceeding 15,000 volts	2.5	2.4
2. Exceeding 15,000 volts but not exceeding 33,000 volts . .	2.7	2.4
3. Exceeding 33,000 volts but not exceeding 44,000 volts . .	2.9	2.4
4. Exceeding 44,000 volts but not exceeding 66,000 volts . .	3.0	2.4
5. Exceeding 66,000 volts but not exceeding 88,000 volts . .	3.2	2.4
6. Exceeding 88,000 volts but not exceeding 110,000 volts . .	3.4	2.4

7. Exceeding 110,000 volts but not exceeding 132,000 volts . .	3.6	2.4
8. Exceeding 132,000 volts but not exceeding 165,000 volts . .	3.8	2.4
9. Exceeding 165,000 volts but not exceeding 220,000 volts . .	4.3	2.4
10. Exceeding 220,000 volts but not exceeding 275,00 volts . .	4.6	2.4
11. Exceeding 275,000 volts but not exceeding 330,000 volts . .	5.2	2.4

NOTES—

(*a*) The above provisions concern the means of access for works which are permanently available, such as fixed ladders or platforms attached to structures. The means of access shall also comprise the structures themselves and the tops of circuit-breakers or transformers if a man is required to stand on them to carry out work. The provisions do not apply to portable ladders, cradles or similar equipment, the use of which is governed by the general instructions issued by the consumer in accordance with by-law 13.

(*b*) Portable ladders and platforms specially designed for specific maintenance work and so arranged that they cannot readily be employed in any way other than that intended, shall be considered as permanent means of access for the purpose of safety clearance.

FOURTH SCHEDULE

REPUBLIC OF MALAŴI

ELECTRICITY ACT

(Cap. 73:01)

ELECTRICITY BY-LAWS

Minimum Heights of Overhead Lines by-law 48

Normal operations voltage between line conductors—

	Over roads normally accessible to vehicular traffic	*In any position except where otherwise specified in these By-laws*
(*a*) not exceeding 650 volts	5.5 metres	4.9 metres
(*b*) exceeding 650 volts but not exceeding 33,000 volts . .	5.8 metres	5.2 metres
(*c*) exceeding 33,000 volts but not exceeding 88,000 volts . .	6.1 metres	6.1 metres
(*d*) exceeding 88,000 volts but not exceeding 132,000 volts	6.7 metres	6.7 metres
(*e*) exceeding 132,000 volts but not exceeding 275,000 volts	7.0 metres	7.0 metres
(*f*) exceeding 275,000 volts	7.3 metres	7.3 metres

FIFTH SCHEDULE

Minimum Heights of Overhead Lines Crossing Railway Tracks

by-laws 49 and 135

Normal operating voltage between line conductors height—	*Minimum above rail*
1. Not exceeding 33,000 volts	7.6 metres
2. Exceeding 33,000 volts but not exceeding 88,000 volts . .	7.9 metres
3. Exceeding 88,000 volts but not exceeding 132,000 volts . .	8.5 metres
4. Exceeding 132,000 volts but not exceeding 275,000 volts . .	8.8 metres
5. Exceeding 275,000 volts but not exceeding 330,000 volts . .	9.1 metres

SIXTH SCHEDULE

PART I

Fundamental Units

by-laws 62 and 63

The fundamental electrical units are the units agreed as such at an international conference on electrical units and standards held in London in October, 1908 (the magnitude thereof being determined on the electro-magnetic system of measurement, with reference to the centimetre as the unit of length, the gram as the unit of mass and the second as the unit of time), and compromising—

(*a*) the ohm, the unit of electrical resistance, the value thereof being one thousand million in terms of the centimetre and the second;

(*b*) the ampere, the unit of electrical current, the value thereof being one tenth in terms of the centimetre, the gram and the second;

(*c*) the volt, the unit of electro-motive force, the value thereof being one hundred million in terms of centimetre, the gram and the second.

PART II

Denominations of Standards

1. Electrical Resistance:

A standard of electrical resistance denominated one ohm, agreeing in value within the limits of accuracy specified in Part III with that of the fundamental unit in paragraph **(***a***)** of Part I, and being the resistance between the copper terminals of the instrument marked "Board of Trade Ohm Standard Verified 1894 and 1909" to the passage of an unvarying electrical current, when the coil of insulated wire forming part of the instrument aforesaid is in all parts at a temperature of fourteen point decimal nine degrees centigrade.

2. Electrical Current:

A standard of electrical current denominated one ampere, agreeing in value within the limits aforesaid with that of the fundamental unit in paragraph **(***b***)** of Part I, and being the current which is passing in and through the coils of wire forming part of the instrument marked "Board of Trade Ampere Standard Verified 1894 and 1909" when, on reversing the current in the fixed coils, the change in the forces acting on the suspended coil in its sighted position is exactly balanced by the force exerted by gravity in Teddington in the United Kingdom upon the iridioplatinum weight marked A and forming part of the said instrument.

3. Electrical Pressure:

A standard of electrical pressure denominated one volt, agreeing in value within the limits aforesaid with that of the fundamental unit in paragraph **(***c***)** of Part I, and being one-hundredth part of the pressure which, when applied between the terminals forming part of the instrument marked "Board of Trade Volt Standard Verified 1894 and 1909 and 1948", causes that rotation of the suspended portion of the instrument which is exactly measured by the coincidence of the sighting wire with the image of the fiducial mark A before and after the application of the pressure, and with that of the fiducial mark B during the application of the pressure, these images being produced by the suspended mirror and observed by means of the eye-piece.

4. The coils and instruments referred to herein are deposited at the National Physical Laboratory' at Teddington, Middlesex, in the United Kingdom.

PART III
Limits of Accuracy

The limits of accuracy attainable in the use of the standards denominated in Part II are—

(*a*) for the ohm, within one-hundredth part of one per centum;

(*b*) for the ampere, within one-tenth part of one per centum; and

(*c*) for the volt, within one-tenth part of one per centum.

PART IV
Derived Electrical Unit of Energy

The derivation of the kilowatt-hour as the lawful electrical unit for the measurement of electricity shall be from the fundamental units described in Part I of this Schedule. Thus one watt (the practical unit of power) shall be equal to the amount of energy expended per second by an unvarying current of one ampere with a steady applied voltage

of one volt. For the purpose of expressing watts in terms of voltage and resistance, or current and resistance, the steady voltage applied to a constant resistance shall be equal to the unvarying current in amperes multiplied by the value of the resistance in ohms.

In an alternating-current circuit the product of the instantaneous value of the amperes and the volts represents the instantaneous value of the power and the algebraic mean value of the instantaneous values over one second shall be the power in watts provided that the frequency is fifty cycles per second. One watt-hour shall be equal to the energy expended in one hour when the power is one watt, and a kilowatt-hour shall be equal to one thousand watt-hours.

SEVENTH SCHEDULE

Minimum Section Clearance

by-laws 87, 113 and 115

Normal operating voltage between bareline conductors—	Minimum clearance from any point on or about the permanent equipment where a man may be required to stand (measures from the position of the feet).	
	To the nearest unscreened live Conduct in air	To the nearest part not at earth potential of an insulator supporting a live conductor
	Metres	*Metres*
1. Not exceeding 15,000 volts	2.5	2.4
2. Exceeding 15,000 volts but not exceeding 33,000 volts	2.7	2.4
3. Exceeding 33,000 volts but not exceeding 44,000 volts	2.9	2.4
4. Exceeding 44,000 volts but not exceeding 66,000 volts	3.0	2.4
5. Exceeding 66,000 volts but not exceeding 88,000 volts	3.2	2.4
6. Exceeding 88,000 volts but not exceeding 110,000 volts	3.4	2.4
7. Exceeding 110,000 volts but not exceeding 132,000 volts	3.6	2.4
8. Exceeding 132,000 volts but not exceeding 165,000 volts	3.8	2.4

9. Exceeding 165,000 volts but not exceeding 220,000 volts	4.3	2.4
10. Exceeding 220,000 volts but not exceeding 275,000 volts	4.6	2.4
11. Exceeding 275,000 volts but not exceeding 330,000 volts	5.2	2.4

NOTES—

(*a*) The above provisions concern the means of access for works which are permanently available, such as fixed ladders or platforms attached to structures. The means of access shall also comprise the structures themselves and the tops of circuit-breakers or transformers if a person is required to stand on them to carry out work. The provisions do not apply to portable ladders, cradles or similar equipment, the use of which is governed by the general instructions issued by the consumer in accordance with by-law 13.

(*b*) Portable ladders and platforms specially designed for specific maintenance work and so arranged that they cannot readily be deployed in any way other than that intended, shall be considered as permanent means of access for the purpose of safety clearance.

EIGHTH SCHEDULE

Minimum Requirements for Protection of Private Generation

by-laws 152 and 159

PART I

Switchboard Supply Controls and Protective Apparatus

System of Supply	*Number of poles to be broken by circuit-breaker or Switch*	*Position of circuit-breaker of fuse*
1. Two-wire, alternating current or direct current, earthed at either pole	1	In non-earthed conductor
2. Two-wire, alternating current or direct current, not earthed at either pole	2	In each conductor
3. Three-wire, single-phase, alternating current or direct current	2	In each outer conductor
4. Three-wire, three-phase, alternating current or four-wire, three-phase alternating current.	3	In each non-earthed conductor

PART II

Instrumentation for a Switchboard

	Type of System	*One Generator Only*	*More than One Generator*
1.	Two-wire, alternating or direct current	(*a*) an ammeter; and	(i) an ammeter for each generator
		(*b*) a voltmeter.	(ii) a voltmeter to measure the voltage of any generator; and
			(iii) if generators are paralleled, a voltmeter to measure the busbar voltage.
2.	Three-wire, single-phase, alternating current or direct current	(*a*) an ammeter to measure the current in each outer conductor; and	(i) an ammeter for each generator to measure the current in each outer conductor;
		(*b*) two voltmeters, each connected between an outer conductor and neutral.	(ii) two voltmeters, each connected between an outer conductor and neutral of the busbars; and
			(iii) if generators are paralleled, two voltmeters, each connected between an outer conductor and neutral, to measure the voltage of any of the two generators.
3.	Three-wire, three-phase, alternating current or four-wire, three-phase, alternating current	(*a*) an ammeter to measure the current in each phase; and	(i) an ammeter for each generator to measure the current in each phase;
		(*b*) a voltmeter to measure the line voltage.	(ii) a voltmeter to measure the line voltage of each generator; and
			(iii) if generators are paralleled, a voltmeter to measure the busbar voltage.

NINTH SCHEDULE

Minimum Distances Between Power Lines and Wayleaves

by-law 175

	Power Line Voltage	*Length between parallel power lines (metres)*	*Wayleave (metres)*
1.	Not exceeding 11,000 volts (11 kV)	5	10
2	Exceeding 11,000 volts but not exceeding 22,000 volts (22 kV)	12	15
3.	Exceeding 22,000 volts but not exceeding 33,000 volts (33 kV)	14	20
4.	Exceeding 22,000 volts but not exceeding 33,000 volts (33 kV) (H-pole)	14	30
5.	Exceeding 66,000 volts but not exceeding 88,000 volts (88 kV)	15	30
6.	Exceeding 88,000 volts but not exceeding 132,000 volts (132 kV)	25	30
7.	Exceeding 132,000 volts but not exceeding 275,000 volts (275 kV)	32	47
8.	Exceeding 275,000 volts but not exceeding 330,000 volts (330 kV)	35	50
9.	Exceeding 330,000 volts but not exceeding 400,000 volts (400 kV)	35	55
10.	Exceeding 400,000 volts but not exceeding 420,000 volts (420 kV)	35	55
11.	Exceeding 420,000 volts but not exceeding 500,000 volts (500 kV)	40	60
12.	Exceeding 500,000 volts but not exceeding 533,000 volts (533 kV)	40	60
13.	Exceeding 533,000 volts but not exceeding 765,000 volts (765 kV)	40	60
14.	765,000 volts and above (765 kV)	60	80

TENTH SCHEDULE

QUALITY OF SERVICE AND SUPPLY STANDARDS

by-laws 65 and 180

1.0 BACKGROUND

The Minimum Standards for Electricity Supply Industry (ESI) shall provide the industry in Malaŵi the basis for checking to ensure that the quality of electricity supplied conforms to the acceptable minimum standards for normal operation of electricity dependent processes of customers.

Based on these standards, quality of supplies in the country shall be checked on a continuous basis. Compliance with the standards shall be checked using measurement and reporting procedures specified herein for both licensees and consumers.

2.0 MINIMUM QUALITY STANDARDS

2.1 Quality of Service Parameters:

Quality of Service Standards specifies requirements for monitoring and reinforcing reliability of electricity supply. This includes minimum times for clearing various faults on the network and monitoring frequency of forced and planned interruptions on the system.

2.2 Quality of Service and Reliability Objectives:

(*a*) Each licensee shall maintain procedures to meet service levels established herein.

(*b*) In the event that service must be interrupted for purposes of working on the lines or equipment, the licensee's work procedure shall provide that an attempt be made to—

(i) do the work at a time which will cause minimal inconvenience to customers; and

(ii) where reasonable and practicable, provide notice to customers in advance about the interruption.

(*c*) The licensee shall keep a record of those instances where it is not reasonable or practical to provide advance notice.

2.3 Quality of Supply Parameters:

Qualities of Supply (QOS) parameters have been defined for both licensees responsible for generation, transmission and distribution in order for them to co-ordinate their contractual relationships with each other and between distributors and end customers. The characteristics of electric power that detract from its quality include momentary interruptions, waveform irregularities and voltage variations, which are either prolonged or transient.

Minimum standards for each one of the parameters have been developed. This minimum level shall represent the lower threshold of adequate service below which further review analysis and corrective action may be required by the licensee. The measured and assessed levels of these QOS parameters will then be compared to these minimum standards. The immunity levels of licensee and customers equipment are set at a percentage above the defined minimum or maximum nominal standards.

2.4 Quality of Power Supply Objectives:

Each licensee shall consider power quality in the design of power delivery system. It shall also strive to avoid and to mitigate to the extent feasible and cost effective, power quality disturbances under its control that adversely affect customers properly designed processes and equipment.

Each licensee shall, as a minimum, maintain a power quality programme that includes its performance objectives and procedures. The programme should be designed to respond promptly to customer reports of power quality problems.

3.0 CUSTOMER COMPLAINTS

Each licensee will receive customer service complaints and that licensees and their customers will be expected to resolve the problem between themselves first. Only those issues, which have not been successfully resolved between the licensees and their customers, as well as those between licensees, can be referred to the Authority for arbitration.

4.0 REPORTING PROCEDURES

In cases where the licensee has already been collecting the required information for a number of years, it is relatively easy to use the same information for the performance review plan. The performance requirements, reporting formats and the definition of the data will have to be agreed upon between the Authority and the licensee concerned.

4.1 Annual Report:

Each licensee shall file a report with the Authority by the end of each calendar year that includes the following information—

(*a*) An overall assessment of the reliability performance cooperate wide in each of the licensee's operating area in relation to the minimum standards set for interruption frequency and duration.

(*b*) A status report on the power quality programme including data on the number of power quality complaints received during the year and the number of power quality

investigations conducted during the year. Copies of monthly and quarterly circuit analysis reports by the company can be used.

(*c*) A list of circuits' performance by operating area based on applicable forced outage performance indicators (AFIk, TITk, CAIDI, SAIFI, SAIDI, FIU and TIU) for the calendar year.

4.2 Under Achievements of Base line Target:

When a licensee data for a given operating area does show that performance has gone down, the licensee will prepare a report to the Authority. This report should analyze the interruption patterns and trend as well as the maintenance history of the affected operating area and describe the problem causing the unacceptable performance and the action the licensee is taking to resolve them. The report shall contain target dates for completion of corrective action.

4.3 Assessment Method:

Faults centers as well as consumers shall keep record of the date, time and duration of all reported interruptions. As far as practicable, the reported interruptions shall be corrected and related with the known disturbances on the network. Samples of fault-reporting format for operators are appended with these standards as attachment.

Operators shall submit to the Authority annual reports based on these recordings in order for the Authority to analyze licensee service quality performance. The Authority may request interim reports from licensees if required.

The Authority shall monitor continuously the reliability of the supply on a network sample basis using specialized equipment and data that shall be recorded and compiled annually. A report will be published based on the findings indicating the extent of compliance to these standards and the comparative performance of the concerned network.

If a consumer complains of non-compliance with quality of service standards by the operator, the issue shall first be settled between the operator and the consumer. If the issue is not resolved and has been referred to the Authority for resolution, the Authority shall put specialized equipment on a section of the network to verify and resolve the complaint.

5. 0 COST OF INVESTIGATIONS

The cost of investigations carried out by the Authority to determine non-compliance with standards during disagreements between licensees, and between licensees and consumers, will be borne by the Authority. After determination, the cost will be charged to the party found guilty.

QUALITY OF SERVICE STANDARDS

1.0 PURPOSE

The Authority sets the minimum standards for the quality of electricity services supplied by Malaŵian utilities to end customers. They are intended to provide the Authority with means of evaluating and monitoring reliability of electricity supply in Malaŵi. This include minimum fault clearing time on the distribution network and maximum number of forced and planned interruptions for each category of the MV and LV distribution networks. While some key parameters of quality of service are measurable, overall quality of service includes many aspects that cannot be readily measured. Target standards for these have been established, which should be achieved under normal circumstances.

2.0 DEFINITIONS

2.1 "interruptions" refer to an occurrence when one or more phases of supply to a customer or a group of customers are disconnected for a defined period exceeding 3 minutes.

2.2 "planned interruptions" refer to an occurrence when a component is deliberately taken out of service by a utility or its agent at a selected time, usually for the purpose of a construction or for preventive maintenance or repair.

2.3 "forced interruptions" refer to an occurrence when a component is taken out of service immediately, either automatically or as soon as switching operations are performed as a direct result of emergency conditions, or an interruption caused by improper operation of equipment or human error.

2.4 "equipment failure" refers to interruptions that result from electric breakdown or mechanical failure of any plant.

2.5 "operational causes" refer to interruptions from operational action or from the operation of protection control equipment including interruption caused by lack of preventive maintenance.

2.6 "third party causes" refer to interruptions that result from damage to licensee's equipment by another party, such as theft of conductors, vandalism, motor vehicle accidents, customers protection device failure.

2.7 "natural events" refer to interruptions that result from lightning, windstorms, fire and other natural events, including those caused by birds or animals directly.

2.8 "low-voltage (LV)" means normal operating voltage exceeding 30 volts AC and/or 50 volts direct current but not exceeding 250 volts.

2.9 "medium-voltage (MV)" means normal operating voltage exceeding 250 volts but not exceeding 650 volts.

2.10 "high-voltage (HV)" means normal operating voltage exceeding 650 volts.

3.0 SERVICE QUALITY AND RELIABILITY STANDARDS

The following performance indices for measuring frequency and duration of interruptions have been developed and comply with the International Electrotechnical Commission (IEC) standards. These are universally recognized standard definitions and shall be applied to the entire distribution system, operating areas, sub-operating areas or individual circuits.

3.1 Frequency and Duration of Forced Interruptions Per Year:

Interruptions of duration less than 3 minutes or due to *force majeure* are not considered. Major events shall be considered separately.

The standards are implemented in phases. Improving gradually towards internationally acceptable standards. The AFIk and TITk indices (described below) are applied in the transition stage. After the transition stage (year 2) more detailed (SAIFI, SAIDI and CAIDI indices) are used as specified below. In this period DisCos are expected to carry out necessary improvements and adjust their information system to comply with SAIFI, SAIDI and FAIDI indices.

Stage I, Phase I

In Phase I of Stage I global values shall be used as follows—

(*a*) System Average Interruption Index:

AFIk = (Average Frequency of Interruptions per kVA)

= Sum [kVA disconnected during outage/Total installed kVA]

Average frequency of interruptions per unit (kVA) of distribution transformation capacity installed. AFIk specifies the number of times a unit of installed distribution transformation capacity is interrupted.

(*b*) Customer Average Interruption Duration Index:

TITk = (Total Interruption Time per installed kVA)

= Sum [(kVA disconnected during outage) × (Duration of outage)/ Total installed kVA].

Total interruption time per unit of installed capacity. TITk specifies the average amount of time a unit of installed distribution transformation capacity is disconnected.

Stage I, Phase II

Phase II of Stage I shall use more detailed indicators and DisCos shall be required to improve carry-out improvements and adjust their information system to comply with the standards specified below: Global values shall be used as follows—

(*c*) System Average Interruption Index:

The average number of times that a customer is interrupted in a year.

SAIFI = (System Average Interruption Frequency Index)

= Sum [Customers disconnected by outage/Total customers in system]

(*d*) Customer Average Interruption Duration Index:

This index defines an average interruption duration time for those customers that experience an interruption during the year. This index provides a basis of estimating the average length of time required to complete service restoration.

SAIDI = (System Average Interruption Duration Index)

= Sum [(Customers disconnected by outage) × (Duration of outage)/ Total customers in system].

CAIDI = (Customer Average Interruption Duration Index) it specifies the average outage duration experienced by a customer defined by the following formula—

= SAIDI/SAFI

Compatibility levels shall be as specified in Tables 4–6 below.

Table 4–6

	Yearly Values Excluding External Events											
	Stage I									Stage II		
	Year 1			Year 2			Year 3 Use SAIDI and SAIFI			Objective		
	Urban Service	Rural Service	System Equivalent	Urban Service	Rural Service	System Equivalent	Urban Service	Rural Service	System Equivalent	Urban Service	Rural Service	System Equivalent
AFIk/ SAIFI (events)	8.0	10.0	9.4	7.0	9.0	8.4	7.0	8.0	7.7	6.0	7.0	6.7
TITk/ SAIDI (hours)	16.0	30.0	25.8	14.0	27.0	23.1	12.0	20.0	17.6	9.0	17.5	15.0
CAIDI (hours)	2.0	3.0	2.7	2.0	3.0	2.7	1.7	2.5	2.3	1.5	2.5	2.2

Stage II:

The final stage moves DisCos to International Standards where individual customer indices (FIU and TIU), as defined below, are used. The Discos are expected to have implemented necessary improvements and adjusted their information system to provide all necessary data.

(*e*) Customer Average Interruption Index:

FIU = (Frequency of Interruptions experienced by individual customer within a fiscal year).

(*f*) Customer Average Interruption Duration Index:

TIU = (Total duration, cumulative, of Interruptions experienced by individual customer within a fiscal year).

Compatibility levels shall be as specified in Table 4–7 below.

Table 4–7

	Yearly Values Excluding External Events				
	Stage II				
	Low-Voltage Customers		*Medium-Voltage Customers*		*High-Voltage Customers*
	Urban Service	Rural Service	Urban Service	Rural Service	All Service
TIU (hours)	6.0	8.0	4.0	6.0	3.0
TIU/FIU (hours)	12.0	24.0	8.0	12.0	6.0
FIU (events)	2.0	3.0	2.0	2.0	2.0

NOTE: The numbers and durations are for overhead distribution lines and assume bare conductor. These figures shall also apply where aerial bundled conductor (ABC) is used. Generally better performance is expected from ABC.

3.2 Establishment of Service Level Performance Values:

The Authority shall verify the actual numerical values for the service quality and reliability indices provided in tables 4–6 and 4–7 above before using them. Minimum levels shall be assigned to each operating area of the licensee. Factors to be considered to guide the establishment of the indices shall include physiographic, demographic and load characteristics

of an operating area and relative performance of an operating area in relation to other operating areas within a given licensee franchise area.

3.3 Penalty:

Non-compliance to the service quality standards by a Licensee shall attract a penalty charge equal to the cost of energy not supplied. The cost of the unsupplied energy shall be calculated based on the tariffs (measured in Malaŵi Kwacha/kWh) applicable to affected customer(s). The penalty shall be used to compensate affected customers. Each in proportion to its annual consumption.

Global indemnification (INIG) shall be used to compensate all customers where customers are affected in general and is defined as follows—

INIG = Maximum of {ENS system_t, ENS system_f} × VENS.

Where ENS system_t	=	Estimated Energy not supplied to the customers in terms of TITk
	=	E system × (TITk – TIT limit)/8760.
ENS system_f	=	Estimated Energy not supplied to the customers in terms of AFIk.
	=	E system × {(AFIk – AFIk limit) × (TITk/AFIk)/8760}.
E system	=	Energy billed during the monitoring period (year) in kWh.
VENS	=	Value of energy not served (used in computation of electricity rates in K/kWh.)

After information system is fully established, three years later INIG shall be calculated in terms of SAIFI and SAIDI and in terms of TIU and FIU in the final phase as determined by the Authority and agreed by the Licensee.

3.4 Tariff Implications:

A Licensee shall be allowed to increase the level of investment to enable supply of services consistent to these standards. Tariff restructuring shall therefore be recommended to enable the Licensee collect adequate revenue to make such investments.

4.0 STANDARD GUIDELINES FOR THE QUALITY OF OTHER SERVICE PARAMETERS

(*a*) General:

The following service standards shall be applied and achieved by a licensee.

(*b*) Processing of Request for Service:

A licensee is required to connect its customers within the time frame (number of days) specified in Table 4–4 below, which is based on whether network extensions are required and the size of the new demand to be connected. The last two columns specify time frames where network extension within 100 m is required. A response to a customer shall indicate expected date for the provision of the service.

Table 4–4

Time frame for Compliance (Days from receipt of payment)

	Where extension is not required		*Where extension of less than 100 m is required*	
	Stage I	Stage II	Stage I	Stage II
Urban/sub-urban demarcated areas	6	3	15	7
Urban/sub-urban un-demarcated areas . .	10	5	20	10
Isolated Rural Areas	20	10	30	15

Where works are required to extend the existing network beyond the 100 m limit, a Licensee shall conduct a study to work out a budget and time frame for the works. The study shall be provided within thirty days. Upon agreement with the customer the Licensee shall proceed with the works after payment of a contribution by the customer. After works are completed the Licensee shall complete the connexion in five days.

(*c*) Customer Commercial Complaints:

(i) The number of complaints received by a licensee shall not exceed an average of 10% of the total customers connected in a system within the first stage and reducing to 5% in the final stage.

(ii) The time in days taken to process customers' commercial complaints shall not exceed seven calendar days if the complaint is related to the supply of electricity and thirty calendar days if it is of public liability in nature during Stage I. The period shall be reduced to three days in Stage II.

The Licensee shall endeavor to resolve ninety per cent of general complaints without further referral.

(*d*) Telephone response times at emergency/fault Reporting Centers:

Ninety per cent of telephone requests for information shall be dealt with within five minutes.

(*e*) Replacement of Electric Consumption Meter:

Meters shall be replaced if when tested are found to have errors of more than 3% for low consumption measurements (MD < 10 kW), 2% for medium consumption measurements (MD > 10 kW) and 1% for higher consumption measurements where a customer is connected at voltages higher than 11 kV.

All meters shall be checked at least every six years or at the request of the customer. In the latter case, if the meter is found within specifications, the licensee shall charge a reasonable fee to the customer. If the meter is found with an error the last measurement that was deemed correct shall be used for the estimation of the current consumption.

(*f*) Disconnexion of Supply and Penalties for non-Payment—

(i) Disconnexions:

A licensee shall send written notices of termination of service before disconnecting a customer from the service. The notice shall be tendered fourteen days after the due date indicated on the bill. A minimum of forty-eight hours notice shall be given to all consumers before disconnexion. An exemption to this rule shall include the following—

- If an immediate condition dangerous or hazardous to life exists.
- If order to terminate has been issued by any Court or any duly authorized public authority
- Illegal use of electricity for instance, in cases where such service is obtained diverted or used without the authority or knowledge of the licensee.

Dealing with non-payment:

- No disconnexion shall be effected until after fourteen days after the due date written on a bill.
- Commercial and industrial customers shall be given at least forty-eight hours notice of an impending disconnexion using major circulation newspapers or other means. The Authority shall monitor failure to give notification of scheduled disconnexions.

- Disconnexions shall be carried out in the morning hours only and during normal working days.
- Disconnexions shall not be carried out over the weekend and public holidays.

(ii) Reconnexion (After paying penalties):

Where a service is discontinued and the cause has been remedied and the penalty paid by the customer, the customer shall be reconnected by the first working day after settling the account and paying the reconnexion fee and within 24 hours.

(iii) Penalties:

A licensee shall be charged a fine determined by the Authority for repeated non-compliance based on records.

- Planned Interruptions without Proper Warning:

  All planned interruptions without proper warning shall be deemed as forced interruptions and their duration shall be counted towards the calculation of the reliability statistics and compensation for poor quality.

- Billing Errors:

  A licensee shall charge an uncontested amount only and later if proven correct, shall correct the difference with interest.

- Connexion Delays:

  The Authority shall determine a fine for repeated offences.

QUALITY OF SUPPLY STANDARDS FOR DISTRIBUTION NETWORK

1.0 PURPOSE

This standard specifies the minimum acceptable limits for voltage dips, voltage harmonics, voltage imbalance, voltage regulation and voltage flicker. The standard recommends network planning levels and Power Quality (PQ) process parameters for use by Licensees and Customers in planning to achieve the required compatibility at points of common coupling.

The minimum standards are intended to be used by licensees, customers and the Authority as criteria for compliance or non-compliance with acceptable PQ standards.

Where specific network conditions make it difficult to meet the minimum acceptable limits for declared reasons, for example where the electrical infrastructure is under development, a licensee

may deliver levels of specified PQ parameters below the minimum requirement as agreed between the licensee and the customer, with the exception of voltage regulation and frequency.

Where measured PQ parameters indicate that the minimum standards have not been achieved at a particular site, or where a PQ sensitive customer requires an enhanced PQ, countermeasures can be considered. Such countermeasures might include the installation of compensation equipment within the customer's network by mutual agreement between the licensee and the customer, including the relative allocation of costs where such an installation is found to be more practical or cost effective than an installation on the licensee's networks.

The licensee shall be deemed to have supplied the required PQ, even if the standards are not achieved at the point of common coupling, if the countermeasures installed within the customer's network have resulted in an acceptable PQ being provided to sensitive loads.

2.0 DEFINITIONS AND ABBREVIATIONS

"customer" means a person or legal entity that has entered into an electricity supply agreement with a licensee;

"declared voltage" means the voltage declared by the licensee as the voltage at the of supply;

"developing network'' means a network, the construction of which has not yet reached the initially planned configuration, and from which temporary or early supply is made available to customers by agreement, in order to avoid delayed service availability;

"extra-high-voltage (EHV)" means the set of nominal voltage levels that are used in power systems for bulk transmission of electricity in the range Un > 220 kV;

"frequency" means the frequency of alternating voltage generated by power system generators:

"high-voltage (HV)" means the set of nominal voltage levels that are used in power systems for bulk transmission of electricity in the range 650 V < Un < 220 kV;

"interruption" means a phenomenon that occurs when one or more phases of a supply to a customer or group of customers are disconnected for a period exceeding 3 minutes;

"licensee" means a body licensed to generate, transmit or distribute electricity.

"low-voltage (LV)" means normal operating voltage exceeding 30 volts AC and/or 50 volts direct current but not exceeding 250 volts;

"medium-voltage (MV)" means normal operating voltage exceeding 250 volts but not exceeding 650 volts;

"measurement period" means the minimum period of time for taking a measurement. Normally, a full week (5 working days and a week-end); and

"measurement interval (k)" means the minimum period of time for recording instantaneous values of each parameter. Normally 15 minutes and 10 minutes intervals are specified;

"monitoring period" monthly periods during which several areas in the network shall be covered;

"planning level" means the level to which a licensee designs its networks when it evaluates the impact on the supply system of all loads connected to the system. These levels might change from network to network, depending on network structure and circumstances, and are typically lower than the compatibility level;

"point of common coupling (PCC)" means the point of a public supply network electrically nearest to a particular consumer's installation, and at which other consumer installations are, or may be connected;

"power quality (PQ)" means technical parameters to describe the electricity supplied to customers, and that are used to determine the extent to which the needs of customers are met in the utilization of electricity;

"physical points" means the points in the electricity supply network which have been categorized for the purpose of monitoring PQ;

"rural" means clustered or scattered structures, usually of low-density, not served by a well-established infrastructure (roads, telecommunication, etc.). Usually supplied with power through radial overhead lines emanating from one distribution station;

"standard voltage" means a phase voltage of 230 V measured between a phase conductor and a neutral conductor, or a line voltage of /3 × 230 V measured between phase conductors;

"ten minute r.m.s. value" means the average (root mean square) value of all the samples taken during a 10 minute period;

"urban" means formally or informally built structures, usually of high-density, served by a well-established infrastructure (roads, telecommunication, etc.). The power network is usually supplied by more than one distribution station;

"voltage dip" means a sudden reduction in the r.m.s. voltage on any or all of the phase voltages of a single-phase or a poly-phase supply;

"voltage flicker" means the modulation of the amplitude of the supply voltage, perceived by the observer as a fluctuation of light intensity in electric lighting;

"voltage harmonics" means the sinusoidal components of the fundamental waveform (i.e. 50 Hz) that have a frequency that is an integral multiple of the fundamental frequency;

"voltage regulation" means the ability of the steady-state r.m.s. voltage to remain between the upper and lower limits;

"voltage imbalance" means the voltage imbalance that arises in a poly-phase system when the magnitudes of the phase voltages or the relative phase displacements of the phases (or both) are not equal.

3.0 THE SUPPLY STANDARDS

Standard 3–1—

Voltage Regulation (%):

Voltage regulation refers to the absolute value of the difference between the average of the effective instantaneous values (RMS) of the voltage measured at the point of delivery, and the value of the nominal voltage at the same point expressed as a percentage of the nominal value at that point where:

Voltage Regulation (% Vk) is defined below as—

Ave. RMS measured voltage (Vk) – Nominal voltage (Vn)/Vn × 100.

Voltage regulation shall be limited to a maximum value of ±6%. Measurements shall be carried out at 15 minutes intervals for a minimum period of 7 days for an individual case or complaint. Overall system performance shall be established for a Monitoring Period of not less than 6 months.

Compliance:

System performance shall be deemed to be compliant to voltage regulation standard if Equivalent Frequency of Voltage Deviation (EFVD), defined as the percentage of measurements with voltage deviation outside the specified bandwidth, is equal to or less than 5%. Penalties shall be charged if EFVD exceeds 5%.

Where	EFVD	=	{NRV_ob/NRV}
	NRV_ob	=	Number of registered values outside the bandwidth.
	NRV	=	Sum of registered values.
			The standard bandwidths for the voltage shall be ±6%.

Penalties (In two scenarios):

Scenario I—

Indemnification for Poor Voltage Regulation (IVR) (where affected customers are known).

The Licensee shall make correction within (5 days), repair damaged equipment and pay affected customers indemnification if no correction is done within the five days limit or as may be determined.

Where IVR = CAT × EFE_ob × ADE × ED × Wf.

and CAT = Tariff (K/kWh) of affected customers.

ED = Excess Days to correct the problem.

Wf = Weighing factor.

ADE = Average Daily Energy consumption in kWh from last bill for the affected customers.

EFE_ob = ES_ob/TES.

(Equivalent Frequency of Energy supplied outside the voltage bandwidth specified above).

ES_ob = Energy supplied outside the bandwidth during the measuring period.

TES = Total Energy supplied during the period.

The weighting factor (Wf) ranges from (0.4 to 10) and is adjusted based on impact of non-compliance. Table 3–1–2 below refers—

Table 3–1–2

Permissible Voltage Unbalance (%)

Average deviation above (below) the voltage band	Wf
≤ 1%	0.4
≤ 2%	0.8
≤ 4%	2.0
≤ 6%	4.0
≤ 8%	6.0
≤ 10%	10

Scenario 2 (Global Non-Compliance)—

Sanction for Poor Voltage Regulation (IVRg), where voltages have generally been outside the bandwidth). Proceeds are used to compensate the customers in proportion to electric service payments (consumption).

Where IVRg = ATc × EFE_ob × TESc × Wf (Global indemnification).

and ATc = Average Tariff (K/kWh) for the company.

TESc = Total Energy supplied during the control periods being considered (kWh).

Standard 3–2—

Voltage Imbalance in Three-Phase Services—

Voltage imbalance shall be defined by the following formula:

Voltage Regulation (%) = 3(Vmax. – Vmin.)/(Va + Vb + Vc) * 100.

And Vmax. = Maximum voltage recorded during a measuring interval (k).

Vmin. = Minimum voltage recorded during a measuring interval (k).

Va = Voltage of Phase A recorded during a measuring interval (k).

Vb = Voltage of Phase B recorded during a measuring interval (k).

Vc = Voltage of Phase C recorded during a measuring interval (k).

Compliance:

System performance shall be deemed to be compliant to voltage imbalance standard if during the Measurement Period 5% of the measurements taken, voltage imbalance is equal or less than 3% for system voltage rating of up to 11 kV, and 1% at higher voltage rating. Penalties shall be charged if more than 5% of the measurements taken, voltage imbalance exceeds the limits.

Penalties:

The licensee shall make correction within 5 days and be liable to related damages. If the fault is due to customer installation, time shall be fixed to make correction or be disconnected. Where the imbalance causes grave impact to affect other customers on the system, the licensee shall pay a penalty and be reimbursed by the responsible customer.

Indemnification for Voltage Imbalance (IVU) to affected customers.

Where IVU (Kwacha) = ADE × ED × AT × Wf.

and AT = Average Tariff (K/kWh) for the company.

ED = Excess Days to correct the problem.

Wf = Weighing factor.

ADE = Average Daily Energy consumption in kWh from last bill for the affected customers.

The weighing factor (Wf) ranges from 0.5 to 10 and is adjusted based on impact of non-compliance. Table 3–2–2 below refers—

Table 3–2–2

Average deviation beyond the acceptable values	Wf
≤ 1%	0.5
≤ 3%	2.0
≤ 5%	5.0
≤ 7%	8.0
≤ 7%	10

Standard 3-3—

Voltage Harmonic Distortion:

Voltage Harmonic Distortion shall be measured in terms of Total Harmonic Voltage Distortion (THVD) and Individual Harmonic Voltage Distortion (IHVD) defined by the formulae below where—

THVD (%) = $\{(/\Sigma V_i^2)/ V_l^2\} \times 100$

IHVD (%) = V_i/V_l^2

Where V_i = Voltage component of the order—i harmonic

V_l = Voltage component of the fundamental frequency (50 HZ).

Compliance:

System performance shall be deemed to be of poor quality if during the Measurement Period greater than 5% of the Measurement Period THVD or IHVD exceed the established tolerance range shown in Table 3–3–1 below.

Each point shall be measured for at least seven days at ten minutes intervals. Suspect points shall be monitored in the transition period. Measurements shall include 6 points across suspect area, which shall include—two residential, two commercial and two industrial customers.

Table 3–3–1

Individual Harmonic Distortion Limits

Individual Harmonic (Voltage) Distortion, IHD (%)					
Old, Not Multiples of 3		Old, Multiples of 3		Even	
Order of the Harmonic (n)	Limit of Individual Harmonic	Order of the Harmonic (n)	Limit of Individual Harmonic	Order of the Harmonic (n)	Limit of Individual Harmonic
5	6	3	5	2	2
7	5	9	1.5	4	1
11	3.5	15	0.3	6	0.5
13	3	21	0.2	8	0.5
17	2	<21	0.2	10	0.5
19	1.5			12	0.2
23	1.5			<12	0.2
25	1.5				
<25	0.2 + 1.3 * 25/n				
Total Harmonic (Voltage) Distortion, THD (%)					8

Penalties:

Indicator of the level of deviation above the threshold (between 0 and 1.0) shall be calculated and be used to calculate the compensation as below:

$$PHDk = Max.[0. (THDk - THD)/THD] + 1/3 \times \sum_{i=2}^{40} Max.[0, (IHDik - IHDi)/IHDi].$$

and (PHDk) = Penalised Harmonic Distortion measured during the interval k.

THDk = Total Harmonic Distortion measured during the interval k (k).

THD = Threshold for Total Harmonic Distortion given in these Standards.

IHDk = Individual Harmonic Distortion measured during the interval k (k).

IHD = Threshold for Individual Harmonic Distortion given in these Standards.

The penalty during the interval k shall be calculated based on the value of PHDk above.

Penalty (k) = If PHDk < 1 ⇨ $(PHDk)^2 \times (10 \times AT) \times E(k)$

If PHDk ≥ 1 ⇨ $(10 \times AT) \times E(k)$.

Penalty paid for the energy supplied with sub-standard conditions during the interval k.

Where AT = Average Tariff for affected customers

E(k) = Energy supplied during period k to the affected customers.

Standard 3–4—

Voltage Flicker Distortion:

Quantitative methods shall be used to measure flicker and the standard shall be measured in terms of Short-term Flicker severity indicator (Fst), which shall not exceed 1.0. Reference is made to IEC standard 1000–3–7.

i.e. $Fst \leq 1.0$

Measurements shall be taken at six points each month for a minimum period of seven continuous days at intervals of ten minutes. Two for residential, two for commercial and two for industrial customers. A flicker meter shall be used according to IEC Standard 868 or IEC Standard 61000–4–15.

Compliance:

System performance shall be deemed to be of poor quality if during the Measurement Period greater than 5% of the Measurement Period, the records show that Flicker exceeded the compliance level.

Penalties:

Discos shall be asked to correct the problems and shall be subject to sanctions.

The following Indicator of deviation shall be used:

PFDk = Max.[0, (Fstk – Fst)/Fst]

Penalized Flicker Distortion during the interval k.

Where Fstk = Flicker severity factor measured during interval k.

Fst = Threshold total for Flicker severity (1.0).

The penalty during the interval k shall be calculated based on the value of PFDk above.

Penalty (k) = If PFDk < 1 ⇨ $(PFDk)^2 \times (10 \times AT) \times E(k)$.

If PFDk ≥ 1 ⇨ $(10 \times AT) \times E(k)$.

Penalty paid for the energy supplied in sub-standard condition during the period k.

Where AT = Average Tariff for affected customers.

E (k) = Energy supplied during period (k) to the affected customers.

Standard 3–5—

Harmonic Distortion of the Current (By a customer):

The customer shall be limited in the value of the harmonic currents that can be injected into the system.

Where a customer is connected at a voltage greater than 1.0 kV and demands greater than 10 kW the limit shall be defined in terms of Total Harmonic Current Distortion (THCD) and Individual Harmonic Current Distortion (IHCD).

Where THCD (%) = $[(\sqrt{\sum I_i^2})/I_l^2] \times 100$

IHCD (%) = $I_i/I_l^2 \times 100$

and I_i = Current intensity component of the order—i harmonic

I_l = Current intensity component of the fundamental frequency (50 HZ).

Where a customer is connected at 1 kV or less with a demand of less than 10 kW the following formula shall apply—

Delta I_i = (I_i load – I_i maximum)

Compliance:

System performance shall be deemed to be of poor quality if during the Measurement Period is greater than 5% of the Measurement Period, Harmonic Current Distortion exceeded the compliance level. Table 3–5–1 refers—

Table 3-5-1
Maximum Harmonic Tolerances to distortion produced by Customer

12	0.31.	0.4
>12	3.68/n	0.3
THCD (%)		20

Penalties:

The Authority shall discuss necessary remedies with the customer and agree the time frame to make corrections. The customer shall be subject to disconnexion if not compliant and shall be asked to reimburse the licensee for any penalty.

QUALITY OF SUPPLY STANDARDS FOR TRANSMISSION NETWORK

1.0 PURPOSE

This standard specifies minimum acceptable limits for voltage dips, voltage harmonics, voltage imbalance, voltage regulation, voltage flicker, system frequency and quality of electricity services supplied by the Transmission Licensee to the Distribution Customers for operation of a transmission network with a rated voltage of 66 kV and above.

Network planning levels and Power Quality (PQ) process parameters are specified for use by Licensees and Customers to achieve an internationally acceptable level of system reliability. The standard defines a minimum level of investment, which shall enable the system meet customer projected demand and energy requirements, reliably deliver (from generation to large customers and distribution companies), achieve system flexibility in switching arrangement, voltage control, etc., and improve availability of the system to acceptable level.

Excessive dependence on any one transmission circuit, structure, right of way or substation and cascaded trip of any other element due to an outage of any facility (N – 1 criteria) shall be avoided.

The Licensee shall ensure speed recovery, sophistication of protective equipment and system restoration to reliable operation by limited load shedding or re-dispatching of generation in the system.

The Authority shall approve system expansion and transmission rate base paid for by system users. A Licensee in liaison with the Authority shall develop a transmission investment plan followed by international bidding for all major expansions. The Licensee shall construct and maintain the facilities and be subjected to availability standards and penalties for non-compliance.

2.0 SERVICE QUALITY AND RELIABILITY STANDARDS

2.1 Availability Measure:

The duration and frequency of forced outages shall be monitored in terms of accumulated duration of forced outages (Deik) in minutes per line or transformer per voltage class, (66 kV and 132 kV) in a fiscal year and in terms of frequency of forced outage (Feik) per line or transformer per voltage class, (66 kV and 132 kV) in a fiscal year.

Scheduled outages (O and M) deemed necessary by the Authority and outages due to events external to transmission system including generation related forced outages, outages due to other licensees,

customer equipment, earthquakes, floods, wars, sabotage and other natural catastrophes shall be excluded.

Availability performance indices shall be calculated by voltage class and used as compatibility measure as shown below—

(*a*) Frequency Index (Fl_{vc-k}):

(For Transmission Lines)

Annual Average Forced Outage Frequency (Fl_{vc-k}) for all transmission lines per 100 km per voltage class.

Where $Fl_{vc-k} = (1/L_{vc}) \times \sum_{i=0}^{i=Nk} [Flik* 100]$

for i = 1 to Nk (sum of forced outages on the element)

Average number of forced outages for all transmission line circuits in a voltage class within a fiscal year k (given by faults/100 km).

L_{vc} = Total length of transmission line circuits in a voltage class in fiscal year k.

Flik = Frequency of forced outages for the ith transmission line circuit in a fiscal year k.

(*b*) Frequency Index (Ft_{vc-k}):

(For Transmission System Transformers)

Annual Average Forced Outage Frequency Index (Ft_{vc-k}) for all transmission system transformers.

Where $Ft_{vc-k} = (1/Nt_{vc}) \times \sum_{i=0}^{i=Nk} [Ftik]$

for i = 1 to Nk (sum of forced outages on the element).

Average number of forced outages for all transformers whose primary voltage is in a particular voltage class for the fiscal year k.

and Nt_{vc} = Total number of transformers with a primary voltage rating in one voltage class in a fiscal year k.

Ftik = Frequency of forced outages for the ith transformer in a fiscal year k.

(*c*) Duration Index:

(For Transmission Lines)

Accumulated Annual Average Forced Outage Duration (Dl_{vc-k} per 100 km of all transmission line circuits that experienced forced outage in the fiscal year k.

$$\text{Where} \quad Dl_{vc-k} = (1/Fl_{vc-k}) \sum_{i=0}^{i=Nk} [Dlik]$$

for i = 1 to Nk (total duration of forced outages on the line circuit).

Accumulated Average Duration of Forced Outages for all transmission line circuits in a voltage class which experienced forced outages in a fiscal year k given by Min./Outage/100 km}.

and Dlik = Accumulated duration of forced outages for the transmission line circuit having a forced outage frequency availability measure (fik > 0) in a fiscal year k.

(*d*) Duration Index (Ft_{vc-k}):

(For Transmission System Transformers)

Accumulated Annual Average Forced Outage Duration (Dt_{vc-k}) of transformers that experienced forced outage in a fiscal year.

$$\text{Where} \quad Dt_{vc-k} = (1/Ft_{vc-k}) \times \sum_{i=0}^{i=Nk} [dtik]$$

for i = 1 to Nk (sum of forced outages on the element).

Average number of forced outages for all transformers whose primary voltage is in a particular voltage class for the fiscal year k.

and dtik = Accumulated duration of forced outages for the transformer having a forced outage frequency availability measure (ftik > 0) for fiscal year k.

Compliance Limits:

Table 3–1 below specifies transmission lines tolerance values for the parameters specified above. The tolerance limits are set based on existing statistics of the licensee's system. The Authority shall adjust the limits towards internationally accepted standards (the permanent phase) to allow for improvements in system performance. The tolerance limit for system transformers shall be defined by the Authority taking into account the current performance and necessary investment to improve performance.

Table 3–1: Proposed Maximum Tolerance Values

			Testing Phase		Transition Phase		Permanent Phase	
	Symbol	Current Avg.	Warning Level	Max. Value	Warning Level	Max. Value	Warning Level	Max. Value
(Average Number of outages/100 km of transmission Lines/year)	F1_lim	10	8	10	6	8	5	6
Annual Average Forced outage duration (hours/100 km of transmission lines)	D1_lim	70	50	70	30	40	10	24

Control Charts:

Annual availability control charts shall be developed and Upper Control Limit and Upper Warning Limit (UCL and UWL) set to values to drive improvement in system performance. Reference is made to Table 3–1 above.

Figure 3–1

Sample Control Chart

Annual Performance Index

The center Line in figure 3–1 above is calculated based on the historical data. Control charts shall be developed for each line and transformer. The charts shall be reviewed quarterly and annually to track performance and evaluate to see if intended improvements are complied with.

Penalties and Incentives:

Outages due to scheduled maintenance and initiated by events caused by third parties shall not be considered.

The Authority shall specify a penalty factor per event in MK/event and a penalty factor per hour in MK/hour. Actual values of the penalty factor shall be defined taking into consideration the revenue that the Transmission Company (TransCo) receives from the of the service, i.e. Dividing annual payment TransCO receives for each asset by 8,760 (hours in a year) and multiplying the result by a penalty multiplier.

The formulae below shall apply—

(i) Where frequency of forced outages exceeds threshold:

PFl_{vc-k} = $\{Rl_{vc-k}/8{,}760\} \times (Fl_{vc-k} - F1_lim) \times (L_{vc}/100) \times$ 1 hour × Wf.

PFl_{vc-k} = Penalty factor for frequency.

Wf = Penalty factor (Based on importance of the transmission system. Typically 60 or more).

Rl_{vc-k} = Revenue per asset/voltage category.

(ii) Where duration of forced outages exceeds threshold:

PDl_{vc-k} = $\{Rl_{vc-k}/8{,}760\} \times (Dl_{vc-k} - D1_lim) \times (L_{vc}/100) \times 1$ hr × Wf.

PDl_{vc-k} = Penalty factor for frequency.

The proceeds from the penalties shall be used to compensate customers by a way of reducing transmission rates.

Penalty regimes consider that TransCo pay a maximum of either—

(i) Penalty based on violation of frequency $index^N$ or

(ii) Penalty based on violation of duration $index^M$.

System Maintenance:

System maintenance, rehabilitation and reinforcement programmes shall be strategically planned to enable the licensee improve its services to the level required by these standards.

3.0 TRANSMISSION SYSTEM OPERATION STANDARDS

The TransCo responsible for system operation shall ensure that electric service is provided with appropriate levels of quality of service in terms of voltage quality and continuity of supply.

This standard specifies minimum acceptable limits for voltage regulation, voltage dips, voltage imbalance, voltage flicker and system frequency for operation of a transmission network with a rated voltage of 66 kV and above.

The transmission operation standards shall be consistent with the standards in force in the Southern African Power Pool (SAPP) which defines in detail obligations of parties connected to the pool in terms of generators response to frequency deviations, of generators to be controlled by other machines, the Automatic Generation Control (AGC) facility, reserve margin (standby spare capacity), frequency excursions generators and loads can withstand before tripping, information requirements and communication procedures.

N{Number of events exceeding tolerance × Penalty factors per event (MK/event)}

M{Number of hours exceeding tolerance × Penalty factors per event (MK/event)}

The Transmission Operation standards shall be complemented by the SAPP Grid Code and Ancillary Services Normative. They shall be tools used by the TransCo to achieve correction of deviation from the operation standards described below once the responsible party is identified.

3.1 Voltage Regulation:

Variations in magnitude of transmission system voltage (rated at 66 kV and above) shall be limited to ± 5% of the nominal value.

Measurements shall be taken continuously for a minimum period of seven days for 24 hours and at 10 minutes intervals. The highest 10 minutes r.m.s. voltage not exceeded for 95% of the time shall be recorded, and the highest of these values shall be retained as the daily high value. Similarly, the lowest 10 minutes r.m.s. values of the supply voltage within which the voltage remains for 95% of the time shall be recorded and the lowest of these values shall be retained as the low value.

All incidences where two or more consecutive 10 minutes values are outside compatibility levels shall be reported.

3.2 Voltage Imbalance (Vlmb):

Voltage imbalance shall be limited to a maximum value of 2%.

Where

$$\text{Vlmb} = \sqrt{\{(1 - \sqrt{(3 - 6\beta)})/(1 + \sqrt{(3 - 6\beta)}) \times 100\}}$$

and

$$\beta = \{V^4_{12} + V^4_{23} + V^4_{31}\}/\{V^2_{12} + V^2_{23} + V^2_{31}\}$$

V_{12} fundamental frequency phase-to-phase voltage between phases l and 2, etc.

Measurements shall be taken continuously for a minimum period of seven days and 24 hours in a day at 10 minutes intervals. The

highest 10 minutes percentage unbalanced value not exceeded for 95% of the time is recorded as the daily high value. The highest of the daily value over the full assessment period shall be compared with the compatibility level.

The 10 minutes % imbalanced values (VU_{10}) over a period of 24 hours (00:00 to 24:00) shall be calculated as follows:

$$VU_{10} = \sqrt{\{\sum_{1}^{N} VU^2/N\}}$$

Where VU_{10} = measured sample of imbalance within a 10 minute period.

N = number of samples in that 10 minute period.

The total accuracy of the measurement shall be limited to a maximum value of 0.5% in the calculated imbalance and measuring instruments with an accuracy class of 0.2% or better shall be used.

3.3 Voltage Dips:

Voltage dips shall be defined in terms of dip windows. The dip windows shall be defined based on duration and magnitude of the voltage dips. Figure 3.3–l below refers. The compatibility level shall be specified in terms of maximum number of dips in each dip window.

Figure 3.3–1

Measured Voltage Dip Parameters

Figure 3.3–2 below defines the dip windows.

Magnitude of Voltage Depression

Figure 3.3–2

Voltage Dip Window

Table 3.3–2 specifies compatibility levels in terms of maximum number of dips per feeder per year for the defined ranges on voltage dip duration and magnitude (dip window categories "7", "T", "S" and "X").

Table 3.3–2

Limits for the number of voltage dips per year for each category of dip window:

Transmission System	Number of Voltage Dips per Year				
Voltage Range	Dip Window Category				
	Z	T	S	X	Y (*see* Note)
<66kV to ≤132 kV	16	25	25	80	120
220 kV and above	5	6	11	45	88

NOTE:

The number of "Y" dips is provided for completeness of information, but is not intended to regulate licensees on the basis of the number of "Y" dips.

All three phases of the supply voltage shall be monitored. Measurements shall comprise phase to neutral voltage and phase-to-phase voltage wherever applicable. Metering classes of 0.1, 0.2, 0.5 and 1.0 shall be used for measurements. Measurement accuracy for the duration of the dip shall be 10 ms. The accuracy of the logged time of occurrence shall be ±10 minutes.

The assessed level for each dip window shall be the number of dips that occur in that window. The assessed level shall be compared to the compatibility level for that window.

3.4 Voltage Flicker:

Voltage flicker shall be measured using a flicker meter in terms of Short-term flicker severity (Pst) and Long-term flicker severity (Plt). All three phases of supply voltage shall be monitored. Measurements shall comprise phase to neutral voltages and phase-to-phase voltages wherever applicable.

Measurements shall be carried out at 10 minute intervals for a minimum period of seven days. The highest 10 minute Pst value in 24 hours, which is not exceeded for 95% of the time shall be recorded for each phase and the highest of these shall be retained as a daily value. High Pst values known to have occurred coincidentally with voltage dips shall be ignored.

Compatibility levels for Short-term flicker severity Pst and Long-term flicker severity Pit shall be 1.0 and 0.8, respectively.

Long-term flicker severity value shall be measured every 10 minutes and calculated over a two-hour period from the preceding (12) Pst values where

$$Plt = \sqrt{(\Sigma P3_{st,k}/12)} \text{ for } k = 1 \text{ to } 12$$

and Pst,k = General term for consecutive 10 minute Short-term flicker severity.

The highest retained daily values over the full assessment period shall be compared with the compatibility levels specified above.

3.5 Frequency:

Frequency deviations from the nominal frequency of 50 Hz shall be limited to a maximum of ±2.5%.

3.6 Harmonics and Total Harmonic Distortion (THD):

Total harmonic distortion (THD) shall be defined as follows—

$$THD = \sqrt{\sum V^2_k} \quad \text{for } k = 1 \text{ to } N$$

Where

k = is the harmonic number

V = is the percentage r.m.s. value of the hth harmonic or inter-harmonic voltage component.

N = the highest harmonic considered in the calculation and N shall be equal to 25.

The compatibility levels for harmonics on the transmission network shall be as provided in Table 3–6 below.

Table 3–6

Compatibility Levels for Harmonic Voltages

(Expressed as a percentage of the operating voltage in the transmission system)

Odd Harmonics (Non-multiples of 3)		Odd Harmonics (Multiples of 3)		Even Harmonics	
Order (h)	Voltage (%)	Order (h)	Voltage (%)	Order (h)	Voltage (%)
5	2	3	2	2	1.5
7	2	9	1	4	1
11	1.5	15	0.3	6	0.35
13	1.5	21	0.2	8	0.4
17	1	>21	0.2	10	0.4
19	1			12	0.2
23	0.7			>12	0.2
25	0.7				
>25	0.2 + 0.5 × 25/h				
Total Harmonic Distortion (THD) ≤ xx%.					

All three phases of the supply voltage shall be monitored. Measurements shall comprise phase to neutral voltages and phase-to-phase voltages wherever applicable.

The measurement shall be done continuously at a maximum of 3 seconds intervals for a minimum period of seven days. The measurements shall be summated over a 10 minute period to obtain 10 minutes r.m.s. values using the following formula—

Where for the h th harmonic

Vs,h = measured r.m.s. value at 3 seconds intervals during the 10 minute period.

$$V_{10,k} = \sqrt{\frac{\sum_{1}^{N} V_{S,k}^2}{N}}$$

H = the harmonic number

N = the number of r.m.s. values within the measured 10 minute period.

Where more than one sample is calculated in every 3 seconds Vs,h shall be calculated as below—

Where

Vo,h = is the value in volts of each of the samples calculated using a time window of between 80 ms and 500 ms.

$$V_{S,k} = \sqrt{\frac{\sum_{1}^{N} V_{o,k}^2}{N}}$$

A gap between the windows shall be permissible. The highest 10 minutes r.m.s. values for each harmonic and THD, within each 24–hour period (00:00 – 24:00) not exceeded for 95% of the time shall be recorded for each phase. The highest of the values in each phase shall be retained as the assessed daily values over the assessment period. The highest of the retained assessed daily values over the full assessment period shall be compared with the compatibility levels.

The number of days during the assessment period during which the THD level exceeds the compatibility levels as provided in Table 3–6 above, shall be recorded. The assessed levels shall be less than the compatibility levels defined above.

TENTH SCHEDULE

REPUBLIC OF MALAŴI

ELECTRICITY ACT

(Cap. 73:01)

ELECTRICITY BY-LAWS

by-law 212 Electricity Tariff Formulae

The Normal Tariff Formula:

The formula for normal tariff setting or tariff review process for electricity is based on the traditional Revenue Requirement Approach [RRA]. This approach defines what should be the acceptable annual revenue requirement [RR] and reasonable rate of return on investment [RRI].

In practice the revenue to be earned by a licensee is equal to the cost of supply for electricity plus a fair return on the rate base as shown below.

Revenue Requirement	=	Electricity Production Cost
	+	Operation and Maintenance [O and M]
	+	Customer Service Costs
	+	Overhead Costs
	+	Depreciation Costs
	+	Rate of Return on Investment [RRI]
	+	Cost of Working Capital
	+	Bad Debts
	–	Income from other sources.

The Automatic Tariff Adjustment Formula (ATAF):

The formula is applied when the licensee's costs rise or fall as a result of fluctuations in exchange rate and inflation rate above or below a defined trigger limit of ± 5%.

The automatic tariff adjustment formula is structured as follows:

$$\Delta T = \frac{\Delta TC}{TC} = DC \times 0.2\,\frac{\Delta CPI}{CPI} + FC \times 0.8\,\frac{\Delta ER}{ER}$$

The rate of change in tariff is equal to the rate of change in total cost which in turn is equal to the share of domestic cost in total cost multiplied by the rate of inflation plus the share of foreign costs in total costs multiplied by the rate of currency change.

Where;

ΔT	=	Change in tariff.
ΔTC	=	Change in total cost.
DC	=	Percentage of the total cost which is domestic.
FC	=	Percentage of the total cost which is foreign.
CPI	=	The consumer price index.
ER	=	The exchange rate between Malaŵi Kwacha and USA Dollar.

G.N. 37/2007

An Act to establish an Energy Regulatory Authority to regulate the energy sector, to define the functions and powers of the Energy Regulatory Authority, to provide for licensing of energy undertakings, and for matters connected therewith and incidental thereto

[28TH DECEMBER, 2007]

PART I

Preliminary

1. This Act may be cited as the Energy Regulation Act. Short title

2. In this Act, unless the context otherwise requires— Interpretation

"Authority" means the Malaŵi Energy Regulatory Authority established under section 3;

"coal" means coal as defined in the Energy Laws;

"customer" means a person purchasing energy;

"consumer" means a person consuming energy;

"electricity undertaking" means electricity undertaking as defined in the Electricity Act; Cap. 73:01

"energy" means such sources of renewable and non-renewable energy as defined in this Act;

"Energy Laws" means this Act and any other written law under which the Authority exercises any function;

"energy undertaking" means any undertaking selling energy or commercial activities related thereto, whether public or private as defined in the Energy Laws;

"licence" means a licence granted under Part III;

"licensee" bears a corresponding meaning;

"liquid fuels and gas" means liquid fuels and gas as defined in Energy Laws;

"member" means a member of the Authority and includes the Chairperson or Vice-Chairperson;

"non-renewable energy" means those sources of energy available to mankind arising from natural processes in the interaction between the sun and the earth's surface but not regularly replenished and these include uranium and fossil fuels e.g. coal, peat, crude oil, natural gas;

"Public Appointments Committee" means the Public Appointments Committee established under section 56 (7) of the Constitution;

"renewable energy" means those sources of energy available to mankind arising from natural processes in the interaction between the sun and the earth's surface and regularly replenished and these include the sun as the primary renewable energy resource and the secondary renewable energy resources that derive from the sun including wind energy, hydro, ocean thermal, ocean wave, ocean tidal and electricity from photovoltaic effects, biomass, geothermal, etc.;

"rural electrification" means rural electrification as defined in the Rural Electrification Act;

Cap. 73:03

"Rural Electrification Fund" means the fund set up under the Rural Electrification Act;

Cap. 73:03

"solar, wind, biogas" means solar, wind, biogas as defined in the Energy Laws;

PART II
Establishment of the Energy Regulatory Authority: Constitution, Functions, Powers and Duties

Establishment of the Authority

3. There is hereby established an Authority known as the Malaŵi Energy Regulatory Authority (in this Act otherwise referred to as the "Authority") which shall be a body corporate by that name with perpetual succession and a common seal and capable of suing and being sued in its corporate name and capable of acquiring and disposing of any moveable or immoveable property and performing such acts and things as bodies corporate may by law do or perform and have power to perform such functions and exercise such powers as are conferred by this Act and the Energy Laws.

Constitution of the Authority

4.—(1) The Authority shall comprise—

(*a*) a Chairperson, a Vice-Chairperson and three other members;

(*b*) the Principal Secretary responsible for Energy Affairs as *ex officio* member;

(*c*) the Director of Energy Affairs; and

(*d*) the Chief Executive of the Authority as *ex officio* member so long as he or she remains in the post of Chief Executive.

(2) Members of the Authority shall be persons who have adequate knowledge and experience in any one or more of the following functional areas—

(*a*) energy supply and demand, including the end use consumption of energy;

(*b*) commercial and business practices and procedures;

(*c*) financial and funding aspects of the energy sector;

(*d*) energy tariffs, pricing or charges;

(*e*) energy planning and project development;

(*f*) energy technology and standards or renewable energy technologies;

(*g*) environmental issues; or

(*h*) legal matters.

(3) Candidates for appointment as members of the Authority shall be selected on the basis of their knowledge and experience of national, regional and international issues relating to the supply of energy in Malaŵi.

(4) The overall composition of the Authority shall as far as possible reflect a balance of knowledge and experience relevant to the different types of energy supply regulated by the Authority and the distinct industries involved in the energy sector.

(5) Any person who—

(*a*) is a Member of Parliament;

(*b*) is a Minister or Deputy Minister;

(*c*) is a holder of a licence;

(*d*) is an employee of a licensee;

(*e*) is a director of a company holding a licence under this Act;

(*f*) holds five per cent or more shares in a company holding a licence under this Act;

(*g*) has, in the last seven years, been convicted of an offence under this Act, or an offence involving fraud or dishonesty by a competent court in Malaŵi or elsewhere; or

(*h*) is in a position where there is a material conflict of interest between the interests of the member as member of the Authority and the business interest of that member,

shall be disqualified from being appointed as a member of the Authority.

Appointment of members of the Authority

5.—(1) The President shall appoint members of the Authority and each appointment shall be subject to confirmation by The Public Appointments Committee.

(2) The first appointment of members of the Authority as provided for in subsection (1) shall be made within twenty-eight days of the coming into force of this Act.

(3) The names of all members of the Authority as first constituted and every change of membership of the Authority shall be published in the *Gazette*.

(4) In appointing members of the Authority under subsection (1), the President shall have regard to the need for continuity of service on the Authority so that at least half of the members of the Authority appointed thereunder shall be reappointed for the next term of office.

Chairperson of the Authority

6. The President shall appoint one of the members of the Authority as Chairperson and another member as Vice-Chairperson.

Tenure of office of members

7.—(1) A member of the Authority, other than an *ex officio* member, shall hold office for a period of three years and shall be eligible for reappointment:

Provided that no member may be reappointed for more than two consecutive terms.

(2) The office of a member of the Authority shall become vacant—

(*a*) if he or she resigns;

(*b*) upon his or her death;

(*c*) if he or she becomes bankrupt;

(*d*) if he or she knowingly fails to declare a conflict of interest relating to any matter under consideration by the Authority;

(*e*) if he or she is absent, without the consent of the Chairperson or without valid excuse, from three consecutive meetings of the Authority of which he or she has had notice;

(*f*) upon the expiry of the term of his or her appointment;

(*g*) if he or she becomes, by reason of mental or physical infirmity, incapable of performing his or her duties as a member; or

(*h*) if any circumstances arise that, if he or she were not a member, would cause that member to be disqualified for appointment as a member.

Removal from office and vacancy

8.—(1) A member of the Authority shall not be removed from office except for reasons of incompetence or misconduct and only after due inquiry and subject to the approval of the Public Appointments Committee.

(2) A vacancy in the Authority shall be filled by the appointment of another member in accordance with this Act, and the member so appointed shall hold office for the unexpired period of the term of office of his or her predecessor.

Powers and functions

9.—(1) The Authority shall have power to regulate the activities of the energy industry in accordance with this Act and the Energy Laws and, without limitation to the generality of the foregoing, shall carry out the following functions—

(*a*) receive and process licence applications for energy undertakings;

(*b*) grant, revoke or amend licences granted under this Act and Energy Laws;

(*c*) approve tariffs, and prices of energy sales and services;

(*d*) monitor and enforce compliance by licensees with licences granted under this Act and Energy Laws;

(*e*) develop and enforce performance and safety standards for energy exploitation, production transportation and distribution;

(*f*) prescribe and collect fees, charges, levies or rates under this Act and Energy Laws;

(*g*) arbitrate commercial disputes under this Act and Energy Laws;

(*h*) recommend reforms to this Act and Energy Laws as the Authority may deem desirable;

(*i*) resolve or mediate consumer complaints against licensees; and

(*j*) do all such things as are necessary or incidental or conducive to the better carrying out of the functions of the Authority provided for in this Act and Energy Laws.

(2) In exercising its powers and functions under this Act and the Energy Laws, the Authority shall be independent of interference or direction of any other person or authority, and shall—

(*a*) promote the interests of consumers of energy with respect to energy prices and charges and the continuity and quality of energy supply;

(*b*) monitor the efficiency and performance of energy undertakings, having regard to the purposes for which they were established;

(*c*) in conjunction with other relevant agencies, monitor the levels and structures of competition within the energy sector in order that competition in and accessibility to the energy sector in Malaŵi is promoted;

(*d*) facilitate increasing access to energy supplies;

(*e*) promote energy efficiency and energy savings;

(*f*) promote consumer awareness and education;

(*g*) promote the integrity and sustainability of energy undertakings and seek to ensure that energy undertakings, whilst providing efficient service, are able to finance the carrying on of the activities which they are licensed or authorized to carry on;

(*h*) in conjunction with other relevant agencies, formulate measures to minimize the environmental impact of the exploitation, production, transportation, storage, supply and use of energy and enforce such measures by the inclusion of appropriate conditions to licences held by energy undertakings;

(*i*) promote the exploitation of renewable energy resources; and

(*j*) take all such measures as are necessary to fulfill the above purposes through regulations to be made under this Act or the Energy Laws.

(3) The Authority shall, in undertaking its regulatory tasks, regulate in a manner that is transparent, cost effective and fair.

(4) The Authority may advise the Government on matters affecting the energy sector generally and energy undertakings specifically.

Minister to *Gazette* policy

10.—(1) Whenever the Minister intends to revise the policy with regard to the energy sector, he or she shall prepare a draft thereof and invite comments from licensees and other stakeholders, and he or she shall take those comments into account before issuing the new policy.

(2) Any policy issued under subsection (1) shall be in writing and shall be published in the *Gazette* and in such other manner as the Minister may determine.

Remuneration of members

11.—(1) A member of the Authority shall be paid such remuneration or allowances as the Minister of Finance may approve on the recommendation of the Authority:

Provided that such remuneration or allowances shall be set at levels that are comparable to those offered to similar professionals on the open market in Malaŵi.

(2) Members shall be paid out of the funds of the Authority.

Meetings of the Authority

12.—(1) The members of the Authority shall meet at such times and places and in the manner as the Chairperson may from time to time determine provided that the Authority shall meet at least once every quarter.

(2) The Chairperson of the Authority may at any time convene an extraordinary meeting of the Authority to be held at a time and place and in the manner determined by him or her and shall, upon a written request of at least two other members of the Authority, convene an extraordinary meeting to be held within two weeks after the date of such request.

(3) The Chairperson of the Authority or, in the absence of the Chairperson, the Vice-Chairperson of the Authority shall preside over any meeting of the Authority, and in the absence of both the Chairperson and Vice-Chairperson, the members present shall elect one of their number to preside at the meeting.

(4) The Authority may publish in the *Gazette* the procedure to be followed at meetings of the Authority.

(5) In the absence of a published procedure under subsection (4), the person presiding at such a meeting of the Authority shall determine the procedure to be followed thereat.

(6) The quorum for a meeting of the Authority shall be a majority of all its members.

(7) The decision of a majority of the members of the Authority present at a meeting thereof shall constitute a decision of the Authority, and in the event of an equality of votes on any matter the person presiding at a meeting has a casting vote in addition to his or her deliberative vote.

(8) No member of the Authority, except *ex officio* members, shall attend the meeting of the Authority by representation.

(9) Other officers of the Authority as the Chief Executive may designate, shall attend meetings of the Authority and of any committee of the Authority and may address such meetings, but shall not vote on any matter:

Provided that the person presiding at any meeting may, for good cause, require such other officers to withdraw from such meeting.

(10) No decision taken by the Authority or act performed under it shall be invalid only by reason of a vacancy on the Authority or of the fact that any person not entitled to sit as a member of the Authority sat at such a meeting at the time the decision was taken or the act was authorized.

(11) The Authority may, at its discretion, allow members of the public or licensees to attend any of its meetings.

(12) If the Authority takes a decision in any manner other than at a formal meeting, such decision shall come into effect immediately but shall be reduced to writing and submitted for ratification at the first formal meeting of the Authority following such decision.

(13) The Authority shall cause a record of its proceedings to be kept.

Duties and responsibilities of members

13.—(1) Any member of the Authority shall—

(*a*) act in a justifiable and transparent manner whenever the exercise of his or her discretion is required;

(*b*) at all times act in the interests of the Authority and not in his or her sectoral interest;

(*c*) act independently of any outside influence or instruction; and

(*d*) act in a manner that is required of any holder of a public office.

(2) A member of the Authority having any interest, directly or indirectly, in any matter under discussion by the Authority shall as soon as possible after the relevant facts have come under his or her knowledge, disclose to the Authority the facts of his or her interest and nature thereof.

(3) A disclosure under subsection (2) shall be recorded in the minutes of the Authority and, after the disclosure, the member—

(*a*) shall not take part nor be present in any deliberation or decision of the Authority; and

(*b*) shall be disregarded for the purpose of constituting a quorum of the Authority.

(4) Any member of the Authority who fails to disclose his or her interest as provided under subsection (1) shall be guilty of an offence and liable on conviction to a fine of K500,000 and to imprisonment for five years.

(5) No act or proceedings of the Authority shall be invalidated on the grounds only that any member of the Authority has contravened the provisions of this section.

Just administrative action

14.—(1) Any decision of the Authority affecting the rights of another person shall—

(*a*) be within the powers of the Authority as set out in this Act and Energy Laws;

(*b*) be taken within a procedurally fair process; and

(*c*) be reasonable.

(2) Any person adversely affected by a decision of the Authority shall on request be furnished with written reasons for the decision.

Committees of the Authority

15.—(1) The Authority may appoint committees consisting of as many members of the Authority and employees of the Authority as may be deemed necessary to perform such functions or exercise such powers of the Authority as the authority may perform or exercise under this Act, and Energy Laws and may at any time dissolve or reconstitute such committees, and the chairperson of any such committee shall be a member of the Authority but so however that the Authority is not divested of any function or power conferred upon a committee under this subsection.

(2) Any decision of a committee performing a function or exercising a power of the Authority shall be tabled at a meeting of the Authority and may be withdrawn or amended by the Authority or referred back to such committee and shall, until it has been so withdrawn or amended, be deemed to be a decision of the Authority.

Advisory Committees and customer-consumer fora

16.—(1) The Authority may appoint committees consisting of as many members of the Authority, employees of the Authority and other persons as may be deemed necessary to advise the Authority in general or on a particular matter.

(2) The Authority may establish customer-consumer fora consisting of as many of the members of the Authority, employees of the Authority and other persons as may be deemed necessary to represent the interests of consumers or consumers of energy in relation to consumer or consumer information, education, energy pricing and dispute resolution.

Members or employees not to be engaged in licensed activity

17.—(1) A member or employee of the Authority shall not seek employment with any licensee for a period of two years after leaving the position as member or employee of the Authority.

(2) A member or employee of the Authority, as the case may be, shall not, after leaving the membership or employment of the Authority act as an agent for or on behalf of a licensee in any matter before the Authority that was under consideration by the Authority during the term of office of that member or during the employment of the employee with the Authority.

Chief Executive of the Authority

18. The Authority shall appoint a Chief Executive to be known by such title as the Authority may deem fit, who shall be the chief executive officer of the Authority and responsible for the administrative control of, and supervision over the work and staff of the Authority.

Other staff of the Authority

19.—(1) The Authority shall establish its own Secretariat and may appoint such staff, subordinate to the Chief Executive, as the Authority deems necessary.

(2) The Authority may delegate to the Chief Executive the appointment of staff of such ranks as the Authority may specify.

(3) The Authority may pay to persons in its employ, or provide them with, such remuneration, pension and employment benefits as the Authority may, after having obtained such professional advice as it may deem fit, consider as being competitive in the employment market in Malaŵi.

Disclosure of interest

20.—(1) The Chief Executive shall disclose to the Authority any interest he or she has, whether in a private or professional capacity, in any matter that is under consideration by the Authority and shall not attend any meeting of the Authority or of any committee of the Authority while any question touching such matter is being discussed.

(2) Every employee of the Authority or any consultant, adviser or sub-contractor to the Authority shall disclose to the Chief

Executive any interest he or she has, whether in a private or professional capacity, in any matter that is under consideration by the Authority, and the Chief Executive shall take such decision as he or she considers appropriate in each case and submit a report thereon to the Authority.

Hiring of services

21. The Authority may, subject to such conditions as the Authority may determine contract with any person to provide goods or supply services as may be necessary to perform the work connected with the powers, functions and duties of the Authority.

Delegation of powers and Authority

22.—(1) The Authority may delegate any power or function assigned to it under this Act and Energy Laws to the Chairperson or any member of the Authority or to any employee of the Authority to facilitate the day to day operation of the Authority.

(2) The Chairperson of the Authority may, with the approval of the Authority, delegate any power or function assigned to him or her under this Act and Energy Laws or delegated to him or her under subsection (1) to any member of the Authority.

PART III

Financial Provisions

Funds of the Authority

23. The funds of the Authority shall consist of—

(*a*) all fees, charges, energy regulation levies, dues or rates imposed under this Act and Energy Laws;

(*b*) one-half of all fines imposed by a competent court for the contravention of the provisions of this Act and Energy Laws or by-laws made by the Authority;

(*c*) revenue accruing to the Authority from the Government or other body or person, whether as a grant-in-aid or otherwise;

(*d*) all such monies as are, from time to time, appropriated to the Authority by Parliament; and

(*e*) any other income authorized under this Act and Energy Laws or income recognized as such by accounting standards and practices.

Energy regulation levy

24.—(1) For the purposes of the levies referred to in section 23, the Authority may by notice in the *Gazette* impose an energy regulation levy on energy sales to be paid by licensees.

(2) A notice under subsection (1)—

(*a*) shall state the amount of the levies or the basis or method of calculation or determination of the amounts;

(*b*) shall specify the date on which or periods within which the levies are payable and the manner of payment; and

(*c*) may stipulate that a licensee becomes liable for payment of interest on any arrear payments of the levy and specify the rate of interest and manner of calculation thereof.

Rural electrification levy

25.—(1) In order to promote and fund rural electrification, every licensee shall pay to the Authority a rural electrification levy which levy shall be part of the tariffs or prices of energy payable by energy customers.

(2) The rural electrification levy referred to in subsection (1) shall be 4.5 per cent of retail energy sales.

(3) Every licensee shall pay the levy referred to in subsection (1) to the Authority within forty-five days from the date of sale or billing for the energy as the case may be, whichever shall occur first.

(4) The Authority shall pay the levy referred to in subsection (1) to the Rural Electrification Fund within seven days of receipt of the same from a licensee.

(5) If a licensee or the Authority, as the case may be, fails to remit the levy referred to in subsection (1) within the periods specified in subsections (3) and (4) interest on the levy at the rate of 2 per cent above the bank lending rate shall be chargeable and payable to the Rural Electrification Fund.

(6) The rural electrification levy shall be used for the purposes prescribed under the Rural Electrification Act. Cap. 73:03

Books of accounts

26.—(1) The Authority shall cause to be kept proper books of accounts and other records relating to its accounts.

(2) The Authority shall, as soon as possible after the end of each financial year, cause to be prepared a statement of the cash-flow and income and expenditure of the Authority for that financial year and a balance sheet of its assets and liabilities as at the end of that financial year.

(3) The accounts of the Authority shall—

(*a*) be audited annually by independent public auditors appointed by the Authority; and

(*b*) be examined by the Auditor General before being presented to Parliament in accordance with this Act.

(4) The financial year of the Authority shall be the period of twelve months commencing on 1st July of each year and ending on 30th June of the following year:

Provided that the first financial year of the Authority may be a period shorter or longer than twelve months as the Authority may determine, but in any case not longer than eighteen months.

Annual report

27.—(1) The Authority shall as soon as practicable, but not later than six months after the expiry of the financial year, submit to Parliament, through the Minister, a report concerning its activities during that financial year.

(2) The annual report referred to in subsection (1) shall include—

(*a*) an audited balance sheet and income statement, including any notes thereon and documents annexed thereto whereby relevant information is provided;

(*b*) the report of the examination of the accounts referred to in section 26 (3);

(*c*) information regarding licences granted, renewed, amended, suspended, cancelled or withdrawn;

(*d*) information regarding the amount of rural electrification levies collected and paid to the Rural Electrification Fund;

(*e*) a report regarding the execution of the business plan of the Authority;

(*f*) a report of the future strategic plans of the Authority;

(*g*) a status report on the performance of the energy sector and energy undertakings; and

(*h*) such other information as the Authority may, from time to time, deem necessary.

(3) The Authority shall, after submission of the annual report to Parliament in accordance with subsection (1), cause a summary of the report to be published in such manner as the Authority shall deem appropriate or as Parliament may direct.

PART IV

Regulation of the Energy Sector

Activities to be carried out under licence

28.—(1) No person may establish, operate, carry on or be involved in any manner in an energy undertaking in Malaŵi, without a licence issued by the Authority.

(2) Any person who contravenes the provisions of subsection (1) shall be guilty of an offence.

(3) For the purposes of this section the Authority has the power—

(*a*) to determine whether any person is carrying on or involved in any energy undertaking; and

(*b*) to order any person not holding a licence and who is obliged to apply for and hold a licence under this Act or Energy Laws to cease carrying on or being involved in any energy undertaking.

29. Any person obliged to hold a licence under this Act or Energy Laws shall apply to the Authority for a licence in the prescribed form in accordance with the procedure and subject to payment of fees laid down in this Act or Energy Laws.

Application for and issuing of licence

30. A licensee shall not charge a customer any other tariff, price or charge more than that forming part of the conditions of his or her licence or revision thereof and as approved by the Authority.

Tariffs or prices of energy

31. No licence and no rights or privileges thereunder shall be assigned or transferred, either in whole or in part, nor shall title thereto, either legal or equitable, or any right, interest or property therein, pass to or vest in any person without the prior written consent of the Authority, but so however that such consent shall not be unreasonably withheld.

Transfer of licences

PART V

Resolution of Disputes

32. The Authority shall, if requested thereto by a party to a dispute, act as arbitrator in disputes between licensees or between a licensee and its customers or consumers relating to—

Authority may arbitrate

(*a*) the right to energy supply;

(*b*) the duty to supply energy;

(*c*) the tariffs, process or charges at which energy is supplied;

(*d*) delays in or refusal to supply energy; and

(*e*) the quality of energy supply and the provision of services in connexion therewith.

33. The Authority may act as mediator in any other matter in respect of which a licensee, customer, or consumer requests the Authority to act as such.

Authority may act as mediator

34. The Authority may, on approval of the parties involved, appoint a suitable person to act as mediator or arbitrator on its behalf and any action or decision of a person so appointed is deemed to be an action or decision of the Authority.

Authority may appoint another arbitrator

35. The Authority shall by notice published in the *Gazette* prescribe the procedure to be followed and mediation and arbitration fees to be paid in mediating and arbitrating disputes.

Procedure and fees for mediation and arbitration

36. The decision of the Authority in arbitrating a dispute, including a decision as to costs, shall be final and binding on the disputing parties, subject only to the right of appeal to the High Court.

Decision of the Authority is final

PART VI

Inspections, Accidents, Inquiries and Investigations

Inquiries and formal investigations

37.—(1) The Authority may, at its own instance or on receipt of a complaint or enquiry relating to the supply of energy, appoint a person to make enquiries in respect thereof and report thereon to the Authority.

(2) On receipt of a report under subsection (1), the Authority may—

(*a*) issue such licensing conditions, guidelines, rules or directives as it is empowered under this Act; or

(*b*) institute a formal investigation.

(3) The Authority shall, on receipt of a complaint regarding unlawful conduct by a licensee, institute a formal investigation in respect of that complaint.

(4) Upon instituting a formal investigation under subsection (2) or (3)—

(*a*) the Authority may appoint a person to chair the investigation and as many persons as may be necessary to assist with the investigation; and

(*b*) the person appointed under subparagraph (*a*) and the persons assisting him or her may summon witnesses and conduct the investigation in accordance with the rules made by the Authority by order published in the *Gazette*.

(5) On completion of an investigation under subsection (4), the person chairing the investigation shall submit his or her written report thereon to the Authority.

(6) On receipt of the report under subsection (5), the Authority—

(*a*) may refer it to the Attorney General for his or her consideration;

(*b*) if a licensee is involved, may take action in accordance with this Act or Energy Laws,

and the Authority shall give a copy of the report to a concerned consumer or affected person who requests for it.

Licensee to report accidents

38.—(1) Every licensee shall send to the Authority notice of any accident of such a kind as to have caused, or likely to have caused, loss of life or serious personal injury which occurs in any part of such licensee's works or equipment, together with notice of any loss of life or serious personal injury occasioned by any such accident, within twenty-one days of such accident.

(2) Nothing contained in subsection (1) shall absolve a licensee from the duty of complying with the provisions of any other written law relating to the reporting of accidents.

Entry and inspection of premises

39.—(1) The Authority, or any person authorized thereto in writing by the Authority may—

(*a*) at any time enter upon the premises of a licensee and inspect any plant, machinery, books of accounts and other documents found thereat for the purpose of ascertaining whether or not the provisions of this Act, the Energy Laws or other written law or the conditions of any licence are being complied with, or for the purpose of any inspection which is incidental to or connected with the carrying out of the duties of the licensee; and

(*b*) call upon any licensee to furnish to the Authority such periodical or other returns in such form and such particulars as the Authority may, from time to time, prescribe by notice in the *Gazette*.

(2) The Authority may require that the accuracy of the returns and particulars be verified on oath by the licensee.

(3) A person authorized by the Authority to carry out an inspection or call for a return shall on request by a licensee show his or her authorization.

(4) A person who intentionally alters, destroys or otherwise suppresses a document or information required of him or her or under subsection (1) shall be guilty of an offence.

PART VII

Offences and Penalties

Offences

40.—(1) Any person who carries on in any manner any activity for the supply of energy in contravention of this Act, or fails to carry out or to comply with any order or decision of the Authority made or given under this Act or otherwise contravenes the provisions of this Act, or Energy Laws shall be guilty of an offence.

(2) Without prejudice to the right of a licensee to recover for any illegal consumption of energy, including costs associated with such recovery, a customer or any other person who—

(*a*) illegally abstracts energy;

(*b*) disturbs or tampers with any meter or other energy measuring instrument or apparatus;

(*c*) denies access to premises for inspections by authorized personnel of the licensee or the Authority;

(*d*) damages or vandalizes any energy installation equipment or apparatus,

shall be guilty of an offence.

(3) Any transmitter who denies access on his or her system to a licensee shall be guilty of an offence.

Penalties

41. Any person who is guilty of an offence under this Act for which no penalty is provided shall be liable to a line of K5,000,000 and to imprisonment for ten years.

PART VIII

Miscellaneous Provisions

Service of notice

42. Any notice or other document required or authorized to be given, delivered or served under this Act may be given, delivered or served—

(*a*) by delivering it to the person to whom it is to be given or delivered or on whom it is to be served;

(*b*) by leaving it at the usual or last known place of abode of that person;

(*c*) by sending it in a prepaid registered letter addressed to that person at his or her usual or last known place of abode or postal address;

(*d*) in the ease of a company, by delivering it to the secretary or clerk thereof at its registered or numbered office or by sending it in a prepaid registered letter addressed to the secretary or clerk of the company at that office; or

(*e*) if it is not practicable after reasonable enquiry to ascertain the name or address of a person to whom it should be given or delivered or on whom it should be served, as being a person having an interest in land, being the person to whom the description of the person having that interest in the premises (naming those premises) to which it relates, or by delivering it to some person on the premises or, if there is no person on the premises to whom it can be addressed, by affixing a true copy of it to some conspicuous part of the premises.

Right of appeal to the High Court

43.—(1) Any person aggrieved by the decision or action of the Authority under this Act may appeal to the High Court within three months from the date of the decision or action of the Authority.

(2) The Chief Justice may make such rules as he or she considers proper in relation to the procedure on the hearing of appeals under subsection (1), including the appointment and remuneration of assessors and regulating the costs of the appeal.

Obligation of secrecy

44. Except for any of the purposes of this Act or the Energy Laws or for the purpose of any civil or criminal proceedings under any written law or where otherwise authorized by the Authority, no member of the Authority or a committee of the Authority or any officer, servant or agent of the Authority or any person attending any meeting of the Authority or a committee of the Authority, whether during his or her tenure of office or during his or her employment or for a period of five years thereafter, shall disclose any information which has been obtained by him or her in the course of his or her duties and which is not published in pursuance of this Act or the Energy Laws.

By-laws

45. The Authority may make by-laws to give effect to any of the provisions of this Act and without prejudice to the generality of the foregoing, the Authority may make by-laws—

(*a*) for securing that the supply and use of energy is regular, safe and efficient;

(*b*) prioritizing of fuels and technologies for energy supply;

(*c*) for bulk stockholdings;

(*d*) for protecting the public in so far as practicable from any personal injury, fire or other dangers arising from the use of energy;

(*e*) prescribing anything, including fees, required to be prescribed under this Act prohibiting, controlling or restricting the importation, disposal, sale of defective or dangerous goods or fittings used in the supply of energy;

(*f*) for the testing of meters and the adjustment of accounts where meters are found to be defective; and

(*g*) providing for matters incidental to and connected with the matters mentioned in the preceding paragraphs of this section.

ENERGY REGULATION BY-LAWS

under s. 45

G.N. 5/2009
29/2010

PART I

PRELIMINARY

1. These By-laws may be cited as the Energy Regulation By-laws. Citation

2. In these By-laws, unless the context otherwise requires— Interpretation

"applicant" means with respect to any licensee, a person or legal entity that has applied for service from a licensee;

"arbitrator" has the meaning given in by-law 88;

"auditor" means a person registered as an accountant and auditor in terms of the Public Accountants and Auditors Act; Cap. 53:06

"claimant" has the meaning given in by-law 89;

"customer" means with respect to any licensee, a person or legal entity that purchases energy from that licensee;

"demand" has the meaning given in by-law 89;

"licensee" means a person or persons or legal entity licensed by the Authority to supply or sell energy;

"licensed activity" means an activity for which an energy licence is required under the Energy Laws;

Cap. 50:03

"liquid fuels" has the meaning ascribed to the words in the Liquid Fuels and Gas (Production and Supply) Act;

"LPG" means Liquefied Petroleum Gas;

"respondent" has the meaning given in by-law 89;

"retailing", for liquid fuels and gas includes sales of liquid fuels and gas by holders of retail licences in bulk to end users;

"ring-fence" means the keeping of separate accounting records in respect of a licensed activity so that revenue and cost, assets and liabilities, reserves and provisions of, or reasonably attributed to, the licensed activity are separately identified in the books of the licensee from those of any other activity, business or operations of the licensee;

"Roster of Arbitrators" has the meaning given in by-law 88.

PART II
Energy Regulation Levy

Division 1—Regulation Levy System

The amount of Levy

3. Every licensee under the Energy Laws shall pay the Energy Regulation Levy specified in the First Schedule hereto.

Levy to be charged on basic income

4. The Energy Regulation Levy referred to in by-law 3 shall be charged on the basic income derived from licensed energy activity or undertaking and not from any other income of the licensee.

Period for paying levy

5.—(1) Every licensee shall pay the Energy Regulation Levy to the Authority within forty-five days from the date of sale of or billing for energy, as the case may be.

(2) Failure to collect or difficulty in collecting the monies from customers shall not exonerate the licensee of his obligation to pay the Levy to the Authority within the time specified in paragraph (1).

Interest on delayed payment of levy

6. If a licensee fails to remit the amount of the Levy within the time specified in by-law 5, interest at the rate per annum equivalent to commercial bank lending rate shall be paid on the delayed payment and such interest shall accrue on a daily oasis.

Liquid fuels wholesalers to collect levy from retailers at source

7. Every holler of a wholesale liquid fuels licence shall be responsible for collecting from the retailers the Energy Regulation Levy and paying the Levy to the Authority and the holder of a wholesale liquid fuel licence shall include the Levy in the sale price of liquid fuels sold to the retailers.

Division 2—Billing and Ring-Fence Accounting

Bills to clearly show levy amount

8. A licensee charging the levies shall—

(*a*) distinguish the different levies in its billing from the basic energy tariffs of prices it charges;

(*b*) indicate the levies in its billing in a transparent and easily understandable manner;

(*c*) indicate the date of the bill on each bill;

(*d*) exclude, from the bills when billing a customer the levy paid by the licensee as part of energy acquisition costs; and

(*e*) subject to by-law 5, recover such levies from customers and pay them over to the Authority in accordance with these By-laws.

Ring-fence accounting

9.—(1) Every licensee shall ring-fence every licensed activity in accordance with this by-law.

(2) In order to give effect to paragraph (1), a licensee shall in respect of any licensed activity—

(*a*) keep, or cause to be kept, ring-fenced accounting records; and

(*b*) prepare, in a consistently uniform manner, in respect of each financial year of the licensee, financial statements comprising—

(i) an income statement;

(ii) a balance sheet;

(iii) a cash-flow statement;

(iv) an asset register; and

(v) a statement showing the amounts paid as energy regulation levy.

(3) The financial statements referred to in paragraph (2) (b) shall be accompanied by notes showing separately for each licensed activity and in appropriate detail, the amounts of any revenue, cost, asset, liability, reserve or provision which has been either charged from or to any other activity, business or operations of the licensee, whether licensed or not, together with a description of that charge.

(4) A licensee shall submit to the Authority, not later than six months or such longer period as the Authority may determine after the end of the licensee's financial year, a report by its auditor stating whether, in the auditor's opinion, the financial statements referred to in paragraph 2 (b) have been prepared in accordance with these By-laws to give a true and fair reflection of the financial affairs of the licensed activity and the amount of levy paid by the licensee.

(5) A licensee shall submit to the Authority management accounts within three months at the end of each quarter.

(6) The Authority may subject any financial statements or management accounts submitted to it to independent audit and the cost of such audit shall be borne by the licensee.

Part III

The Rural Electrification Levy

Division 1—The Rural Electrification Levy

The Rural Electrification Levy

10.—(1) Every retail energy licensee shall pay the Rural Electrification Levy specified under section 25 of the Act in accordance with the provisions thereunder and these By-laws.

(2) Failure to collect or difficulty in collecting the monies from customers she 11 not exonerate the licensee of his obligation to pay the Levy to the Authority within the period specified in the Act.

Levy to be charged on basic income

11. The Rural Electrification Levy referred to in by-law 10 shall be charged on the basic income derived from retail energy sales and not from any other income of the licensee.

Liquid fuels wholesalers

12. Every holder of a wholesale liquid fuels licence, shall be responsible for collecting from retailers the Rural Electrification Levy and paying the Levy to the Authority and the holder of wholesale liquid fuel licence shall include the Levy in the sale price of liquid fuels sold to retailers.

Bills to clearly show levy amount

13. A licensee charging the levies, other than retail liquid fuels licensees, shall—

(*a*) distinguish the different levies in its billing from the basic energy tariffs or prices it charges;

(*b*) indicate the levies in its billing, in a transparent and easily understandable manner; and

(*c*) indicate the date of the bill on each bill.

Division 2—Ring-Fence Accounting

Ring-fence accounting

14.—(1) Every licensee shall ring-fence every licensed activity in accordance with this by-law.

(2) In order to give effect to paragraph (1), a licensee shall in respect of any licensed activity—

(*a*) keep, or cause to be kept, ring-fenced accounting records; and

(*b*) prepare, in a consistently uniform manner, in respect of each financial year of the licensee, financial statements comprising—

(i) an income statement;

(ii) a balance sheet;

(iii) a cash-flow statement;

(iv) an asset register; and

(v) a statement showing the amounts paid as rural electrification levy.

(3) The financial statements referred to in paragraph (2) (b) shall be accompanied by notes showing separately for each licensed activity and in appropriate detail, the amounts of any revenue, cost, asset, liability, reserve or provision which has been either charged from or to any other activity, business or operations of the licensee, whether licensed or not, together with a description of that charge.

(4) A licensee shall submit to the Authority, not later than six months or such longer period as the Authority may determine after the end of the licensee's financial year, a report by its auditor stating whether, in the auditor's opinion, the financial statements referred to in paragraph (2) (*b*) have been prepared in accordance with these By-laws and give a true and fair reflection of the financial affairs of the licensed activity and the amount of Levy paid by the licensee.

(5) A licensee shall submit to the Authority quarterly management accounts within three months at the end of each quarter.

(6) A licensee who holds more than one type of licence in the chain of supply of energy shall clearly show the income derived from retail sale of energy for purposes of the Rural Electrification Levy, otherwise it shall be assumed that its total income is derived from retail sale of energy.

(7) The Authority may subject any financial statements or management accounts submitted to it to independent audit and the cost of such audit shall be borne by the licensee.

Part IV

Coal Supply

Division 1—Licences

Licence for coal supply activities

15. No person shall carry on the business of importing, exporting, transporting, storage or selling of coal without a licence issued to him by the Authority.

Application for a licence

16.—(1) Any person who wishes to carry on the business of importing, exporting, transporting, storage or selling of coal shall apply to the Authority for a licence in Form ECS I contained in Part I in the Second Schedule hereto.

(2) There shall be only one type of licence covering any type of activity dealing with coal supply:

Provided that an applicant may apply for licence for one or more coal supply activity.

(3) Every licence issued by the Authority shall be in the form prescribed in Part II in the Second Schedule hereto and shall be valid on the conditions and for the period provided therein.

(4) Every licence issued under these Regulations shall have the following details—

(*a*) name and type of the licence;

(*b*) name and particulars of the licensee;

(*c*) commencement and expiry date;

(*d*) emblem or logo of the Authority;

(*e*) designated signature of the Authority;

(*f*) any such security features as the Authority may determine; and

(*g*) the common seal of the Authority.

Application and licence Fees

17.—(1) No application for licence under these By-laws shall be considered by the Authority unless the applicant has paid the application fees prescribed in Part I of the Third Schedule hereto.

(2) Upon the grant of a licence and upon the annual renewal thereof, an applicant shall pay the licence fee or the renewal fee, as the case may be, specified in Part I of the Third Schedule hereto.

Information to be supplied by applicants

18. An applicant shall, for every application, furnish to the Authority the following—

(*a*) the information specified in Form ECS I contained in the Second Schedule hereto; and

(*b*) a copy of the schedule of prices of the different types or grades of coal or charges for licensed activities it intends to charge consumers.

Grant or denial of application

19.—(1) The Authority shall consider each application under these By-laws and determine if the application meets the criteria specifically set out under this Part and if the Authority is satisfied that the applicant has met all the requirements hereunder, it may issue the licence to the applicant.

(2) Where the Authority determines that the applicant does not meet all the requirements, the Authority shall refuse to grant the licence.

Communication of the Authority's decision

20. Once the Authority determines the outcome of any application for licence, the Authority shall communicate its decision in writing to the applicant within thirty days from the date a decision was made.

Refusal to be accompanied by reasons

21. Where the Authority refuses to grant the licence, it shall give reasons in writing for such refusal to the applicant.

Right of appeal

22. Any applicant whose application for licence has been refused may appeal against the decision in accordance with the Act.

Duration and renewal of licence

23.—(1) Any licence issued under this Part shall be valid for a period of twelve months and may be renewed for a similar period alter the expiration of the period.

(2) An application for renewal of a licence shall be made in a similar manner used when making the initial application.

Division 2—Prices and Charges

Licensees to charge only approved prices

24.—(1) No person shall sell or provide coal supply services to any other person at a price or charge that is higher than the maximum selling prices or charges approved by the Authority.

(2) The Authority may review maximum prices and charges for coal supply licensed activities any time that circumstances necessitate such review, on its own initiative or on the application of a licensee.

(3) Once the Authority has set the new maximum prices or charges it shall communicate the new prices or charges to all licensees.

Factors determining prices

25.—(1) In determining the maximum prices and charges for coal supply licensed activities, the Authority shall take into account the following factors—

(*a*) the acquisition costs of coal;

(*b*) the cost of transportation and distribution to the place of use;

(*c*) the weighted cost of storage;

(*d*) the cost of goods in transit, insurance and other transit expenses;

(*e*) Government taxes and levies on the sale of the product;

(*f*) the weighted cost of labour; and

(*g*) the licensee's approved mark-up.

(2) The Authority, in its discretion, or at the instance of a licensee may take into account other factors as the Authority may deem necessary.

Authority may obtain independent quotations

26. The Authority may obtain independent quotations for prices of all types or grades of coal or charges for coal supply activities for purposes of determining the appropriate prices and charges.

Renewal application to be accompanied by new prices

27. Each licensee applying for renewal of licence shall submit to the Authority the approved maximum prices and charges which the licensee is authorized to charge.

Division 3—Standards and Code of Practice

Standard specification Cap. 51:02

28. Every licensee shall comply with and adhere to the Malaŵi Standards as promulgated under the Malaŵi Bureau of Standards Act in respect of coal.

29. Every licensee shall comply with and adhere to the Environment Management Act.

Compliance with Environment Management Act Cap. 60:02

30. The Authority may through its members, officers or other authorities carry out inspections on the premises or operations of the licensee or on the premises of the customer at the place of use to verify or monitor compliance with the above standards, or Energy Laws or these By-laws.

Authority to monitor standards

Division 4—Coal Transportation and Storage

31. No person shall keep or cause to be kept any coal in excess of two tonnes on any premises other than in an approved storage area.

Prohibition against storage of coal

32. The following conditions shall apply to all storage areas in which coal is stored—

Conditions for management and control of storage area

(*a*) every person managing or employed in or in connexion with the storage area shall abstain from any act or acts whatsoever which may cause fire and shall take all reasonable and necessary steps to prevent any other person from so doing;

(*b*) no fire or naked light shall be permitted in a storage area or within sixteen metres thereof; and

(*c*) all grass, bushes and shrub within sixteen meters near a storage area shall be cut short to the satisfaction of the Authority and no cultivation shall be permitted within sixteen metres from the boundaries of any storage area.

33. No person shall carry out or permit the carrying out of any soldering work within the storage area except in a workshop specifically constructed for that purpose.

Prohibition against soldering

34. No person shall store any type of coal of a quantity of more than half tonne within any building, which or part of which, is used as accommodation or as a place of habitual public resort.

Coal storage in accommodation

35. All accidents arising out of the storage of coal to which these By-laws apply involving fire, shall be reported immediately in writing by the licensee of the storage area to the Authority, any nearest police and fire station.

Reports of accidents

36. Any member or authorized officer of the Authority may, at all reasonable times of the day, enter and inspect any premises in

Inspections by the Authority

respect of which a licence has been granted under or by virtue of these By-laws for purposes of monitoring compliance with these By-laws or the Energy Laws.

Coal transportation Cap. 60:02

37. Every licensee involved in the transportation of coal shall comply with the provisions of the Environment Management Act in respect of pollution of the environment during transportation of coal as well as storage and supply thereof.

Licensee to provide information to applicants and customers

38. A licensee shall, upon the request of an applicant or a customer, provide to the applicant or customer such reasonable information and assistance as may be necessary so that the applicant or customer has sufficient information regarding the service provided by the licensee.

Copies of agreements to be sent to the Authority

39. Every licensee shall within one month of the execution of any coal Sale and Purchase Agreement, provide to the Authority a copy of the Sale and Purchase Agreement.

Registration of coal importers for own use

40.—(1) Every person who wishes to import coal for own use shall register with the Authority and give the necessary details contained in Form ECS 3 in the Fourth Schedule hereto.

(2) Whenever there is a change in the particulars provided under paragraph (1), the registered importer of coal for own use shall immediately advise the Authority of the new particulars.

(3) Every registered importer of coal for own use shall pay a registration fee and annual renewal registration fee prescribed in Part I of the Third Schedule hereto.

(4) Renewal of registration for importation of coal for own use shall be due on the 1st day of January each year.

Mining of coal for own use

41.—(1) Every person who wishes to mine coal for own use shall register with the Authority and give the necessary details contained in Form ECS 4 in the Fourth Schedule hereto.

(2) Whenever there is a change in the particulars provided under paragraph (1), the registered miner of coal for own use shall immediately advise the Authority of the new particulars.

(3) Every registered miner of coal for own use shall pay a registration fee and annual renewal registration fee prescribed in Part 1 of the Third Schedule hereto.

(4) Renewal of registration for mining coal for own use shall be due on the 1st day of January each year.

PART V
Renewable Energy Technologies

Division 1—Licences

42. No person shall carry on the business of importing and selling or installation and maintenance of renewable energy technologies without a licence issued to him by the Authority.

Licences for renewable energy technologies activities G.N. 29/2010

43.—(1) Any person who wishes to carry on the business of importing and selling or installation and maintenance of renewable energy technologies shall apply for a licence in Form ERET 1 contained in the Fifth Schedule hereto.

Licence applications and fees G.N. 29/2010

(2) The Authority shall issue two types of licences for activities dealing with renewable energy technologies—

(*a*) importation and selling; or

(*b*) installation and maintenance.

(3) Every licence issued by the Authority shall be in the form prescribed in the Fifth Schedule hereto and shall be valid on the conditions and for the period therein.

(4) Every licence issued under these By-laws shall have the following details—

(*a*) name and type of the licence;

(*b*) name and particulars of the licensee;

(*c*) commencement and expiry date;

(*d*) emblem or logo of the Authority;

(*e*) designated signature of the Authority;

(*f*) any such security features as the Authority may determine; and

(*g*) the common seal of the Authority.

(5) No application for a licence under these By-laws shall be considered by the Authority unless the applicant has paid the application fees specified in Part II of the Third Schedule hereto.

(6) Upon the grant of the licence and annual renewal thereof, an applicant shall pay the issue fee specified in Part II of the Third Schedule.

44. The Authority shall not issue a licence to an applicant for renewable energy technologies unless the Authority has granted to the applicant an electrical installations permit issued under the Electricity By-laws.

Installations permit under Electricity Act Cap. 73:01 Sub. Leg.

Information to be supplied by applicants

45. Every application for a licence under this Part shall be accompanied by the following—

(*a*) the information specified in Form ERET I;

Cap. 73:01, Sub. Leg.

(*b*) a copy of the Electrical Installations Permit issued to the applicant under the Electricity By-laws;

(*c*) a Schedule of charges for each type of renewable energy technologies equipment to be supplied by him in the next twelve months; and

(*d*) a Schedule of the maintenance charges, where applicable, for all types of maintenance for renewable energy technologies it intends to charge customers in the next twelve months.

Grant or denial of application

46.—(1) The Authority shall consider each application under this Part and determine if the application meets the criteria specifically set out under this Part and if the Authority is satisfied that the applicant has met all the requirements hereunder, it may issue the licence to the applicant.

(2) Where the Authority determines that the applicant does not meet all the requirements, the Authority shall refuse to grant the licence.

Communication of the Authority's decision

47.—(1) Once the Authority determines the outcome of any application for licence, it shall communicate its decision in writing to the applicant within thirty days from the date any such decision is made.

(2) Where the Authority refuses to grant the licence, it shall give reasons in writing for such refusal to the applicant.

Right of appeal

48. Any applicant whose application for licence has been refused may appeal against the decision in accordance with the Act.

Duration and renewal of licence

49.—(1) Any licence issued under this Part shall be valid for twelve months and may be renewed for a similar period after the expiration of the period.

(2) An application for renewal of a licence shall be made in a similar manner used when making the initial application.

Division 2—Prices and Charges

Licensees to charge only approved prices

50.—(1) No person shall sell or provide maintenance services for renewable energy technologies to any other person at a price or maintenance charge that is higher than the maximum selling prices or maintenance charges approved by the Authority.

(2) The Authority may review maximum prices and maintenance charges for renewable energy technologies once a year unless there are special extenuating circumstances necessitating an earlier review.

Factors determining prices

51.—(1) In determining the prices and maintenance charges for renewable energy technologies, the Authority shall take into account the following factors—

(*a*) the Free on Board (FOB) cost of the equipment and associated service spares, tools and materials;

(*b*) the cost of transportation and distribution to the place of use;

(*c*) the weighted cost of storage;

(*d*) the cost of goods in transit, insurance and other transit expenses;

(*e*) Government taxes and levies on the sale of the product;

(*f*) the weighted cost of labour; and

(*g*) the licensee's approved mark-up.

(2) The Authority, in its discretion or at the instance of a licensee, may take into account other factors as the Authority may deem necessary.

Licensees to propose prices annually

52. In order to help determine the prices and charges applicable in the following year, at the time each applicant is applying for renewal of licence, each licensee shall present to the Authority a schedule of prices and charges for all types of renewable energy technologies equipment and maintenance charges it proposes to charge consumers or purchasers during the next twelve months.

Authority may obtain independent quotation

53. In addition to proposals by licensees in by-law 52 above, the Authority may also obtain independent quotations for prices of all types of renewable energy technologies equipment for purposes of determining the appropriate prices and charges for the next twelve months.

Renewed licence to be accompanied by new prices

54. The renewal of licence for each licensee shall be accompanied by the approved maximum prices and charges which that licensee is authorized to charge during the next twelve months.

Division 3—Standards, Code of Practice and Inspections

Standard specification and code of practice

55.—(1) Every licensee shall comply with and adhere to the standard specifications for renewable energy technologies approved by the Authority.

(2) Every licensee shall comply with and adhere to the standard code of practice for renewable energy technologies approved by the Authority.

Electrical installation permits Cap. 73:01, Sub. Leg

56. Every licensee shall comply with and adhere to the applicable provisions in the Electricity By-laws under the Electricity Act in respect of authorized persons or licensees to carry out installations and maintenance of renewable energy technologies installations.

Inspections by the Authority

Cap. 73:01, Sub. Leg.

57. The Authority may, through its members, officers or authorized agents, carry out inspections on the premises or operations of the licensee or on the premises of the customer to verify or monitor compliance with the above standards and code of practice or the Electricity By-laws and shall have power to order rectification of non-compliance thereof.

Division 4—Purchase, Sale and Service Agreements

The Authority to approve purchase agreements

58. Every licensee selling and installing renewable energy technologies equipment shall enter into a sale and purchase agreement with the purchaser and the terms of such agreement shall be subject to the approval of the Authority.

Terms in purchase agreements

59. Every sale and purchase agreement shall contain the following terms and conditions—

(*a*) that the contractor shall fully and faithfully provide all labour, plant, and materials and complete the works and deliver, install, test and commission at buyer's premises the renewable energy technologies equipment, including instructions on location, in operating the system in accordance with the specifications of the contract;

(*b*) that the contractor shall give the buyer the following documents—

(i) commissioning certificate;

(ii) operation manual for the system;

(iii) service contract, signed by both contractor and buyer;

(iv) warranty guarantee or certificate, including warranty transfer agreement transferring the manufacturer's product guarantee to the buyer, where applicable;

(*c*) that if the contractor fails to complete the works within the period specified in the contract, including any extension of time that may be granted, the contractor shall pay the buyer zero point one per cent (0.1%) of the contract price each day of delay up to a maximum often per cent (10%) of the contract price as liquidated damages;

(*d*) that the buyer shall give the licensee free access to his premises to the extent necessary for the licensee to install, test and commission the renew able energy technology system described in the contract; and

(*e*) that the buyer shall reasonably prepare his premises for the installation, and shall attend personally or by duly appointed representative the installation in order to discuss with the licensee's installation crew the exact location of the equipment.

Licensees to sign service agreements with buyers

60.—(1) Every licensee selling and installing renewable energy technologies equipment shall enter into a service agreement with the purchaser.

(2) The Authority shall approve the terms of the agreement referred to in paragraph (1).

Obligations of licensees in service agreements

61. The following licensee's obligations shall be specified in every service agreements, that the licensee shall—

(*a*) perform the maintenance services with reasonable care and skill;

(*b*) perform any associated services within a reasonable time after being requested by the buyer; and

(*c*) use parts that are of merchantable quality and reasonably fit for their purpose.

Obligations of buyers in service agreements

62. The following buyer's obligations shall be specified in every service agreement that the buyer shall—

(*a*) grant the licensee such access to the premises as the licensee shall from time to time reasonably require in order to discharge its obligations hereunder;

(*b*) make available at the premises such facilities as the licensee shall reasonably require in order to discharge its obligations hereunder, including adequate work space and storage;

(*c*) take all reasonable precautions to protect the health and safety of the licensee's employees agents and sub-contractors while on the buyer's site;

(*d*) make available all the documentation and other information necessary for the licensee to diagnose any fault in the equipment; and

(*e*) the licensee shall have a free and unencumbered title to any replaced parts for the equipment replaced during service.

Division 5—Customer Information and Reports

Service agreements

63.—(1) The Authority shall prescribe a standard service agreement in the form set out in the Sixth Schedule hereto.

(2) Licensees and buyers shall enter into a service agreement for the duration of the warranty period.

Licensees to provide information to applicants and customers

64. A licensee shall upon the request of an applicant or a customer provide to such applicant or customer such reasonable information and assistance as may be necessary to enable the applicant or customer become informed about the service provided by the licensee and to apply to receive such service from such licensee.

Copies of agreements to be sent to the Authority

65. Every licensee shall within one (1) month of the execution of the equipment sale and purchase agreement and service agreement provide to the Authority a copy of such equipment sale and purchase agreement and service agreement.

PART VI

Generation of Electricity for Own Use

Registration and annual renewal fees for private owner G.N. 29/2010

66.—(1) Every private owner with a generation capacity of below and above 20 kVA shall register with the Authority, details required under sections A and C only in Form EPOU 1 in the Seventh Schedule hereto:

Provided that only those registered by the Authority shall be permitted to generate electricity for own use.

(2) Whenever there is a change in the particulars provided under paragraph (1), the private owner shall immediately advise the Authority of the new particulars.

(3) Every private owner shall pay a registration fee and an annual renewal fee prescribed in the Third Schedule hereto.

(4) Every person, who, before entry into force of these By-laws, owns generation facilities for own use shall register with the Authority within six months from the date of these By-laws.

(5) Every Registration Certificate issued by the Authority shall be in Form EPOU 2 prescribed in the Seventh Schedule hereto and shall be valid on the conditions and for the period provided therein.

(6) Every Registration Certificate issued under these By-laws shall have the following details—

(*a*) name and type of the Registration Certificate;

(*b*) name and particulars of the registered private generator;

(*c*) commencement and expiry date;

(*d*) emblem or logo of the Authority;

(*e*) designated signature of the Authority;

(*f*) any such security features as the Authority may determine; and

(*g*) the common seal of the Authority.

(7) Generators of less than 20 kVA shall be registered—

(*a*) on importation, at the border of entry; and

(*b*) on sale in Malaŵi, by shop owners who shall transmit a register of such sales to the Authority every three months.

PART VII
Mediation

Division 1—Application

Application of this Part

67. This Part shall apply to all disputes arising between any licensee and any customer or applicant of that licensee.

Division 2—Commencement of Mediation and Appointment of Mediators

Initiation of mediation

68.—(1) Any licensee, customer or applicant may initiate mediation under this Part by filing with the Authority a submission to mediation or a written request for mediation pursuant to the procedures contained under this Part, together with the non-refundable fee specified in Part III of the Third Schedule hereto.

(2) Such initiation of mediation under by-law 68 (1) shall be done within six months from the date on which the last act or omission giving rise to the dispute occurred or failed to occur:

Provided that the Authority may on good cause allow the initiation of mediation more than six months from the date on which the last act or omission giving the rise to the dispute occurred or failed to occur as the case may be.

Requests for mediation

69.—(1) A request for mediation shall contain a brief statement of the nature of the dispute, the names, addresses and telephone numbers of all parties to the dispute and those who will represent them, if any, in the mediation.

(2) The party initiating the mediation shall simultaneously file two copies of the request with the Authority and one copy with every other party to the dispute.

Appointment of the mediator

70.—(1) Upon receipt of a request for mediation, the Authority shall appoint a qualified mediator to deal with the matter.

(2) Unless the parties agree otherwise or the Authority determines otherwise, a single mediator shall be appointed who may be a member of the Authority or an independent person.

Qualifications of the mediator

71.—(1) No person shall serve as a mediator in any dispute in which the person has any financial or personal interest in the results of the mediation.

(2) Prior to accepting an appointment, the prospective mediator shall disclose any circumstance likely to create a presumption of bias or prevent a prompt meeting with the parties and upon receipt of such information, the Authority shall either replace the mediator or immediately communicate the information to the parties for their comments.

(3) In the event that the parties disagree as to whether the mediator shall serve, the Authority shall appoint another mediator.

(4) The Authority may appoint another mediator if the appointed mediator is unable to serve promptly.

Vacancies

72. If any mediator is unwilling or unable to serve, the Authority shall appoint another mediator, unless the parties agree otherwise.

Division 3—Conduct of Mediation and Authority of Mediator

Representation

73.—(1) Any party may be represented by any person of the party's choice.

(2) The name and address of the person shall be communicated in writing to the Authority and to all parties.

Date, time and place of mediation

74.—(1) The mediator shall determine the date and the time of each mediation session.

(2) The mediation shall be held at the appropriate office of the Authority, or at any other convenient location agreed upon by the mediator and the parties.

Identification of matters in dispute

75.—(1) At least five days prior to the first scheduled mediation session, each party shall provide the mediator with a brief memorandum setting out each party's position regarding the issues that need to be resolved and at the discretion of the mediator, such memoranda may be mutually exchanged by the parties.

(2) At the first session, the parties will be expected to produce all information reasonable required for the mediator to understand the issues presented.

(3) The mediator may require any party to supplement such information or provide other documentary and other evidence.

Authority of the mediator

76.—(1) The mediator shall not impose a settlement on the parties but shall attempt to help them reach a satisfactory resolution of their dispute.

(2) The mediator may conduct joint and separate meetings with the parties and make oral and written recommendations for settlement.

(3) Whenever necessary, the mediator may also obtain expert advice concerning technical aspects of the dispute:

Provided that the parties agree and shall be responsible for expenses of obtaining such advice.

(4) Arrangements for obtaining expert advice shall be made by the mediator or the parties, as the mediator shall determine.

(5) The mediator may end the mediation whenever, in the opinion of the mediator, further efforts at mediation would not result into the resolution of the dispute between the parties.

Confidentiality of proceeding

77.—(1) Mediation sessions shall not be open to the public and only the parties and their representatives may attend mediation sessions.

(2) Other persons may attend the mediation only with the permission of the parties and with the consent of the mediator.

Confidentiality of information

78.—(1) Confidential information disclosed to a mediator by the parties or by witnesses in the course of the mediation shall not be disclosed to any other person by the mediator.

(2) The mediator shall treat all records, reports or other documents received by him while serving in that capacity with confidentiality.

(3) The mediator shall not be compelled to disclose the information referred to in paragraph (2) or to testily in regard to the mediation in any adversary proceedings or at any judicial forum.

(4) The parties shall maintain the confidentiality of the mediation and shall not rely on, or introduce as evidence in any arbitral, judicial or other proceeding—

(*a*) views expressed or suggestions made by another party with respect to a possible settlement of the dispute;

(*b*) admissions made by another party in the course of the mediation proceedings;

(*c*) proposals made or views expressed by the mediator; or

(*d*) the fact that another party had or had not indicated willingness to accept a proposal for settlement made by the mediator.

No stenographic record

79. There shall be no stenographic record of the mediation process except for the signed mediation settlement agreement.

Settlement agreement

80.—(1) When it appears to the mediator that there exist elements of a settlement which may be acceptable to the parties, the mediator shall formulate the terms of a possible settlement and submit them to the parties for their consideration, and after receiving the observations of the parties, the mediator may finalize the terms of a possible settlement taking into account the observations and submit them to the parties as it appears to him expedient.

(2) If the parties reach a settlement to the dispute—

(*a*) the mediator shall immediately thereafter draw up a settlement agreement in conjunction with the parties; and

(*b*) the parties shall sign the settlement agreement in the presence of each other, and the mediator shall also sign the settlement agreement in the presence of the parties.

(3) The mediator shall furnish a copy of the signed settlement agreement to each of the parties.

(4) When the parties sign the settlement agreement, the settlement agreement shall be binding on the parties and any persons claiming under them.

Division 4—Miscellaneous Provisions

Termination of mediation

81. Mediation proceedings shall be terminated—

(*a*) by the execution of a settlement agreement by the parties;

(*b*) by a written declaration of the mediator to the effect that further efforts at mediation are no longer worthwhile; or

(*c*) by a written declaration of a party or parties to the effect that the mediation proceedings are terminated.

Exclusion of liability

82.—(1) The Authority or a mediator shall not be compelled to be a party or witness in any judicial proceedings because of their involvement in any mediation proceedings under this Part.

(2) Neither the Authority nor any mediator shall be liable to any party for any act or omission in connexion with any mediation proceedings conducted under this Part.

Interpretation and application of procedures

83.—(1) The mediator shall interpret and apply these procedures insofar as they relate to the mediator's duties and responsibilities.

(2) All other procedures shall be interpreted and applied by the Authority.

Fees and expenses

84.—(1) The expenses of witnesses for either side shall be paid by the party producing such witnesses.

(2) All other expenses of the mediation, including required travel and other expenses of the mediator and representatives of the Authority, and the expenses of any expert advice or witnesses produced at the direct request of the mediator and agreed to by the parties shall be borne equally by the parties unless they otherwise agree.

(3) The fees payable to the mediator shall be borne by the parties equally unless they otherwise agree and such fees shall be as specified in Part IV of the Third Schedule hereto.

Use of forms

85. The parties shall use the forms specified in the Eighth Schedule hereto or any other forms approved or promulgated by the Authority.

Part VIII

Arbitration

Division 1—Application

Application of this Part

86. This Part shall apply to all disputes arising between any licensee and any customer or applicant of that licensee.

Division 2—Arbitrators and Commencement of Arbitration

The Authority and delegation of duties

87.—(1) The powers and duties of the Authority with respect to the arbitration of disputes between licensees and their customers or applicants are prescribed under this Part and the Act and may be carried out by representatives of the Authority as it may direct.

(2) The Authority may in its discretion, assign the administration of arbitration to any of its members or officers.

Roster of Arbitrators

88.—(1) The Authority shall establish and maintain a roster of arbitrators (the "Roster of Arbitrators") and shall appoint arbitrators from the Roster of Arbitrators when there is need.

(2) Under this Part, members of the Authority may be included on the Roster of Arbitrators.

(3) For the purposes of this Part "arbitrator" means the person appointed to consider and deal with a particular matter, whether composed of one or more arbitrators.

(4) The Roster of Arbitrators shall contain fee rate, in front of the name of each arbitrator.

Initiation of arbitration

89.—(1) Any licensee, customer or applicant may initiate an arbitration process under this Part in the following manner—

(*a*) the initiating party (the "claimant") shall give to the other party (the "respondent") written notice of its intention to arbitrate (the "demand") within six months from the date on which the last act or omission giving rise to the dispute occurred or failed to occur, as the case may be:

Provided that the Authority may on good cause allow the initiation of arbitration more than six months from the date on which the last act or omission giving rise to the dispute occurred or failed to occur, as the case may be.

(*b*) The demand shall contain a statement setting out the nature of the dispute, the names and addresses of all parties involved, the amount in question, if any, the remedy being sought, and the venue of hearing being requested;

(*c*) the claimant shall file at the office of the Authority two copies of the demand, together with the application fee, as prescribed in Part IV of the Third Schedule hereto; and

(*d*) the Authority shall acknowledge receipt of the demand after the demand is filed with the Authority.

(2)—(*a*) A respondent may file a response to the claim in duplicate, with the Authority within fifteen days after the acknowledgment of demand is sent by the Authority to the respondent;

(*b*) the respondent shall, at the time of filing the response, send a copy of the response to the claimant;

(*c*) if the respondent wishes to file a counterclaim, the counterclaim shall contain a statement setting out the nature of the counterclaim, the amount in question, if any, and the remedy being sought and the respondent shall forward to the Authority with the counterclaim and the appropriate fee specified in Part IV of the Third Schedule hereto.

(3) If no response or counterclaim is filed within the specified time, the respondent shall thereby be deemed to deny the claim and arbitration process shall proceed.

(4) When filing a demand, response or counterclaim pursuant to this by-law, a party shall sufficiently describe the demand, response or counterclaim as the case may be, so that the circumstances of the dispute are clear to the arbitrator.

Changes of claim

90.—(1) If a party, after filing a matter desires to make any new or different demand, response or counterclaim, as the case may be, it shall be made in writing and filed with the Authority.

(2) The party wishing to make the change shall provide a copy containing the changes to the other party, who shall have fifteen (15) days from the date of such transmission within which to file a response in respect of the changes with the Authority.

(3) However, after the appointment of an arbitrator, no new or different issue may be submitted to the Authority except with the arbitrator's consent.

Jurisdiction

91.—(1) The arbitrator shall have the power to rule on the question regarding his own jurisdiction, including any objections with respect to the existence, scope or validity of the arbitration agreement.

(2) A party may object to the jurisdiction of the arbitrator or to the arbitrability of a demand or counterclaim no later than the filing of the response to the demand or counterclaim, as the case may be, that gives rise to the objection.

(3) The arbitrator may rule on the objection as a preliminary matter or as part of the final award.

Mediation

92.—(1) At any stage of the proceedings, the parties may agree to conduct a mediation conference in accordance with the provisions under Part VI on Mediation in order to facilitate a settlement.

(2) The mediator shall not be the same person as the arbitrator dealing with the matter.

(3) Where the parties to a pending arbitration agree to mediate under the mediation provisions, no additional application fee is required to initiate the mediation.

Administrative conference

93.—(1) At the request of any party or upon the Authority's own initiative, the Authority may conduct an administrative conference, in person or by telephone, with the parties or their representatives.

(2) The conference may address such issues as arbitrator selection, potential mediation of the dispute, potential exchange of information, venue of arbitration, a timetable for the hearings, payment of deposit fees for arbitrator and any other administrative matters.

The venue

94.—(1) The parties may mutually agree on the venue where the arbitration is to be held.

(2) Where any party requests that the hearing be held at a specific place and the other party files no objection thereto within fifteen days after notice of the request has been sent to it by the Authority, the venue shall be the one requested.

(3) Where the other party objects to the venue requested by the party, the Authority shall determine the venue, and the Authority's decision on the matter shall be final and binding.

Appointment from Roster of Arbitrators

95.—(1) An arbitrator shall be appointed in the following manner—

(*a*) immediately after the filing of the demand, response or counterclaim, as the case may be, or upon the expiration of the time within which a response is supposed to be filed, whichever occurs last, the Authority shall send simultaneously to each party to the dispute an identical list of six, unless the Authority decides that a different number is appropriate, names of persons chosen from the Roster of Arbitrators together with their fee rate.

(2) The parties shall choose an arbitrator from the submitted list and to advise the Authority of their choice.

(3) Where the parties are unable to agree upon an arbitrator—

(*a*) each party to the dispute shall have seven days from the transmittal date during which to strike off the names objected to, and number the remaining names in order of preference and return the list to the Authority;

(*b*) if a party does not return the list within the time specified, all persons named therein shall be deemed acceptable to that party; and

(*c*) from among the persons who have been approved on both lists, and in accordance with the designated order of mutual preference, as far as it is possible, the Authority shall invite the acceptance of an arbitrator to serve.

(4) Where acceptable arbitrators are unable to act, or if for any other reason the appointment cannot be made from the submitted lists, the Authority shall appoint an arbitrator from among other members of the Roster of Arbitrators without submitting the new list to the parties.

(5) Unless the parties otherwise agree, where there are two or more claimants or two or more respondents, the Authority may appoint all the arbitrators.

Number of arbitrators

96. All disputes shall be heard and determined by one arbitrator, unless the Authority, in its discretion, directs that three arbitrators be appointed.

Disclosure

97.—(1) Any person appointed or to be appointed as an arbitrator shall disclose to the Authority any circumstance likely to give rise to justifiable doubt as to the arbitrator's impartiality or independence including any bias or any financial or personal interest in the result of the arbitration or any past or present relationship with the parties or their representatives.

(2) The obligation to disclose shall remain in effect throughout the arbitration.

(3) Upon receipt of such information from the arbitrator or another source, the Authority shall communicate the information to the parties and, if it deems it appropriate to do so, to the arbitrator and others.

(4) In order to encourage disclosure by arbitrators, disclosure of information under this By-law shall not be construed as an indication that the arbitrator considers that the disclosed circumstances is likely to affect impartiality or independence.

Disqualification of arbitrator

98.—(1) An arbitrator shall be impartial, independent and diligent in the performance of his duties and shall also carry out his duties in good faith.

(2) An arbitrator shall be disqualified for—

(*a*) partiality or lack of independence;

(*b*) inability or refusal to perform his duties with diligence and in good faith; or

(*c*) any grounds for disqualification provided for under any written applicable law.

(3) Upon objection of a party to the continued service of an arbitrator, or on its own initiative, the Authority shall determine whether the arbitrator should be disqualified under the grounds set out above and shall inform the parties of its decision which decision shall be binding.

Communication with arbitrator

99. Any party or any person acting on behalf of a party, shall not communicate with an arbitrator or a prospective arbitrator concerning the arbitration without the knowledge of the other party.

Vacancies

100.—(1) If for any reason, an arbitrator is unable to perform his duties and, the Authority is satisfied that this is the case, the Authority shall terminate the services of the arbitrator.

(2) The Authority shall replace the arbitrator in accordance with the provisions of this Part.

(3) Where a vacancy occurs in a panel of arbitrators after the hearing of a matter has commenced, the remaining arbitrator or arbitrators may continue with hearing the matter unless the parties otherwise agree.

(4) In the event of the appointment of a substitute arbitrator, the panel of arbitrators shall determine in its discretion whether it is necessary to repeat all or part of any prior hearings.

Division 3—Conduct of Arbitration Proceedings

Preliminary hearing

101.—(1) At the request of any party or at the discretion of the arbitrator or the Authority, the arbitrator may schedule as soon as practicable a preliminary hearing with the parties or their representatives.

(2) During the preliminary hearing, the parties and the arbitrator shall discuss the future conduct of the case, including clarification of the issues and claims, a schedule for the hearings and any other preliminary matters.

Exchange of information

102.—(1) At the request of any party or at the discretion of the arbitrator, consistent with the expedited nature of arbitration, the arbitrator may direct—

(*a*) the production of documents and other information; and

(*b*) the identification of any witness to be called.

(2) The arbitrator may resolve any disputes concerning the exchange of information.

Date, time and place of hearing

103.—(1) The arbitrator shall set the date, time and place for each hearing.

(2) The parties shall respond to the notice of hearing dates in a timely manner, be cooperative in scheduling the earliest practicable date and adhere to the established hearing schedule.

(3) The Authority shall send a notice of hearing to the parties at least ten (10) days prior to the date of hearing, unless otherwise agreed by the parties.

Confidentiality of hearing

104.—(1) Arbitration sessions shall not be open to the public and only the parties and their representatives may attend arbitration sessions.

(2) Other persons may attend the arbitration only with the permission of the parties and with the consent of the arbitrator.

Representation

105.—(1) Any party may be represented by a legal practitioner or other authorized representative.

(2) A party intending to be represented shall notify the other party and the Authority of the name and address of the representative at least three days prior to the date set for the hearing at which the representative will first appear.

(3) Where such a representative initiates arbitration or responds for a party, notice of representations is deemed to have been given.

Oaths

106.—(1) Each arbitrator shall, before the commencement of the arbitration proceedings take an oath.

(2) The arbitrator may require witnesses to testify under oath administered by any duly qualified person.

Stenographic record

107.—(1) Where a party wants a stenographic record, he shall make arrangements directly with a stenographer and notify the other parties of the arrangements at least three days before the date of hearing.

(2) The requesting party shall pay the cost of the record.

(3) Where the parties agree, or the arbitrator determines that the stenographic record be the official record of the proceedings, the record shall be provided to the arbitrator and made available to the other parties for inspection, at a date, time and place determined by the arbitrator.

Interpreters and language of proceedings

108. Where a party requires an interpreter, he shall make all arrangements directly with the interpreter and shall be responsible of the costs of the service, otherwise all proceedings shall be conducted in English.

Postponement

109. The arbitrator may postpone any hearing upon—

(*a*) mutual agreement of the parties;

(*b*) the request of a party for good cause shown; or

(*c*) the arbitrator's own initiative.

Arbitration in the absence of a party or representative

110.—(1) Arbitration may proceed in the absence of any party or representative who, after due notice, fails to be present or fails to obtain a postponement:

Provided however that an award shall not be made against a party solely on the grounds of the absence of the party.

(2) Where a party is absent during arbitration under the circumstances referred to in paragraph (1), the arbitrator shall require the party who is present to submit such evidence as the arbitrator may require for the making of an award and the arbitrator shall make a decision on the merits of the case.

Conduct of proceedings

111.—(1) A claimant shall present evidence to support its demand and a respondent shall then present evidence to support its response or counterclaim, as the case may be.

(2) Witnesses for each party shall answer questions from the arbitrator and the other party.

(3) The arbitrator may vary this procedure:

Provided that the parties are treated with equality and that each party has the right to be heard and is given a fair opportunity to present its case.

(4) The arbitrator in the exercise of his discretion, shall conduct the proceedings with a view to expediting the resolution of the dispute and may direct the order of proof, order the separation of issues and direct the parties to focus their presentations on issues which could dispose of all or part of the matter.

(5) The parties may agree to waive oral hearings in any case.

Evidence

112.—(1) The parties may offer such evidence as is relevant and material to the dispute and shall produce such evidence as the arbitrator may deem necessary for understanding and determination of the dispute.

(2) Conformity to legal rules of evidence shall not be necessary in the arbitration.

(3) All evidence shall be taken in the presence of all the arbitrators and all of the parties, except where any of the parties is absent, in default or has waived the right to be present.

(4) The arbitrators shall determine the admissibility, relevance and materiality of the evidence offered and may exclude evidence deemed by the arbitrator to be cumulative or irrelevant.

(5) An arbitrator shall take into account applicable legal principles of legal privilege such as those involving the confidentiality of communication between a lawyer and client.

(6) An arbitrator shall have the power to subpoena witnesses and order production of documents and the arbitrator or other person authorized by law to subpoena witnesses or documents may do so upon the request of any party or independently.

Evidence by affidavit, filing of documents or other evidence

113.—(1) An arbitrator may receive and consider the evidence of witnesses by declaration or affidavit, but shall give the evidence only such weight as the arbitrator deems fit after taking into consideration any objection made to its admission.

(2) If the parties agree or the arbitrator directs that documents or other evidence be submitted to the arbitrator after the hearing, the documents or other evidence shall be filed with the Authority for transmission to the arbitrator.

(3) All parties shall be afforded an opportunity to examine and respond to such documents or other evidence.

Inspection or investigation

114.—(1) Where an arbitrator deems it necessary to conduct an inspection or investigation in connexion with the arbitration, he shall direct the Authority to advise the parties accordingly.

(2) The arbitrator shall set the date and time and the Authority shall notify the parties when the inspection or investigation, as the case may be, shall be conducted.

(3) Any party may be present at such an inspection or investigation.

(4) Where one or all parties are not present at the inspection or investigation, the arbitrator shall make an oral or written report to the parties and afford them an opportunity to comment.

Interim measures

115.—(1) An arbitrator may determine whatever interim measures he deems necessary.

(2) Such interim measures may be in the form of an interim award, and the arbitrator may require security for the costs of such measures.

(3) A request for interim measures addressed by a party to a judicial authority shall not be deemed incompatible with the agreement to arbitrate or a waiver of the right to arbitrate.

Closing of hearing

116.—(1) Before the conclusion of an arbitration, an arbitrator shall specifically inquire from all parties whether they have any further evidence or proof to offer or witnesses to be heard.

(2) Upon receiving negative replies or if satisfied that the record is complete, the arbitrator shall declare the hearing closed, however where briefs or submissions are to be filed, the hearing shall be declared closed on the final date set by the arbitrator for the receipt of briefs or submissions.

(3) If documents are to be filed as provided under by-law 113 and the date set for their receipt is later than that set for the receipt of briefs or submissions, the later date shall be the closing date of the hearing.

(4) The time limit within which the arbitrator is required to make the award shall commence, in the absence of other agreements by the parties, upon the closing of the hearing.

Reopening of hearing

117.—(1) The hearing may be reopened on an arbitrator's initiative, or upon an application of a party, at anytime before an award is made.

(2) If reopening the hearing would prevent the making of an award within the specific time agreed by the parties, the matter may not be reopened unless the parties agree on an extension of time.

(3) Where no specific date is fixed, the arbitrator may reopen the hearing and shall make an award within thirty days from the day the reopened hearing was closed.

Waiver of objection

118. Any party who proceeds with the arbitration after the knowledge that any provision or requirement under these By-laws has not been complied with and who fails to object in writing shall be deemed to have waived the right to object.

Extension of time

119.—(1) The parties may modify any period of time by mutual agreement.

(2) The Authority or the arbitrator may, for good cause, extend any period of time established under this Part except the time for making an award and the Authority shall notify the parties of any extension.

Service of notice

120.—(1) Any papers, notices or process necessary or proper for the initiation or continuation of an arbitration under this Part or any court action in connexion therewith or for the entry of judgment on any award made under this Part may be served on a party by mail addressed to the party or its representative at the last known address or by personal service.

(2) Unless otherwise instructed by the Authority or by the arbitrator, any documents submitted by any party to the Authority or to the arbitrator shall simultaneously be provided to the other party or parties to the arbitration.

Division 4—Awards and Follow up Judicial Process

Majority decision

121. Where a panel consists of more than one arbitrator, unless required by any written law or by the arbitration agreement, the decision of the arbitrators shall be that of the majority.

Time of award

122. An award shall be made promptly by an arbitrator and unless otherwise agreed by the parties or specified by law, no later than thirty days from the date of closing the hearing or if oral hearings have been waived from the date of the Authority's transmittal of the final statements, submissions, briefs and proofs to the arbitrator.

Form of award

123.—(1) Any award shall be in writing and signed by the majority of the arbitrators.

(2) An arbitrator need not render a reasoned award unless the parties request such an award in writing prior to appointment of the arbitrator or unless the arbitrator determines that a reasoned award is appropriate.

Scope of work

124.—(1) An arbitrator may grant any remedy or relief that the arbitrator deems just and equitable and within the scope of the agreement of the parties, including specific performance of a contract.

(2) In addition to a final award, the arbitrator may make other decisions, including interim, or partial orders and awards.

(3) In any interim or partial award, the arbitrator may assess and apportion the fees, expenses and compensation related to such award as the arbitrator determines is appropriate.

(4) In the final award, an arbitrator shall assess the fees, expenses and compensation provided in by-laws 131, 132 and 133 and the arbitrator may apportion such fees, expenses and compensation among the parties in such amounts as the arbitrator determines is appropriate.

(5) The award of an arbitrator may include—

(*a*) interest at such rate and from such date as the arbitrator may deem appropriate; and

(*b*) an award of legal practitioner's fees if the parties have requested such an award or it is authorized by law or their arbitration agreement.

Consent award

125.—(1) Where the parties settle their dispute during the course of the arbitration and if the parties so request, an arbitrator may set forth the terms of the settlement in the "consent award".

(2) A consent award shall include an allocation of arbitration costs, including application fees and expenses as well as arbitrator fees and expenses.

Delivery of award to parties

126. Parties to the arbitration shall accept as notice and delivery of an award where the award or a true copy thereof is sent through the mail addressed to the parties or their representatives to their last known addresses, personal or electronic service of the award, or the filing of the award in any other manner that is permitted by law.

Correction of an award

127.—(1) Within twenty days after the transmittal of an award, any party, upon notice to the other parties, may request an arbitrator through the Authority to correct any clerical, typographical, or computational errors in the award.

(2) While the arbitrator is making the corrections, he shall not re-determine the merits of any claim already decided and the other parties shall have ten days to respond to the request for corrections.

Release of documents for judicial proceedings

128. The Authority shall, upon the written request of a party, furnish to the party, at the party's expense, certified copies of any papers in the Authority's possession that may be required in judicial proceedings relating to the arbitration.

Applications to court and exclusion of liability

129.—(1) No judicial proceedings by a party relating to the subject matter of the arbitration shall be deemed a waiver of the party's right to arbitrate.

(2) The Authority or an arbitrator shall not be compelled to be a party or a witness in any judicial proceedings because of their involvement in any arbitration proceedings under this Part.

(3) Parties to an arbitration under this Part shall be deemed to have consented that an arbitration award may be filed in any court of competent jurisdiction.

(4) Parties to an arbitration under this Part shall be deemed to have consented that neither the Authority nor any arbitrator shall be liable to any party in any action for damages or injunctive relief for any act or omission in connexion with any arbitration under this Part.

Division 5—Fees and Expenses

Application of fees

130. A claimant or a respondent in any matter shall pay the application fees prescribed in Part IV of the Third Schedule hereto.

Expenses

131.—(1) The expenses of witnesses for either side shall be paid by the party producing such witnesses.

(2) All other expenses of the arbitration, including required travel and other expenses of an arbitrator, representatives of the Authority and any witness and the cost of any proof produced at the direct request of the arbitrator, shall be borne equally by the parties, unless the parties otherwise agree or unless the arbitrator in an award assesses such expenses or any part thereof against any specific party or parties.

Neutral arbitrator's fees

132.—(1) Any person appointed from the Roster of Arbitrators, other than a member of the Authority, shall be paid the fees specified in the Arbitrator's Roster for that particular arbitrator.

(2) Where there is disagreement concerning the rate of fees, an appropriate rate shall be determined by the Authority together with the arbitrator and the parties shall be informed accordingly.

(3) Any arrangement for the fees, including payment of such fees shall be made through the Authority and not directly between the parties and the arbitrator.

Arbitration fees for member of Authority

133. Where a member of the Authority acts as an arbitrator, the arbitration fees payable shall be those spelt out in Part V of the Third Schedule hereto:

Provided that the non-refundable application fees shall be K20,000.

Deposit

134. The Authority may require the parties to deposit in advance of any hearing such sums of money as it deems necessary to cover the expenses of the arbitration, including the arbitrator's fee, and the Authority shall account to the parties on how the money was spent and return any balance to the parties at the conclusion of the matter.

Suspension for non-payment

135.—(1) If arbitrator's fees or other expenses have not been paid in full by the parties, the Authority shall inform the parties so that one party may advance the required payment.

(2) If the payments are not made, the arbitrator may order the suspension or termination of the proceedings, or if no arbitrator has yet been appointed, the Authority may suspend the proceedings.

Division 6—Miscellaneous Provisions

Interpretation and application of this Part

136.—(1) An arbitrator shall interpret and apply the provisions under this Part insofar as they relate to the arbitrator's powers and duties.

(2) Where there is more than one arbitrator and a difference arises among them concerning the meaning or application of the provisions under this Part, the arbitrators shall decide the matter by a majority vote.

(3) Where the issue is still not resolved, the arbitrators or a party may refer the question to the Authority for final decision.

(4) All other rules in respect to arbitration shall be interpreted and applied by the Authority.

PART IX
Licensees to Supply Information

Licensees to supply required information

137. Every holder of a licence under these By-laws shall provide information to the Authority about any licensed activity it deals with including any information on amounts, prices, specifications in the manner prescribed by the Authority.

PART X
Offences and Penalties

Offences and penalties

138. A person who contravenes any provision of these By-laws commits an offence and on conviction, shall be liable to a fine of K2,000 and to imprisonment for a term of six months.

FIRST SCHEDULE by-law 3

ENERGY REGULATION (LEVY PAYABLE BY ENERGY LICENCE HOLDER UNDER THE ENERGY LAWS)

(1) Levies on Electricity Sales:

One per centum (1%) of basic income on electricity sales.

(2) Levies of Liquid Fuels:

(i) Fossil Fuels—

	Matter	*Levy Payable*
(*a*)	Diesel	37 tambala per litre;
(*b*)	Petrol	41 tambala per litre;
(*c*)	Paraffin	29 tambala per litre;
(*d*)	Aviation fuel	50 tambala per litre
(e)	Jet-Al	50 tambala per litre;
(*f*)	Bitumen	50 tambala per kilogram;
(*g*)	Other organic compounds, pure or blended, which are derived from the refining or processing of crude oils or mixtures of crude oils, or refined from plant organic materials	50 tambala per litre.

(i) Bio-Fuels—

	Matter	*Levy Payable*
(*a*)	Ethanol	50 tambala per litre;
(*b*)	Bio-Diesel	50 tambala per litre; and
(*c*)	Any other product categorized as a bio-fuel	50 tambala per litre.

(3) Levies of Gas:

	Matter	*Levy Payable*
(*a*)	LPG	50 tambala per kilogram;
(*b*)	AV-GAS	50 tambala per litre;
(*c*)	Methane	50 tambala per kilogram;
(*d*)	Ethane	50 tambala per kilogram;
(*e*)	Butane	50 tambala per kilogram;
(*f*)	Propane	50 tambala per kilogram; and
(*g*)	Other similar gases or mixtures of the gases whether in gaseous or liquefied state	50 tambala per kilogram.

(4) Levies of Solid Fuels:

	Matter	*Levy Payable*
(*a*)	Coal	50 tambala per kilogram;
(*b*)	Peat	50 tambala per kilogram; and
(*c*)	Other	50 tambala per kilogram.

(5) Levies of Lubricants:

Matter	*Levy Payable*
Lubricants	50 tambala per litre.

(6) Other products or by-products of crude oil processing having a Flash Point lower than 120°C, determined in a Pen sky-Martens closed test apparatus . . . . 50 tambala per litre.

Application For Licence

SECTION A

PARTICULARS OF APPLICANT

A.1 Full names of applicant: .....

A.2 Address of applicant, or in the case of a body corporate, the registered office:
.....

A.3 Telephone number of applicant: .....
Fax number: .....

A.4 E-mail address: .....

A.5 Details of the Contact Person:
(*a*) Full Name: .....
(*b*) Telephone number: .....
(*c*) Fax number: .....
(*d*) E-mail address: .....

A.6 Legal personality of applicant: .....

A.7 If the applicant is a company provide the following details—
(*a*) full names of shareholders and their holding percentages;
(*b*) full names and occupation of Directors;
(*c*) Certificate of Incorporation;
(*d*) Memorandum and Articles of Association.

SECTION B

COMMENCEMENT DATE AND PURPOSE OF LICENCE

B.1 Desired date from which the licence (if granted) is to take effect:

.....

B.2 Purpose of licence: .....

B.3 Type of application (issue, transfer, amendment or renewal):

SECTION C

PARTICULARS OF ANY LONG-TERM ARRANGEMENTS WITH ENERGY SUPPLIERS

.....

.....

.....

.....

.....

.....

Particulars of the contractual arrangements (attach draft contract if in place):

.....

.....

.....

.....

.....

.....

SECTION D

FINANCIAL INFORMATION

D.1 *Income Statement:*

Provide statements and annual forecasts of sales, revenues and costs. Attach copies of the current or budgeted balance sheet, rate of return, profit and loss account and source and application of funds for current and next two (2) years. Indicate major cost items such as staff costs, transport, etc.

D.2 *Audited Accounts:*

Provide copies of the latest audited accounts of the applicant.

SECTION E

INFORMATION ON HUMAN RESOURCES

E.1 Submit details of the number of staff and employees and their categories and grades in the service of or to be recruited by the applicant, showing their qualifications and number of years of experience in similar jobs.

E.2 Provide *curriculum vitae* of top management personnel of the applicant.

SECTION F

PERMITS FROM OTHER GOVERNMENT DEPARTMENTS OR REGULATORY AUTHORITIES

Submit copies of permits or approvals issued by public or local authority or other regulatory agencies necessary for the operation of the Coal Supply business.

SECTION G

ENVIRONMENTAL CONSIDERATION

G.1 Provide a brief description of the likely negative impact of the Coal Supply business on natural resources and environment and mitigation measures proposed.

G.2 Provide a copy of the approved environmental mitigation plan (if any) by the relevant authority.

SECTION H

PRICES AND CHARGES

Provide a schedule of the proposed prices and charges.

SECTION I

ADDITIONAL INFORMATION

Provide any other relevant information which the applicant wishes to include with this application.

.....

of (physical address): .....

for the importing/exporting/transporting/storage/selling of coal subject to the conditions prescribed by the Energy Regulation By-laws, 2009, made under the Energy Regulations Act (Cap. 73:02).

This Licence shall expire on the ..... day of ..... next following the date of issue hereof, and may be renewed on application being made for this purpose.

Issued this ..... day of....., 20 .....

.....

for Malaŵi Energy Regulatory Authority

This Licence is issued subject to the Energy Regulation By-laws of which the Licensee admits cognizance.

G.N. 29/2010

THIRD SCHEDULE by-laws 16, 40 and 41

FEES

PART I

FEES PAYABLE UNDER PART IV FOR THE COAL SUPPLY

		K	t
1.	On application for a licence or renewal thereof—		
(*a*)	Wholesale Licence	200,000	00
(*b*)	Distribution Licence	50,000	00
(*c*)	Retailing Licence	20,000	00
(*d*)	Storage Licence	50,000	00
(*e*)	Transportation Licence	50,000	00
(*f*)	Exportation Licence	50,000	00
(*g*)	Importation Licence	200,000	00

	K	t
2. On application for registration for importation and mining of coal for own use or renewal thereof—		
(*a*) importation for own use	30,000	00
(*b*) mining for own use	30,000	00
3. On issue of a licence:		
Applicable to all types of licences considered under Part I of this Third Schedule	5,000	00

PART II

FEES UNDER PART V FOR RENEWABLE TECHNOLOGIES — by-law 43 (5)

1. On application	10,000	00
2. On issue	5,000	00
3. On renewal	10,000	00

PART III

REGISTRATION FEES FOR PRIVATE GENERATION — by-law 66

CAT. I	Less than 20kVA	Nil (Free)
CAT. II	Standby Private Generation 20kVA or above	MK100/kVA with MK 3,000 as a minimum
CAT. III	Base Load Private Generation 20kVA or above . . .	MK150/kVA

PART IV

FEES PAYABLE UNDER PART VII FOR MEDIATION — by-laws 68 and 84

1. Non-refundable fee for initiating mediation . .	4,000 00
2. Mediator's Fees—	*Fees Payable*
(*a*) value of subject matter:	
(i) where the value exceeds K50,000 but does not exceed K100,000	5 per cent, subject to a minimum of K5,000
(ii) where the value exceeds K 100,000 but does not exceeds K500,000	3 per cent, subject to a minimum of K10,000
(iii) where the value exceeds K500,000 but does not exceed K1,000,000	2 per cent, subject to a minimum of K15,000
(iv) where the value exceeds K 1,000,000 and above	1 per cent, subject to a minimum of K20,000 and maximum of K100,000

(*b*) where the value of the matter has not been determined, the rate of fees shall be K2,000 per hour subject to a minimum of K5,000 and a maximum of K100,000.

PART V

FEES PAYABLE UNDER PART VIII FOR ARBITRATION — by-laws 84, 130 and 133

1.	Non-refundable fee for initiating arbitration	K20,000
2.	Arbitrator's Fees—	*Fee Payable*
	(*a*) value of subject matter:	
	(i) where the value exceeds K50,000 but does not exceed K100,000	5 per cent, subject to a minimum of K5,000
	(ii) where the value exceeds K 100,000 but does not exceed K500,000	3 per cent, subject to a minimum of K10,000
	(iii) where the value exceeds K500,000 but does not exceed K1,000,000	2 per cent, subject to a minimum of K15,000
	(iv) where the value exceeds K1,000,000 and above	1 per cent, subject to a minimum of K20,000 and maximum of K100,000

(*b*) where the value of the matter has not been determined, the rate of fees shall be K2,500 per hour subject to a minimum of K5,000 and a maximum of K100,000.

(CAP. 73:02)

ENERGY REGULATION BY-LAWS

FORM ERET 1

LICENCE FOR RENEWABLE ENERGY ACTIVITIES

This Licence is hereby granted to: .....

of (physical address): .....

.....

for the importation and selling/installation and maintenance of renewable energy technologies subject to the conditions prescribed by the Energy Regulation By-laws, made under the Energy Regulation Act (Cap. 73:02).

This Licence shall expire on the ..... day of ..... next following the date of issue hereof, and may be renewed on application being made for this purpose.

Issued this ..... day of ....., 20.....

.....

for Malaŵi Energy Regulatory Authority

This Licence is issued subject to the Energy Regulation By-laws, of which the Licensee admits cognizance.

SIXTH SCHEDULE by-law 63

REPUBLIC OF MALAŴI

ENERGY REGULATION ACT

(CAP. 73:02)

ENERGY REGULATION BY-LAWS

SERVICE AGREEMENT UNDER RENEWABLE ENERGY TECHNOLOGIES

THIS SERVICE AGREEMENT is made the ..... day of ..... , 20.....

Between ..... of ..... (hereinafter referred to as "the Owner") of the one part and ....., (hereinafter referred to as "the Contractor") of the other part:

WHEREAS by an agreement made the .....day of ..... , 20..... Between the ..... (hereinafter referred to as the "Buyer") and the Contractor, the Contractor sold to the Buyer the Renewable Energy Technology Equipment, more fully described in the Schedule attached hereto: WHEREAS the signing of Hand Over and User Agreement will pass the title in the Renewable Energy Technology Equipment to the Buyer;

WHEREAS it is a condition of the said Purchase Agreement that the Contractor and the Buyer shall execute this Service Agreement for the service and maintenance of the said Renewable Energy Technology Equipment;

NOW THEREFORE the Parties to this Agreement hereby agree that:

1. DEFINITIONS

1.1 In this Agreement unless the context otherwise requires—

"additional charges" means the charges to be calculated by the Contractor on a time and material basis at its then prevailing rates in respect of the provision of Exempted Services pursuant to clause 6.3;

"commencement date" means the date set out in the Schedule hereto upon which this Agreement shall commence;

"excepted services" means those services referred to in clause 6 which do not fall within the Maintenance Services;

"Government" means the Department of Energy Affairs or its authorized representative;

"initial period" means the period of twelve months from the commencement date;

"maintenance charges" means the aggregate annual charges for the Maintenance Service calculated in accordance with clause 3.1 below and set out in the Schedule hereto;

"maintenance services" means the provision of preventative maintenance, curative maintenance and other services as defined in clause 4;

"monitoring engineer" means the Authority or its Agents or other body authorized by the Malaŵi Government;

"place of use" means that part of the Buyer's premises at the Site where the Renewable Energy Technology is installed and operated;

"renewable energy technology equipment" means the items of Renewable Energy Technology Equipment identified by type and serial number in the Schedule hereto; and

"site" means the Buyer's address specified in the Schedule hereto.

2. CONTRACTOR'S UNDERTAKING

2.1 In consideration of the payment by the Buyer from time to time of the maintenance charges in accordance with the provisions of clause 3, the Contractor undertakes to provide the Maintenance Services in respect of the Renewable Energy Technology Equipment upon the terms and conditions of this Agreement.

3. MAINTENANCE CHARGES

3.1 The annual maintenance charges at the date hereof in respect of each item of Renewable Energy Technology Equipment shall be as set out in the Schedule. The aggregate of such annual maintenance charges shall constitute the maintenance charges for the purposes of this Agreement.

3.2 The Contractor shall not be entitled to vary the maintenance charges during the period of twelve months commencing on the commencement date.

Thereafter the Contractor shall be entitled to vary the maintenance charges not more than once in every successive period of twelve months upon giving not less than ten days prior written notice of increase to the Buyer.

3.3 Upon receipt of a notice of increase in Maintenance Charges in accordance with clause 3.2 above, the Buyer shall be entitled to terminate this agreement in accordance with clause 12.

3.4 The maintenance chares shall cover two scheduled semi-annual visits to the plant and shall include the cost of travel, accommodation and subsistence expenses of the Contractor (including the cost of time spent travelling) incurred in the provision of the maintenance services plus Contractor's fees and the cost of spare parts replaced due to normal wear and tear during the warrant) period of each such component.

3.5 The service visits shall comprise a comprehensive inspection, and eventual repairs and adjustments of components as deemed necessary to secure continued trouble free operation.

3.6 The maintenance charges shall not include the cost of any exempted services.

3.7 The maintenance charges shall be levied by the Contractor immediately after delivery of services.

3.8 Maintenance charges shall be payable by the Buyer. The Contractor shall send his invoices to the Buyer.

3.9 During renewed period as in clause 10, maintenance charges shall include the cost of spare pails replaced due to normal wear and tear only during the subsistence of the warranty period for the particular component.

4. MAINTENANCE SERVICE

4.1 Maintenance services shall comprise the provision by the Contractor of "preventive maintenance" and "curative maintenance" in respect of the Renewable Energy Technology Equipment at the place of use.

4.2 Preventive maintenance shall comprise—

(*a*) the routine inspection and testing (by attendance on site) by the Contractor of each item of Renewable Energy Technology Equipment in accordance with the Contractor's recommendations thereof; and

(*b*) the carrying out by the Contractor of such repairs replacement of parts worn out due to normal wear and tear, cleaning, and adjustment to each item of Renewable Energy Technology Equipment as the Contractor shall deem necessary as a result of the said inspection and testing.

4.3 Curative maintenance shall comprise—

(*a*) upon receipt of a request from the Buyer, the inspection, testing and diagnosis (by attendance on site) by the Contractor of any fault reported in an item of Renewable Energy Technology Equipment; and

(*b*) the earning out by the Contractor of such repairs, replacement of parts. cleaning and adjustment as the Contractor shall deem necessary to remedy the fault.

5. TIMES FOR MAINTENANCE SERVICES

5.1 Curative maintenance shall be provided upon a request by the Buyer to the Contractor. The Contractor shall use its reasonable endeavors to carry out the curative maintenance within seven days of receipt of such request.

5.2 Preventative maintenance shall be provided by the Contractor at least once every six months.

5.3 If the Contractor persistently tails to carry out curative maintenance within the stipulated seven days, the Government may issue a written warning to the Contractor.

6. EXEMPT SERVICES

6.1 The maintenance services shall not include the correction of any fault due to—

(*a*) the Buyer's neglect or misuse of the Renewable Energy Technology Equipment or his failure to operate the Renewable Energy Technology Equipment in accordance with the Contractor's operation manual or for the purposes for which it was designed;

(*b*) the alteration, modification or maintenance of the Renewable Energy Technology Equipment by any party other than the Contractor without the Contractor's prior consent;

(*c*) any accident or disaster affecting the Renewable Energy Technology Equipment including fire, hood, water, wind, lighting, vandalism or burglary; or

(*d*) the Buyer's failure, inability or refusal to afford the Contractor's personnel proper access to the Renewable Energy Technology Equipment;

6.2 Maintenance services shall also not include additions to the Renewable Energy Technology Equipment.

6.3 The Contractor shall upon request by the Buyer provide all or any of the exempt services referred to in Clauses 6.1 and 6.2 above but shall be entitled to charge for the same by levying additional charges in the manner described in Clause 6.5.

6.4 Without prejudice to the Clause 6.3 above, the Contractor shall be entitled to levy additional charges in the manner described in Clause 6.5 below if maintenance services are provided in circumstances where any reasonable operator of the Renewable Energy Technology Equipment would have judged the Buyer's request to have been unnecessary.

6.5 Additional charges shall be levied by the Contractor by delivering an invoice to the Buyer soon after earning out exempt services and the Buyer shall pay the same within three days from the date of receipt of the invoice.

6.6 All exempt services shall be carried out after getting prior approval from the Buyer.

7. BUYER'S OBLIGATIONS

7.1 The Buyer undertakes to the Contractor throughout the term of this Agreement—

(*a*) to grant the Contractor such access to the place of use as the Contractor shall from time to time reasonably require in order to discharge its obligations hereunder;

(*b*) to make available the place of use such facilities as the Contractor shall reasonably require in order to discharge its obligations hereunder, including adequate work space and storage;

(*c*) to take all reasonable precautions to protect the health and safety of the Contractor's employees, agents and sub-contractors while on the Buyer's site; and

(*d*) to make available the Renewable Energy Technology Equipment and supply all documentation and other information necessary for the Contractor to diagnose any fault in the Renewable Energy Technology Equipment.

8. CONTRACTOR'S WARRANTY

8.1 The Contractor warrants and undertakes to the Buyer—

(*a*) to perform a the maintenance services and any exempt services with reasonable care and skill;

(*b*) to perform any exempt services within a reasonable time after being requested by the Buyer;

(*c*) that he shall have a free and unencumbered title to any replacement parts for the equipment supplied hereunder; and

(*d*) that the Buyer will enjoy quiet possession of any such replacement parts and that the same will be of merchantable quality and reasonably fit for their purpose.

8.2 The Contractor does not warrant that the maintenance services (or any additional services) will cause the Renewable Energy Technology Equipment to operate without interruption or error.

9. REPLACEMENT OF PARTS

9.1 The Contractor shall supply new replacement parts in the performance of its duties hereunder.

9.2 Any parts of the Renewable Energy Technology Equipment replaced by the Contractor pursuant to clause 9.1 above ("replaced parts") shall upon replacement become the property of the Contractor and the Buyer warrants that either it shall have a fee and unencumbered title to such Replaced Parts and/or that he shall have obtained all necessary consents and authorities to part with possession and give good title to the Replaced Parts.

9.3 This Agreement shall not hinder transfer of manufacturers warranty.

10. DURATION OF AGREEMENT

(*a*) this Service Agreement shall commence on the commencement date and shall continue until the expiry of the initial period during which period either party shall not terminate the Agreement; and

(*b*) after the expiry of the initial period, this Agreement may be renewed by mutual agreement of the Parties. However if three months before the expiry date of the initial period or renewed period, the Contractor sends a quotation to the Buyer in respect of maintenance charges for the proposed renewed period and the duration thereof and if the Buyer accepts the quotation, this Service Agreement and all the conditions herein shall be deemed to have been renewed automatically:

Provided that if no duration is specified in the quotation, this Service Agreement shall be deemed to have been renewed for a period of twelve months.

11. MAINTENANCE REPORTS

11.1 The Contractor shall upon carrying out any maintenance work on the Renewable Energy Technology Equipment, prepare a maintenance report and deliver the same to the Buyer.

11.2 The said maintenance reports shall describe in detail the inspection, testing. repairs, the parts replaced, additions and other maintenance work done.

11.3 The Monitoring Engineer may earn out inspection and testing of the Solar Equipment to counter check or verify the finding in the maintenance report.

12. TERMINATION

12.1 Subject to clause 10.1 of this Service Agreement, this Service Agreement max be terminated—

(*a*) by the Buyer upon giving not less than ninety days written notice to the Contractor at any time after the expiry of the Initial Period;

(*b*) forthwith by the Contractor if the Buyer fails to pay the maintenance charges or any additional charges due hereunder within thirty days of the due date thereof; or

(*c*) forthwith by either party if the other commits any material breach of any term of this Agreement (other than one falling within (*b*) above) and which (in the case of breach capable of being remedied) shall not have been remedied within thirty days of a written request by the other parts' to remedy the same.

12.2 Any termination of this Agreement pursuant to this clause shall be without prejudice to any other rights or remedies a party may be entitled to hereunder or at law and shall not affect any accrued rights or liabilities of either party nor the coming into or continuance in force of any provision hereof which is expressly or by implication intended to come into or continue in force on or after such termination.

13. INVALIDITY AND SEVERABILITY

If any court or administrative body of competent jurisdiction shall find any provision of this Service Agreement to be invalid or unenforceability the invalidity or unenforceable, of such provision shall not affect the other provisions of this Service Agreement and all provisions not affected by such invalidity or unenforceable shall remain in full force and effect.

14. SUCCESSORS

This Service Agreement shall be binding upon and endure for the benefit of the successors in title of the parties hereto.

15. ASSIGNMENT

Neither parts shall be entitled to assign this Service Agreement nor all or any of their rights and obligations hereunder without the prior written consent of the other.

16. APPLICABLE LAW AND PLACE OF ARBITRATION

This Service Agreement shall be governed by and construed in accordance with the Laws of Malaŵi and the parties hereto agree to submit to the jurisdiction of Malaŵi Courts and venue of arbitration shall be Blantyre, Malaŵi.

IN WITNESS WHEREOF the authorized representatives of the parties hereto have signed this Service Agreement on the day and year first above written.

Signed: for Buyer
for Contractor

ENERGY REGULATION BY-LAWS

Form EPOU 1

REGISTRATION FORM FOR PRIVATE ELECTRICITY GENERATION

SECTION A

PARTICULARS OF APPLICANT

A.1 Full name of Applicant: .....

A.2 Address of Applicant, or in the case of a body corporate, the registered office:

.....

.....

A.3 Telephone Number of Applicant: .....

A.4 Fax Number: .....

A.5 E-mail Address: .....

A.6 Details of Contact Person:

Full Name: .....

Telephone Number: .....

Fax Number: .....

E-mail Address: .....

A.7 Legal Form of applicant (specify—company, partnership, individual, cooperative):

.....

(A separate application is required in respect of every installation).

SECTION B

INSTALLATION

(*a*) Total capacity to be installed for the purpose of this licence, Kilowatts comprising the following units—

Capacity of Units	Prime Mover Hydro, Steam, Diesel	If Steam (Wood or coal fired)	Voltage	A.C. or D.C. Phase and Frequency	Age	Date of Installation

(*b*) Indication of capital investment in generating plant (book value).

(*c*) Undertakings Distribution System (if any) (Voltages, length of lines or cables, number and capacity of substations):

.....

.....

.....

SECTION C

OPERATION

(The information given here will be affected by whether the undertaking is connected to the utility, distribution system or not)—

(*a*) normal maximum total electrical load: ..... Kw

(*b*) proportion derived from own plant: ..... Kw

(*c*) proportion derived from Electricity Supply Corporation of Malaŵi: ..... Kw

(*d*) total energy derived from plant for year ending 31st December, 20 ..... Kw

SECTION D

STAND-BY PURPOSES

(Defined as "purpose" of generating electricity for a consumer's own use or business when by reason of technical failure, or for any other reason the utility is for the time being unable to provide an adequate supply of electricity to that consumer"). If the generating plant is not normally in use, all supplies being taken from the utility, the following information is required—

(*a*) time taken to bring plant into commission;

(*b*) is the plant capable of supplying the full load to the undertaking? If not, the proportion should be stated.

SECTION E

BASE LOAD GENERATION

(Defined as "purpose of generating electricity continuously to subsidise electricity from a registered electric utility e.g. ESCOM").

Is the plant going to be used for base load generation? Yes/No:

.....

.....

SECTION F

FUTURE PROGRAMME

(*a*) Is an increase in electrical load expected within the next three years? If so, state extent.

(*b*) Will this increased load be met from—

(i) existing installation;

(ii) the installation of additional plant (if approved);

(iii) an increased demand for supply from the electrical utility.

SECTION G

GENERAL

Any further information relevant to the application should be stated hereunder—

FORM EPOU 2

REGISTRATION CERTIFICATE FOR PRIVATE ELECTRICITY GENERATION by-law 66

Issued to: .....
of: ..... (hereinafter called the "private generator").

1. Granting of Certificate of Registration:

   The Malaŵi Energy Regulatory Authority (the "Authority") in exercise of the powers conferred by by-law 66 of the Energy Regulation By-laws hereby issue this Certificate of Registration to: ..... for the generation of electricity.

2. Duration of Registration Certificate:

   This Certificate of Registration shall be valid for one year (or less than one year up to 31st December in the case of initial registration in the middle of the calendar year) and shall be renewed by 1st January of each year and shall continue for a period of one year unless revoked or modified in accordance with the provisions of the Energy Regulation By-laws.

3. Collection of Information:

   The Authority shall be entitled to collect such information from the registered private generator, as it deems necessary.

4. Inspection:

   The Authority is empowered to perform inspections of the equipment of the registered private generator and the Authority or any person authorized by it in writing may enter the premises of the registered private generator and inspect any other plant and machinery which form part of the generation equipment under this Registration Certificate.

5. Prohibition of Transfer of Registration Certificate:

   This Registration Certificate is not transferable without the approval of the Authority.

6. This Registration Certificate is granted under the authority of the Energy Regulation By-laws.

7. For other private generation registration requirements (See behind certificate).

   The Common Seal of the Malaŵi Energy Regulatory Authority was hereunto affixed.

   This ..... day of ..... , 20.....

   .....

   Chief Executive Officer

An Act to make provision for the promotion, funding, management and regulation of rural electrification; and for matters connected therewith and incidental thereto

[28TH DECEMBER, 2007]

PART I

PRELIMINARY

Short title

1. This Act may be cited as the Rural Electrification Act.

Interpretation

2. In this Act, unless the context otherwise requires—

"Authority" means the Malaŵi Energy Regulatory Authority established under section 3 of the Energy Regulation Act; Cap. 73:02

"beneficiary" means a person who procures a credit guarantee under section 18;

"candidate site" means a site included in the rural electrification programme;

"Committee" means the Rural Electrification Management Committee established under section 3;

"Concedante" means the Department of Energy Affairs and any other entity or body as the Minister may designate by notice published in the *Gazette*;

"Concessionaire" means a person who has entered into concession agreement to install, operate or maintain a rural electrification installation on behalf and as agent of a Concedante;

"concession agreement" means a concession agreement concluded between a Concedante and a Concessionaire whereby the Concessionaire agrees to construct, install, operate or maintain a rural electrification installation on behalf and as an agent of the Concedante in accordance with section 27;

"concession area" means an area demarcated in the concession agreement over which a Concessionaire is granted exclusive right to construct, install, operate or maintain a rural electrification installation on behalf of a Concedante;

"Credit Finance Manager" means the Credit Finance Manager appointed under section 19;

"Fund" means the Malaŵi Rural Electrification Fund established under section 12;

"grant and subsidy agreement" means the agreement entered into between the Concedante and the Concessionaire for purposes of channelling funds from the Fund to the Concessionaire for rural electrification and m accordance with section 2;

"grid extension rural electrification" means rural electrification installation that is connected to the interconnected system;

"interconnected system" means the high voltage national electricity system of 66 KV and above, or as may be prescribed by notice in the *Gazette*, including related substations and associated equipment and generation stations to which they are connected and any distribution system connected thereto;

"Malaŵi Bureau of Standards" means the Malaŵi Bureau of Standards established under the Malaŵi Bureau of Standards Act; Cap. 51:02

"management fee" means the fee payable by a Concessionaire to a Concedante in accordance with section 28;

"micro hydropower station" means a hydropower station whose installed generation capacity is not less than 2 KW, but is less than 100 KW;

"mini hydropower station" is a hydropower station whose installed generation capacity is not less than 100 KW, but is less than 500 KW;

"off-grid rural electrification" means rural electrification installation that is not connected to the interconnected system;

"public institutions" includes Government schools, hospitals, clinics, health centres, police stations and other Government offices and institutions;

"renewable energy resources" means solar home system, micro, mini and small hydro-electric power stations, biomas, biogas, wind, and other thermal electricity generation systems and technologies;

"rural electrification" means grid extension or off-grid electrification or renewable energy resources electrification whose internal rate of return is up to 6 per cent per annum and line capacity is lower than 66 KV or generation capacity is up to 5MW;

"rural electrification programme" means the rural electrification programme prepared or compiled in accordance with section 34;

"rural electrification site" means a site where rural electrification installation is in progress or under commercial operation;

"Rural Electrification Unit" means the Rural Electrification Unit in the Department of Energy Affairs;

"small hydropower station" means a hydropower station whose installed generation capacity is not less than 500 KW and up to 5 MW;

"solar home system" means photovoltaic solar home systems technology as contemplated in section 31;

"Solar Home System Purchase, Guarantee and Service Agreement" means the agreement entered into between the Concedante or Purchaser and the Concessionaire or between the Concessionaire and the supplier of solar home system equipment for the purpose of purchase, guarantee and service of the same in accordance with section 32.

PART II
Establishment of Rural Electrification Management Committee

Establishment of the Committee

3. There is hereby established a committee to be known as the Rural Electrification Management Committee (in this Act otherwise referred to as the "Committee").

Composition of the Committee

4.—(1) The Committee shall consist of—

(*a*) the Principal Secretary responsible for energy affairs;

(*b*) the Director of Energy Affairs in the Department of Energy Affairs;

(*c*) the Chief Executive of the Authority or his or her designated representative;

(*d*) the Secretary for Economic Planning and Development;

(*e*) the Secretary to the Treasury;

(*f*) the Secretary for Local Government;

(*g*) a representative of the Board of Engineers; and

(*h*) a representative of the Society of Accountants of Malaŵi.

(2) The Minister shall appoint one of the members of the Committee as Chairperson of the Committee.

Objectives of the Committee

5. The objectives of the Committee shall be—

(*a*) to ensure that the majority of the Malaŵian population in peri-urban and rural communities have access to efficient, sustainable and affordable energy for their social economic development through grid extension and off-grid electricity supply, including solar home system technologies;

(*b*) to raise funds and receive and to administer the Fund for the benefit of rural electrification in Malaŵi;

(*c*) to prepare annual rural electrification programmes and advise the Minister on the prioritization, selection criteria on candidate sites, and ensure the efficient and effective implementation of rural electrification programmes; and

(*d*) to promote rural electrification and act as a source of technical, commercial and institutional advice in rural electrification matters.

Functions of the Committee

6. For purposes of achieving the objectives set out in section 5, the Committee shall carry out the following functions—

(*a*) develop a rural electrification master plan and update it at regular intervals;

(*b*) set criteria for candidate site selection;

(*c*) act as a source of technical, commercial and institutional advice;

(*d*) seek and access donor funding and soft credit for rural electrification;

(*e*) undertake publicity and marketing campaigns on the new approach to rural electrification and the opportunities provided;

(*f*) contract and oversee the construction and management of rural electrification projects;

(*g*) administer the Fund and decide on the allocation of financial resources from the Fund;

(*h*) monitor implementation of rural electrification projects by Concessionaires;

(*i*) carry out or commission studies and research for promoting the development of rural electrification;

(*j*) advise the Authority on the specifications, design and safety standards for rural electrification systems, equipment and technologies;

(*k*) advise the Authority on the prices for solar home system equipment and on the tariffs and maintenance charges for rural electrification;

(*l*) advise the Minister on the appropriate amount to be appropriated by Parliament for the Fund;

(*m*) in liaison with the Authority, carry out evaluations and publish periodic reports of the activities of the Committee;

(*n*) prepare, publish and submit to the Minister audited annual accounts of the Fund; and

(*o*) do all such things as are necessary for achieving the purposes for which the Committee and the Fund are established.

Meetings of the Committee

7.—(1) The Committee shall meet at least once every six months at such place or places and at such time or times as the Chairperson may determine.

(2) The Chairperson shall preside at the meetings of the Committee and, in the absence of the Chairperson, the members present and forming a *quorum* shall elect one of their number to preside over the meeting of the Committee, and the member so elected shall exercise all the powers and functions and perform all the duties of the Chairperson.

(3) At any meeting the decision of the Committee on any matter shall be that of the majority of the members present and at all such meetings the person presiding shall have, in the event of an equality of votes a casting vote in addition to his deliberative vote.

(4) Save as otherwise provided in this section, the Committee shall have power to determine its own procedure of meetings and operating guidelines.

Remuneration and expenses of the Committee

8. The members of the Committee shall be paid from the proceeds of the Fund such allowances as the Minister, on the recommendation of the Committee, may determine, and the Committee shall make provision for the reimbursement of any reasonable expenses incurred by a member of the Committee in connexion with the business of the Committee.

Committee may co-opt advisors

9.—(1) The Committee may in its discretion at any time, and for any length of period, co-opt any person to attend deliberations of the Committee, but such person shall not be entitled to vote on any matter.

(2) The Committee may in its discretion engage any advisor or consultant to carry out any assignment on behalf of the Committee in relation to rural electrification and pay him or her out of the proceeds of the Fund.

Committee to be accountable to the Minister

10.—(1) The Committee shall be responsible and accountable to the Minister for ensuring efficiency, transparency and propriety in—

(*a*) the collection, allocation and utilization of funds of the Fund;

(*b*) the conduct of its business and the performance of its functions and duties; and

(*c*) the operations and activities of the Committee.

(2) The Committee shall at such intervals as the Minister may in writing require submit to the Minister reports and financial statements, in such form as the Minister may determine, regarding the operations and activities of the Committee and the Fund.

Secretariat and staff of the Committee

11.—(1) The Rural Electrification Unit shall provide services and resources to the Committee.

(2) The members of staff of the Rural Electrification Unit shall carry out the day to day work and operations of the Committee as the Committee may, from time to time, require.

(3) The Committee may delegate to the Director of Energy Affairs functions and duties of the Committee and the supervision of the said staff members carrying out the day to day work and operations of the Committee.

(4) Save as otherwise provided in this Act, the Director of Energy Affairs and members of staff of the Rural Electrification Unit shall not be entitled to any additional remuneration by reason only of their carrying out the functions for or of the Committee.

(5) Members of staff of the Rural Electrification Unit or the Department of Energy Affairs may, at the invitation of the Committee, or for purposes of presenting reports attend meetings of the Committee.

PART III

Establishment of Malaŵi Rural Electrification Fund

Establishment of the Fund

12. There is hereby established a Fund to be known as the Malaŵi Rural Electrification Fund (in this Act otherwise referred to as the "Fund") which shall comprise—

(*a*) such sums as shall be appropriated by Parliament for the purposes of the Fund;

Cap. 73:02

(*b*) rural electrification levies on energy sales as may, from time to time, be imposed by the Authority under the Energy Regulation Act;

(*c*) such sums or assets as may, from time to time, accrue to or vest in the Fund by way of grants, subsidies, bequests, donations, gifts and subscriptions from the Government or any person;

(*d*) such sums or assets as may be donated to the Fund by any foreign Government, international agency or other external body of persons, corporate or unincorporate;

(*e*) 50 per cent of penalties and fines payable or imposed under this Act;

(*f*) the proceeds from sale of rural electrification lines and equipment funded by the Fund; and

(*g*) any other income authorized under this Act or income recognized as such by accounting standards and practices.

Purpose of the Fund

13. The proceeds of the Fund shall be used to finance—

(*a*) the capital cost of rural electrification grid extension and off-grid electrification;

(*b*) the capital cost of solar home system equipment to be acquired for public institutions;

(*c*) operational and maintenance costs of rural electrification projects, to the extent to which it makes the project viable;

(*d*) provision of credit guarantees for the capital cost of solar home system equipment other than those to be acquired by a Concessionaire;

(*e*) any monetary contribution required to be made by the Government for the implementation and execution of a donor-funded rural electrification project;

(*f*) the administrative expenses associated with the execution of the duties and functions and responsibilities of the Committee and the management of the Fund;

(*g*) research and consultancy assignments related to rural electrification;

(*h*) expenses for credit guarantee funds management; and

(*i*) compensation for removal of off-grid installations in accordance with section 33.

Advances to the Fund

14.—(1) The Committee shall ensure that in any financial year expenditures and commitments from the Fund shall not exceed the annual income of the Fund.

(2) If, in exceptional circumstances, the income of the Fund together with any surplus income brought forward from a previous year, is insufficient to meet the actual or estimated liabilities of the Committee and rural electrification projects, the Committee may apply to the Minister responsible for finance for an advance to the Fund in order to meet the deficiency or any part thereof and, subject to subsection (3), such advance shall be made on such terms and conditions, whether as to repayment or otherwise, as the Minister responsible for finance may determine.

(3) Every advance made available pursuant to subsection (2) shall be repaid from the income of the Fund in the next financial year following the financial year in which the advance was made available.

Holdings of the Fund

15. All sums received for purposes of the Committee and the Fund shall be paid into one or more banking accounts at such bank or banks or other financial institutions as the Committee may determine, and no amount shall be withdrawn therefrom except under the authority of the Committee and by means of cheque or other authorization signed by such person or persons as are authorized in that behalf by the Committee.

Surplus funds to be invested

16. Any part of the Fund not immediately required for the purposes of the Committee or rural electrification may be invested in such manner as the Committee may, with the prior approval of the Minister, determine.

Disbursements from the Fund

17.—(1) Disbursements of monies from the Fund to a Concessionaire shall be made by the Committee subject to fulfilment of the following conditions—

(*a*) acceptance by the Committee of a business plan of the Concessionaire;

(*b*) where applicable, the conclusion and implementation of the concession agreement by the Concedante and the Concessionaire;

(*c*) proof, acceptable to the Committee, that the proposed installation or equipment complies with the applicable equipment standards, design and performance criteria;

(*d*) proof, acceptable to the Committee, that the Concessionaire has a valid rural electrification licence for the area in question;

(*e*) in the case of final disbursement, proof that the installation or equipment is fully functional, completely installed and operational;

(*f*) in the case of solar home system equipment, additionally, proof that the Authority has approved the equipment supply and service contract price; and

(*g*) that the project has been approved as a priority rural electrification project by the Committee.

(2) The Committee shall not be obliged to disburse monies from the Fund to a Concessionaire and may refuse to do so on breach or non-compliance by the Concessionaire with the provision of the concession agreement or the provisions of this Act or the Energy Regulation Act, or the Electricity Act.

Cap. 73:02
Cap. 73:01

(3) The Committee shall disburse monies from the Fund to a Concessionaire only for rural electrification projects of the highest priority in accordance with the priority listing criteria set down in section 35 and regulations made by the Minister in that regard.

Credit guarantees

18.—(1) The Committee may authorize the provision of a credit guarantee to a beneficiary if—

(*a*) the conditions stated in section 17 (1) (*c*), (*e*) and (*f*) which shall apply *mutatis mutandis*, have been fulfilled; and

(*b*) the Credit Finance Manager has certified that the beneficiary is capable of servicing the credit.

(2) The Committee shall not authorize the provision of a credit guarantee unless the provisions of subsection (1) are complied with.

Appointment of Credit Finance Manager

19. The Minister shall, on the recommendation of the Committee, appoint one or more institutions as a Credit Finance Manager.

20.—(1) For purposes of channeling the funds from the Fund, the Department of Energy Affairs shall enter into a grant and subsidy agreement, in the prescribed form with a Concessionaire for each rural electrification project. Grant and subsidy agreements

(2) In addition to the terms and conditions of the grant and subsidy agreement, the following terms and conditions shall be implied in every grant and subsidy agreement—

(*a*) that the Concessionaire shall use the monies from the Fund for financing the capital costs or operational costs of the rural electrification project specified in the agreement;

(*b*) that disbursements from the Fund shall be made in accordance with progress of works, including a reasonable amount as advance payment as the parties may agree; and

(*c*) that, the Concedante shall grant the Concessionaire exclusive concession for the concession area and shall not disburse any monies to another concessionaire in the same concession area.

PART IV

Financial Provisions

21.—(1) The Committee shall cause to be kept proper books of accounts and other records relating to the Fund. Books of accounts

(2) The Committee shall as soon as possible after the end of each financial year cause to be prepared a statement of the cash flow and income and expenditure of the Fund for that financial year and a balance sheet of the assets and liabilities of the Fund as at the end of that financial year.

(3) The accounts of the Fund shall be audited annually in accordance with the Public Audit Act, before being presented to the Minister in accordance with section 22. Cap. 37:01

(4) The financial year of the Fund shall be a period of twelve months commencing on 1st July in each year and ending on 30th June in the following year:

Provided that the first financial year of the Fund may be a shorter or longer period than twelve months as the Minister may determine, but being not less than six months nor more than eighteen months.

22.—(1) As soon as practicable, but not later than six months after the expiry of each financial year, the Committee shall submit to the Minister an annual report concerning rural electrification and the Fund during that financial year. Annual report

(2) The annual report referred to in subsection (1) shall include—

(*a*) an audited balance sheet and statement of cash flow and income and expenditure;

(*b*) a report of the examination of the accounts referred to in section 21 (3);

(*c*) a status report on rural electrification;

(*d*) a report regarding rural electrification programme for the next financial year;

(*e*) a list of Concessionaires and beneficiaries who have benefitted from the Fund including the provision of any credit guarantee; and

(*f*) a report on the performance of Concessionaires with respect to rural electrification projects in progress, planned and completed.

PART V

Regulation of Rural Electrification

Application of Cap. 73:01 and Cap. 73:02

23. The provisions of the Electricity Act and the Energy Regulation Act shall apply to rural electrification activities under this Act *mutatis mutandis*:

Cap. 73:01 Cap. 73:02

Provided that where the Electricity Act or the Energy Regulation Act are in conflict with the provisions of this Act and the regulations made hereunder, the provisions of this Act and the regulations made hereunder shall prevail over the provisions of the Electricity Act or the Energy Regulation Act as the case may be.

Cap. 73:01 Cap. 73:02

Rural electrification activities to be licensed

24.—(1) No person shall carry on or be engaged in any manner in any rural electrification activity without a licence issued by the Authority.

(2) Separate licences shall be issued for generation, distribution or renewable energy technologies.

(3) Any person required to hold a licence under this Part shall apply to the Authority for a licence.

(4) An application for a licence under this section shall be in the prescribed form.

(5) A licence under this section shall be in the prescribed form.

(6) The Authority shall consider an application for the issue of a licence and may issue or refuse to issue the licence.

(7) The Authority may only issue a licence if it is satisfied that—

(*a*) the applicant has or has access to financial, technical and human resources to enable it install and operate a rural electrification scheme;

(*b*) in the case of solar home system, the applicant or its officers have valid accreditation certificates issued by the Malaŵi Bureau of Standards or other body or agency the Minister may designate by notice in the *Gazette*; and

(*c*) subject to funding from the Fund, the applicant will be able to meet reasonably foreseeable obligations under contracts for sale of electricity within the area covered by his or her licence.

(8) A holder of a generation licence may apply and be granted a distribution licence or renewable energy licence and *vice versa* for off-grid electrification.

Tariffs

25. The tariffs for grid extension or off-grid rural electrification shall be approved by the Authority and shall be set, administered and revised in accordance with the Electricity Act. Cap. 73:01

Safety by-laws Cap. 73:01

26.—(1) The supply, wiring, design and safety by-laws under the Electricity Act shall apply to the grid and off-grid extension rural electrification system:

Provided that in order to ensure that rural electrification schemes are appropriately engineered and costs are minimized, the Authority, on the recommendation of the Committee, may develop and publish in the *Gazette* by-laws regulating the supply, wiring, design and safety standards for rural electrification grid extension or off-grid schemes.

(2) The Authority may, on the recommendation of the Committee, by notice published in the *Gazette* prescribe minimum codes of practice and design specification standards for solar home system equipment for rural electrification.

Concession agreements

27.—(1) Where the execution of a rural electrification project is to be carried out by a Concessionaire, there shall be executed a concession agreement between the Concedante and the Concessionaire in the prescribed form.

(2) For purposes of subsection (1) the Concedante shall demarcate the concession area and grant the Concessionaire exclusive right to establish, operate and maintain a rural electrification scheme or schemes and sell electrical energy to customers in the concession area.

(3) The electricity tariffs and charges by the Concessionaire under a rural electrification project shall be set at the rate as approved by the Authority.

(4) The Concessionaire shall submit to the Concedante within sixty days of the end of the Concedante's financial year an annual report of the rural electrification activities in the concession area.

Concession management fee

28.—(1) The Concedante shall be entitled to be paid by the Concessionaire a concession fee to cover the monitoring and management costs and costs of channelling monies from the Fund to the Concessionaire and also costs of identifying and demarcating the concession area.

(2) The amount of the management fee referred to in subsection (1)—

(*a*) shall be agreed upon between the Concedante and the Concessionaire and approved by the Authority; and

(*b*) may be reviewed annually by the Authority on application by the Concedante or the Concessionaire.

Duration of concession agreement

29. A concession agreement shall remain in force for a period of up to twenty years as long as the Concessionaire complies with the provisions thereof and this Act or any other relevant written law.

Implied terms and conditions in concession agreement

30. There shall be implied in every concession agreement the following terms and conditions—

(*a*) no monies from the Fund shall be payable to the Concessionaire if the Concessionaire operates outside the concession area unless the parties agree otherwise before hand;

(*b*) provided the Concessionaire has complied with the provisions of the concession agreement, the Concedante shall be obliged to forthwith pass on the approved monies from the Fund to the Concessionaire; and

(*c*) the concession agreement shall come into force upon the successful conclusion of the grant and subsidy agreement between the Concedante and Concessionaire.

Solar home system agreements

31. Where the rural electrification is by means of solar home system technologies, the Concedante and the Concessionaire and the supplier of the equipment shall enter into the Solar Home System Purchase Guarantee and Service Agreement in the prescribed form.

Ownership of lines and equipment

32.—(1) All rural electrification lines and equipment installed or acquired with funding from the proceeds of the Fund shall be owned by the Government represented by the Concedante for each rural electrification project.

(2) A Concessionaire shall not transfer or cede any rural electrification line or equipment installed or acquired with funding from the proceeds of the Fund to any person without the written consent of the Concedante.

(3) In the case of sale of any rural electrification line or equipment installed or acquired with funding from the proceeds of the Fund the proceeds of such sale shall be appropriated to the Fund.

Grid power coming to off-grid system

33.—(1) When the interconnected system extends to an off-grid electrification area, the consumers in that area shall have an option of either continuing with the off-grid electrification system or connecting to the interconnected system.

(2) If a consumer referred to in subsection (1) elects to connect to the interconnected system, the Concessionaire shall have the option of either removing the off-grid installation or connecting such installation to the interconnected system, where technically feasible, for purposes of feeding into such system, subject to the approval of the owner and operator of the interconnected system, and in either case without any penalty to the consumer.

(3) The cost of connecting to the interconnected system or adjusting the off-grid system to make it compatible with the interconnected system shall be financed from the proceeds of the Fund on the same terms as other rural electrification projects.

(4) Where a Concessionaire, referred to in subsection (2), decides to remove the off-grid installation—

(*a*) the Concessionaire shall move the installation to another area to be agreed between the Concedante and Concessionaire;

(*b*) the Concedante shall define a new or extend existing concession area for the Concessionaire without additional charge to the Concessionaire; and

(*c*) the Concessionaire shall be compensated for the costs involved in the removal and reinstallation of the rural electrification installation and any consequential damages thereof out of monies from the Fund.

(5) The quantum of compensation under subsection (4) (*c*) shall be determined by the Committee, and shall be subject to the approval of the Authority.

(6) If the licensee was holding a generation and distribution licence or renewable energy licence he or she shall surrender the other licences and remain with only one licence if he or she will be a licensee in the interconnected system.

PART VI

Management of Rural Electrification Activities

Annual rural electrification programme

34.—(1) Every Concessionaire shall, at least six months before the commencement of the Committee's financial year, submit to the Committee an annual rural electrification programme in such form and containing such details as the Committee shall specify and the programme shall contain an estimated cost of such rural electrification programme.

(2) The Committee shall compile a rural electrification programme which shall—

(*a*) specify the amounts allocated for grid extension, off-grid electricity supply and solar home system electricity supply and include an annual budget for rural electrification;

(*b*) prepare a candidate site priority list in accordance with the criteria laid down in section 35.

(3) The Committee shall submit to the Minister the annual rural electrification programme and the budget for approval.

Priority listing of projects

35.—(1) Each project in the rural electrification programme shall be assessed by the Committee, for technical, financial, economic, environmental and social feasibility and only those projects that are proved to be technically, financially, economically, socially and environmentally feasible shall qualify for funding from the Fund.

(2) The rural electrification project with the highest internal rate of return shall be placed at the top of the priority list of rural electrification projects:

Provided that where a Concessionaire or consumers are able and willing to contribute up to 20 per cent of the capital cost of the project for grid or off-grid electrification or up to 50 per cent for renewable energy project such a project will gain additional priority on the priority list.

Promotion of rural electrification

36. The Committee shall take steps and do all things necessary to promote, attract, encourage, facilitate and market rural electrification in Malaŵi and in particular shall—

(*a*) conduct civic education to the peri-urban and rural population on the advantages of and opportunities available in rural electrification services and technologies;

(*b*) conduct market research on the acceptance or satisfaction of rural electrification customers with rural electrification technologies and services for purposes of attracting potential customers to rural electrification;

(*c*) provide to potential customers, investors, concessionaires, donors, beneficiaries, and all others, information regarding rural electrification in Malaŵi;

(*d*) develop and promote a favourable image of rural electrification for Malaŵi;

(*e*) undertake rural electrification promotion missions within and outside Malaŵi;

(*f*) recommend to the Minister changes in the statutory and administrative framework which act as barriers to the promotion of rural electrification in Malaŵi and make representations against or regarding any changes to such statutory or administrative framework;

(*g*) develop and promote strategies aimed at building confidence among various stakeholders in rural electrification services and technologies;

(*h*) develop and promote strategies aimed at ensuring the sustainability of rural electrification in Malaŵi;

(*i*) develop and promote strategies aimed at increasing the access to energy sources by the majority of the peri-urban and rural population in Malaŵi and raise their living standards and empower women as key players in energy matters at household level; and

(*j*) do all such things as are necessary and conducive to the achievement of the objectives of this Act.

Committee to monitor rural electrification

37.—(1) The Committee shall monitor, through reports or site visits, the implementation and operation of rural electrification projects and schemes for purposes of ensuring that the Concessionaires are implementing the rural electrification projects or operating the rural electrification schemes in accordance with the grant and subsidy agreement, the concession agreement, this Act, the Energy Regulation Act or the Electricity Act.

Cap. 73:02
Cap. 73:01

(2) A Concessionaire found to be in breach of his or her obligations as set out in subsection (1) shall be notified by the Committee in writing on the nature of the breach and the Concessionaire shall be requested to remedy the breach, if capable of remedy, within thirty days of receipt of such notice.

(3) Where a Concessionaire fails to remedy the breach notified in accordance with subsection (2), the Committee shall take any of the following actions, as the case may be—

(*a*) withhold further disbursements from the Fund;

(*b*) recommend to the Malaŵi Bureau of Standards for cancellation of the accreditation certificate, where applicable; and

(*c*) recommend to the Authority to take action in accordance with this Act, the Energy Regulation Act or the Electricity Act.

Cap. 73:02
Cap. 73:01

Reports of rural electrification

38. A Concessionaire shall submit to the Committee reports in such form and containing such information as the Committee shall determine as follows—

(*a*) an initial rural electrification plan and budget for the next financial year in accordance with section 34;

(*b*) implementation progress reports at least quarterly, detailing progress of each rural electrification project, special attention being paid to cases where the cost estimate changes significantly as the project develops;

(*c*) project completion report containing such details and information as the committee may specify; and

(*d*) one year after completion, an evaluation report on the success and failures of the project and any special issues that may have arisen.

PART VII

Miscellaneous

Offences

39.—(1) Any person who contravenes any provisions of this Act shall be guilty of an offence.

(2) It shall not be a defence to an offence under this Act that proceeds or assets of the Fund have been appropriated for the benefit of the public.

Penalties

40. Any person who is guilty of an offence under this Act shall be liable to a fine of K5,000,000 and to imprisonment of ten years.

Regulations

41. The Minister may, by notice published in the *Gazette*, make regulations for the better carrying into effect of this Act.

RURAL ELECTRIFICATION REGULATIONS

under s. 41

PART I

Preliminary

Citation

1. These Regulations may be cited as the Rural Electrification Regulations.

Application of Energy Laws

2. These Regulations shall apply to the Energy Laws with respect to—

(*a*) carrying out rural electrification electricity licensed activities and all consumers serviced by such licences under the Electricity By-laws under the Electricity Act:

Cap. 73:01

Provided that the Authority, on the application of a licensee, may approve other standards or designs in respect of a particular consumer or concession area, if such standards or designs are cheaper and shall not compromise quality and safety under the Electricity Act;

Cap. 73:01

(*b*) carrying out renewable technologies licensed activities under the Energy Regulation By-laws under the Energy Regulations Act.

Cap. 73:02

PART II

Licences

Rural electrification licence

3.—(1) No person shall carry out any activity under the Act except—

(*a*) under a licence granted under the Electricity Act and any by-laws made thereunder; or

Cap. 73:01

(*b*) under a licence granted under the Energy Regulation Act and any regulations made thereunder.

Cap. 73:02

(2) An application for a licence under these Regulations (1) (*a*) and (*b*) shall be in Form RE 1 prescribed in the First Schedule hereto.

(3) The rural electrification licences under these Regulations shall be in Form RE 3 and RE 4 prescribed in the First Schedule hereto.

PART III
Tariffs, Charges and Fees

4. The charges or tariffs for electricity supply to be charged by licensees under these Regulations shall be those approved by the Authority for such particular licensee under the Electricity Act and as revised from time to time.

Electricity tariffs and charges Cap. 73:01

5. The equipment prices and the maintenance charges to be charged by licensees for renewable energy technologies equipment supply, installation and maintenance thereof shall be those approved by the Authority under the Energy Regulation Act.

Renewable energy technologies system prices and charges Cap. 73:02

6. Licensing fees under these Regulations shall be those prescribed in the Second Schedule hereto.

Licensing fees

PART IV
Concession, Grant and Subsidy Agreements

7. A grant and subsidy agreement under section 20 of the Rural Electrification Act shall be in Form RE 5 prescribed in the Third Schedule.

Form of a grant and subsidy agreement Cap. 73:03

8.—(*a*) A concession agreement under section 27 of the Rural Electrification Act shall be in Form RE 6 prescribed in the Third Schedule hereto;

Form of a concession agreement Cap. 73:03

(*b*) a concession agreement shall have general obligations which shall form part of the agreement.

9. A licence issued under a concession agreement shall terminate three months after the termination or expiration of the concession.

Termination of licence

10. A solar home system purchase agreement under the Energy Regulations Act shall be in Form RE 7 prescribed in the Third Schedule hereto.

Form of a solar home system purchase agreement Cap. 73:02

Form of a solar home system service agreement Cap. 73:02

11.—(*a*) A solar home system service agreement under the Energy Regulation Act shall be in Form RE 8 prescribed in the Third Schedule hereto;

(*b*) a solar home system service agreement shall have general obligations binding the buyer and licensee which shall form part of the agreement.

PART V

Rural Electrification Site Selection and Funding

Site selection and funding

12. The Rural Electrification Management Committee shall comply with the procedures and criteria for rural electrification site selection and funding guidelines prescribed in the Fourth Schedule hereto when compiling a priority list for sites:

Provided that, where the Committee wishes to make minor alterations to the prescribed criteria, it shall seek the approval of the Authority before making such minor alteration.

Rural electrification projects

13. A project for rural electrification under these Regulations shall be—

(*a*) for the extension of 400v, 11kV and 33kV distribution lines from the national grid;

(*b*) for the a construction of an isolated mini, micro and small hydropower station and associated substations and distribution reticulation; or

(*c*) for the supply and installation of renewable energy technologies.

Funding

14. The Malaŵi Rural Electrification Fund shall provide capital costs funds for projects under these Regulations:

Provided that operational costs for the project from the Fund shall not exceed an amount that shall make the project's internal rate of return reach up to six per cent (6%).

PART VI

Miscellaneous Provisions

Mandatory use of forms

15. The use of forms prescribed herein is mandatory, unless the Authority approves modification to such forms.

General offences and penalties

16.—(1) Any person or licensee who contravenes any provision of these Regulations commits an offence and shall, on conviction, be liable to a fine of K2,000 and to imprisonment for six months.

(2) In addition to the penalties prescribed for the offences under these Regulations, a court may also order that the guilty person repay any expenses incurred by the Authority or any other person as a consequence of the offence.

REPUBLIC OF MALAŴI

RURAL ELECTRIFICATION ACT

(Cap. 73:03)

Form RE 1

Application For Electricity Generation Licence For Rural Electrification

SECTION A

PARTICULARS OF APPLICANT

A.1 Full name of Applicant: .....

A.2 Address of Applicant, or in the case of a body corporate, the registered office:
.....
.....

A.3 Telephone Number of Applicant: .....

A.4 Fax Number: .....

A.5 E-mail Address: .....

A.6 Details of Contact Person:
Full Name: .....
Telephone Number: .....
Fax Number: .....
E-mail Address: .....

SECTION B

PARTICULARS OF A GENERATION LICENCE ISSUED UNDER THE ELECTRICITY ACT BY THE AUTHORITY

B.1 Date from which the licence became effective:
.....

B.2 Duration of the licence from the effective date: .....

B.3 Purpose for which the licence was issued: .....

B.4 Location of the existing licensed generation station(s): .....

B.5 Reference number for the existing generation licence: .....

SECTION C

COMMENCEMENT DATE, PURPOSE AND DURATION OF THE RURAL ELECTRIFICATION LICENCE

C.1 Desired date from which the licence (if granted) is to take effect:

.....

C.2 Duration of the licence from commencement date: .....

C.3 Purpose for which electricity is to be generated: .....

C.4 Type of application (issue, transfer, amendment or renewal): .....

SECTION D

PARTICULARS OF GENERATING STATION

(To be provided for each generating station separately)

D.1 Name of generating station: .....

D.2 Location of generating station: .....

D.3 Address of generating station: .....

.....

D.4 Details of Contact Person:

Full Name: .....

Telephone Number: .....

Fax Number: .....

E-mail Address: .....

D.5 Type and age of generation station (thermal, nuclear, hydro, pumped storage, gas turbine, diesel generator, solar, wind or other including equipment description):

.....

D.6 Date on which the generating station was commissioned for an existing station or the expected commissioning date for a proposed station:

.....

D.7 The installed capacity of each unit within the generating station (MW):

.....

D.8 Life span of each generating station: .....

D.9 Maximum generating capacity (MW) expected to be available from the generating station and energy to be produced (kWh):

	Maximum kWh	Total kWh	Own use (kWh)	For sale (kWh)
YEAR 1				
YEAR 2				
YEAR 3				
YEAR 4				
YEAR 5				
YEAR 6				
YEAR 7				

D.10 Estimate of the energy conversion efficiency of—

(*a*) Turbine: .....

(*b*) Generator: .....

(*c*) Estimated overall station: .....

SECTION E

PARTICULARS OF ANY LONG-TERM ENERGY SUPPLY ARRANGEMENTS

(To be provided for each generating station separately)

E.1 Name of transmission company: .....

E.2 Particulars of the contractual arrangements (attach draft contract if in place):

.....

.....

.....

.....

SECTION F

GENERATION BUSINESS

(To be provided for each generating station separately)

F.1 Details of proposed major maintenance programmes, including the expected cost and duration thereof, covering the next five years:

.....

.....

.....

.....

F.2 Details of major generating station rehabilitation and modifications dates, cost and description for the next five years:

.....

.....

.....

.....

.....

F.3 Details of generating station expansion, dates, cost and description:

.....

.....

.....

.....

.....

F.4 Particulars of power sales agreements and tariffs therein:

.....

.....

.....

.....

.....

F.5 Particulars of anticipated outages and duration thereof as a result of F.1 and F.2 above:

.....

.....

.....

.....

.....

SECTION G

FINANCIAL INFORMATION

G.1 Income Statement:

Provide statements and annual forecasts of sales, revenues and costs. Attach copies of the current and/or budgeted balance sheet, rate of return, profit and loss account and source and application of funds for current and next two years. Indicate major cost items such as staff costs, maintenance.

G.2 Investment Programme:

Investment Programme for current and the next five years. Attach copies of detailed scheme or schemes prepared by a competent engineer and mode and cost of financing such a scheme.

G.3 Fixed Assets:

Summary of total assets of all generating plant.

G.4 Audited Accounts:

Provide copies of the latest audited accounts of the applicant.

G.5 Letters of Reference from Banks:

Provide one letter of recommendation as to credit worthiness from a local commercial bank and one from a reputable international bank.

SECTION H

INFORMATION ON HUMAN RESOURCES

H. Personnel:

(*a*) submit details of the number of staff and employees and their categories and grades in the service of or to be recruited by the applicant, showing their qualifications and number of years of experience in similar jobs.

(*b*) Provide *curriculum vitae* of top management personnel of the applicant.

SECTION I

ENVIRONMENTAL CONSIDERATION

1.1 Provide a brief description of the likely negative impact of the generation facility on natural resources and environment and mitigation measures proposed.

1.2 Provide a copy of the approved environmental mitigation plan (if any) by the relevant authority.

SECTION J

PERMITS FROM OTHER GOVERNMENT DEPARTMENTS OR REGULATORY AUTHORITIES

Submit copies of permits or approvals issued by public or local authority or other regulatory agencies necessary for the operation of the generating plant.

SECTION K

ADVERTISING NOTICE

K. Attach draft copy of the notice of advertisement as to representations or objections.

SECTION L

TARIFFS

Provide a schedule of the proposed tariffs.

SECTION M

ADDITIONAL INFORMATION

Provide any other relevant information which the applicant wishes to include with this application:

Form RE 2

Application for Electricity Distribution Licence for Rural Electrification

SECTION A

PARTICULARS OF APPLICANT

A.1 Full name of Applicant: .....

A.2 Address of Applicant, or in the case of a body corporate, the registered office:

.....

.....

A.3 Telephone Number of Applicant: .....

A.4 Fax Number: .....

A.5 E-mail Address: .....

A.6 Details of Contact Person:

Full Name: .....

Telephone Number: .....

Fax Number: .....

E-mail Address: .....

SECTION B

PARTICULARS OF A DISTRIBUTION LICENCE ISSUED UNDER THE ELECTRICITY ACT BY THE AUTHORITY

B.1 Date from which the licence became effective:

.....

B.2 Duration of the licence from the effective date: .....

B.3 Purpose for which the licence was issued: .....

B.4 Area to which the existing licence relates: .....

B.5 Reference number for the existing distribution licence: .....

SECTION C

COMMENCEMENT DATE, PURPOSE AND DURATION OF LICENCE

C.1 Desired date from which the licence (if granted) is to take effect:

.....

C.2 Duration of the licence from commencement date: .....

C.3 Description of the purpose for which a supply is to be distributed:

.....

C.4 Type of application (issue, transfer, amendment or renewal): .....

SECTION D

AREA TO WHICH THE APPLICATION RELATES

D.1 Provide sufficient information (map, etc.) of the area or areas to which the application relates:

.....

.....

.....

.....

D.2 Provide a list of local authorities covered by the area of distribution:

.....

.....

.....

.....

.....

SECTION D

TECHNICAL INFORMATION

Submit single line diagram(s) of the system by means of which the applicant intends to supply electricity. Identify any parts of that system which will not be in possession or control of the applicant. The diagram should show the applicant's points of supply (input).

E.1 Domestic metering details:

Number of customers on— . . . . . Prepayment metering;
Convectional credit metering;
Ripple control load limiting devices;
AMR metering system.

E.2 Commercial metering details:

Number of customers on— . . . . . Convectional credit metering, prepayment metering;
Maximum demand metering;
AMR metering.

E.3 Special Agreements:

Number of customers on . . . . . Maximum demand metering;
Time of day metering.

E.4 Transformer Capacity:

		Number	Ages	(kVA) Capacity
E.4.1	Power transformers (kV)			
E.4.2	Distribution transformers			

E.5 Lines:
Total circuit length (Km) when commissioned

E.5.1	Distribution Lines 66 kV (if not part of Transmission			
E.5.2	Distribution Lines 33 kV			
E.5.3	Distribution Lines 11 kV			
E.5.4	400/230 Volts			

E.6 Cables:
Total circuit length (Km) when commissioned

E.6.1	Distribution Cables 33 kV			
E.6.1	Distribution Cables 11 kV			
E.6.1	Distribution Cables LV/MV			

SECTION F

DISTRIBUTION BUSINESS

F.1 General:

Provide projected details of the following—

	Year 1	Year 2	Year 3	Year 4	Year 5
Number of consumers					
Total kWh Sales					
Total energy (kWh) purchased					
Percentage kWh losses					

F.2 Provide details of long-term power purchase agreements:

.....

.....

.....

.....

F.3 Attach details of proposed tariff structure for each category of consumers:

.....

.....

.....

F.4 Provide details of your policy regarding capital contribution, connexion and reconnexion charges, inspection charges, etc.:

.....

.....

.....

.....

.....

F.5 Provide details of proposed major maintenance programmes including expected cost and duration thereof covering the next five years:

.....

.....

.....

.....

.....

F.6 Consumer Profile:

Tariff	Number of Consumers				Sales (kWh)				Total Revenue (K'000)					Growth Rate Consumer Nos./ Sales
	Year 1	Year 2	Year 3	Year 4	Year 1	Year 2	Year 3	Year 4	Year 1	Year 2	Year 3	Year 4	Average Consumer Numbers	Average Sales Growth
Domestic Urban														
Domestic Rural														
General														
Maximum Demand (Low voltage)														
Maximum Demand (Medium voltage)														
Optional Demand (Off-peak)														

F.7 Provide details of major rehabilitations and modifications and dates, costs and description thereof for the next five years:

.....

.....

F.8 Details of distribution expansion programme including dates, and description:

.....

.....

.....

.....

SECTION G

FINANCIAL INFORMATION

G.1 Income Statement:

Provide statements and annual forecasts of sales, revenues and costs. Attach copies of the current and/or budgeted balance sheet, rate of return, profit and loss account and source and application of funds for current and next two years. Indicate major cost items such as staff costs, maintenance.

G.2 Investment Programme:

Investment Programme for current and the next live years. Attach copies of detailed scheme or schemes prepared by a competent engineer and mode and cost of financing such a scheme.

G.3 Fixed Assets:

Summary of total assets of all distribution plant.

G.4 Audited Accounts:

Provide copies of the latest audited accounts of the applicant.

G.5 Letters of Reference from Banks:

Provide one letter of recommendation as to credit worthiness from a local commercial bank and one from a reputable international bank.

SECTION H

INFORMATION ON HUMAN RESOURCES

Personnel:

(*a*) submit details of the number of staff and employees and their categories and grades in the service of or to be recruited by the applicant, showing their qualifications and number of years of experience in similar jobs.

(*b*) Provide *curriculum vitae* of top management personnel of the applicant.

SECTION I

ENVIRONMENTAL CONSIDERATION

Provide a brief description of the likely negative impact of the distribution facility on natural resources and environment and mitigation measures proposed.

SECTION J

PERMITS FROM OTHER GOVERNMENT DEPARTMENTS OR REGULATORY AUTHORITIES

Submit copies of permits or approvals issued by public or local authority or other regulatory agencies necessary for the operation of the distribution system.

SECTION K

ADVERTISING NOTICE

Attach draft copy of the notice of advertisement as to representations or objections.

SECTION L

TARIFFS

Provide a schedule of the proposed tariffs.

SECTION M

PRESCRIBED FORMS FOR AGREEMENTS

FORM RE 5

RURAL ELECTRIFICATION ACT

(CAP. 73:03)

GRANT AND SUBSIDY AGREEMENT

THIS GRANT AND SUBSIDY AGREEMENT is made on the ..... day of ..... , 20..... BETWEEN the Malaŵi Government represented by the Department of Energy Affairs (hereinafter referred to as the Government) on the one part

AND ..... of ..... (hereinafter referred to as "the Concedante") on the other part.

WHEREAS the Government through the Rural Electrification Unit is willing and desirous to give a grant and subsidy out of the Malaŵi Rural Electrification Fund to the Concedante for the installation of rural electrification system which is more fully described in the First Schedule hereto (hereinafter referred to as "the Project").

AND WHEREAS the Concedante is willing and is able to carry out the project or to enter into a Concession Agreement with a Concessionaire to carry out the Project.

NOW THEREFORE the parties hereby agree as follows—

1. In consideration of the Concedante carrying out the Project, the Government shall grant to the Concedante a grant and subsidy in the sum of K ..... (Malaŵi Kwacha (hereinafter referred to as "the Funds") for purposes of financing the capital cost of the Project and operational cost of the Project as the Rural Electrification Management Committee (hereinafter referred to as "the Committee") may approve.
2. The Funds shall be disbursed to the Concedante upon the Concedante fulfilling the conditions set out in the Rural Electrification Act.
3. The Funds shall be disbursed to the Concedante in accordance with progress of work on the Project and in accordance with the disbursement schedule set out in the Second Schedule hereto.
4. The Grant and Subsidy shall be a once off payment to the Concedante for each Project and shall be used solely for payment of the capital costs of the Project, provided that for operational cost of the Project, the funds may be disbursed monthly over a period as the Committee may approve.
5. In the case where there is a Concessionaire, the Concedante shall not pay the Funds or any part thereof to another Concessionaire other than the Concessionaire granted exclusive rights in the concession area as demarcated in the Concession Agreement, a copy of which Concession Agreement is attached hereto.

FORM RE 6

reg. 8

RURAL ELECTRIFICATION ACT

(CAP. 73:03)

CONCESSION AGREEMENT

THIS CONCESSION AGREEMENT is made the ..... day of....., 20.....

BETWEEN .....

of .....

(hereinafter referred to as "the Concedante") of the one part AND .....

.....of .....

(hereinafter referred to as "the Concessionaire") of the other part.

WHEREAS the Government through the agency of the Concedante is willing and desirous to give a grant and subsidy for the installation, operation and maintenance of rural electrification installation;

AND WHEREAS the Concessionaire is desirous to provide the services for the installation, operation and maintenance of rural electrification installation and has agreed with the Concedante to enter into this Concession Agreement.

NOW THEREFORE this Agreement witnesseth as follows—

1. The Concessionaire shall carry out the installation operation and maintenance of rural electrification system in the concession area demarcated in the First Schedule hereto and shall not charge consumers any tariffs or charges other than those specified in the Second Schedule hereto or as may be revised in accordance with the Energy Regulation Act (Cap.73:02) and the Act.

2. This Concession Agreement is subject to the provisions of the Rural Electrification Act and the regulations made thereunder.
3. The Concessionaire shall pay to the Concedante a management fee of K..... (Malaŵi Kwacha) per annum payable quarterly in advance provided that the said management fee shall be subject to revision with the approval of the Malaŵi Energy Regulatory Authority.
4. This Concession Agreement may not be transferred in whole or in part, by the Concessionaire, without the prior written approval of the Concedante.
5. Where the Concession Agreement has been terminated by the Concedante, the concession may be granted to any other person the Concedante may deem fit, after approval of the Rural Electrification Management Committee and the Malaŵi Energy Regulatory Authority and after consultation with creditors. Any compensation to the Concessionaire shall be determined by the parties and approved by the Malaŵi Energy Regulatory Authority.
6. The Concessionaire shall be solely liable for the installation, operation and maintenance of the rural electrification system and shall operate the same solely and exclusively and for the account of the Concessionaire.
7. Each of the parties shall ensure that their contractors, subcontractors, consultants and agents, and each of their respective permitted assigns and successors, hold in confidence all documents and other information whether technical or commercial, which are of a confidential nature supplied to it by or on behalf of the other party relating to the Concession and shall not publish or otherwise disclose or use the same for its own purpose, other than as may be required to perform its obligations under this Concession Agreement.
8. The provisions of the clause 8 herein shall survive the termination of this Concession Agreement but shall expire and be of no further effect from the fifth anniversary of the date of termination of this Concession Agreement.
9. The Concessionaire's obligations under this Concession Agreement include—
   (*a*) to carry out the service of supplying electricity and renewable energy technologies in such a way as to best serve the interests and needs of customers (both existing and future) and for the benefit of Malaŵi's economic and social development;
   (*b*) to utilize the grant and subsidy for the intended purpose and in accordance with the Rural Electrification Act and the Grant and Subsidy Agreement;
   (*c*) not to remove any installation from the concession area without the prior written consent of the Concedante and to ensure that at all times each system is identifiable;
   (*d*) to carry out the Concessionaire's obligations under this Concession Agreement so long as it remains in force;
   (*e*) to allow the Concedante to enter any installation for purposes of verifying if the Concessionaire is complying with this Concession Agreement and the Rural Electrification Act;

(*f*) to supply electricity or renewable energy technologies as the case may be, within the concession area to all Consumers who are prima facie able to pay for the services charged by the Concessionaire, provided that the grant and subsidy received by the Concessionaire is enough to cover all such supply of energy;

(*g*) to cooperate with other suppliers of electricity with regard to national and regional plans and operation of electricity supply systems;

(*h*) not to reduce or terminate supply of electricity or remove the installation except in accordance with—

(i) the Rural Electrification Act;

(ii) the Electricity Act;

(iii) the Energy Regulation Act;

(iv) this Concession Agreement; and

(v) the contract for supply of electricity entered into between the Concessionaire and a consumer;

(*i*) not to charge consumers any other tariffs or charges that have not been agreed in accordance with the Act, and as varied from time to time in accordance with the provisions thereof;

(*j*) to submit to the Concedante within sixty days of the end of each financial year an annual report on all relevant parts of the operation including, but not limited to—

(i) actual and target total number of installations for each month;

(ii) year end projection of installations for the next financial year; and

(iii) any particulars as may be specified by the Concedante;

(*k*) to maintain full and proper records of all its activities and to make the same available to the Concedante and the Authority and their servants at any reasonable times including—

(i) complete records of maintenance and repair activities including dates, personnel and the contractors involved and the costs thereof where these can be reasonably calculated or estimated;

(ii) particulars of the physical locality and the identification of all installations in terms of which a grant or subsidy has been granted; and

(iii) any other records as may reasonably be required by the Concedante or the Authority to properly monitor the activities of the Concessionaire;

(*l*) to indemnify the Concedante and its employees for all liabilities arising out of the installation operation and maintenance of the rural electrification installation; and

(*m*) in the case of solar home system, to enter into the solar home system purchase agreement and solar home system service agreement with the supplier as prescribed in the Rural Electrification Regulations.

10. This Concession Agreement may be terminated by the Concedante following the occurrence of any one or more of the following events—

(*a*) material suspension by the Concessionaire of rural electrification activities which do not result from a force majeure event;

(*b*) repeated refusal by the Concessionaire to permit the due exercise of inspection, monitoring and supervision operations;

(*c*) refusal by the Concessionaire to undertake the appropriate maintenance and repair of the rural electrification installations;

(*d*) the charging by the Concessionaire of tariffs at a rate in excess of that which has been fixed under this Concession Agreement and as varied from time to time with the consent of the Authority;

(*e*) bankruptcy of the Concessionaire;

(*f*) unauthorized transfer or assignment of the Concession Agreement by the Concessionaire;

(*g*) breach of the Electricity Act, the Energy Regulation Act, the Rural Electrification Act or other material breach of this Concession Agreement; and

(*h*) material deviation by the Concessionaire from the purpose of the Concession: Provided that the Concession Agreement shall not be terminated if the Concessionaire has taken appropriate remedial action within thirty (30) days of being given notice of intention to terminate by the Concedante.

12. The Concession Agreement may be terminated—

(*a*) by the Concessionaire, on giving three months written notice following material violation of the grant and subsidy agreement in the non payment of grant and subsidy:

Provided that such violation has resulted in such infringement or such prejudice that the Concessionaire is unable to install, operate or maintain the rural electrification system on an economical basis in part or in whole; or

(*b*) after twenty years for rural electrification electricity and five years for renewable energy technologies or as specified in the Concession Agreement which ever occurs first.

FORM RE 7

RURAL ELECTRIFICATION ACT

(CAP. 73:03)

SOLAR HOME SYSTEM PURCHASE AGREEMENT reg. 10

THIS SOLAR HOME SYSTEM PURCHASE AGREEMENT is made on the..... day of ..... , 20....., BETWEEN ..... of ..... (hereinafter called "the Buyer'), of the one part, AND ..... of ..... (hereinafter called 'The Contractor"), of the other part.

WHEREAS the Contractor submitted a quotation dated the ..... day of ...., 20..... for the Solar Home System works at the request of the Buyer; and

WHEREAS the Buyer has accepted the said quotation.

NOW THEREFORE the parties agree as follows—

1. The following documents shall be deemed to form and construed as an integral part of this Agreement and in case of discrepancies, the following sequence of priority shall govern among the documents—
   (*a*) Appendix A — General Conditions;
   (*b*) Appendix B — Scope of works, Technical Specifications and Description of the Works including Drawings;
   (*c*) Appendix C — Forms:
      (i) Form C1 — Commissioning Certificate Form; and
      (ii) Form C2 — Warranty Transfer Form or Warranty Guarantee;
   (*d*) Appendix D — Site Map;
   (*e*) Contractor's Quotation; and
   (*f*) Solar Home Service Agreement.
2. Any changes, modifications or amendments to the Agreement shall be made only by mutual consent in writing between the Buyer and the Contractor and approved by the quality committee of the Rural Electrification Management Committee, which changes, modifications or amendments shall constitute an integral part of the Agreement.
3. For the avoidance of doubt, it is hereby agreed that the Contractor's signing of the Solar Home Service Agreement is a condition precedent to the effectiveness of this Contract.

4. For and in consideration of the payments to be made by the Buyer in accordance with the provisions of clause 7 hereof, the Contractor shall fully and faithfully furnish all labour, plant, and materials, and complete the works in accordance with the above mentioned documents, appendices attached to the documents or on file in the office of the Buyer, and the quotation of the Contractor, deliver, install, test and commission at Buyer's premises the Solar Home System described in Appendix B, including a verbal instruction, on location, in operating the system. Further, the Contractor shall hand over to the Buyer the following documents—
   (*a*) Commissioning Certificate;
   (*b*) Operation Manual for the system;
   (*c*) Solar Home Service Agreement, signed by both Contractor and Buyer; and
   (*d*) Warranty Guarantee or Certificate, including Warranty Transfer Agreement transferring of manufacturer's product guarantee to Buyer.
5. The Installation Site shall be the Buyer's premises at .... District and more fully described in Appendix D attached hereto.
6. The Contract price for the works is K..... (Malaŵi Kwacha).
7. The Buyer shall pay the Contractor in local currency for the latter's satisfactory performance of this Agreement, in accordance with the provisions of the Agreement Documents, and on the basis of the Contractor's lump sum quotation in the following manner—
   (*a*) 30% to be paid by the Purchaser upon signing this Agreement and 70% to be paid upon completion of the works; and
   (*b*) payment of the said 70% will be made within fourteen days from the date of receipt of certified and approved certificate and invoices plus the delivery of the documents specified in the clause 9 hereunder.
8. This Agreement is subject to the provisions of the Rural Electrification Act and the regulations made thereunder.
9. The Contractor shall commence the Works specified in this Agreement within fourteen days after signing of the Agreement and payment of the deposit and shall complete the same within ..... days counted from the date of commencement and based on the following programme of events:

Date	*Event*
.....	Signing of Contract and Service Agreement.
.....	Presentation to the Purchaser of invoice on first installment.
.....	Payment to Contractor of 1st instalment.
.....	Delivery, installation and commissioning of equipment, issuing and handing over to Buyer of Commissioning Certificate, Operation Manual, Guarantee Certificate, Warranty Transfer Agreement, etc.
.....	Presentation of invoice on second instalment.
.....	Payment to Contractor of the second and Final Instalment.

10. Should the Contractor fail to complete the Works under this Agreement within the period specified in this Agreement, plus any extension of time that may be granted under the provisions of this Agreement, the Contractor shall pay the Buyer 0.1% of the contract price per each day of delay up to a maximum of 10% of the contract price.

11. If any term or condition of this Agreement is held invalid or contrary to the law, the validity of the other terms and conditions hereof shall not be affected thereby.

12.—(*a*) The Buyer shall give the Contractor free access to his premises to the extent necessary for the Contractor to install, test and commission the Solar Home System described in Appendix B. The Buyer shall reasonably prepare his premises for the installation, and shall personally attend the installation in order to discuss with the Contractor's installation crew, the exact location of lamps and other equipment. In case the buyer is unable to attend the installation, he shall send a duly identified and authorized person to represent him.

(*b*) The Buyer shall cover any additional costs incurred as a result of the Buyer's unnecessary obstruction of installation.

(*c*) The Buyer's general obligations under the Solar Home Service Agreement shall be provided for in every renewable energy technologies system service agreement as follows—

(i) to grant the licensee such access to the premises as the licensee shall from time to time reasonably require in order to discharge its obligations hereunder;

(ii) to make available at the premises such facilities as the licensee shall reasonably require in order to discharge its obligations hereunder including, without limitation, adequate work space and storage;

(iii) to take all reasonable precautions to protect the health and safety of the licensee's employees, agents and sub-contractors while on the Buyer's Site; and

(iv) to make available the renewable energy technologies equipment and supply all documentation and other information necessary for the licensee to diagnose any fault in such Equipment.

(*d*) that the Buyer shall have a free and unencumbered title to any replaced parts for the Equipment replaced during service.

(*e*) The Buyer shall report to Police any theft of the Solar Home System Equipment immediately after the incident and submit a copy of the police report to the Contractor.

13.—(*a*) The licensee's general obligations shall be provided for in every renewable energy technologies system service agreement as follows—

(i) to perform the Maintenance Services and any other services with reasonable care and skill; and

(ii) to perform any Excepted Services within a reasonable time of being so requested by the Buyer;

(*b*) that the licensee will enjoy possession of any such replacement parts and that the same will be of merchantable quality and reasonably fit for their purpose.

14. The Contractor shall execute the Warranty Assignment in Form C2 of Appendix C attached hereto, assigning the Contractor's benefit of the manufacturer's Warranty for the Solar Panel to the Buyer and shall also deliver the Manufacturer's Warranty to the Buyer. The Contractor shall also execute a Warranty guarantee for the battery and charger in favour of the Buyer. It is further agreed that the signing and delivery of the Warranty Assignment for the Solar Panel and the signing and delivery of the Warranty Guarantee for the battery and charger is a prerequisite for the payment of the final installment.

15. The procedural law for arbitration is the Energy (Renewable Technologies) By-laws under the Energy Regulation Act.

THIS WARRANTY ASSIGNMENT is made the ..... day of....., 20.....

BETWEEN ..... of

.....

(hereinafter referred to as "the Buyer") of the one part AND .....

of ..... (hereinafter referred to as "the Contractor") of the other part.

WHEREAS under and by virtue of a sale agreement dated the ..... day of ....., 20..... and made between the Contractor and the Buyer the Contractor sold the Solar Home System Equipment more fully described in the Schedule hereto to the Buyer;

WHEREAS the Contractor is the beneficial owner of the Manufacturer's Warranty for the Solar Panel of the said Solar Home System equipment.

WHEREAS it was a condition of the sale agreement that before final payment for the said Solar Home System Equipment, the Contractor should assign to the Buyer the benefit of the said Manufacturer's Warranty for the said Solar Home System Equipment;

WHEREAS it was a condition of the sale agreement that the Contractor undertakes to grant a warranty guarantee of all components of the Solar Home System Equipment which do not have the Manufacturer's Warranty more fully described in the Schedule hereto to the Buyer.

NOW THEREFORE this Agreement witnesseth as follows—

1. In pursuance of the aforesaid sale agreement, the Contractor as beneficial owner hereby assigns to the Buyer the Manufacturer's Warranty for the said Solar Home System Equipment's Solar Panel battery and charge controller which has been granted to the Contractor together with the Buyer's full right, title and interest therein and all rights of action powers and benefits accruing or belonging to the Contractor.

2. The Contractor will at the request and cost of the Buyer join with the Buyer in any proceedings for and do all such acts and things as may be reasonably required for enforcing the said Manufacturer's Warranty during the duration of that warranty.
3. The Contractor further warrants the Solar Home System Equipment before, during and after the transfer or installation of the said equipment for a period of ..... to the Buyer.

SOLAR HOME SYSTEM SERVICE AGREEMENT reg. 11

THIS SERVICE AGREEMENT is made the ..... day of ....., 20.....

BETWEEN .....

of.....(hereinafter called "the Buyer") on the one part AND .....

..... of ..... (hereinafter called "the Contractor") on the other part.

WHEREAS by an agreement made the ..... day of ....., 20..... BETWEEN the Buyer AND the Contractor, the Contractor sold to the Buyer the Solar Home System Equipment more fully described in the Schedule attached hereto.

WHEREAS it was a condition of the said Solar Home System Purchase Agreement that the Contractor and the Buyer shall execute this Service Agreement for the service and maintenance of the said Solar Home System Equipment.

NOW THEREFORE this Service Agreement witnesseth as follows:

1. In this Agreement unless the context otherwise requires—

"additional charges" means the charges to be calculated by the Contractor on a time and material basis at its then prevailing rates in respect of the provision of Excepted Services pursuant to clause 5 (*c*) below;

"commencement date" means the date set out in the Schedule hereto upon which this agreement shall commence;

"solar home system equipment" means the items of Solar Home System Equipment identified by type and serial number in the Schedule hereto;

"excepted services" means those services referred to in clause 5 below which do not fall within maintenance services;

"initial period" means the period of twenty-four months commencing on the Commencement Date;

"maintenance charges" means the aggregate annual charges for the Maintenance Services calculated in accordance with clause 3 below and set out in the Schedule hereto;

"maintenance services" means the provision of Preventative Maintenance, Curative Maintenance and other services as defined in clause 4 below;

"monitoring engineer" means the Malaŵi Bureau of Standards or other body authorized by the Malaŵi Government;

"place of use" means that part of the Buyer's premises at the Site where the Solar Home System Equipment is installed and operated;

"regulator" means the Malaŵi Energy Regulatory Authority or its authorized representative; and

"site" means the Buyer's address specified in the Schedule hereto.

2. In consideration of the payment by the Buyer from time to time of the Maintenance Charges in accordance with the provisions of clause 3 below, the Contractor undertakes to provide the Maintenance Services in respect of the Solar Home System Equipment upon the terms and conditions of this Service Agreement.

3. The annual maintenance charges at the date hereof in respect of each item of Solar Home System Equipment shall be as set out in the Schedule. The aggregate of such annual maintenance charges shall constitute the maintenance charges for the purposes of this Service Agreement—

(*a*) The Contractor shall not be entitled to vary the maintenance charges during the period of twenty-four months commencing on the Commencement Date. Thereafter the Contractor shall be entitled to vary the maintenance charges not more than once in every successive period of twelve months upon giving not less than ninety days prior written notice of increase to the Buyer. But such increase shall be subject to the approval of the Malaŵi Energy Regulator) Authority.

(*b*) Upon receipt of a notice of increase in maintenance charges in accordance with paragraph (*a*) above, the Buyer shall be entitled to terminate this Service Agreement in accordance with clause 12 below.

(*c*) The maintenance charges shall cover two scheduled semi annual visit to the plant and shall include the cost of travel, accommodation and subsistence expenses of the Contractor (including the cost of time spent travelling) incurred in the provision of the maintenance services plus Contractor's fees and cost of spare parts replaced due to normal wear and tear during the warrant} period of each such component.

(*d*) The service visits shall comprise a comprehensive inspection, and eventually repairs and adjustments of components as deemed necessary to secure continued trouble free operation.

(*e*) The maintenance charges shall not include the cost of any Excepted Services.

(*f*) The maintenance charges shall be levied by the Contractor annually in advance. Maintenance charges shall be payable by the Buyer and the maintenance charges for the initial period shall be included in the purchase price for the equipment.

(*g*) During renewed period provided for in clause 10 maintenance charges shall include cost of spare parts replaced due to normal wear and tear only during the subsistence of the warranty period for the particular component.

4.—(*a*) Maintenance services shall comprise the provision by the Contractor of

"Preventative Maintenance" and "Curative Maintenance" in respect of the Solar Home System Equipment at the place of use.

(*b*) Preventative maintenance for the purposes of this Service Agreement shall comprise—

(i) the routine inspection and testing (by attendance on Site) by the Contractor of each item of Solar Home System Equipment in accordance with the Contractor's recommendations therefor; and

(ii) the carrying out by the Contractor of such repairs replacement of parts worn out due to normal wear and tear, cleaning, lubrication or adjustment to each item of Solar Home System Equipment as the Contractor shall deem necessary as a result of the said inspection and testing.

(*c*) Curative maintenance for the purposes of this Service Agreement shall comprise—

(i) upon receipt of a request from the Buyer the inspection testing and diagnosing (by attendance on Site) by the Contractor of any fault reported in an item of Solar Home System Equipment; and

(ii) the carrying out by the Contractor of such repairs replacement of parts cleaning, lubrication or adjustment as the Contractor shall deem necessary to remedy the said fault.

(*d*) The times for maintenance services under this Service Agreement shall be—

(i) curative maintenance will be provided upon a request by the Buyer to the Contractor. The Contractor shall use its reasonable endeavours to carry out the Curative Maintenance within forty-eight hours of receipt of such request;

(ii) preventative maintenance shall be provided by the Contractor at least once every twelve months; and

(iii) if the Contractor persistently fails to carry out curative maintenance within the stipulated forty-eight hours the Monitoring Engineer may withdraw the Contractor's accreditation and the Authority may cancel its licence.

5. The following shall form part of the services expected to be carried out under this Service Agreement—

(*a*) The maintenance services shall not include the correction of any fault due to—

(i) the Buyer's neglect or misuse of the Solar Home System Equipment or his failure to operate the Solar Home System Equipment in accordance with the Contractor's instruction manuals or for the purposes for which it was designed;

(ii) the alteration modification or maintenance of the Solar Home System Equipment by any party other than the Contractor without the Contractor's prior consent;

(iii) any accident or disaster affecting the Solar Home System Equipment including without limitation, fire, flood, water, wind, lightening, transportation, vandalism or burglary; or

(iv) the Buyer's failure, inability or refusal to afford the Contractor's personnel proper access to the Solar Home System Equipment.

(*b*) maintenance services shall also not include additions to the Solar Home System Equipment.

(*c*) The Contractor shall, upon request by the Buyer, provide all or any of the Excepted Services referred to in clause 5 (*a*) and (*b*) above but, shall be entitled to charge for the same by levying additional charges in the manner described in Clause 5 (*e*) below.

(*d*) Without prejudice to clause (*b*) above, the Contractor shall be entitled to levy additional charges in the manner described in clause (*e*) below, if maintenance services are provided in circumstances where any reasonable operator of the Solar Home System Equipment would have deemed the Buyer's request to have been unnecessary.

(*e*) Additional charges shall be levied by the Contractor by delivering an invoice to the Buyer soon after carrying out Excepted Services and the Buyer shall certify the same for payment and forward to the Lender who shall pay the same within fourteen days from the date of receipt of the certified invoice.

6.—(*a*) The Buyer's general obligations shall be provided for under the Service Agreement in every renewable energy technologies system service agreement as follows—

(i) to pay for the service charges in accordance with this Service Agreement;

(ii) to grant the licensee such access to the premises as the licensee shall from time to time reasonably require in order to discharge its obligations hereunder;

(iii) to make available at the premises such facilities as the licensee shall reasonably require in order to discharge its obligations hereunder including without limitation adequate work space and storage;

(iv) to take all reasonable precautions to protect the health and safety of the licensee's employees, agents and sub-contractors while on the Buyer's Site;

(v) to make available the renewable energy technologies equipment and supply all documentation and other information necessary for the licensee to diagnose any fault in such equipment; and

(vi) that the licensee shall have a free and unencumbered title to any replaced parts for the equipment replaced during service.

7. The licensee's general obligations which shall be provided for in even renewable energy technologies system service agreement are—

(*a*) to perform the Maintenance Services and any other services with reasonable care and skill;

(*b*) to perform any Excepted Services within a reasonable time of being so requested by the Buyer; and

(*c*) that the Buyer will enjoy quiet possession of any such replacement parts and that the same will be of merchantable quality and reasonably lit for their purpose.

8. The Contractor does not warrant that the Maintenance Services (or the Additional Services) will cause the Solar Home System Equipment to operate without interruption or error.

9. The Contractor shall at all times provide insurance cover (at his cost and as part of the price for the equipment) for the supply, installation and operation of the Solar Home System Equipment against fire, lightening, storm, flood, theft and vandalism in the names of the owner from the date of commissioning up to the expiration of the initial service contract.

10.—(*a*) Subject to the warranty set out in this Service Agreement, the Contractor reserves the right to supply new, second-hand or reconditioned replacement parts in the performance of its duties hereunder.

(*b*) Any parts of the Solar Home System Equipment replaced by the Contractor pursuant to clause 10 (*a*) above ("replaced Parts") shall upon replacement become the property of the Contractor and the Buyer warrants that either it shall have a free and unencumbered title to such Replaced Parts and/or that he shall have obtained all necessary consents and authorization to part with possession and give good title to the Replaced Parts.

11.—(*a*) This Service Agreement shall commence on the Commencement Date and shall continue until the expiry of the Initial Period during which period the agreement shall not be terminated by either party.

(*b*) After the expiry of the Initial Period this Service Agreement may be renewed. three months before the expiry date of the Initial Period. The Contractor shall send a quotation to the Buyer in respect of maintenance charges for the proposed renewed period and the duration thereof. If the Buyer accepts that quotation, this service agreement and all the conditions herein shall be deemed to have been renewed without further assurance thereof, provided that if no duration is specified in the quotation, this service agreement shall be deemed to have been renewed for twelve months.

12.—(*a*) The Contractor shall upon carrying out any maintenance work on the Solar Equipment, prepare a maintenance report and deliver the same to the Buyer;

(*b*) The said maintenance reports shall describe in detail the inspection, testing, repairs, the parts replaced, additions and other maintenance work done and where excepted services have been undertaken; a detailed justification as to why the work done has been classified as Excepted Services; and

(*c*) The Monitoring Engineer may carry out inspection and testing of the Solar Home System Equipment to counter-check or verify the finding in the maintenance report.

13.—(*a*) Subject to clause 11 (*a*) of this Service Agreement, this Service Agreement may be terminated—

(i) by the Buyer upon giving not less than ninety days notice to the Contractor at any time after the expiry of the Initial Period;

(ii) forthwith by the Contractor if the Buyer fails to pay the Maintenance Charges or any Additional Charges due hereunder within sixty days of the due date therefor; or

(iii) forthwith by either party if the other commits any material breach of any term of this Service Agreement (other than one falling within (ii) above) and which (in the case of a breach capable of being remedied) shall not have been remedied within sixty days of a written request by the other party to remedy the same.

(*b*) Any termination of this Service Agreement pursuant to this clause shall be without prejudice to any other rights or remedies a party may be entitled to hereunder or at law and shall not affect any accrued rights or liabilities of cither party nor the coming into or continuance in force of any provision hereof which is expressly or by implication intended to come into or continue in force on or after such termination.

14. If any provision of this Service Agreement shall be found by any Court or administrative body of competent jurisdiction to be invalid or unenforceable, the invalidity or unenforceability of such provision shall not affect the other provisions of this Service Agreement and all provisions not affected by such invalidity or unenforceability shall remain in full force and effect—

(*a*) This Service Agreement shall be binding upon and inure for the benefit of the successors in title of the parties hereto.

(*b*) Neither party shall be entitled to assign this Service Agreement nor all or any of their rights and obligations hereunder without the prior written consent of the other.

15.—(*a*) This Service Agreement shall be governed by and construed in accordance with the Laws of Malaŵi.

(*b*) Arbitration shall be in accordance with the Energy Regulation By-laws under the Energy Regulation Act (Cap. 73:02).

FOURTH SCHEDULE reg. 14

PROCEDURE AND CRITERIA FOR SELECTION OF RURAL ELECTRIFICATION SITES

Type of Rural Electrification	*Technical Feasibility*	*Financial and Economic Feasibility*	*Social Feasibility*	*Scoring*	*List of Target Groups*
1. Rural Electrification by Grid Extension Candidate sites for electrification shall be assessed according to the following criteria, and shall be prioritized according to the result of the assessment by the Committee.	(*a*) Location of the candidate site— (i) The supply voltage at the site has to be within statutory limits of +/- 6% of the supply voltage. (ii) Anything below 25 kVA will be subject to contribution of 20% of total cost. (*b*) Power Demand (i) The estimated power demand should be at least 25 kVA. (ii) Anything below 25 kVA will be subject to contribution of 20% of total cost. (*c*) Capacity of existing distribution lines	(*a*) The project should have a positive Internal Rate of Return to be on the priority list, i.e. above 0% and up to 6%. (*b*) Costs and revenues are compared based on the present value throughout the project life— (i) The costs consist of construction, connexion fees, operation and maintenance of the distribution lines; (ii) The project life consists of a construction period and 20 years of operation period; and (iii) Benefits are the revenues derived from electricity-sales and potential economic activities.	(*a*) The existence of social facilities with some local groups working together to utilize such social facilities. (*b*) Social acceptance of electricity is assessed by– (i) Willingness to pay; and (ii) Readiness to connect which could be represented by advance house wiring.	In order to prioritize the areas, each will be scored based on the factors in the criteria— (*a*) Technical feasibility This has a score of 1 to 5. The area with the highest score is the one which will be considered with priority and the one with the least score will be considered for the other options if feasible. (*b*) Financial, Economic and Social Feasibility These two factors will be scored together based on a scale of 1 to 10. (*c*) The former has a maximum score of 6 while the latter s maximum score is 4.	The target beneficiaries of distribution lines extension under this criteria are as below— (*a*) public schools; (*b*) rural clinics; (*c*) rural hospitals; (*d*) trading centres; (*e*) orphanages; (*f*) irrigation schemes; (*g*) police units; (*h*) border posts; and (*i*) rural growth centres.

FOURTH SCHEDULE —(*continued*) reg. 14

PROCEDURE AND CRITERIA FOR SELECTION OF RURAL ELECTRIFICATION SITES

Type of Rural Electrification	*Technical Feasibility*	*Financial and Economic Feasibility*	*Social Feasibility*	*Scoring*	*List of Target Groups*
	(i) Where there is existing capacity in the distribution network to accommodate new and future power demand, the area will be given first priority. (ii) Where there is no capacity, hence a need to reinforce existing distribution lines, the area will be considered later. (*d*) Systems stability and reliability (i) Extension of distribution lines should not disturb the system stability and reliability.	(*c*) The candidate site should be accessible by (*d*) The candidate site should have existing economic activities represented by the number of shops, agro-businesses and other small businesses (*e*) Community contribution— (i) The beneficiaries are encouraged where possible, to contribute towards the project costs either in kind or monetary terms in order to be considered with the highest priority; and (ii) The total contribution should be at least 20 per cent of the total cost.			

FOURTH SCHEDULE —(*continued*) reg. 14

PROCEDURE AND CRITERIA FOR SELECTION OF RURAL ELECTRIFICATION SITES

Type of Rural Electrification	*Technical Feasibility*	*Financial and Economic Feasibility*	*Social Feasibility*	*Scoring*	*List of Target Groups*
2. Rural Electrification by Isolated Stand alone grid powered by micro, mini and small hydro-power	(*a*) Adequate power demand to justify installation of either of the power stations above. (*b*) The river should be perennial and have the potential for either micro, mini and small hydro-power. (*c*) Consideration for basic design of civil, mechanical and electrical works. (*d*) In the case of micro and mini hydro-power development, the stations will be isolated and have no voltage transformation.	(*a*) Cost of construction (i.e. cost of plant and distribution network); (*b*) Costs of revenues are compared based on the present value throughout the protect life. (*c*) The project life consists of construction period and 20 years of operation period. (*d*) Benefits are connexion fees and the revenues derived from electricity sales. (*e*) The project should have a positive Internal Rate of Return of up to 6%.	(*a*) Community's willingness to contribute towards the project either in kind or monetary terms. (*b*) The existence of social/public facilities as load centres. (*c*) Willingness to pay for electricity (*d*) Willingness of concessionaires to operate and maintain the micro and mini and small hydro-power station.		The target beneficiaries will work as a guide to check the availability of load— (*a*) large farms; (*b*) tea, coffee and tobacco estates; (*c*) commercial enterprises; (*d*) public schools/ colleges; (*e*) rural clinics; (*f*) trading centres; (*g*) religious institutions; (*h*) rural growth centres; (*i*) orphanages; and (*j*) police units.

FOURTH SCHEDULE —(*continued*) reg. 14

PROCEDURE AND CRITERIA FOR SELECTION OF RURAL ELECTRIFICATION SITES

Type of Rural Electrification	*Technical Feasibility*	*Financial and Economic Feasibility*	*Social Feasibility*	*Scoring*	*List of Target Groups*
3. Rural Electrification by Renewable Energy Technologies (RET) The assumptions for the installation of RET are that— (*a*) site is for the national grid; (*b*) site is too costly to connect to the grid; or (*c*) one option either grid or non-grid to be considered per site.	(*a*) Power demand (i) The type and size of load has to be consistent with RET applications; (ii) The systems are capable of providing power for lighting, radio and black and white TV tor a limited number of hours; (iii) The average system is a 50 watt single panel system which provides enough power to operate 4 lights for 4 hours per day, power a 2.5 W radio for 10 hours per day and a 35W black and white TV for 4 hours per day; and	Economic Analysis— (*a*) Cost-Benefit analysis. (*b*) Opportunity cost. (*c*) Rate of Return. NOTE: Because we are targeting public entities, the issue of financial analysis may not arise but an economic analysis will have to be done.	(*a*) Willingness by the community to protect the system. Willingness of the community to pay for maintenance charges. (*b*) Willingness of the beneficiaries to operate and maintain the system. (*c*) Willingness by the communities to accept limitations of RET applications.		The target beneficiaries are— (*a*) schools; (*b*) colleges; (*c*) rural clinics; (*d*) community water supply; (*e*) religious institutions; and (*f*) CHAM health facilities.

FOURTH SCHEDULE —(*continued*) reg. 14

PROCEDURE AND CRITERIA FOR SELECTION OF RURAL ELECTRIFICATION SITES

Type of Rural Electrification	*Technical Feasibility*	*Financial and Economic Feasibility*	*Social Feasibility*	*Scoring*	*List of Target Groups*
	(iv) The system cannot be used for cooking (*b*) Solar radiation period of sunshine to be considered. (*c*) Location of site in relation to the distance from the existing grid. (*d*) Inclusion or exclusion of the site from the Rural Electrification Master Plans. (*e*) Period of electrification within live to ten years.

PAYMENT SYSTEMS

An Act to provide for the operation, regulation and supervision of payment, clearing and settlement systems in Malaŵi, and matters connected therewith and incidental thereto 15 of 2016 G.N. 35/2017

[30th June, 2017]

PART I

Preliminary

1. This Act may be cited as the Payment Systems Act. Short title

2. In this Act, unless the context otherwise requires— Interpretation

"bank" has the meaning ascribed to that term in the Banking Act; Cap. 44:01

"business day" means any day other than a Saturday, Sunday or public holiday;

"card" means any card including an Auto-Teller Machine card, point of sale card, debit card, credit card or stored value card, used by a consumer to effect an electronic funds transfer, electronic payments or withdrawals;

"cheque" has the meaning ascribed to that term in the Bills of Exchange Act; Cap. 48:02

"circular" means a written notice on a new policy or change of policy that relates to clearing and settlement systems operators, participants and includes instruments associated with such systems;

"clearing" means the process of transmitting, reconciling and confirming transfer instructions regarding funds, securities or other financial instruments prior to settlement, including the netting of instructions and the establishment of final positions prior to settlement;

"clearing system" means a system that facilitates the presentment and exchange of transfer instructions regarding funds, securities or other financial instruments prior to settlement;

"direction" means a specific mandatory instruction or set of instructions to do or not to do certain acts or things addressed to specific payment, clearing and settlement systems and operators, participants and instruments associated with such systems;

"directive" means a general mandatory instruction or set of instructions that apply or relate to all or specific payments,

clearing and settlement systems or operators, participants and instruments associated with such systems;

"electronic funds transfer" means the transfer of funds through an electronic mechanism;

"finality" means that a settlement or transfer is unconditional, enforceable and irrevocable;

"financial collateral arrangement" means an arrangement under which a participant provides acceptable collateral by way of securities in favour of, or to another participant, and where the full ownership of the collateral remains with the collateral provider when the security right is established whether or not the arrangement is covered by a master agreement, standard form contract, or any other general terms and conditions;

"financial institution" has the meaning ascribed to the term in the Financial Service Act; Cap. 44:05

"guidelines" means a standard or set of standards that relate to payments, clearing and settlement systems and operators, participants and instruments associated with those systems;

"mobile payment system" means a system that enables the process of money transfer and exchange of money for goods and services between two parties using a mobile phone or an electronic mobile device;

"netting" means the offsetting of positions or obligations by participants leading to the determination of net payment obligations between two or more clearing system participants within a clearing system, or the determination of the net settlement obligations between two or more settlement system participants within a settlement system;

"officer" means a person who is—

(*a*) an employee of the Reserve Bank;

(*b*) a person engaged by the Reserve Bank to provide services to it; or

(*c*) an examiner or investigator appointed under this Act;

"oversight" means monitoring, regulation and supervision of payments including mobile payments, clearing systems, settlement systems and payment instruments;

"parent company" has the meaning ascribed to that term in the Companies Act; Cap. 46:03

"payment instruction" means an order or instruction, whether electronic or physical, requesting movement of funds, securities or other financial instruments or the right pertaining to those funds, securities or financial instruments to a system operator by a system participant;

"payment instrument" means any instrument, whether tangible or intangible, that enables a person to obtain money, goods or services or to otherwise make a payment;

"payment system" means a system that enables funds transfer to be effected between a payer and a payee, utilizing payment instruments and procedures that relate to the payment system;

"Registrar" means the Registrar of Financial Institutions appointed under the Financial Services Act; Cap. 44:05

"remittance" means an in-country or cross-border person-to-person payment or transfer of relatively low value as may be prescribed by the Reserve Bank from time to time;

"remittance service provider" means a person that provides remittance services;

"Reserve Bank" means the Reserve Bank of Malaŵi as established under the Reserve Bank of Malaŵi Act; Cap. 44:02

"settlement" means an act of discharging obligations by transferring funds, securities or financial instruments between two or more parties in central bank money or through accounts with a settlement agent;

"settlement account" means an account held at the Reserve Bank or any other institution acting as a settlement agent, which is used to settle transactions between participants in a settlement system;

"settlement agent" means the Reserve Bank or any other bank or financial institution which holds accounts on behalf of clearing and system participants and effects settlements on their behalf;

"settlement instruction" means an instruction given to a settlement system by a system participant or by a payment clearing house system operator on behalf of a system participant to effect settlement of one or more payment obligations, or to discharge any other obligation of one system participant to another system participant;

"settlement obligation" means an indebtedness that is owed by one system participant to another as a result of one or more settlement instructions;

"settlement system" means a system used to facilitate the settlement of transfer instructions regarding funds, securities or other financial instruments;

Cap. 46:03 "subsidiary" has the meaning ascribed to that term in the Companies Act;

"system operator" means a person establishing or operating a payment, clearing, settlement system or services, or remittance services;

"system participant" means a person who has access to a payment, clearing or settlement system under a contractual arrangement with a system operator;

"systemic risk" means a risk of failure by one participant in a payment, clearing or settlement system to meet its obligation which results in other participants being unable to meet their obligations when due;

"truncation" means a procedure in which paper payment instruments within a bank, between banks or between a bank and its customers are replaced, in whole or in part, by electronic records for their further processing and transmission; and

"winding-up proceedings" means proceedings involving realization of assets and distribution of the proceeds among creditors, shareholders or members as appropriate, which involve an intervention by administrative or judicial authorities, including where the proceedings are terminated by a composition or other analogous measures, whether or not they are founded on insolvency or are voluntary or compulsory.

Objectives

3. The principal objective of this Act is to provide for the regulation and oversight of payment, clearing and settlement systems, payment instruments, remittance service providers, electronic money transfers, card issuers and travellers cheques agencies by—

(*a*) promoting the soundness, integrity, safety and efficiency and reliability of the payment, clearing and settlement systems or payment instruments including security and operating standards, and infrastructure arrangements;

(*b*) providing for minimum standards for protection of customers; and

(*c*) determining respective rights and obligations of system operators, participants and their customers.

PART II

Powers and Functions of the Reserve Bank

4. Without limiting the generality of the powers conferred on it by the Reserve Bank of Malaŵi Act, the Reserve Bank shall have, powers, duties and functions, to— Powers, duties and functions of the Reserve Bank Cap. 44:02

(*a*) promote the soundness, safety and efficiency, integrity and reliability of payment, clearing and settlement systems in Malaŵi;

(*b*) take all available measures to ensure that this Act is complied with by system operators and system participants;

(*c*) establish settlement systems;

(*d*) license and authorize payment, clearing and settlement systems operators;

(*e*) inspect system operators' and system participants' premises, equipment, machinery, apparatus, books or other documents, or accounts and transactions relating to the systems and payment instruments referred to in section 3 to ensure compliance with this Act;

(*f*) ensure that system operators comply with the Financial Crimes Act, and regulations made thereunder; Cap. 7:07

(*g*) exercise an oversight role over payment, clearing and settlement systems, and issuing of payment instruments in Malaŵi; and

(*h*) exercise and perform all other powers, duties, and functions as may be deemed necessary in the regulation of payment systems from time to time, or conferred on it by any other written law.

5. The Reserve Bank may, in writing, delegate any power or assign any function conferred on it by this Act, to any person, subject to such conditions as the Reserve Bank may determine. Delegation of powers

6. Any delegation of power under section 5— Reserve Bank not precluded from exercising and withdrawing delegated powers

(*a*) shall not prevent the Reserve Bank from exercising that power or performing that duty; and

(*b*) may be withdrawn at any time by written notification from the Reserve Bank.

7. In carrying out its functions, the Reserve Bank shall cooperate with other regulatory authorities within and outside Malaŵi by Cooperation with other regulatory authorities

sharing information and doing such other acts to achieve the objectives of this Act.

Directives, guidelines, circulars and directions

8. The Reserve Bank may issue directives, guidelines, circulars and directions for the proper administration of this Act.

Breaches of directives, etc

9. Any person who refuses or fails to comply with a directive, guideline, circular or direction issued under this Act, shall be liable to administrative or monetary penalties as may be prescribed by the Reserve Bank in directives.

Directions for inadequate control of risks

10. Where the Reserve Bank is of the opinion that a system operator or system participant engages in, or is about to engage in, any act or omission that results in, or is likely to result in, a systemic risk, or is, or may be detrimental to, or contrary to public interest in the security and effectiveness of payment, clearing and settlement systems of Malaŵi, the Reserve Bank may issue a direction in writing requiring the system operator or system participant, within the period specified in the direction, to—

(*a*) cease or refrain from engaging in the acts or omissions;

(*b*) perform such acts with respect to their participation in the payment system as the Reserve Bank considers necessary to remedy the situation;

(*c*) conform to requirements contained in the direction; or

(*d*) provide the Reserve Bank with such information and documents relating to the matter as specified in the direction within such period as the Reserve Bank may specify.

Court order for compelling compliance with a direction

11. Notwithstanding that criminal proceedings have been or may be instituted against a person relating to non-compliance of a direction given under section 10, the Reserve Bank may apply to the High Court for an order compelling such a person to comply with a direction issued under the section.

PART III

Regulation and Oversight by the Reserve Bank

Restrictions on operating a payment system etc. or services

12.—(1) Except for the Reserve Bank acting in its capacity as a system operator, a person shall not establish or operate a payment, clearing and settlement system or service, remittance services including electronic money transfer services, mobile payment services or issue payment instruments without a licence or authorization issued by the Reserve Bank.

(2) The Reserve Bank may, by a written order, prohibit a person from issuing or using any payment instrument, or from operating a payment, clearing or settlement system, if it is of the opinion that—

(*a*) the operation of the payment, clearing or settlement system, issuing or use of the payment instrument, is detrimental to the reliable, safe, efficient and smooth operation of the payment, clearing and settlement systems of Malaŵi, or monetary policy of Malaŵi;

(*b*) the prohibition is in the interest of the general public; or

(*c*) the payment instrument has been issued or the system is operated with intent to defraud the general public.

(3) Subsection (2) shall not be construed as prohibiting the acceptance of money or payment instructions—

(*a*) by any person acting as a duly appointed agent of a person to whom a payment is due;

(*b*) by a company from its subsidiary or by a subsidiary from its parent company, or by one subsidiary from another subsidiary, of the same parent company; or

(*c*) for purposes of effecting a money lending transaction by an agent.

(4) Any person who contravenes subsection (1), commits an offence and shall on conviction, be liable to a fine of K50,000,000 and to imprisonment for seven years.

Application for licences or authorization

13.—(1) An application for licensing or authorization by a payment system operator shall include information on the following—

(*a*) system owners, system participants and a plan for the organization and operation of the payment system, including the distribution of responsibilities between the system operator and individual system participants;

(*b*) the criteria established for direct and indirect participation in the payment system;

(*c*) measures to safeguard technical operations in the event of a payment system failure, including a contingency plan that lays down the disaster recovery arrangements in the event of any operational disruption should the payment system fail to function;

(*d*) measures to mitigate risks in the payment system arising from illiquidity, insolvency or winding-up of a system operator and system participants;

(*e*) the agreements referred to in section 14 (4); and

(*f*) such other requirements as the Reserve Bank may prescribe from time to time.

(2) The Reserve Bank may prescribe more detailed procedures for application for licensing or authorization in directives or guidelines.

14.—(1) A system operator shall have a registered office in Malaŵi.

Licence and authorization requirements

(2) For the purposes of this Act, a system operator may be the Reserve Bank, commercial banks, non-bank financial institutions, mobile payment system operators, remittance service providers, card issuers, or other persons as licensed or authorized by the Reserve Bank.

(3) A system operator shall satisfy the necessary requirements that may be set out by the Reserve Bank from time to time in directives or guidelines.

(4) A system operator shall enter into agreements with individual system participants which shall stipulate their respective responsibilities, rights and obligations.

(5) The Reserve Bank may stipulate more detailed requirements regarding activities, legal form, fit and proper management, capital, risk management, security requirements and such other requirements deemed applicable to a system operator, in directives.

(6) The Reserve Bank may in writing and stating reasons therein, grant exemptions to licensing and authorization requirements for a particular payment system or system operator if the Reserve Bank is satisfied that—

(*a*) the operation of the payment system is in the public interest;

(*b*) the operation of the payment system will not cause undue risk to the payment, clearing and settlement systems of Malaŵi or the monetary policy of Malaŵi; or

(*c*) there are other grounds for exemption as the Reserve Bank may determine:

Provided that the Reserve Bank shall publish a notice of such exemption in the *Gazette* and electronic and print media of nationwide circulation.

Revocation or suspension of authorization or a licence

15.—(1) The Reserve Bank may, by notice in writing to a system operator, withdraw authorization or revoke or suspend a licence if the Reserve Bank has reasonable grounds to believe that the system

operator has contravened any provision of this Act or is managing its payment system in a manner that poses risks to the payment system, other payment system operators, systems participants or to the general public:

Provided that, before withdrawing the authorization or revoking or suspending the licence, the Reserve Bank shall grant the system operator an opportunity to be heard.

(2) In the case of revocation of a licence, the Reserve Bank shall make its decision public by publishing a notice in the *Gazette* and electronic and print media of nationwide circulation.

(3) The Reserve Bank may impose other administrative sanctions as it deems fit, in addition to, or prior to, the revocation or suspension of a licence or withdrawal of authorization as the case may be.

Responsibilities of system operators

16.—(1) A system operator shall implement and operate a payment system in a manner that promotes secure, efficient, effective and coordinated execution of payment services.

(2) A system operator and system participants shall be required to provide information which the Reserve Bank may require for regulatory, oversight and investigative purposes.

(3) A system operator shall submit its system rules to the Reserve Bank for vetting and approval.

(4) An issuer of payment instruments shall ensure that all payment instruments issued contain minimum security features as prescribed by the Reserve Bank or comply with prevailing international standards and best practices.

Actions requiring prior approval of the Reserve Bank

17. A system operator shall seek prior approval of the Reserve Bank before making any changes to its ownership, management personnel and structure, system operations and any other changes or actions as may be determined by the Reserve Bank.

Investigative powers of the Reserve Bank

18.—(1) The Reserve Bank shall have powers to investigate a matter where it has reasonable grounds to believe that—

(*a*) an offence under this Act has been, or may have been committed;

(*b*) a system operator or system participant is not complying with, or has not complied with, this Act or any other relevant law; or

(*c*) a system operator or system participant has been involved in financial crime.

(2) Notwithstanding anything to the contrary provided by any written law for the time being in force, all information relating to the commission of an offence under this Act shall be recorded in writing by an officer, employee or any appointee of the Reserve Bank or police officer investigating the matter.

(3) Investigation of offences committed under this Act may be carried out by an officer, employee or any appointee of the Reserve Bank.

(4) Any person who causes or attempts to cause obstruction to an investigation into any matter conducted by an officer, commits an offence and, shall on conviction, be liable to pay a fine of K20,000,000 and to imprisonment for four years.

Requirements for participation in, and operation of a settlement system

19.—(1) The Reserve Bank shall set minimum requirements for participants in settlement systems that the Reserve Bank establishes, operates or controls.

(2) The Reserve Bank shall stipulate specific requirements in the form of directives, directions, guidelines or circulars regarding the activities and security requirements applicable to settlement agents other than the Reserve Bank.

PART IV

Protection of Settlement Systems

Discharge of settlement obligations

20. A settlement system operator shall discharge obligations between settlement participants by means of entries passed through accounts of settlement participants held with the settlement system operator.

Finality and irrevocability of settlements

21.—(1) A settlement that has been effected in accordance with section 20, shall be final, unconditional and irrevocable.

(2) Notwithstanding the provisions of any other written law, no settlement which has been finally and irrevocably effected in terms of this section or any payment instruction entered into a settlement system before commencement of any winding-up proceedings, shall be reversed, netted or set aside.

(3) Any entry or a payment out of the settlement account of a participant held at the Reserve Bank, or a settlement agent to settle a payment obligation in a settlement system shall not be the subject of any provision that operates as a stay of that activity.

(4) For the avoidance of doubt, the finality provisions of this Act derogate from the general insolvency rules contained in any other written law.

Winding-up of a system participant on application by a person other than the Reserve Bank Cap. 46:03

22.—(1) An application to court for an order to wind-up a system participant under the Companies Act shall not be made except with prior notification of twenty-one days to the Reserve Bank.

(2) Where a system participant is wound up on application by a person other than the Reserve Bank, a copy of—

(*a*) the application for winding-up when it is made; and

(*b*) the subsequent winding-up order which shall record the minute, hour and day that such order is made,

shall be lodged by the applicant, with the Reserve Bank on the same business day, and in any case, not later than the start of the next business day, and served on any other settlement agent that requires notification and the Reserve Bank shall immediately notify all relevant domestic and foreign system operators of the winding-up proceedings.

(3) The relevant settlement system operator shall enforce the winding-up order immediately upon being notified by the Reserve Bank of the order lodged with the Reserve Bank under subsection (1).

Winding-up of a system participant by the Registrar Cap. 44:01 Cap. 44:05

23.—(1) Where a system participant is wound up on application by the Registrar under the Banking Act, or the Financial Services Act, the winding-up order shall state the minute, the hour and the date on which the order is made and the Reserve Bank shall, on the same business day and in any case, not later than the start of the next business day—

(*a*) serve the order on the system participant concerned;

(*b*) notify other system participants or agents required to be notified; and

(*c*) notify all relevant domestic or foreign system operators.

(2) The relevant settlement system operator shall enforce the winding-up order immediately upon being notified by the Reserve Bank of the order lodged with the Reserve Bank under subsection (1).

Voluntary winding-up of a system participant Cap. 44:01 Cap. 44:05 Cap. 46:03

24.—(1) Subject to the provisions of the Banking Act, the Financial Services Act, or the Companies Act, where a system participant is voluntarily wound up, that system participant shall inform all other system participants of the winding-up resolution within twenty-four hours of the winding-up resolution taking effect:

Provided that the resolution, demand or other step to wind-up a system participant or system operator shall have no effect unless approved by the Reserve Bank.

(2) The Reserve Bank shall notify relevant domestic and foreign system operators and system participants about the voluntary winding-up of a system participant on the same business day and in any case, not later than the start of the next business day of the winding-up resolution taking effect.

Irrevocability and finality of settlements prior to lodging of winding-up order
Cap. 44:01
Cap. 44:05
Cap. 46:03
Cap. 11:01

25. Notwithstanding the provisions of the Banking Act, the Financial Services Act, the Companies Act, the Insolvency Act and any other written law of Malaŵi, where a system participant is wound up, the relevant winding-up order or resolution shall not affect any settlement that has become final and irrevocable under this part prior to—

(*a*) the lodging of the copy of such order with the Reserve Bank under section 22;

(*b*) the Reserve Bank informing the settlement system operator of the winding-up order under section 22; or

(*c*) the winding-up resolution taking effect as provided under section 23.

Cessation of participation in clearing and payment systems

26. Any clearing or system participant in respect of whom a winding-up order has been effected in terms of sections 22, 23 or 24, shall cease to participate in any clearing or settlement system.

Passing of settlement transactions subsequent to winding-up proceedings

27.—(1) A settlement system operator shall have authority to credit and debit the settlement accounts of a system participant subsequent to a winding-up order for purposes of—

(*a*) discharging outstanding payments or settlement obligations;

(*b*) making use of a credit line; or

(*c*) realizing collateral provided, in order to enable settlement in accordance with the rules and practices of the clearing, netting and settlement agreements to which that system participant was a party.

Cap. 44:05
Cap. 11:01

(2) With the exception of prudentially regulated financial institutions as defined in the Financial Services Act, the Insolvency Act shall apply to winding-up proceedings of system participants.

Restrictions against attachments, garnishee proceedings or seizures

28. A settlement account of any system participant shall not be liable to attachments, garnishee proceedings or seizures.

PART V

Netting and Financial Collateral Arrangements

Obligations under netting agreements, arrangements and rules

29.—(1) A clearing or settlement system shall have netting agreements which shall stipulate the rights and obligations of participants and the system operator.

(2) Where a clearing or system participant is wound up or placed under receivership or statutory management, any arrangement or provision contained in a written netting agreement to which such a system participant is a party, or any netting rules and practices applicable to such a system participant, shall be binding on the liquidator, receiver or statutory manager appointed as the case may be, in respect of any payment or settlement obligation—

(*a*) which has been determined through netting prior to the issue of a winding-up order, receivership order or appointment of the statutory manager as the case may be;

(*b*) which is to be discharged on or after the date of the winding-up order, receivership order or appointment of the statutory manager as the case may be; or

(*c*) the discharge of which was overdue on the date of the winding-up order, receivership order or the appointment of the statutory manager as the case may be.

Recognition of financial collateral arrangements

30.—(1) A clearing or settlement system may, in its rules and procedures, have financial collateral arrangements whose value may be realized for the satisfaction of outstanding rights and settlement obligations within the system.

(2) The financial collateral to be provided shall be either in cash, Malaŵi Government Treasury Bills, Reserve Bank of Malaŵi Treasury Bills or any other assets as determined by the Reserve Bank from time to time.

(3) A system participant shall not provide as collateral security in relation to its operations within a payment system, assets which are subject to a security interest or any other encumbrance in favour of a third party, without obtaining the prior release or waiver from the third party.

(4) The Reserve Bank may issue directives or guidelines pertaining to financial collateral arrangements in a particular payment system.

Utilization of collateral

31. Notwithstanding the provisions of any other written law, any asset of a clearing or system participant which the clearing or

settlement system participant, prior to the issue of a winding-up order, provided to—

(*a*) the Reserve Bank as security for a loan, or otherwise as security in respect of its settlement obligations; or

(*b*) a clearing or settlement system in form of a written agreement as security in respect of its payment obligations,

may be utilized by the Reserve Bank or the relevant clearing or settlement system operator to the extent required for the discharge of such settlement obligations or payment obligations as the case may be.

PART VI

Truncation, Imaging and Electronic Entries

Truncation and imaging Cap. 48:02

32.—(1) Notwithstanding any provisions to the contrary in the Bills of Exchange Act, a bank may request payment of a cheque or other payment instrument from another bank on which it is drawn by notifying the other bank of the essential features of the cheque or payment instrument essential features electronically, instead of presenting the cheque or other payment instrument physically.

(2) Where a bank notifies another bank electronically of the essential features of a cheque or other payment instrument, the paying and collecting bank shall be subject to the same duties in relation to the collection and payment of the cheque or other payment instrument as if the cheque or other payment instrument had been presented for payment physically.

Admissibility of photographic images of payment instruments and electronic entries

33.—(1) Photographic images of original cheques or other payment instruments shall be admissible in any court as *prima facie* evidence of the matters, and or transactions of the original instrument, through proof provided by an affidavit that attests to their existence.

(2) The electronic entries in books of accounts of any system operator or system participant shall be *prima facie* evidence in court of matters, transactions and accounts therein recorded—

(*a*) through proof provided by affidavits of at least two executive officers of the clearing or system participant; or

(*b*) by evidence showing that—

(i) such entries are, or have been the ordinary books of accounts of the payment system participant;

(ii) the said entries have been made in the usual and ordinary course of business; and

(iii) such books of accounts are in, or come immediately from, custody or control of the clearing or system participant.

Right of a bank to request original payment instrument or image thereof

34.—(1) Subject to section 32, where a paying bank has reason to believe that a cheque or payment instrument is fraudulent, it may request the collecting bank to provide to the paying bank, the original payment instrument or a legible image thereof.

(2) The paying bank shall, within two business days of the receipt of the original payment instrument, or a legible image thereof, determine and advise the collecting bank of its acceptance or non-acceptance of the cheque or other payment instrument.

(3) A request made under subsection (1) for the presentment of a cheque, other payment instrument, or a legible image thereof, shall not constitute dishonour of that payment instrument.

PART VII

Dispute Resolution

Dispute resolution

35.—(1) Any dispute arising in payment systems shall be settled in accordance with this section.

(2) Any person who is aggrieved by the operation of a payment system shall submit a written statement setting out full particulars of the grievance to the party to which the grievance relates, and the parties shall attempt to settle the matter by conciliation within seven business days.

(3) If the parties are unable to settle the matter as contemplated in subsection (2), they shall attempt to settle the matter within a further period of ten business days through mediation whereby—

(*a*) the parties shall agree on a mediator;

(*b*) the mediator shall familiarize himself with the parties' respective contentions;

(*c*) the mediator and all parties shall discuss the matter at one or more meetings attended by all of them and attempt to settle the matter by consensus; and

(*d*) the parties shall share the mediator's costs equally between them.

(4) If the parties are unable to settle the matter by conciliation under subsection (2), or by mediation under subsection (3), the matter may be referred to arbitration by a single arbitrator, and where the parties fail to agree on an arbitrator, the parties shall notify the President of the Malaŵi Law Society who then shall appoint an arbitrator on their behalf.

(5) The arbitrator referred to in subsection (4) shall, as far as possible, be a person appointed on account of his or her knowledge of the law and payment systems.

(6) The UNCITRAL Arbitration Rules of 2010 or other subsequent version that the parties may agree on, shall apply to arbitration proceedings done pursuant to this section.

(7) The arbitrator shall reach his decision in the matter within one month after his appointment, unless the parties agree to an extension of that period.

(8) A decision of the arbitrator shall be final and binding on the parties.

PART VIII

Miscellaneous

Access to information

36.—(1) A system operator, system participant and issuer of payment instruments shall provide information which the Reserve Bank considers necessary to ensure that the payment system is organized and operated in accordance with this Act.

(2) A system operator or system participant in possession of information referred to in subsection (1), shall provide such information to the Reserve Bank at any time and in such form as the Reserve Bank may request from the system operator or system participant, in writing.

(3) A system operator or system participant who contravenes subsection (1) commits an offence and, on conviction, shall be liable to a fine of K20,000,000 and to imprisonment for four years.

Confidentiality of information

37. Any information obtained by the Reserve Bank under section 36 (1) which relates to a specific system operator, system participant or issuer of payment instruments, shall be confidential and shall not be disclosed by any officer to any person.

Use of confidential information for personal gain

38. An officer or a member or employee of a licensed payment system, who, for his personal advantage or the advantage of another person, makes use of any information which relates to the affairs of a particular system operator or system participant, acquired in the performance of their duties under this Act, commits an offence and shall on conviction, be liable to a fine of K50,000,000 and to imprisonment for seven years.

Conditions for disclosure of information

39. Section 38 shall not apply—

(*a*) if the information is disclosed to a relevant regulatory authority;

(*b*) to any disclosure made by a person concerned in the performance of their functions under this Act or under the rules of any licensed settlement system, or when required to do so by a court of law or in terms of any other written law;

(*c*) to the disclosure of information that is generally known to members of the public or a substantial section of the public; or

(*d*) if, in the opinion of the Reserve Bank, disclosure is necessary and in the interest of the public to protect the integrity, effectiveness or security of payment systems in Malaŵi.

Indemnity of officers and other officials

40. Any act or matter done by any officer or by any other person in the exercise or performance or purported exercise or performance, in good faith, of any power or function under this Act, shall not give rise to any action, claim, liability, suit or demand against the officer or person concerned.

Retention of records

41.—(1) Notwithstanding anything to the contrary contained in any law relating to the retention of records, the Reserve Bank, payment system operators, system participants and issuers of payment instruments shall retain all records obtained or generated by them during the course of the operation and administration of the payment system for a minimum period of seven years as from the date of each particular record.

(2) The retention of any record in terms of subsection (1) may be effected electronically.

Penalties

42.—(1) Any person who—

(*a*) contravenes a provision of this Act for which no penalty is specifically provided; or

(*b*) fails to comply with any direction given under this Act,

commits an offence and on conviction, shall be liable to a fine of K10,000,000 and to imprisonment for two years.

(2) Where an offence is committed by a body corporate each director, employee or agent of the body corporate shall also be liable to the same penalty in subsection (1) unless it is established that the director, employee or agent took unreasonable applications and exercise due diligence to avoid the commission of the offence.

Regulations

43.—(1) The Minister may, on the recommendation of the Reserve Bank, make regulations for the better carrying out of the provisions of this Act.

(2) The regulations made under subsection (1) may provide for offences with respect to acts done or carried out wholly in or outside Malaŵi or partly in or partly outside Malaŵi.

Cap. 1:01

(3) Notwithstanding section 21 (*e*) of the General Interpretation Act, the regulations made pursuant to this section may create offences in respect of any contravention to the regulations, and may for any such contravention, prescribe penalties up to K10,000,000 and to imprisonment for a period of up to two years.

PART IX

Transitional Arrangements

Transitional arrangements

44.—(1) Any person who, immediately before the commencement of this Act, was—

(*a*) operating a system for—

(i) the clearing of payment instructions; or

(ii) the netting or settlement of obligations arising from the clearing of payment instructions; or

(*b*) issuing payment instrument; or

(*c*) conducting the business of payment service provider,

may continue to operate the system or issue the payment instrument or conduct the business of payment service provider for six months after the commencement of this Act, even if the system of the payment instrument has not been licenced or authorized by the Reserve Bank under this Act and shall, within six months of the commencement of this Act, apply to the Reserve Bank for a licence or authorization to operate such systems in accordance with this Act.

(2) Notwithstanding subsection (1), from the commencement of this Act, the Reserve Bank may, by directives, stipulate terms and conditions or requirements for the operation of payment systems including periods within which, such terms and conditions or requirements are to be complied with by system operators.

ELECTRONIC TRANSACTIONS AND CYBER SECURITY

33 of 2016
G.N. 25/2017

An Act to make provision for electronic transactions; for the establishment and functions of the Malaŵi Computer Emergency Response Team (MCERT); to make provision for criminalizing offences related to computer systems and information communication technologies; and provide for investigation, collection and use of electronic evidence; and for matters connected therewith and incidental thereto

[1st June, 2017]

PART I

Preliminary Provisions

Short title

1. This Act may be cited as the Electronic Transactions and Cyber Security Act.

Interpretation

2. In this Act, unless the context otherwise requires—

"Authority" means the Malaŵi Communications Regulatory Authority established under section 3 of the Communications Act; Cap. 68:01

"CCTLD" means the Country Code Top Level Domain which is at the top level of the internet domain name, system assigned according to the two letter codes in the international standards ISO3166–1 by ICANN;

"certification authority" means a trusted third party organization or company licensed or authorized by the Authority to issue digital certificates used to create digital signatures and public-private key pairs;

"child pornography" means visual and pornographic material that depicts, presents or represents a person under the age of eighteen

engaged in sexually explicit conduct or an image representing a person under the age of eighteen engaged in sexually explicit conduct;

"comparative advertising" means any advertising winch explicitly or impliedly identifies a competitor, or goods or services offered by a competitor;

"computer system" means a device or a group of interconnected or related devices, one or more of which performs automatic processing of data pursuant to a program;

"consumer" means any person who enters or intends to enter into a contract by electronic means with a supplier as the end-user of the goods or services offered by the supplier and acts, for that purpose, outside his trade, business or profession;

"content provider" means a person or organization who supplies information for use on a website or an electronic media platform;

"critical data" means data which is declared by the Minister in accordance with this Act, to be of importance to the protection of national security of the Republic or the economic and socio well being of its citizens;

"cryptography" means the method of storing and transmitting data by transferring it into unreadable format so that only those for whom it is intended can process and read it;

"cyber inspector" means a person appointed as such under section 69;

"data" means electronic presentation of information in any form;

"data controller" means a person who, acting either alone or in common with other persons, determines the purpose for which, and the manner in which, any personal data is processed, or is to be processed and thus, controls and is responsible for the keeping and using of personal data, and the term includes a person who collects, processes or stores personal data;

"data subject" means a person from whom data relating to that person is collected, processed or stored by a data controller;

"digital certificate" means an electronic document to prove ownership of a public key, and certificate includes information about the key owners' identity and the digital signature of an entity that has verified the certificates contents are correct;

"digital signature" means an electronic signature consisting of a transformation of an electronic message using an asymmetric crypto system and a hash function such that a person having the

initial and transformed electronic message and the signatory's public key can accurately determine—

(*a*) whether the transformation was created using the private key that corresponds with the signatory's public key; and

(*b*) whether the initial electronic message is as it was after the transformation was made;

"digital signature certificate" means a record which is issued by the Authority for the purpose of supporting a digital signature;

"distance contract" means any contract concluded between a supplier and a consumer under an organized remote sales or service-provision scheme run by the supplier, who, for the purpose of that contract, makes exclusive use of one or more electronic means up to and including the time at which the contract is concluded;

"domain name" means an alphanumeric designation that is registered or assigned in respect of an electronic address or other resources on the internet;

"e-government service" means a public service provided by electronic means;

"electronic commerce" means any economic activity provided by electronic means, including remote services and products, particularly services that consist of providing online information, commercial communications, research tools, or access to, or downloading of, online data, access to a communication network or the hosting of information;

"electronic message" means any communication created, sent, received or stored by electronic communication means, such as computerized data exchange system, electronic mail system and instant messaging;

"electronic record" means a record created, generated, sent, communicated, received and maintained by electronic means;

"electronic signature" means data attached to, incorporated in, or logically associated with, other data and which is intended by the user to serve as a signature;

"encryption" means a method of transforming signals or messages in a systematic way so that the signal would be unintelligible without a suitable receiving apparatus;

"financial services" has the meaning ascribed to the term under section 2 of the Financial Services Act; Cap. 44:05

"financial services law" has the meaning ascribed to the term under section 2 of the Financial Services Act; Cap. 44:05

"ICANN" means Internet Corporation for Assigned Name and Numbers;

"information system" means a system for generating, sending, receiving, storing, displaying or otherwise processing electronic messages, including internet;

"intermediary service provider" means any person or entity that provides electronic communications services consisting of the provision of access to communications networks, storage, hosting or transmission of information through communication networks;

"internet" means the interconnected system of networks that connects computers around the world using Transmission Control Protocol/Internet Protocol (TCP/IP) or other protocols, and includes future versions thereof;

"Internet Service Provider (ISP)" means a company that provides access to the internet and other related services such as website building and virtual hosting to individuals or other companies;

"key" means a piece of information that determines the functional output of a cryptographic algorithm;

"key pair" means a pair of keys used for cryptography;

"Malaŵi CERT" means the Malaŵi Computer Emergency Response Team established under section 6;

"misleading advertising" means any advertising which in any way, including its presentation, deceives or is likely to deceive a person to whom it is addressed or whom it reaches and which, by reason of its deceptive nature, is likely to affect his economic behaviour or which, for those reasons, injures or is likely to injure a competitor's economic or business interests;

"online public communication" means any transmission of digital data, signs, signals, texts, images, sounds or messages, of whatever nature, that are not private correspondence, by electronic communication means that enable a reciprocal exchange of information between an issuer and a receiver;

"opt-in" means a system where a consumer gives consent to an electronic communication service provider to receive any other communication;

"open standard" means any protocol for communication, interconnexion or exchange and any format of interoperable data

whose technical specifications are public and the access or use thereto is not restricted;

"personal data" means any information relating to an individual who—

(*a*) may be directly identified; or

(*b*) if not directly identified, may be identifiable by reference to an identification number or one or several elements related to his physical, physiological, genetic, psychological, cultural, social, or economic identity;

"place of business" means a place where a person has established, in a stable and lasting way, his activity whatever it is, and as regards a legal person, the place where its registered office is located or where it has its principal activity;

"pornography" means visual material that depicts images of a person engaged in sexually suggestive or explicit conduct;

"private key" means the key of a pair of an isometric crystal system used to create a digital signature by a holder of the digital signature which is exclusively known by the holder and is not made available to anyone;

"processing of data" means any operation or set of operations which is performed upon data, whether or not by automatic means, such as collection, recording, organization, storage, adaptation or alteration, retrieval, consultation, use, disclosure by transmission, dissemination or otherwise making available, alignment or combination, blocking, erasure or destruction;

"public key" means a key of a pair of an isometric crystal system used to verify a digital signature that the holder of a digital signature makes available to the public or intended recipients;

"recipient" means a person to whom a sender intends to send an electronic communication, but does not include an intermediary for that communication;

"record" means recorded information, in any form, including data in computer systems, created or received and maintained by a public body in the course of official duties and kept as evidence of such activity;

"record keeping" means making and maintaining a complete, accurate and reliable evidence of official formalities in the form of recorded information;

"Registrar" means an entity designated by the Authority to manage and maintain the reservation of domain names and domain name registry;

"registry" means a central place where domain names are kept and maintained in an organized way;

"sender" means a person by whom, in whose name, or on whose behalf an electronic communication is sent or created before being stored, where necessary, but does not include an intermediary for that communication;

"signatory" means a person who holds a digital signature creation device and acts either on his own behalf or on behalf of a person he represents;

"subscriber" means a person who agrees to receive or be allowed to access electronic texts or services by subscription;

"supplier" means a person or entity that is the source for goods or services;

"Transmission Control Protocol/Internet Protocol (TCP/IP)" means a system of digital rules for data exchange within or between computers; and

"virus" means a malicious program or script that negatively affects the functioning of a computer by creating files, moving files, erasing files or consuming computer memory, causing the computer not to function properly.

Objectives

3. The objectives of this Act are—

(*a*) to set up a responsive information and communication technology legal framework that shall facilitate competition, development of information and communication technology and the participation of Malaŵi in the information age and economy and in particular—

(i) to ensure that the development, deployment and exploitation of information and communication technology within the economy and society and related legal provisions shall balance as well as protect community and individual interests, including privacy and data protection issues;

(ii) to address ethical issues in the use of information and communication technology in order to protect the rights of children and the under-privileged;

(iii) in liaison with the Malaŵi Revenue Authority, to create a legal framework for favourable tax policies that promote

information and communication technology products and services that originate from within Malaŵi; and

(iv) to provide a responsive and efficient regulatory environment, promote economic subsectors, asset accumulation and tax activities that arise from the use of information and communication technology;

(*b*) to ensure that information and communication technology users are protected from undesirable impacts of information and communication technology, including the spread of pornographic material, cybercrime and digital fraud; and

(*c*) to put in place mechanisms that safeguard information and communication technology users from fraud, breach of privacy, misuse of information and immoral behaviour brought by the use of information and communication technology.

Principles

4. The following principles shall, at all times, be adhered to in the implementation and application of this Act—

(*a*) e-transactions shall benefit from a secure legal framework that recognizes the legal value of electronic transactions and electronic documents;

(*b*) freedom of communication over electronic networks shall be promoted, with the exception of specific reasons as provided for in this Act;

(*c*) there shall be clear and fair specification of responsibilities of intermediaries and editors; and

(*d*) consumer's rights shall be respected, protected and upheld.

Implementation of this Act

5. Unless otherwise provided in this Act, the Authority shall be responsible for the implementation of this Act.

PART II

Administration

Establishment of the Malaŵi CERT

6.—(1) There is hereby established the Malaŵi CERT which shall be a unit under the Authority.

(2) The Malaŵi CERT shall take charge of its information infrastructure protection actions and serve as a base for national coordination to respond to information and communication technology security threats.

(3) The Authority shall ensure that the Malaŵi CERT is capable of providing reactive and proactive services, communicating timely

information on recent relevant threats and, whenever necessary, bringing its assistance to bear for response to incidents.

(4) The Authority shall ensure that the Malaŵi CERT executes the following minimum services—

(*a*) reactive services, early warning and precaution notice, incidents processing, incidents analysis, incident response facility, incidents response coordination, incident response on the web, vulnerability treatment, vulnerability analysis, vulnerability response and vulnerability response coordination;

(*b*) proactive services, public notice, technological surveillance, security audit and assessment, security installations and maintenance, security tools development, intrusion detection services and security information dissemination;

(*c*) artefacts treatment, artefacts analysis, response to artefacts, coordination of response to artefacts, risk analysis, continuation and resumption of activities after disaster, security consultation and sensitization campaign, education or training and product appraisal or certification; and

(*d*) do anything incidental to the functions of Malaŵi CERT.

PART III

Formation and Validity of Electronic Transactions

Recognition of electronic writing

7. Notwithstanding the contrary intention of any written law, where a law requires that certain information or any other matter be in writing, typewritten or printed form, the requirement shall be satisfied if the information or the matter is—

(*a*) rendered or made available in an electronic form;

(*b*) accessible; and

(*c*) capable of being retained for a subsequent reference.

Electronic signature

8.—(1) Where a law requires a document to be signed, an electronic form of the document shall satisfy the requirement if an electronic signature is used.

(2) An electronic signature shall be authentic if—

(*a*) the means of creating the electronic signature is, within the context in which it is used, linked to the signatory and not any other person;

(*b*) the means of creating the electronic signature, was at the time of signing, under the control of the signatory and not any

other person and was done without duress and undue influence; and

(*c*) any alteration made to the electronic signature after signing is detectable.

(3) Subsection (2) does not limit the right of a person—

(*a*) to prove the authenticity of an electronic signature in any other lawful way; or

(*b*) to adduce evidence in respect of non-authenticity of an electronic signature.

Equal treatment of electronic signature

9. Except as otherwise provided for in this Act, the provisions of this Act shall not exclude, restrict or affect the legality of any method of creating an electronic signature which—

(*a*) satisfies the requirements of this Act;

(*b*) meets the requirements of other statutory provision; or

(*c*) is provided for under a contract.

Conduct of a person relying on a digital signature

10. A person may sign an electronic record by affixing a personal digital signature or using any other recognized, secure and verifiable mode of signing agreed by parties or recognized by a particular industry to be safe, reliable and acceptable.

Bearing legal consequences of relying on electronic signature

11. A person who relies on a digital signature shall bear the legal consequences of failure to—

(*a*) take reasonable steps to verify the authenticity of the digital signature; or

(*b*) take reasonable steps where a digital signature is supported by a certificate, to—

(i) verify the validity of the certificate; or

(ii) observe any limitation with respect to the certificate.

Recognition of digital signature certificates and digital signatures

12.—(1) Unless otherwise prescribed by law, a person may decide the use of a digital signature, digital signature certificate or any other mode of authentication, of his choice.

(2) The Authority may, by notice published in the *Gazette,* approve digital signatures, certification authorities offering digital certificates, or authentication of a foreign information security service provider, for use by the public.

(3) The Authority shall ensure that digital certificates comply with international best practices and standards.

(4) A certification authority shall be liable for damages incurred by any person who reasonably relied on a digital certificate issued by the certification authority if—

(*a*) all or part of the information contained in the digital certificate on the date of issuance was incorrect;

(*b*) all or part of the data required for the digital certificate to be regarded as qualified were incomplete;

(*c*) the digital certificate has been issued without checking that the signatory is duly entitled to receive such digital certificate; or

(*d*) the certification authority has not registered the revocation of the digital certificate or has not made this information available to third parties or both.

(5) A certification authority shall not be responsible for damage caused by the use of a digital certificate that exceeds fixed limits on the use or the value of transactions for which the digital certificate has been used, if this condition has been made available to the users prior to the use of the certificate.

Notarization, acknowledgement and certification

13.—(1) Where a law requires a signature, statement or document to be notarized, acknowledged, verified or made under oath, that requirement shall be satisfied if the electronic signature of the person authorized to perform those acts is affixed to an electronic record.

(2) Where a law requires or permits a person to provide a certified copy of a document and the document exists in paper or in another physical form, that requirement shall be satisfied if an electronic copy of the document is certified to be a true copy by using an electronic signature of the certifying person.

Other requirements

14.—(1) A requirement in any written law for multiple copies of a document to be submitted to a single recipient at the same time shall be satisfied by the submission of a single electronic record of such document that is capable of being reproduced by the recipient.

(2) Where a corporate seal is required to be affixed to a document, the requirement shall be satisfied if the electronic signature of the corporate body is affixed to the electronic record in accordance with the provisions relating to the use of the corporate seal.

Determination of originality of an electronic message

15.—(1) Where any written law requires information to be presented or retained in its original form, the requirement shall be satisfied by an electronic record if—

(*a*) there is reliable assurance of the integrity of the electronic record; and

(*b*) the electronic record is capable of being displayed to the person to whom it is to be presented.

(2) For the purposes of this section—

(*a*) criteria for assessing integrity of information shall be whether it has remained complete and unaltered, save from the addition of any endorsement and of any change which may arise in the normal course of communication, storage and display; and

(*b*) the standard of reliability required shall be assessed in the light of the purpose for which the information was created and in the light of all the circumstances thereof.

Admissibility and evidential weight of electronic messages

16.—(1) An electronic message shall be admissible as evidence in court proceedings as provided for in this Act.

(2) In assessing the evidential weight of an electronic message, the court shall have regard to the following—

(*a*) the reliability of the manner in which the electronic record was generated, displayed, stored or communicated;

(*b*) the reliability of the manner in which the integrity of the information was maintained;

(*c*) the manner in which the originator of the electronic message was identified; and

(*d*) any other facts that the court may consider relevant.

Storage of electronic messages

17.—(1) Where any written law requires that a document, record or information shall be retained, that requirement shall be satisfied if the document, record or information is held in electronic form, and—

(*a*) is accessible;

(*b*) is capable of retention for subsequent reference;

(*c*) is retained in the format in which it was generated, sent or received, or in a format which can be demonstrated to represent accurately the information generated, sent or received; and

(*d*) is retained to enable the identification of the origin and destination of the electronic record and the date and time when it was sent or received.

(2) A document, record or information referred to in subsection (1) shall be kept in electronic form for at least seven years.

(3) The obligation to retain a document, record or information under this section shall not extend to information whose purpose is only to enable the message to be sent or received.

(4) The provisions of this section may be satisfied by the use of services of another party as long as all the provisions of the section are complied with.

Secure electronic record

18.—(1) Where a security procedure has been applied to an electronic record at a specific point in time, the record shall be a secure electronic record from the time the security procedure has been applied.

(2) An unauthorized alteration of a security procedure shall render the record invalid.

(3) An alteration shall be unauthorized if it is done by a person without the lawful authority of the person who originally applied a security procedure.

Validity of a contract executed in electronic form

19. Validity of a contract shall not be affected by the sole reason that it is executed in electronic form, if the contract has fulfilled all other requirements for formation of such type of contract.

Time and place of dispatch and receipt of an electronic message

20.—(1) Unless otherwise agreed by the parties, the dispatch of an electronic message shall occur when such message leaves an information system under the control of the sender or an agent of the sender.

(2) Unless otherwise agreed by the parties, receipt of an electronic message shall occur—

(*a*) where the recipient has designated an information system for the purpose of receiving the electronic message, when the electronic message has entered the designated information system; or

(*b*) where the recipient has not designated an information system, when the electronic message enters an information system through which the recipient retrieves the electronic message.

(3) Unless otherwise agreed by the parties, an electronic message shall be dispatched at the sender's registered place of business and shall be received at the recipient's registered place of business.

(4) Where a sender or recipient has more than one registered place of business, his retained place of business shall be the one having the closest link with his underlying operation or, in the absence of such underlying operation, with the principal place of business.

(5) If a sender or recipient does not have a place of business, the place of usual domicile shall be taken into consideration.

(6) The provisions of this section shall apply even though the information system supporting the electronic address of the recipient

differs from the place where an electronic message is considered to be received under this section.

Offer and acceptance

21.—(1) Unless otherwise agreed by the parties, an offer and acceptance of the offer may be wholly or partly expressed by electronic means.

(2) A contract concluded between parties by means of electronic messages shall be concluded at the time when, and place where, the acceptance of the offer was received by the recipient:

Provided that parties may agree that the contract was concluded at the place of residence of one party or the place of location of the legal entity, who accepted the offer.

Attribution of electronic messages to sender

22.—(1) An electronic message shall be considered to be that of the sender, if it was sent—

(*a*) by the sender personally;

(*b*) by an agent of the sender; or

(*c*) by an information system programmed by the sender or on behalf of the sender to send electronic messages automatically.

(2) The recipient of an electronic message shall justifiably consider that the electronic message came from the sender and act accordingly if—

(*a*) the recipient properly applied a procedure previously agreed with the sender for this purpose; or

(*b*) the electronic messages received by the recipient results from the actions of a person whose relationship with the sender or with an agent of the sender, enabled the recipient to gain access to a method used by the sender to identify an electronic message as that of the sender.

(3) Where parties have not agreed on a procedure of ascertaining the sender of an electronic message, the sender shall be presumed to be the person who objectively appears to be the sender.

(4) The presumption in subsection (3) shall not apply in the following circumstances—

(*a*) where a recipient of an electronic message was timely notified by the sender that an electronic message did not emanate from the sender;

(*b*) where a recipient of an electronic message has received notice from the sender that the electronic message was issued without the knowledge or consent of the sender;

(*c*) where a recipient of an electronic message knew or should have reasonably known, if he had used an agreed procedure that the electronic message did not come from the sender, or that the person who sent the electronic message did not have the authority of the sender to issue or send the electronic message; or

(*d*) the recipient of an electronic message knew or should have reasonably known that the electronic message resulted from a transmission error.

(5) A recipient of an electronic message shall be entitled to consider each electronic message received as a separate electronic message and act accordingly, unless it duplicates another electronic message which the recipient knew or should have known after taking reasonable steps or complying with an agreed procedure that the electronic message was a duplicate.

Acknowledgement of receipt of an electronic message

23.—(1) Where acknowledgment of an electronic message is required, a sender of the message shall indicate this requirement to the recipient of the message on or before sending the message.

(2) Where a sender of an electronic message has not specified a particular form of acknowledgement, the recipient may apply one of the following methods—

(*a*) any communication by automated means or any other means, which originated from the recipient; or

(*b*) any act of the recipient, reasonably sufficient to notify the sender that the electronic message was received.

(3) Where a sender of an electronic message states that an electronic message shall be valid on receipt of acknowledgement by the recipient, the electronic message shall not be considered as sent until the acknowledgement is received.

(4) Where a sender of an electronic message receives a recipient's acknowledgement of receipt of the message, it shall be presumed that the message has reached the recipient, but this presumption shall not mean that the electronic message corresponds to the message received.

(5) Where a party has not indicated that the communication of the electronic message is conditional on receipt of an electronic message, and acknowledgement has not been received by the recipient within the time specified or agreed, or if no time has been specified or agreed, within a reasonable time—

(*a*) the sender of the electronic message may notify the recipient that no acknowledgement has been received and specify

a reasonable time by which the acknowledgement shall be received; and

(*b*) if the acknowledgement of receipt is not received within the specified period stipulated in paragraph (*a*), the sender of the electronic message may, upon notice to the recipient, treat the electronic message as though it has never been sent, or exercise any other right that the sender may have.

(6) Where an acknowledgement of receipt indicates that an electronic message complies with the technical conditions, prescribed either by an agreement or by applicable law, these conditions shall be deemed to be fulfilled.

(7) Except insofar as it relates to the sending or receipt of an electronic message, this section shall not affect the legal consequences that may flow either from that message or from the acknowledgement of its receipt.

PART IV

Liability of Online Intermediaries and Content Editors and Protection of Online Users

Freedom of communication and its limitations

24.—(1) Subject to this Act, there shall be no limitations to online public communication.

(2) Notwithstanding the provisions of subsection (1), online public communication may be restricted in order to—

(*a*) prohibit child pornography;

(*b*) prohibit incitement on racial hatred, xenophobia or violence;

(*c*) prohibit justification for crimes against humanity;

(*d*) promote human dignity and pluralism in the expression of thoughts and opinions;

(*e*) protect public order and national security;

(*f*) facilitate technical restriction to conditional access to online communication; and

(*g*) enhance compliance with the requirements of any other written law.

Liability of an intermediary service provider

25.—(1) An intermediary service provider shall not be liable in any civil or criminal proceedings for any information contained in an electronic message in respect of which he provides services, if the intermediary service provider—

(*a*) has not initiated the transmission of the message;

(*b*) has no actual knowledge of the act or omission that gives rise to the civil or criminal liability as the case may be, in respect of the message; and

(*c*) has no knowledge of any facts or circumstances from which the likelihood of such civil or criminal liability ought reasonably to have been known.

(2) Nothing in this section shall be construed as—

(*a*) requiring an intermediary to monitor any information contained in any electronic message, in order to establish knowledge of any act, omission, fact, or circumstance giving rise to civil or criminal liability or imputing knowledge of such liability; or

(*b*) relieving an intermediary from complying with any law, court order, ministerial direction, or contractual obligation in respect of an electronic message.

(3) If in relation to information contained in an electronic message in respect of which an intermediary service provider renders his services, the intermediary service provider has—

(*a*) actual knowledge of the act or omission that gives rise to civil or criminal liability, as the case may be, in respect of the message; or

(*b*) knowledge of any fact or circumstance from which the likelihood of such civil or criminal liability ought reasonably to have been known, he shall forthwith remove the document from any electronic communication system within his control and shall cease to provide services in relation to the message.

(4) An intermediary service provider shall not be liable for any act done in good faith pursuant to this section.

Liability for being a conduit

26.—(1) An intermediary service provider shall not, when supplying services of transmission of information, or when offering access to online public communication, be held liable for the information transmitted on condition that the intermediary service provider—

(*a*) does not monitor the online communication;

(*b*) does not initiate the transmission;

(*c*) does not select the receiver of the transmission; or

(*d*) does not select or modify the information contained in the transmission.

(2) The acts of transmission, routing and provision of access include the automatic, intermediate and transient storage of the information transmitted in so far as this takes place—

(*a*) for the sole purpose of carrying out the transmission in the information system;

(*b*) in a manner that makes it ordinarily inaccessible to anyone other than an anticipated recipient; and

(*c*) for storage for a period not longer than is reasonably necessary for the transmission.

Liability for caching services

27. An intermediary service provider shall not be liable for the automatic intermediate and temporary storage of the electronic message, where the intention of such storage is for its onward transmission to other recipients who requested it, if the intermediary service provider—

(*a*) does not modify the electronic message;

(*b*) complies with the conditions on access to electronic message;

(*c*) complies with rules regarding updating of the electronic message, specified in a manner widely recognized and used by the information and communication technology industry;

(*d*) does not interfere with the lawful use of technology that is widely recognized and used by the information and communication technology industry, to obtain information on the use of electronic message;

(*e*) acts expeditiously to remove or to disable access to the information it has shared upon obtaining actual knowledge of the fact that the information at the initial source of the transmission has been removed or access to it has been disabled or that a court or an administrative authority has ordered such removal or disablement; and

(*f*) removes or disables access to the electronic messages it has stored upon receiving a takedown notice.

Liability for the supply of hosting services

28. An intermediary service provider who provides a service comprising storage of electronic messages shall not be liable for the information stored if—

(*a*) he was not aware of the unlawful character of the stored information; or

(*b*) immediately after becoming aware of the unlawful character of the stored information, he took all necessary measures

to withdraw the information or to make access to such information impossible; or

(*c*) upon receipt of the takedown notice issued under this Act, he expeditiously removes or disables access to the information.

Saving of data

29.—(1) An intermediary service provider shall, while exercising the activities prescribed in section 30, maintain and preserve the data that permits the identification of any person who contributed to the creation of all or part of the content relating to the services rendered by such intermediary service provider.

(2) The High Court may require from the intermediary service provider communication of the data referred to in subsection (1).

(3) The Authority may issue regulations governing the retention of data referred to in this section.

Takedown notification

30.—(1) An intermediary service provider offering access to online public communication services shall provide, and inform its subscribers of the existence of any technical means which permit restriction of access to certain services.

(2) An intermediary service provider shall set up an easily accessible and visible system to enable any person inform the intermediary service provider of any content which is unlawful or infringes, or may infringe, on such person's rights.

(3) An intermediary service provider shall—

(*a*) inform promptly the Authority or its organs of any illegal content reported as indicated in subsection (2) and made available online by the beneficiaries of their services; and

(*b*) make public the means taken to fight against the dissemination of such illegal content.

(4) Any person who claims that a published electronic message is unlawful or infringes on his right, shall notify the intermediary service provider of such message.

(5) A notification stipulated in subsection (4) shall be in permanent medium addressed by the complainant to the intermediary service provider, and shall include the following information—

(*a*) the full name and address of the complainant;

(*b*) the written or electronic signature of the complainant;

(*c*) the right that has been infringed;

(*d*) identification of the material or activity that is claimed to be the subject of the infringing or unlawful activity;

(*e*) the remedial action required to be taken by the intermediary service provider in respect of the complaint;

(*f*) telephone and electronic mail contacts;

(*g*) a statement that the complainant is acting in good faith; and

(*h*) a statement by the complainant that the information is true and correct.

(6) Any person who notifies an intermediary service provider of an infringement or unlawful activity or content knowing that the notification is false, commits an offence and is liable to a fine of K1,000,000 and imprisonment for twelve months.

(7) An intermediary service provider shall not be liable for a takedown in response to a wrongful or false notification.

Online content providers

31.—(1) An online content provider shall display in a conspicuous manner, the following information on its webpage—

(*a*) in case of a natural person, full name, domicile, telephone number, and email address, of the editor;

(*b*) in case of a legal entity, corporate name, postal and physical address of the registered office, telephone number, email address, authorized share capital, and registration number, of the editor;

(*c*) where applicable, the name of the corporate officer appointed as director of the publication of the online public communication and the editor in chief; and

(*d*) the name, title, corporate name, postal and physical address and telephone number, email address of the intermediary service provider prescribed in this section.

(2) A person editing online public communication on a non-professional basis may make publicly available his name as well as the name and address of the intermediary service provider prescribed in this Act:

Provided that the person has duly communicated to the intermediary service provider the particulars of personal identification prescribed by subsection (1).

(3) Any intermediary service provider identified in this section shall be subject to professional secrecy as regards disclosure of the particulars of personal identification or of any information sufficient to identify the source of online content.

(4) A person may act as an editor of an online public communication, and as an intermediary service provider, if his activities fall under both regimes.

(5) Where a person acts as an editor of an online public communication and as an intermediary service provider as provided in subsection (4), legal obligations of both regimes shall apply respectively to each activity.

(6) An intermediary service provider exercising the activities prescribed in this section shall provide to editors of online content under this section the technical means to comply with the requirements of identification prescribed in this section.

Right of reply

32.—(1) A person who can be directly or indirectly identified in an online public communication, shall have the right to demand a publication of his response, without prejudice to his right to request correction or deletion of the content.

(2) A request stipulated in subsection (1) shall be addressed to the editor in chief designated in section 31 (1) (*c*).

(3) In the event that a person editing an online public communication on a non-professional basis elects to remain anonymous, the complainant shall directly address the request to the hosting intermediary service provider.

(4) An online editor shall publish the response stipulated in subsection (1) within twenty-four hours of receipt of the request in subsection (1).

(5) A person who contravenes subsection (4) commits an offence and is liable to a fine of K1,000,000 and imprisonment for twelve months.

(6) A right of reply shall be exercised free of charge.

PART V

Electronic Commerce

Information to be provided by a supplier

33.—(1) A supplier of goods or services through electronic commerce (in this Act otherwise referred to as a "supplier") shall make available the following information to consumers—

(*a*) full name and legal personality;

(*b*) postal and physical address and telephone number;

(*c*) website address and email address;

(*d*) in case of a corporate entity, its registration number, name of its office bearers and its place of registration;

(*e*) if the supplier is subject to a tax on consumer goods and services, his tax personal identification number;

(*f*) details of membership to any regulatory or accreditation body to which the supplier belongs or subscribes to, and contact information of such body;

(*g*) if the activity of the supplier is subject to any professional regulation, reference to the applicable professional rules, his professional title, the place where such title was granted, or organization to which the person is registered;

(*h*) if the supplier belongs to a self-regulatory body, to a professional association, to an organization for dispute settlement, or to any other relevant certification organization, the supplier shall provide adequate information and ensure easy means of verification of such belonging and of access to the codes and practices applicable to that body, association or organization; and

(*i*) physical address where the supplier receives service of legal documents.

(2) A supplier shall, before conclusion of a contract, provide to consumers the following information regarding the terms, conditions and costs associated with the transaction—

(*a*) sufficient description of goods or services subject of the contract;

(*b*) instructions for use and, in particular, the warnings related to security and health;

(*c*) restrictions, limitations or conditions related to the purchase, such as an agreement of a parent or of a guardian, and any territorial or temporal restrictions;

(*d*) details of full costs, including taxes and costs of shipping and delivery to be paid by the consumer, and terms and conditions of payment;

(*e*) conditions of delivery or execution such as the time of delivery of goods or provision of services:

Provided that—

(i) unless otherwise agreed by the parties, the supplier shall be bound to deliver the goods or to provide the services immediately upon conclusion of the contract; and

(ii) where the supplier fails to deliver the goods and provide the services as stipulated in subparagraph (i), the consumer shall be entitled to terminate the contract;

(*f*) mode of payment;

(*g*) information regarding available after-sale service;

(*h*) details and conditions of withdrawal, denunciation, return, cancellation or reimbursement, in accordance with the provisions of sections 36, 37, 38 and 39;

(*i*) warranty conditions;

(*j*) return, exchange and refund policy of the supplier;

(*k*) manner and the period within which the consumer can maintain a full record of the transaction;

(*l*) any alternative dispute resolution code to which the supplier subscribes and how the details and content of that code may be accessed electronically by the consumer; and

(*m*) security procedures and privacy policy of the supplier in respect of payment, payment information and personal information of the consumer.

Formation of electronic contracts with consumers

34.—(1) Every contract with a value exceeding K5,000,000, or a value as will be prescribed by the Minister by notice published in the *Gazette*, concluded by electronic means shall be achieved by the supplier for a period of not less than seven years from the date when the contract was formed.

(2) A supplier shall ensure that the terms and conditions referred to in subsection (1)—

(*a*) specify the time and manner the contract is formed; and

(*b*) are in a form that guarantees their preservation and production.

(3) A supplier shall—

(*a*) provide the technical means which permit the consumer to review the transaction and correct any errors made;

(*b*) indicate the languages in which the contract shall be formed;

(*c*) in case the contract is archived, provide the conditions of such archiving by the supplier and the conditions of access to the archived contract; and

(*d*) if applicable, provide the way to access, through electronic means, professional and commercial rules that the supplier considers binding.

(4) Every contract with a value exceeding K5,000,000 concluded by electronic means shall be archived by the supplier for a period

of not less than seven years from the date when the contract was formed.

Cooling-off period

35.—(1) A consumer shall be entitled to exercise the right of withdrawal from a contract concluded by electronic means without giving reasons and without penalties—

(*a*) with respect to goods, within seven days of receipt of the goods or a period as agreed by the two parties in the agreement;

(*b*) with respect to services, within seven days of the formation of the contract or a period as agreed by the two parties in the agreement.

(2) Where consumer has cancelled a contract under this section, the consumer may, if necessary, bear return costs for the goods supplied or services rendered.

(3) After a consumer has cancelled a contract under this section, a supplier shall, within fourteen days of cancellation of the contract by the consumer, reimburse to the consumer all sums paid.

(4) After expiry of the period specified in subsection (3), the sum due shall attract interest at the prevailing bank rate as specified by the Reserve Bank of Malaŵi.

(5) A supplier shall reimburse to a consumer, all sums due, in a payment mode agreed by the parties:

Provided that in the event that the parties fail to agree on the mode, the reimbursement shall be made in the same mode in which the consumer paid the supplier.

(6) Notwithstanding subsection (1), a consumer shall not withdraw from a contract concluded by electronic means where—

(*a*) the provision of services started with the consumer's consent, before the end of the seven day period;

(*b*) the price of the goods or services depends on the fluctuations of financial market rates and the price is not in the control of the supplier;

(*c*) the provision of goods was made according to the consumer's own specifications or clearly personalized, or goods which by their nature cannot be returned or are liable to deteriorate rapidly;

(*d*) the contract relates to the provision of audio or video recording or software;

(*e*) the contract relates to the provision of newspapers, periodicals or magazines; and

(*f*) the contract relates to the provision of betting and authorized lotteries.

Performance of an electronic transaction

36.—(1) A supplier shall put technical measures on his electronic platform that will enable a consumer to verify the accuracy of the details of an order, failing which an electronic transaction made on the platform shall be invalid.

(2) A supplier shall acknowledge receipt of the order electronically within forty-eight hours of receipt of the order.

(3) Unless the parties agree otherwise, a supplier shall execute the order within thirty days of receipt of the order.

(4) Where a supplier has failed to execute an order within the thirty days or within the agreed period, the consumer may, after the expiration of that period, cancel the contract upon giving a seven days' written notice.

(5) The order, the acceptance of the order, and the acknowledgement of receipt of such acceptance of the order, shall be considered received in accordance with section 20.

(6) For the purposes of this section, an "order" shall amount to an "offer".

Default in contract performance

37.—(1) Where a supplier fails to perform his part of the contract, the supplier shall inform the consumer of the failure and the supplier shall refund the consumer any sums paid within seven days of notifying the consumer of his failure or at the expiry of the thirty days or at the expiry of the period agreed by the parties, whichever comes first.

(2) Where a supplier fails to refund a consumer as required by subsection (1), interest shall accrue on the sum at the applicable bank rate as specified by the Reserve Bank of Malaŵi.

(3) Where a consumer is contractually required to bear costs of returning goods that the supplier has delivered to a consumer, the supplier shall inform the consumer of this fact in advance.

Review and cancellation of contract by a consumer

38.—(1) A supplier shall provide to a consumer with an opportunity to do the following—

(*a*) review the entire electronic transaction;

(*b*) correct any errors; and

(*c*) withdraw from the transaction before finally placing an order.

(2) Where a supplier's transaction fails to comply with subsection (1), a consumer is entitled to cancel the transaction within fourteen days after receiving the goods, services or facilities to which the transaction applies.

(3) Where a transaction is cancelled under subsection (2)—

(*a*) a consumer shall return the goods and cease using the services or facilities supplied pursuant to the transaction, as the case may require; and

(*b*) a supplier shall refund all payments made by the consumer in respect of the transaction.

(4) A supplier shall utilize a payment system that is sufficiently secure having regard to—

(*a*) accepted technological standards at the time of the transaction; and

(*b*) the type of transaction concerned.

(5) A supplier shall be liable for any damage suffered by a consumer due to a failure by the supplier to comply with subsection (4).

Cancellation of payment

39. A consumer may require the cancellation of a payment in case of fraudulent use of his payment for the purposes of execution of a contract by electronic means, and in such a case the sums paid shall be reimbursed to the consumer.

Prohibition of misleading advertising

40.—(1) A person dealing on online communication shall not advertise in a misleading manner.

(2) In determining whether online advertising is misleading, account shall be taken of all its features, and in particular, of any information it contains concerning—

(*a*) the characteristics of goods or services, such as their availability, nature, execution, composition, method and date of manufacture or provision, fitness for purpose, uses, quantity, specification, geographical or commercial origin, the results to be expected from their use, or the results and material features of tests or checks carried out on the goods or services;

(*b*) the price or the manner in which the price is calculated, and the conditions on which the goods are supplied or the services provided; and

(*c*) the nature, attributes and rights of the advertiser, such as its identity, assets, qualifications, ownership of industrial, commercial or intellectual property rights or its awards and distinctions.

(3) Comparative advertising shall, as far as the comparison is concerned, be permitted if the advertising—

(*a*) is not misleading within the meaning of subsections (1) and (2);

(*b*) compares goods or services meeting the same needs or intended for the same purpose;

(*c*) objectively compares one or more material, relevant, verifiable and representative features of those goods and services, which may include price;

(*d*) does not discredit or denigrate the trademarks, trade names, other distinguishing marks, goods, services, activities or circumstances of a competitor;

(*e*) for products with designation of origin, relates in each case to products with the same designation;

(*f*) does not take unfair advantage of the reputation of a trademark, trade name or other distinguishing marks of a competitor or of the designation of origin of competing products;

(*g*) does not present goods or services as imitations or replicas of goods or services bearing a protected trademark or trade name; and

(*h*) does not create confusion among traders, between the advertiser and a competitor or between the advertiser's trademarks, trade names, other distinguishing marks, goods or services and those of a competitor.

Identification of advertisement content Cap. 48:10

41.—(1) Subject to the Consumer Protection Act and any other written law, any advertisement made by electronic means shall be clearly identifiable as such and the natural or legal person for whom the advertisement is placed shall be clearly identifiable.

(2) The terms and conditions for benefiting from promotional offers and for participating in sweepstakes, lotteries or in other promotional games shall be clearly and precisely indicated and easily accessible.

Unsolicited communications

42.—(1) Except in the case of a notice sent by an electronic communications provider to a customer in relation to services, a

person shall not send unsolicited electronic communications to a consumer without obtaining the prior consent of the consumer.

(2) A person who sends electronic commercial communication to a consumer shall provide the consumer—

(*a*) with an option to unsubscribe from the mailing list of that person; and

(*b*) at the request of the consumer, the identifying particulars of the source from which that person obtained the consumer's personal information.

(3) A recipient shall have the opportunity to object, free of charge, to the use of his personal data for prospection purposes by a data controller.

(4) A person who contravenes subsection (1) commits an offence and shall, upon conviction, be liable to a fine of K2,000,000 and imprisonment for five years.

(5) A person who sends unsolicited commercial communications to another person or who continues to send unsolicited commercial communications to a person after unsubscribing in accordance with subsection (2) (*a*) commits an offence and shall, upon conviction, be liable to a fine of K1,000,000 and imprisonment for twelve months.

(6) The provisions of subsections (1) and (2) shall not apply where—

(*a*) the sender of the electronic message has obtained the personal data of the recipient in the course of negotiations for the sale of the product or the provision of the service referred to in the electronic message; or

(*b*) the commercial solicitation is directly linked to the product or the service.

Scope of application of financial provisions Cap. 74:01

43.—(1) Subject to the Payment Systems Act, and any financial services law, the provisions of this Part shall apply to any supply of electronic financial services without prejudice to application of—

(*a*) specific legal and regulatory obligations applicable to certain financial products, instruments or services; and

(*b*) other provisions applicable to contracts concluded between natural persons or a supplier and a consumer.

(2) The Minister of Finance, on recommendation from the Authority and the Governor of the Reserve Bank of Malaŵi, shall

make regulations defining specific obligations with regards to online banking.

Identity of a provider of financial or banking services

44.—(1) Before a conclusion of a distance contract or acceptance of an offer, a consumer shall receive from the supplier the information indicated in section 33, and where applicable—

(*a*) when the supplier uses the services of a representative, the supplier shall communicate to the consumer the identity of the representative and his address and the following information—

(i) the fact that financial services are linked to instruments involving special risks related to their specific features or the operations to be executed or the fact that their price depends on fluctuations in the financial markets outside the supplier's control;

(ii) the fact that past performances do not allow to predict future performances; and

(iii) any limitation of the term during which the information provided is valid, the conditions of payment and execution and, if necessary, the existence of any specific additional costs for the consumer arising out of the use of electronic communication;

(*b*) where necessary, the existence of a right of withdrawal as prescribed by section 35, its duration, the possible pecuniary consequences of its exercise, as well as the address to be used by the consumer to notify the supplier of his decision;

(*c*) in a case where the right of withdrawal is not exercisable, the supplier shall inform the consumer about that and the consequences.

(2) For a contract with a withdrawal period, the supplier shall inform the consumer that without his express consent, the contract may not be executed before expiry of the withdrawal period.

(3) The terms and conditions of the contract and in particular the information indicated in subsections (1) and (2) shall be—

(*a*) provided in a clear and comprehensible manner and in any way appropriate to the means of electronic communication used;

(*b*) communicated to a consumer in writing prior to the conclusion of the contract; and

(*c*) communicated to a consumer in writing upon the consumer's request at any time during the contractual relations.

Right of withdrawal from a contract

45.—(1) Notwithstanding the provisions of section 35, a consumer entering into a distant contract for the provision of financial services shall have twenty calendar days unless otherwise agreed by the parties, within which he may exercise his right to withdraw from the contract without penalty and without giving reasons.

(2) The period referred to in subsection (1) shall be extended to forty-five calendar days for distance contracts relating to life insurance and retirement.

(3) The term during which the right of withdrawal may be exercised starts—

(*a*) either from the day when the distance contract was concluded, except the case of the life insurance with respect to which the term of withdrawal starts from the date when the consumer became aware of the conclusion of a distance contract; or

(*b*) from the day when the consumer received the terms and conditions of the contract, if the period is later than the period prescribed under subsection (1).

(4) The right of withdrawal shall not apply—

(*a*) to financial services having prices dependent on fluctuations of the financial market on which the supplier has no influence and which are susceptible to occur during the withdrawal period;

(*b*) to insurance of travel or luggage, or similar types of short-term insurance not exceeding one month;

(*c*) to contracts—

(i) executed exclusively by the supplier and the consumer;

(ii) executed upon the express request of the consumer; and

(iii) where the consumer has not yet exercised the right of withdrawal;

(*d*) to online auctions;

(*e*) to supply of food stuffs, beverages and other goods intended for daily consumption;

(*f*) where audio or video recordings or computer software were downloaded, or unsealed by the consumer;

(*g*) to sell of newspapers, periodicals, magazines and books;

(*h*) to the provision of gaming and rotary services;

(*i*) to online gambling;

(*j*) to the provision of accommodation, transport and catering services; and

(*k*) to start up transactions as the Minister may by notice published in the *Gazette* prescribe.

(5) Unless otherwise agreed by the parties, where a consumer exercises the right of withdrawal, he may only be required to pay, within seven days, for the financial services already provided by a supplier pursuant to the distant contract and the execution of a contract may only start upon consent of the consumer, and the amount due—

(*a*) has not exceeded the amount proportionate to the service already rendered as compared to the services to be rendered under the contract; and

(*b*) is not, under any circumstances, of such value or nature as to constitute a penalty.

(6) A supplier may not require a consumer to pay an amount due under subsection (5) unless the supplier proves that the consumer was duly notified of the amount.

(7) Where a supplier has started to execute a contract before expiry of the term of withdrawal, the supplier may not, under any circumstances, require the consumer to process the payment.

(8) Unless otherwise agreed by the parties, a supplier shall be required to reimburse to a consumer, not later than fourteen days, all sums which were paid by the consumer under a distant contract.

(9) The fourteen day period referred to in subsection (8) shall commence once a supplier receives a notification of a decision by a consumer to withdraw from the contract.

(10) Unless otherwise agreed by the parties, where a supplier fails to reimburse to a consumer the sums due within the period of fourteen days, the amount shall attract interest at the prevailing bank rate as specified by the Reserve Bank of Malaŵi.

(11) A consumer shall return to the supplier not later than fourteen days or such period as agreed by the parties and the calculation of time under this section shall start from when the goods received from the supplier and the fourteen day period shall start from the day when the consumer has sent a notification of withdrawal to the supplier.

PART VI

Security and Digital Economy

Use, supply, transfer, etc.

46. Where any portion of an electronic message is signed with a digital signature, the digital signature shall be treated as a secure electronic signature with respect to such portion of the message if—

(*a*) the digital signature was created during the operational period of a valid digital signatures certificate and is verified by reference to the public key listed in such certificate;

(*b*) the public key of the signatory has the same identity as the certificate based on the fact that—

(i) the digital signature certificate was issued by a competent licensed certification authority;

(ii) the digital signature certificate was issued by a certification authority outside Malaŵi recognized for this purpose by the Authority;

(iii) the digital signature certificate was issued by an organ licensed by the Authority to act as a certification authority in accordance with this Act; and

(iv) the sender and the recipient have expressly agreed between themselves to use digital signatures as a security procedure, and the digital signature was property verified by reference to the sender's public key.

Presumptions regarding digital signature certificates

47. Except for information identified as subscriber information which has not been verified, any other information included in a digital signature certificate issued by a licensed certification authority shall be deemed correct if the subscriber accepted the digital signature certificate, unless evidence to the contrary is adduced.

Unreliable digital signatures

48. Unless otherwise provided for by any written law or contract, a person relying on a digitally signed electronic message shall bear the risk that the digital signature is invalid as a signature or authentication of the signed electronic message, if reliance on the digital signature is not reasonable under the circumstances having regard to the following factors—

(*a*) acts which the person relying on the digitally signed electronic message knows or has notice of, including all facts listed in the digital signature certificate or incorporated in it by reference;

(*b*) the value or importance of the digital signed electronic message, if known;

(*c*) the course of dealing between the person relying on the digital signed electronic message and the subscriber and any available indication of reliability or unreliability apart from the digital signature; and

(*d*) any usage of trade, particularly trade conducted by trustworthy systems or other electronic means.

Reliance on digital signature and certificate

49. A person who relies on a digital signature shall be deemed to have relied on a valid certificate containing the public key by which the digital signature may be verified.

Requirements to publish digital signature certificate

50. A digital signature certificate may be published where—

(*a*) it has been issued by a competent authority;

(*b*) the subscriber mentioned on that digital signature certificate has accepted it; and

(*c*) the digital signature certificate has not been revoked or suspended.

Authority to appoint a certification authority

51.—(1) The Authority shall accredit certification authorities.

(2) The Minister shall, from time to time issue certification authorities accreditation regulations in consultation with the Authority which may include—

(*a*) application procedures accreditation;

(*b*) applicable fees;

(*c*) terms and conditions for accreditation;

(*d*) standards to be maintained by accreditation authorities;

(*e*) any other terms deemed necessary.

(3) The Authority shall—

(*a*) keep and maintain a register of certification authorities; and

(*b*) do such things as necessary for the implementation of this Act.

Encryption

52.—(1) A person shall not provide cryptograph services or products in Malaŵi without registration under this Part.

(2) Registration for provision of cryptograph services or products shall be made—

(*a*) to the Authority;

(*b*) in the prescribed manner and form; and

(*c*) upon payment of applicable fees.

(3) The Minister in consultation with the Authority shall issue regulations—

(*a*) in respect of use, importation and exportation of encryption programmes and encryption products; and

(*b*) prohibiting the exportation of encryption programmes or other encryption products from Malaŵi generally or subject to such restrictions as may be prescribed.

(4) For the avoidance of doubt, subject to any regulations made under subregulation (1), it is lawful for any person to use encryption programme or product provided that it has lawfully come into possession of that person.

Trustworthy system

53.—(1) A certification authority shall utilize a trustworthy system in performing its services.

(2) The registration for the provision of cryptographic services or products shall be made—

(*a*) to the Authority;

(*b*) in the prescribed manner and form; and

(*c*) upon payment of prescribed fees.

(3) The Minister in consultation with the Authority shall issue regulations—

(*a*) in respect of use, importation and exportation of inscription programmes and products; and

(*b*) prohibiting the exportation of inscription programmes or other inscription products from Malaŵi generally, or subject to such restrictions, as may be prescribed.

(4) For the avoidance of doubt, subject to any regulations made under subregulation (1), it is lawful for any person to use encryption programme or product provided that it has lawfully come into possession of that person.

Disclosure

54.—(1) A certification authority shall disclose—

(*a*) its digital signature certificate that contains the public key corresponding to the private key used by that certification authority to digitally sign another digital signature certificate;

(*b*) any relevant certification practice statement;

(*c*) notice of the revocation or suspension of its certification authority certificate; and

(*d*) any other fact that materially and adversely affects either the reliability of a digital signature certificate that the authority has issued or the authority's ability to perform its services.

(2) In case of an occurrence that materially and adversely affects a certification authority trustworthy system or its certification, the certification authority shall—

(*a*) use reasonable efforts to notify any person who is known to be foreseeably affected by that occurrence; and

(*b*) act in accordance with procedures governing such an occurrence specified in its certification practice statement.

Issuance of a digital signature certificate

55.—(1) A certification authority may issue a certificate to a prospective subscriber only after—

(*a*) it has received a request from the prospective subscriber; and

(*b*) the prospective subscriber has a certification practice statement in compliance with the content of such statement including procedures regarding identification of the prospective subscriber.

(2) In the absence of a certification practice statement, the certification authority shall confirm by itself or through an authorized agent that—

(*a*) the prospective subscriber is the person to be listed in the digital signature certificate to be issued;

(*b*) if the prospective subscriber is acting through one or more agents, the subscriber authorized the agent to have custody of the subscriber's private key and to request issuance of a digital signature certificate listing the corresponding public key;

(*c*) the information in the digital signature certificate to be issued is accurate;

(*d*) the prospective subscriber rightfully holds the private key corresponding to the public key to be listed in the digital signature certificate;

(*e*) the prospective subscriber holds a private key capable of creating a digital signature; and

(*f*) the public key indicated in the digital signature certificate is capable of verifying a digital signature affixed by the public key.

Representations upon issuance of a digital signature certificate

56.—(1) By issuing a digital signature certificate, a certification authority represents any person who relies on the digital signature certificate or a digital signature verifiable by the public key indicated in the certificate in accordance with any applicable certification practice statement.

(2) In the absence of such certification practice statement, the representing certification authority confirms that—

(*a*) the certification authority has complied with all applicable requirements of this Act in issuing the digital signature certificate, but where the certification authority has published or submitted it to such relying person, it shall confirm that the subscriber listed in the digital signature has accepted it;

(*b*) the subscriber identified in the certificate holds the private key corresponding to the public key listed in the digital signature certificate;

(*c*) the subscriber's public key and private key constitute a functioning key pair;

(*d*) all information in the digital signature certificate is accurate, unless the certification authority has stated in the digital signature certificate or incorporated by reference in the certificate a statement that the accuracy of specified information is not confirmed; and

(*e*) the certification authority has no knowledge of any material fact which if it had been included in the digital signature certificate would adversely affect the reliability of the representations above-mentioned.

Suspension of a digital signature certificate

57. A certification authority that issued a digital signature certificate shall suspend the certificate after receiving a request by—

(*a*) a subscriber listed in the digital signature certificate; or

(*b*) a person acting on behalf of a subscriber, where the subscriber is not available.

Revocation of a digital signature certificate

58. A certification authority shall revoke a digital signature certificate that it issued—

(*a*) upon request by the subscriber or his representative;

(*b*) upon receipt of a certified copy confirming that the subscriber is dead;

(*c*) upon presentation of documents effecting a dissolution of the subscriber; or

(*d*) upon confirming by other evidence that the subscriber has been dissolved or has ceased to exist.

Revocation without a subscriber's consent

59.—A certification authority shall revoke a digital signature certificate, regardless of whether the subscriber listed in the certificate consents, if the certification authority confirms that—

(*a*) a material fact represented in the digital signature certificate is false;

(*b*) a requirement for issuance of the digital signature was not satisfied;

(*c*) the certification authority's private key or trustworthy system was compromised in a manner materially affecting the digital signature certificate's reliability; or

(*d*) a subscriber has ceased his activities.

Notice of suspension of a digital signature certificate

60.—(1) Immediately upon suspension of a digital signature certificate by a certification authority, the certification authority shall publish a signed notice of the suspension.

(2) A certification authority shall keep and maintain a register containing notices of suspended digital signature certificates, which registers shall be open for inspection by the public.

Notification of revocation of a digital signature certificate

61.—(1) Immediately upon revocation of a digital signature certificate by a certification authority, the certification authority shall publish a signed notice of the revocation.

(2) A certification authority shall keep and maintain a register containing notices of revoked digital signature certificates which shall be open for inspection by the public.

Generating a key pair

62.—(1) If a subscriber generates a key pair whose public key is to be listed in a digital signature certificate issued by a certification authority and accepted by the subscriber, the subscriber shall generate the key pair using a trustworthy system.

(2) This section shall not apply to a subscriber who generates a key pair using a system approved by a certification authority.

Accurate and complete representations

63. A subscriber shall not make material representations to a certification authority for purposes of obtaining a digital signature certificate, including all information known to the subscriber and represented in the certificate, unless the representations are accurate and complete.

Acceptance of a digital signature certificate

64.—(1) A subscriber shall be deemed to have accepted a digital signature certificate if he publishes in writing or authorizes the publication of a digital signature certificate—

(*a*) to one or more persons;

(*b*) in a register; or

(*c*) where another digital signature certificate is produced or proved by written evidence.

(2) By accepting a digital signature certificate issued by a subscriber or a certification authority, the subscriber listed in the certificate certifies to all who reasonably rely on the information contained in the certificate that—

(*a*) the subscriber rightfully holds the private key corresponding to the public key listed in the digital signature certificate; and

(*b*) all representations made by the subscriber to the certification authority and material to the information listed in the digital signature certificate are true.

Control of a private key

65.—(1) By accepting a digital signature certificate issued by a certification authority, the subscriber identified in the certificate shall assume a duty to exercise reasonable care to retain control of the private key corresponding to the public key listed in such digital signature certificate and shall prevent its disclosure to a person not authorized to create the subscriber's digital signature.

(2) The duty referred to in subsection (1) shall continue during the operational period of the digital signature certificate and during any period of suspension of the certificate.

Requesting for suspension or revocation

66. A subscriber who has accepted a digital signature certificate shall, as soon as possible, request the issuing certification authority to suspend or revoke the certificate if the private key corresponding to the public key listed in the certificate has been compromised.

Provision of encryption services

67.—(1) A person who provides encryption services shall declare to the Authority the technical characteristics of the encryption means as well as the source code of the software used.

(2) Regulations made under this Act shall define the conditions for making declarations referred to in subsection (1), and may define encryption services whose technical characteristics or conditions of supply are such that, with regard to national defence or internal security interests, their provision shall not require any prior formality.

(3) An encryption services provider shall be bound by professional secrecy.

(4) Unless it is proved that no intentional wrongful conduct or negligence was involved, a provider of encryption services for confidentiality purposes shall be liable, notwithstanding any contractual provision to the contrary, for the damage suffered by the persons that entrusted the management of their confidential conventions to them in case of violation of the integrity, confidentiality or availability of the data object of such convention.

Administrative sanctions

68.—(1) Without prejudice to applicable criminal sanctions, where a supplier of encryption, including free of charge encryption, does not comply with its obligations under this Act, the Authority may, after having given the supplier the opportunity to give its observations, prohibit the distribution of the concerned encryption.

(2) The prohibition of distribution shall entail an obligation for the supplier to withdraw—

(*a*) from distribution networks, the prohibited encryption; and

(*b*) materials constituting encryption whose distribution has been prohibited and that have been acquired against payment directly or through distribution networks.

Appointment of cyber inspectors

69.—(1) The Authority shall appoint any person as a cyber inspector to perform the functions provided for in this Part for a term of two years, renewable for another term of two years.

(2) A person may be appointed as a cyber inspector if that person—

(*a*) is a citizen and a resident of Malaŵi;

(*b*) possesses qualifications, expertize and experience in any field of communications technology, law, economics or finance; and

(*c*) is an individual who is committed to fairness, openness, accountability and to principles by which the Authority is guided.

(3) A person shall be disqualified from being appointed as a cyber inspector if he—

(*a*) is a Member of Parliament;

(*b*) is a Minister or Deputy Minister; or

(*c*) is a member of a committee of a political party.

(4) The Authority shall provide any person appointed as a cyber inspector with a certificate of appointment.

(5) The certificate of appointment referred to in subsection (4) may be accompanied by a digital signature of the Authority.

(6) A cyber inspector shall, in performing any function under this Act—

(*a*) be in possession of the certificate of appointment referred to in subsection (4); and

(*b*) upon request by a person who is subject to investigations or an employee of that person, show the certificate of appointment to that person.

Powers and functions of a cyber inspector

70.—(1) A cyber inspector shall have the following powers and functions—

(*a*) to monitor and inspect any website database with critical data or activity on an information system in the public domain and report any unlawful activity to the Authority;

(*b*) in respect of suppliers of encryption and encryption service providers—

(i) to investigate the activities of suppliers of encryption and of encryption service providers in relation to compliance with this Act; and

(ii) to issue orders in writing to suppliers of encryption and encryption service providers to comply with the provisions of this Act;

(*c*) in the performance of his functions, at any reasonable time, without prior notice, and under the authority of a search warrant issued by a court, to enter any premises or access any information system and—

(i) search the premises or the information system;

(ii) search any person on the premises if there are reasonable grounds to believe that the person has possession of a document, record or any element that is connected to an investigation;

(iii) take extracts from, or make copies of, any book, document, record or any element that is in the premises or in the information system and has a bearing on an investigation;

(iv) demand the production of, and inspect, relevant authorizations, declarations and certificates;

(v) inspect any facilities on the premises, which are linked or associated with the information system;

(vi) access and inspect the operation of any computer or equipment forming part of an information system and any associated apparatus or material which the cyber inspector has reasonable cause to believe is, or has been used in, connexion with the commission of any offence;

(vii) use or cause to be used any information system or part thereof to search any data contained in or available to such information system;

(viii) require the person by whom, or on whose behalf, the cyber inspector has reasonable cause to suspect the computer or information system is or has been used, or require any person in control of, or otherwise involved with the operation of the computer or information system, to provide the cyber inspector with such reasonable, technical and other assistance as the cyber inspector may require for the purposes of this Part; or

(ix) make such inquiries as may be necessary to ascertain whether the provisions of this Act or any other written law on which an investigation is based, have been complied with.

(2) A person who—

(*a*) hinders or obstructs a cyber inspector in the performance of his powers and functions under this Part;

(*b*) refuses to cooperate with a cyber inspector; or

(*c*) falsely holds himself out as a cyber inspector,

commits an offence and shall, upon conviction, be liable to a fine of K5,000,000 and imprisonment for seven years.

(3) For the proper performance of his functions under this Act, a cyber inspector may be accompanied by a police officer.

PART VII

Data Protection and Privacy

Processing of personal data

71.—(1) A data controller shall ensure that personal data is—

(*a*) processed fairly and legally;

(*b*) collected for specified, explicit and legitimate purposes and not further processed in a way incompatible with those purposes;

(*c*) adequate, relevant and not excessive in relation to the purposes for which they are collected and processed;

(*d*) accurate and, where necessary, kept up to date;

(*e*) every reasonable step shall be taken to ensure that data which is inaccurate or incomplete, having regard to the purposes for which they were collected or for which they are further processed, is erased or rectified; and

(*f*) kept in a form which permits identification of data subjects for no longer than is necessary for the purposes for which the data was collected or for which it is further processed.

(2) Personal data may be processed only if—

(*a*) the data subject has unambiguously given his consent;

(*b*) the processing is necessary for the performance of a contract to which a data subject is party or in order to take steps at the request of the data subject prior to entering into a contract;

(*c*) the processing is necessary for compliance with a legal obligation to which a data controller is subject;

(*d*) the processing is necessary in order to protect the vital interests of a data subject;

(*e*) the processing is necessary for the performance of a task carried out in the public interest or in the exercise of official authority vested in a data controller or in a third party to whom the data is disclosed; or

(*f*) the processing is necessary for the purposes of the legitimate interests pursued by a data controller or by the third party or parties to whom the data is disclosed, except where such interests are overridden by the interests for fundamental rights and freedoms of the data subject.

(3) For purposes of this section, "consent" means any freely given specific and informed indication by a data subject, of his wishes, by agreement, to his personal data being collected, processed or stored.

Rights of a data subject

72.—(1) A data subject shall be entitled to obtain from a data controller, without constraint or unreasonable delay and at no expense—

(*a*) confirmation as to whether or not the data relating to him is being processed;

(*b*) communication to him of the data undergoing processing and of their source; and

(*c*) communication for the purposes of the processing and the recipients to whom the data is disclosed.

(2) A data subject shall be entitled to object at any time on legitimate grounds relating to his situation to the processing of data relating to him and where there is a justifiable objection, the processing instigated by the data controller may no longer involve such data.

(3) A data subject shall be entitled to obtain from a data controller, as appropriate, the rectification, erasure or blocking of data the processing of which does not comply with the provisions of this Act, in particular because of the incomplete or inaccurate nature of the data.

Accuracy and completeness of information

73. A data controller shall provide a data subject from whom data relating to himself is collected with at least the following information—

(*a*) the identity of the data controller and of his representative, if any;

(*b*) the purposes of the processing for which the data is intended;

(*c*) the existence of the right of access to and the right to rectify the data concerning him; and

(*d*) the existence of the right to object to the processing of the data concerning him.

Security obligations

74.—(1) A data controller shall implement technical and organizational measures enabling to protect personal data against accidental or unlawful destruction or accidental loss, alteration, unauthorized disclosure or access, in particular where the processing involves the transmission of data over a network, and against all other unlawful forms of processing.

(2) Having regard to the state of the art and the cost of their implementation, such measures shall ensure a level of security appropriate to the risks represented by the processing and the nature of the data to be protected.

PART VIII

Domain Name and Management

Appointment of the Registrar of domain names

75.—(1) The Authority shall appoint a Registrar who shall administer and manage the ".mw" domain name space and any other Malaŵian names to be used for domain names (in this Act, otherwise referred to as the "Registrar").

(2) A person holding the office of the Registrar shall hold the office for such duration as the Authority, in its discretion, may determine.

Functions and powers of the Registrar

76.—(1) Without prejudice to generality of section 75, a person holding the office of the Registrar shall perform the following functions—

(*a*) ensuring compliance by users with international best practices in the administration of the ".mw" domain name space and any other Malaŵian names to be used for domain names; and

(*b*) publishing guidelines on—

(i) the general administration and management of the ".mw" domain name space and any other Malaŵian names to be used for the domain names;

(ii) the requirements and procedures for domain name registration; and

(iii) the maintenance of, and public access to, a registry.

(2) The Registrar shall enhance public awareness on the economic and commercial benefits of domain name registration.

(3) The Registrar, in relation to domain name regulation—

(*a*) may conduct such investigations as he may consider necessary;

(*b*) shall conduct research into, and keep abreast of, developments in Malaŵi and elsewhere on the domain name system and identifiers;

(*c*) shall continually survey and evaluate the extent to which the ".mw" domain name space and any other Malaŵian names to be used for domain names meet the needs of the citizens of Malaŵi; and

(*d*) may issue information on the registration of domain names in Malaŵi.

(4) The Registrar may—

(*a*) liaise, consult and cooperate with any person or other authorities in various fields which he deems fit for the purpose of implementing this Act; and

(*b*) appoint experts and other consultants on such conditions as the Authority may determine.

Recommendations relating to domain names

77.—(1) The Authority may make recommendations to the Minister in relation to policy on any matter relating to the ".mw" domain name space and any other Malaŵian names to be used for domain names.

(2) The Authority shall continually evaluate the effectiveness of this Act and the management of the ".mw" domain name space and any other Malaŵian names to be used for domain names.

(3) The Authority shall, in relation to the ".mw" domain name space and any other Malaŵian names to be used for domain names existing prior to the coming into force of this Act, uphold the vested rights and interests of any party involved in the management and administration of the ".mw" domain name space and any other Malaŵian names to be used for domain names at the date of its establishment:

Provided that—

(*a*) such party shall be granted a period of six months during which they may continue to operate in respect of their existing delegated sub-domains; and

(*b*) the Authority may, among other persons, consider the existing registrars for appointment to the post of registrar after the expiry of the six months.

Offence of administering domain name without authority

78. A person who administers, manages or operates second level domain name without authority commits an offence and shall, upon conviction, be liable to a fine of K5,000,000 and to imprisonment for seven years.

Dispute resolution concerning domain names Cap. 6:03

79. Any unresolved dispute under this Part shall be submitted to arbitration in accordance with the Arbitration Act.

PART IX

Electronic-Government Transactions

Requirement of electronic filing and issuing of documents

80.—(1) A public body shall take steps including entering into an arrangement to ensure that its functions are carried out, delivered or accessed electronically or online in full compliance with internationally recognized best practices.

(2) The Department of E-government shall assist and supervise public bodies in the establishment and delivery of e-government services.

(3) Where a law provides that a public body may—

(*a*) accept the filing of a document or requires that a document be created or retained;

(*b*) issue a permit, licence or an approval; or

(*c*) provide for the making of a payment, the public body may—

(i) accept the document to be filed, created or retained in the form of an electronic message;

(ii) issue the permit, licence or approval in an electronic form; or

(iii) make or receive payment by electronic means.

(4) A public body shall treat as official records, electronic records generated or received by a public body in the course of official duties.

(5) A public body shall maintain electronic records in a reliable record keeping system as defined in regulations made under this Act.

Specific guidelines to public bodies

81. The Department of E-government shall, for the purposes of section 80, from time to time, publish guidelines specifying—

(*a*) the manner and format in which the electronic message shall be filed, created or retained;

(*b*) the manner and format in which the permit, licence or approval shall be issued;

(*c*) where the electronic message has to be signed, the type of digital signature required;

(*d*) the manner and format in which the digital signature shall be attached to or incorporated into the electronic message;

(*e*) the appropriate control process and the procedure to ensure adequate integrity, security and confidentiality of an electronic message or a payment; and

(*f*) any other requirements in respect of the electronic message or payment.

Implementation of e-government

82.—The application of the provisions of this Part shall be subject to the adoption of necessary regulations made by the Minister, which shall establish—

(*a*) the legal framework to ensure security, storage, confidentiality and integrity of acts and exchanges done by electronic means; and

(*b*) the legal framework to ensure confidentiality of personal data and guaranteeing inviolability of private life.

PART X

Offences

Search warrant

83.—(1) A court may, on application by a cyber inspector, issue a search warrant.

(2) For the purposes of this section, a court may issue a warrant where—

(*a*) an offence has been committed in Malaŵi; or

(*b*) the subject of an investigation is—

(i) a Malaŵian or a person ordinarily resident in Malaŵi;

(ii) present in Malaŵi at the time when the warrant is applied for; or

(iii) information relevant to an investigation is accessible from within the area of jurisdiction of the court.

(3) A warrant to enter, search and seize may be issued at any time and shall—

(*a*) identify the premises or information system that may be entered and searched; and

(*b*) specify which acts may be performed by a cyber inspector in accordance with this Part.

(4) A warrant to enter and search shall be valid—

(*a*) subject to paragraph (*d*), until the warrant has been executed;

(*b*) until the warrant is cancelled by the court which issued it;

(*c*) until the purpose for issuing the warrant has lapsed; or

(*d*) until one month has passed from the date on which the warrant was issued.

(5) A warrant to enter and search premises may be executed only during the day, unless the court that issued it authorizes that it may be executed at any other time.

(6) Prohibition of disclosure of information to unauthorized persons shall be governed by the following provisions—

(*a*) except for the purposes of this Act or for the prosecution of an offence or pursuant to an order of a court, a person who has, pursuant to any powers conferred under this Part, obtained access to any information shall not disclose such information to any other person; and

(*b*) any person who contravenes paragraph (*a*), commits an offence and shall, upon conviction, be liable to a fine of K2,000,000 and to imprisonment for five years.

Unauthorized access, interception or interference with data

84.—(1) A person shall not gain unauthorized access to, or intercept, or interfere with data.

L.R.O. 1/2018

(2) The Minister shall, by regulations, come up with specific cases where unauthorized access to, or interception of, or interference with, data may be permitted in specific conditions set out in the regulations.

(3) Any person who intentionally accesses or intercepts any data without authority or permission to do so, or who exceeds the authorized access, commits an offence and shall, upon conviction, be liable to a fine of K2,000,000 and to imprisonment for five years.

(4) Any person who intentionally and without authority to do so, interferes with data in a way which causes such data to be modified, destroyed or otherwise rendered ineffective, commits an offence and shall, upon conviction, be liable to a fine of K2,000,000 and to imprisonment for five years.

(5) Any person who unlawfully produces, sells, offers to sell, procures for use, designs, adapts for use, distributes or possesses any device, including a computer program, a component or a phone, which is designed primarily to overcome security measures for the protection of data, or performs any of these acts with regard to a password, access code or any other similar kind of data with the intent to unlawfully utilizing such item, commits an offence and shall, upon conviction, be liable to a fine of K2,000,000 and to imprisonment for five years.

(6) Any person who utilizes any device or computer program referred to in subsection (5) in order to unlawfully overcome security measures designed to protect such data or access thereto, commits an offence and shall, upon conviction, be liable to a fine of K2,000,000 and to imprisonment for five years.

(7) Any person who commits any act described in this section with the intent to interfere with access to an information system so as to constitute a denial, including a partial denial, of service to legitimate users commits an offence and shall be liable, upon conviction, to a fine of K2,000,000 and to imprisonment for five years.

(8) Any person who—

(*a*) communicates, discloses or transmits any data, information, program, access code or command to any person not entitled or authorized to access the data, information, program, code or command;

(*b*) knowingly introduces or spreads a software code that damages a computer, computer system or network;

(*c*) accesses or destroys any files, information, computer system or device without authorisation; or for the purposes of

concealing information necessary for an investigation into the commission, or otherwise, of an offence; or

(*d*) damages, deletes, alters, suppresses any communication or data without authorization,

commits an offence and shall, upon conviction, be liable to a fine of K2,000,000, and to imprisonment for five years.

(9) Any person who knowingly receives data which he is not authorized to receive commits an offence and shall, upon conviction, be liable to a fine of K2,000,000 and to imprisonment for five years.

(10) Where an offence under this section is committed in relation to data that is concerned with national security or the provision of an essential service, the person shall, upon conviction, be liable to imprisonment for a term of not less than ten years, but not exceeding fifteen years.

Child pornography

85.—(1) Child pornography in an electronic form is prohibited under this Act.

(2) Any person who—

(*a*) produces pornographic material for the purpose of its distribution through a computer system;

(*b*) reproduces pornographic material for the purpose of its distribution through an information system;

(*c*) offers or makes available any pornographic material through an information system;

(*d*) exposes a child to pornographic material through an information system;

(*e*) distributes or transmits any pornographic material through an information system;

(*f*) procures any pornographic material through a computer system for oneself or for another person; or

(*g*) possesses any child pornographic material in a computer system or on a computer data storage medium,

commits an offence and shall, upon conviction, be liable to a fine of K10,000,000 and to imprisonment for fifteen years.

(3) For the sake of protecting children from pornography as provided in subsection (1)—

(*a*) establishments serving the public, and places open to the public proposing access to internet shall use an adequate

pornography filtering software as defined by subsidiary legislation made under this Act;

(*b*) failure to comply with the obligation provided in this subsection shall be an offence punishable, upon conviction, with a fine of K10,000,000 and to imprisonment for fifteen years.

Prohibition of cyber harassment

86. Any person who uses any computer system and continues—

(*a*) making any request, suggestion or proposal which is obscene, lewd, lascivious or indecent; or

(*b*) threatening to inflict injury or physical harm to the person or property of any person; or

(*c*) knowingly permits any electronic communications device to be used for any of the above-mentioned purposes,

commits an offence known as cyber harassment and shall, upon conviction, be liable to a fine of K2,000,000 and to imprisonment for five years.

Prohibition of offensive communication

87. Any person who wilfully and repeatedly uses electronic communication to disturb or attempts to disturb the peace, quietness or right of privacy of any person with no purpose of legitimate communication whether or not a conversation ensues, commits a misdemeanour and shall, upon conviction, be liable to a fine of K1,000,000 and to imprisonment for twelve months.

Prohibition of cyber stalking

88. Any person who wilfully, maliciously, and repeatedly uses electronic communication to harass another person and makes a threat with the intent to instil reasonable fear in that person for his safety or to a member of that person's immediate family, commits an offence known as cyber stalking and shall, upon conviction, be liable to a fine of K1,000,000 and to imprisonment for twelve months.

Prohibition of hacking, cracking and introduction of viruses

89. Any person who hacks into any computer system, or knowingly introduces or spreads a virus into a computer system or network, commits an offence and shall, upon conviction, be liable to a fine of K5,000,000 and to imprisonment for seven years.

Unlawfully disabling a computer system

90. Any person who wilfully or maliciously renders a computer system incapable of providing normal services to its legitimate users, commits an offence and shall, upon conviction, be liable to a fine of K5,000,000 and to imprisonment for seven years.

Prohibition of spamming

91. Any person who transmits any unsolicited electronic information to another person for the purposes of illegal trade or

commerce, or other illegal activity, commits an offence and shall, upon conviction, be liable to a fine of K2,000,000 and to imprisonment for five years.

Prohibition of illegal trade and commerce

92. Any person who uses the internet as a medium for any illegal activity or trade, fraudulent transaction or as a means of procuring any internet related fraud, commits an offence and shall, upon conviction, be liable to imprisonment for ten years.

Attempting, aiding and abetting crime

93.—(1) A person who attempts to commit an offence under any provision of this Act, commits an offence and shall, upon conviction, be liable to a penalty not exceeding one half of the maximum penalty imposable by the provision creating the complete offence.

(2) A person who aids or abets any other person to commit any of the offences under this Act, commits an offence and shall, upon conviction, be liable to a penalty imposable by the provision creating the offence for actually committing the offence.

(3) The provisions of this section making reference to penalties imposed upon conviction shall apply *mutatis mutandis* to administrative monetary penalties imposable by the Authority under this Act and any regulations made under the Act.

Offences committed by legal persons

94. Where a legal person is convicted of an offence under this Act, every person who—

(*a*) is a director of, or is otherwise concerned with the management of, the legal person; and

(*b*) knowingly authorized or permitted the act or omission constituting the offence,

commits the same offence which the legal person is guilty of, and may be proceeded against and be sentenced accordingly.

General offence and penalty

95. A person who violates any provision of this Act, whose penalty has not been provided, commits an offence and shall, upon conviction, be liable to a fine of K5,000,000 and to imprisonment for seven years.

PART XI

General Provisions

Lodging of complaints to the Authority

96.—(1) Any person affected by a criminal offence defined under this Act may lodge a complaint to the Authority which shall direct a cyber inspector to assess the relevance of the complaint and, if the complaint is considered relevant and reasonable, proceed with investigations.

(2) Any interested organization whose members are affected by a criminal offence defined under this Act is entitled to lodge a complaint with the Authority.

(3) The Authority shall ensure that the complaining organization is kept informed of the investigations.

Public education programmes

97. The Authority shall implement public educational programs on the safe use of internet focusing in particular on—

(*a*) scope of cybercrimes;

(*b*) tips on safe cyber experience;

(*c*) promotion of educational uses of internet; and

(*d*) remedies and procedures when affected by cybercrime.

Intermediary service providers' levy

98. For the purposes of implementing the public educational programmes referred to in section 97, the Authority may impose intermediary service providers' levy on intermediary service providers who offer access to communications networks.

Codes of Conduct

99.—(1) In order to promote the development and the use of information technologies and electronic communications in Malaŵi and contribute to effective application of this Act, professional associations and organizations shall be encouraged to develop codes of conduct.

(2) A code of conduct shall in particular facilitate—

(*a*) the implementation of self-regulation practices with the assistance of representatives of consumers;

(*b*) access by consumers to information and advice regarding e-commerce;

(*c*) the setting up of alternative dispute resolution mechanisms between professionals and consumers at no fee to consumers; and

(*d*) communication, cooperation, elaboration and effective implementation of joint initiatives between companies, representative consumer associations and the Government to fight against fraudulent, misleading and unfair practices.

(3) A code of conduct shall be notified to the Authority and enter into force upon publication in the *Gazette.*

Act to prevail in case of inconsistency

100. Where any inconsistency arises between a provision of this Act and a provision of any other written law relating to the regulation of electronic transactions, the provisions of this Act shall prevail to the extent of the inconsistency.

101. The Authority may in its discretion impose administrative penalties to persons who violate a provision of this Act or the regulations made under it by imposing a fine not exceeding K5,000,000. Administrative penalties

102.—(1) The Minister may, in consultation with the Authority, by notice published in the *Gazette*, make regulations for carrying out the purpose and provisions of this Act into effect and prescribing all matters which are necessary or convenient to be prescribed for the better carrying out of the provisions of this Act and, without derogation from the generality of the foregoing, such regulations may provide for— Regulations

(*a*) the requirements and standards which registries and the registrar shall meet in order to operate with operational accuracy, stability, robustness and efficiency;

(*b*) the circumstances and manner in which registrations may be assigned, registered, renewed, refused, or revoked by the registries;

(*c*) the pricing policy;

(*d*) the provisions for the restoration of a domain name registration and penalties for late payments;

(*e*) the terms of the domain name registration agreement which registries and the registrar shall adopt and use in registering domain names, including issues in respect of privacy, consumer protection and alternative dispute resolution;

(*f*) the processes and procedures to avoid unfair and anticompetitive practices, including bias to, or preferential treatment of actual or prospective registrants, registries or the registrar, protocols or products;

(*g*) the requirements to ensure that each domain name contains an administrative and technical contact;

(*h*) the creation of new sub-domains;

(*i*) the procedures for ensuring the monitoring of compliance with this Act, including compliance with regular ".mw" domain name and any other Malaŵian names to be used for domain names space technical audits;

(*j*) any other matter relating to the ".mw" domain name space and any other Malaŵian names to be used for domain names as may be necessary to achieve the objectives of this Act;

(*k*) declaring certain classes of information to be critical data;

(*l*) establishing procedures for identification of database with critical data;

(*m*) the registration of database with critical data;

(*n*) prescribing minimum standards regarding management, access to transfer and control of databases with critical data;

(*o*) the inspection of databases by the Authority; and

(*p*) any other matter relating to management, protection, recovery and control of databases with critical data.

Cap. 1:01

(2) Notwithstanding section 21 (*e*) of the General Interpretation Act, the regulations, made under this Act may create offences in respect of any contravention to the regulations, and may for any such contravention impose a fine of up to K5,000,000 and to imprisonment for up to seven years.

Exemption orders

103. The Minister may, in consultation with the Authority, by notice published in the *Gazette,* make an order to exempt certain transactions from the application of the requirements of some provisions of this Act.

Transitional provision

104. The Minister shall, by order published in the *Gazette*, appoint a date or dates beyond which stakeholders affected by this Act, shall be required to comply with this Act.
